

 Date	Time	End Time	Title	Synopsis
20240901	08:00:00	08:25:00	TRAVEL THRU HISTORY - LAS VEGAS	In this episode we explore Las Vegas' lesser known past. We visit the National Atomic Testing museum to learn about how the desert outside of Vegas was used for testing America's secret nuclear weapons. We also visit the Mormon Fort, the first permanent non-native settlement in the area, as well as the Neon Museum.
20240901	08:25:00	09:15:00	TROUBLE IN LEMUR LAND	High up in the mountains of north-eastern Madagascar lives one of the world's most critically endangered primates. There are less than a thousand Silky Sifakas alive today and this area of remote rainforest, known as Marojejy-Anjanaharibe-Sud, is their only home. In the past, the rugged terrain here kept the Silkies relatively safe but things are now changing at an alarming pace. This magical place is under serious threat from illegal logging operations as international demand for highly sought-after rosewood and ebony increases. Unscrupulous logging gangs are encroaching on the Silkies' last remaining habitat. 'Trouble in Lemur Land' follows two men, an American primatologist and a Malagasy conservationist, on their quest to protect this rare species, at the same time providing a rare glimpse into the life of this extraordinarily beautiful and graceful animal. The film centres around the arrival of two babies in the group – a glimmer of hope in an otherwise desperate situation. Lemur reproduction rates are slow and Silkies only mate one day in the year, so it is a very special moment when primatologist Erik Patel sees the newborns for the first
20240901	09:15:00	09:45:00	RACE OF LIFE - EP. 01	We live in a world full of the most magnificent of animals. There are approximately eight point seven (8.7) million different species on earth. With this vast array of natural wonders how do we choose a favorite amongst all these spectacular creatures? The ethereal grace of the oceans whales, the might of the imposing hippo, the unequalled speed of the cheetah, the mesmerizing lure of the snake, the power of the elephant, the strength of the ant, the stealth of the scorpion, the extraordinary talents of the octopus, the force of the crocodile, the sheer grace of the wedge tailed eagle, or the regular commanding presence of the lion...
20240901	09:45:00	10:10:00	THE TECH EFFECT - EP. 01	The Tech Effect is a portal to the future, a look at the forces and inventions that could shape us in the coming century. From e-sports to robotics, home automation to autonomous cars, this series examines the potential for cutting edge technology to improve our lives, while not ignoring the risks. The Tech Effect will appeal to anyone curious about exploring the technological advances that are changing our world. Sophisticated and edgy, each theme-based episode profiles the innovations transforming contemporary life. By identifying the world's most ingenious discoveries, we can unlock tomorrow, today. This episode investigates the jobs of the future, and why it might not be long before your co-worker is a robot. As industry changes, companies are identifying ways to re-train their workforce so they can be deployed in new roles. With space research becoming an important tool for innovation, we hear from a worker on the International Space Station about the types of experiments he conducts. Finally, we visit the factories of the future, discovering that, as a car has more lines of code than an F35 fighter jet, one of the most important jobs of the future in the automotive industry is software developer.
20240901	10:10:00	11:05:00	DIAMOND RIVER HUNTERS - THE SETUP	Peter gathers his team of miners and investors together for a pre-expedition briefing in Durban, South Africa. After a two day journey they reach the mountain kingdom of Lesotho. They arrive at the valley where they will be based, but only after a long and treacherous drive, towing the machinery down dangerous dirt roads. Finding a route to the river so they can setup equipment and mine is not easy. There are problems with the pumps and classifiers, and taking them off the trailers is a quick fix, but this compromises the mobility and safety of the operation. The equipment supplier has not taken the altitude into consideration, and the machinery will not work at full capacity. The team is concerned by Warren's recklessness as he almost rolls the TLB, while prepping the road to a new mining site. There is a snowfall, but work continues. Don is concerned that the river will flood with the snowmelt, and after they wrap for the day, the water levels rise and the machines are under threat. After a mad, dangerous scramble in the dark the equipment is saved, but it has been a close call. All the equipment was almost lost before they even had a chance to

20240901	11:05:00	11:30:00	OUT OF TOWN ADVENTURES - S1 EP 01: GRAND CANYON	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240901	11:30:00	11:55:00	OUT OF TOWN ADVENTURES - S1 EP 02: GRAND CANYON	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240901	11:55:00	12:20:00	TRAVEL QUEST - BRAZIL	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've led groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240901	12:20:00	12:50:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the touching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240901	12:50:00	13:20:00	WONDER - COLOR	Seg 1 Chromatic Adaptation. Chromatic adaptation is the ability of humans to adjust to changes in brightness to keep up with the appearance of colors. this is the reason why we are able to perceive colors properly even though lighting in real environments change constantly. Seg 2 Color-changing animals. Color changing in animals are developed adaptations which the animals use for various applications such as signaling their species or as a way to hide from predators. Animals that can change color have specialized cells called chromatophores that can alter pigmentation and light reflecting properties. Seg 3 How do we see the color pink. We are able to see pink because our brains are able to perceive variations in light and color. Although pink as a wavelength does not exist in the light spectrum, it is our brains that process light in a such a way that we are able to perceive combinations of colors thus giving us a way to see colors like pink. Seg 4 Blue wings, blue feathers. Blue rarely exists in nature. But due to evolution, structural features in the wings and feathers of some animals allow light to bend in ways that make it possible to reflect the color
20240901	13:20:00	14:15:00	WATER: H2O STORIES - SUSTAINABLE WATER MANAGEMENT	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.

20240901	14:15:00	14:45:00	QUIRKY SCIENCE - EP. 1	Mankind has been flying for over a century. As early as the 1500s Leonardo da Vinci tried to build a flying machine. Drawing inspiration from birds he gave it wings. Unfortunately, his 'Ornithopter' didn't work, and indeed, the airplanes of today do not have flapping wings! We also tried it with balloons. Huge 245-metre long airships that needed the guts of between 80,000 to 200,000 cows! But, it was the kite that became the forerunner of the flying machine. A kite made by the now famous Wright brothers. The two brothers were bicycle repairmen, which convinced them that a flying machine could be highly unstable and yet controllable, such as with bicycles. They built their kites as strong as their bicycle frames and used bicycle parts to test their workings. The early Wright planes could manage no more than 65 km/h. Nowadays, a commercial plane can top 800 km/h. What is it that make our current planes fly 12 times faster? Well, one British Royal Air pilot, Frank Whittle, remembered his school experiments with the 'Aeolipile', a piece of ancient Greek engineering. This pilot argued that we could fly faster – if we'd fly higher - because there is less air
20240901	14:45:00	15:10:00	QUIRKY SCIENCE - EP. 2	Cooling is more than a luxury. Nowadays it is a necessity. Without refrigerated shipping and stocking, fresh food wouldn't reach our supermarket so easily. Can you imagine living without it? Before the invention of the refrigerator, icehouses were used to provide cool storage for most of the year. To cool our food and beverages, blocks of ice were simply cut out of frozen lakes and shipped to far and beyond. The so-called 'ice-industry' came to its end when, in the late 1900s, our waters became too polluted to serve as a cool preserving agent. Air-conditioning, on the other hand, was actually invented to control the humidity that was ruining the paper of printing offices, rather than the technology being used to cool you off. The quirky part is, you can't create cold; you can only 'move' temperature from one place to another. The first one to find a technology that cooled the inside of a box - the forefather of the refrigerator - was a medical doctor. In fact, he thought he was building a machine to cure malaria. And yet it took over a century after that, before people started using refrigerators, because refrigerators were thought to be dangerous. And they had a point! For a few decades, the refrigerator was something of a killer machine (literally) as they omitted toxic gases that
20240901	15:10:00	15:40:00	JOURNEYS IN INDIA - UDAIPUR AND JAIPUR: INDIA'S NATURAL BEAUTIES	Whether you refer to Udaipur as the City of Lakes or the City of Dawn, you are sure to agree that romance and beauty fill the air. While traveling by boat, we visit the many palaces and temples on the shore. We also tour the majestic City Palace and the Garden of the Maids of Honor. In Jaipur, we tour the Pink City, paying close attention to such architectural treasures as the Palace of Winds (Hawa Mahal) and the Amber Fort. We also visit the magnificent collections housed in the City Palace.
20240901	15:40:00	16:10:00	JOURNEYS IN INDIA - HYDERABAD: THE LAKE CITY	Join us as we discover the amazing history of this ancient city through its religion, royal lineage, architecture and art. In the markets, Bill shows you how to buy souvenirs like a pro. We visit the Golconda Fort where the ultimate in diamond souvenirs originated. And, of course, no visit to Hyderabad would be complete without taking a look at its high-tech and movie industries, which have revolutionized the city.
20240901	16:10:00	17:05:00	BRAZIL'S COASTLINES - THE AMAZON	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240901	17:05:00	17:35:00	JOURNEYS IN AFRICA - SERENGETI: THE GREAT MIGRATION	One of the Seven Natural Wonders of the World—all other great wilderness areas are compared to this vast savannah. Wildlife numbers are awesome, but nothing like the numbers of the great migration. Journeys places you in the midst of this natural phenomenon where predator and prey are on a march for survival.
20240901	17:35:00	18:05:00	JOURNEYS IN AFRICA - ZANZIBAR: THE ORIGINAL SPICE ISLAND	The name alone conjures up mysterious and exotic images. The architecture and backstory to this once powerful independent kingdom, is both amazing and horrifying. Outside the city, Zanzibar earns its "Spice Island" nickname due to the huge plantations that grow everything to make your cooking flavorful. Journeys final stop is to visit the highly endangered Red Colobus monkeys. Learn why these human-like primates eat dirt for survival.

20240901	18:05:00	18:30:00	CAPTURE WILD SCHOOL - EP. 01	Very quick intro to the history of the course and the make up of the influx of new students as well as a look at some of the lecturers and their characters. Darting practice and drug theory: Students practice with dart guns from certain distances and learn the theory of dangerous drugs. The next step is learning to dart from a helicopter. A moving target is towed by a vehicle, and students have 1 dart to prove their accuracy. Darting practice on donkeys: 3 teams are formed and they have 3 donkeys to dart and check all vital signs. Darting 2 young antelope: 2 students are chosen to dart a young Rhone antelope and young Sable needing medical attention.
20240901	18:30:00	19:20:00	BLACK MAMBA: KISS OF DEATH	It's 'Silly Season' in Mamba Valley and like zombies from their graves, the heat draws Black Mambas from the shadows. They're on the hunt for summer lodgings but as the deadliest snake on the planet, they're not popular neighbors. Many will fall foul to a gunshot or the sharp end of a shovel. But some will be lucky enough to be 'rescued' by a snake wrangling team with a passion for Mambas and a unique facility where these snakes can be housed and observed. One snake has a special mission –she's recently mated and ready to deliver a new generation of silver killers into Mamba Valley. She's the deadliest snake on the planet, but can she outwit her greatest enemy and unleash her fearsome spawn on the valley?
20240901	19:20:00	20:05:00	RV EXPLORERS S1 EP 01 - KAIKOURA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240901	20:05:00	20:45:00	STOLEN TREASURES EP. 1	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240901	20:45:00	21:25:00	STOLEN TREASURES EP. 2	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. 20240901	22:05:00	23:00:00	ANATOLIA LAND OF THE APRICOTS	Millions of golden yellow fruits dry out in the sun. They are called 'Gold of Mesopotamia', the juicy apricots of Anatolia. On the plantations at the shore of the Euphrates grow 95 % of all apricots processed worldwide. But the idyllic atmosphere is deceiving: behind this picturesque façade, seething conflicts erupt among the old patriarchs about more self-determination and, above all, the concerns over climate change and its effects on the harvest are hovering.
20240901	23:00:00	23:50:00	COSTA RICA: WILDLIFE UNDER THE RAINBOW	The tropical climate and varied topography of the Costa Rica have fostered exceptional biodiversity, with wildlife from both North and South America. From the peaks of volcanoes down to the Pacific and Caribbean shores, let's discover the life of 90 of the most remarkable mammals, beautiful birds, and astonishing reptiles...
20240901	23:50:00	00:45:00	DEEP BLUE DIVE	The ethos of freediving is simple. The challenge: to dive as deep as possible on just one breath. The drive: to explore the ocean in the purest way. The goal: to make it back to the surface in a coherent state. In 'Deep Blue Dive' we voyage into this deep and dangerous world with Trevor Hutton, a freediver from South Africa, and reveal the extraordinary physiological challenges which have to be overcome to succeed in this sport. Trevor is a self-taught freediver operating on the periphery of the sport; southern Africa is not a chosen freediving location for good reason. The coastline is hostile, the swell runs high and the deeper water is frequented by every dangerous species of shark imaginable, the Great White in particular. Trevor is six feet tall and he weighs 220 pounds. This is a heavy frame to supply with oxygen, but he's well equipped. His lung capacity is nine litres and his average heart rate is 43 beats per minute. As soon as he hits the water, a set of strange physiological phenomena take over. We see how nerve receptors in his face trigger a response in the heart – slowing it down by an incredible 50%. Simultaneously, blood
20240902	00:45:00	02:15:00	THE MYSTERY OF THE DISAPPEARING BEES	An investigation into a worldwide ecological disaster that could endanger the whole of humanity. The future of our food resources depends on one small insect - the western honey bee, or <i>Apis mellifera</i>. Indeed, it is the most important agricultural pollinator on our planet given that one third of our food supply depends directly on pollination from bees. This documentary tells the story of a worldwide ecological disaster that has been waiting to happen for several generations. It was filmed over an 18-month period in France, Germany, the U.S., Canada and Scotland and retraces the various leads carried out by research scientists in order to try and understand and to stop the declining numbers of domestic and wild bees. Scientists are not the only professionals to figure at the centre of this drama. Beekeepers are in the front line, and striking contrasts exist among beekeepers' experiences in different countries, in various economic situations. The documentary seeks to understand how the long-enjoyed harmonious relationship between man and bee has now undergone such a radical change. It seeks to find a solution that goes beyond science. A solution that cannot

20240902	02:15:00	03:10:00	A COUNTER HISTORY OF INTERNET	A look back at the emergence of Internet freedom defence movements that have sprung up in reaction to growing regulation of the Web by governments and multinationals. Internet was created by hippies while being funded by the military! This improbable culture shock gave birth to an area of freedom that was impossible to censor or control. Yet for years, that is precisely what a certain number of political leaders have sought to do, prompting hackers and defenders of freedom to enter the political arena.
20240902	03:10:00	04:05:00	ALEXANDER THE GREAT, THE MACEDONIAN	A close look at Alexander the Great - from Macedonia to India. Alexander the Great has always enjoyed a unique status in history. To the Greeks and Romans, he was a hero, to the Arabs, he was a prophet, to Westerners, he is a myth. Alexander the Great spread Greek civilisation single-handedly throughout the ancient world, as far as the borders of India, by relentlessly pursuing his sworn enemy Darius the Great, King of Persia. But what remains today of the "real" Alexander? Of his life and environment? Through the many depictions of the hero and the archaeological traces of his triumphant conquest, this film portrays the legendary figure, who has always been, and continues to be, a great source of inspiration, even for artists of today.
20240902	04:05:00	04:30:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20240902	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - TULOUS: CHINESE FORTRESSES	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240902	05:00:00	05:30:00	WILD ONES - EP. 08	The colossal elephant. The lush tropical forests of Asia hold within them some of nature's mightiest creatures. Each of these silent footsteps carries with it the immense weight of the world's largest land mammal. The intimidating birds with soaring grace and aerial prowess, birds dominate our skies. To remain the undisputed pioneers of the air most bird species are feather light and relatively small. The barrel-like Hippo Lumbering across land, the enormity of the barrel like hippo is without question. Other grass eaters are frail by comparison. The towering giraffe standing taller than any other living animal in their towering majesty is the proud and elegant giraffe. The gigantic whale the Mighty whale graces our oceans with a size and strength unrivalled on land. Three times longer than the tallest giraffe and weighing more than a dozen hippos' the beautiful humpback whale is most famed for its mystical and haunting song. Which is the biggest of them all?

20240902	05:30:00	06:00:00	WILD ONES - EP. 09	Camouflaged cats. Some animals will never be inconspicuous, others blend so perfectly with their surroundings that they can move through them without detection. For many of the cats of Africa, camouflage is key to survival. From the spots of the cheetah, the rosettes of the leopard and the stripes and dots of the serval, these cats have evolved to merge with their habitat. Hidden lizards. Feeding on these harvester ants, is a beautifully adapted predator, the regal horned lizard. Merging perfectly with their surroundings these small reptiles live in the rocky, gravelly, desert like habitats of Arizona where they make a living almost exclusively on ants. Cryptic snakes. In the leaf litter of Australia's woodlands and scrub hides one of its most cryptic and dangerous snakes – the death adder. The camouflaging patterns of snakes are mesmerizing – from the pearly multicolored sheen of the carpet python to the mottled bands of the death adder, snakes can be hidden right before our eyes. Shimmering cuttlefish . Many animals can hide and many can disguise themselves to some degree, but few can rival the camouflaging capabilities of the magnificent
20240902	06:00:00	06:35:00	CLOSE QUARTER BATTLE - EP. 01	"Special Operations" are special divisions of military, police or intelligence services that are highly qualified in specific areas of urban warfare and in a variety of special weapons and technology. Over the past forty years, all of the world's superpowers have built up these groups in order to better fight wars, to counter terrorism and to conduct high-stakes police actions. This episode examines the history of such organizations, from the Green Berets, WWII paratroopers and naval special warfare units through to the Seal Team 6, the British SAS, and private contractors, including Black Water and Brown and Root. Showing how these operators are trained, how they plan, and what weaponry and tactical gear they use, the introductory episode of CQB provides viewers with a fast-paced overview of the techniques, strategies and equipment that have been successfully used by Military Special Operations.
20240902	06:35:00	07:30:00	HIDDEN TRACES	"D-DAY" - June 6th 1944: Normandy landings Personal and daily items such as helmets, badges, bullets, weapons, cans have been uncovered by recent archeological digs. These traces left behind by soldiers and civilians on the battle ground and findings of underground passages and blockhouses kept secret provide new insights into 2WW History.
20240902	07:30:00	08:00:00	RACE OF LIFE - EP. 03	Sleek,dangerous, fast, and vicious. Revered for their beauty and vitality. No-one runs the Race of Life faster than the Cheetah, and yet it is on the endangered species list. The Leopard is perhaps the best equipped survivor for the long run, with its population spread far beyond Sub-Saharan Africa. This success is probably to do with the fact they are 'opportunistic hunters'. And what of the Lion? Known as the King of the Jungle, (even though they don't live there), lions hunt buffalos, giraffes, warthogs, wildebeests and zebras, and antelopes when the opportunity presents itself. Lions are high up on the food chain, the very centre of their food web, so have almost no predators. Another loner in the race of life, the snow leopard prefers to inhabit steep cliff areas, rocky outcrops and ravines. To survive, the snow leopard must be a clever and resourceful hunter. Next, we leave the Snow Leopard and the great Asian mountains behind, and travel to the Americas, where the Cougar roam. Also known as mountain lions or pumas, cougars are agile and sleek, known for their habit of appearing from seemingly nowhere, and pouncing on their prey. The Tiger -
20240902	08:00:00	08:25:00	TRAVEL THRU HISTORY - SPACE COAST	Travel Thru History is an Emmy-nominated, un-hosted lifestyle/travel series designed to spark interest and enthusiasm in viewers about our world's rich and fascinating history by traveling to diverse locales across the globe. Locations include New Orleans, Las Vegas, Oslo, Belize, Dublin and more. In this episode we visit the Kennedy Space Center located on Florida's famous "Space Coast." We'll speak to NASA engineers about the past, present and future of American space travel, as well as take a look at the attractions KSC has to offer.

20240902	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 01	Very quick intro to the history of the course and the make up of the influx of new students as well as a look at some of the lecturers and their characters. Darting practice and drug theory: Students practice with dart guns from certain distances and learn the theory of dangerous drugs. The next step is learning to dart from a helicopter. A moving target is towed by a vehicle, and students have 1 dart to prove their accuracy. Darting practice on donkeys: 3 teams are formed and they have 3 donkeys to dart and check all vital signs. Darting 2 young antelope: 2 students are chosen to dart a young Rhone antelope and young Sable needing medical attention.
20240902	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - COCA COLA, SLINKY, FRISBEE	Wow, I Never Knew That! is a whimsical, half-hour television series that is jam-packed with exciting tidbits and fascinating facts that uncover the truths and origins behind the stuff you're already familiar with. From the items you use every day to the phrases you use in conversation to the habits you're so accustomed to, you'll be fascinated to learn how they've all really come about! Learn how a pharmacist and an accountant created the most famous drink in the world, COCA COLA! And, learn the "BEAR" truth behind how a U.S. president helped create everyone's favorite stuffed toy, THE TEDDY BEAR! Then, how did a piece of wire accidentally "SLINK" its way to become a fantastic fun toy for children? Plus, how a the WIFFLE BALL was invented.
20240902	09:15:00	09:45:00	RACE OF LIFE - EP. 09	Crocodiles , like all living reptiles, they are descended from animals that roamed the Earth about 250 million years ago. There's something so viscerally terrifying about these creatures that lay in wait for their prey, just under the waterline. The comparatively friendly seeming turtle is among the most ancient of the reptiles alive today and have a protective shell that encloses their body and provides protection and camouflage, just as it did millions of years back. They inhabit terrestrial, freshwater, and marine habitats and are found both in tropical and temperate regions. Poisonous or harmless, large or small, all snakes - from the desert rattlesnake to the dwarf pipe snake - have certain things in common: a long, thin shape; scaly, legless bodies; and unblinking, lidless eyes. Like all reptiles, snakes rely on the heat of the sun to control their body temperature. The venom of the king cobra, the world's largest poisonous snake, is strong enough to kill an elephant. Lizards have developed their own adaptations – some lose their tail when in danger, as a means of escaping from a predator. In time the tail will grow back again. The tail they leave behind will
20240902	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 01: FUERTEVENTURA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240902	10:15:00	11:05:00	DIAMOND RIVER HUNTERS - THE BREAKDOWN	After constructing dirt roads and river crossings, access to the new mining site is completed. Warren and Konrad are first to the reach the hotspot and setup in prime position, but the equipment is not running properly. There is a confrontation between Gary and Peter on the way to the site about Gary's reckless driving. The divers start to pump the river bank. The classifiers and jig are processing concentrate: bags are slowly being filled. However, there are constant breakdowns and stoppages as the team try to find a way to get the pumps primed and running at full power. They are desperately searching for solutions and have taken to repairing and modifying the equipment on site. This is starting to affect productivity and morale. A new plan is hatched to solve the pump problems: get larger and more powerful pumps. The divers are dispatched to fetch these from South Africa, but they are much to heavy for the trailers used to tow them. The trip back over the mountain passes is made even more dangerous because of the overloaded trailers. The new pumps are set up the next day, but they come with problems of their own. Jan, the

20240902	11:05:00	11:30:00	OUT OF TOWN ADVENTURES - S1 EP 02: GRAND CANYON	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240902	11:30:00	11:55:00	OUT OF TOWN ADVENTURES - S1 EP 03: SEYCHELLES	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240902	11:55:00	12:20:00	THE TECH EFFECT - EP. 01	The Tech Effect is a portal to the future, a look at the forces and inventions that could shape us in the coming century. From e-sports to robotics, home automation to autonomous cars, this series examines the potential for cutting edge technology to improve our lives, while not ignoring the risks. The Tech Effect will appeal to anyone curious about exploring the technological advances that are changing our world. Sophisticated and edgy, each theme-based episode profiles the innovations transforming contemporary life. By identifying the world's most ingenious discoveries, we can unlock tomorrow, today. This episode investigates the jobs of the future, and why it might not be long before your co-worker is a robot. As industry changes, companies are identifying ways to re-train their workforce so they can be deployed in new roles. With space research becoming an important tool for innovation, we hear from a worker on the International Space Station about the types of experiments he conducts. Finally, we visit the factories of the future, discovering that, as a car has more lines of code than an F35 fighter jet, one of the most important jobs of the future in the automotive industry is software developer.
20240902	12:20:00	12:45:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240902	12:45:00	13:35:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lightning. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240902	13:35:00	14:00:00	INSIDE OUTER SPACE - SOLAR SYSTEMS, SATELLITES, TELESCOPES, STARS, EARTH, ANIMALS IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.

20240902	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - TULOUS: CHINESE FORTRESSES	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240902	14:30:00	15:00:00	WONDER - COLOR	Seg 1 Chromatic Adaptation. Chromatic adaptation is the ability of humans to adjust to changes in brightness to keep up with the appearance of colors. this is the reason why we are able to perceive colors properly even though lighting in real environments change constantly. Seg 2 Color-changing animals. Color changing in animals are developed adaptations which the animals use for various applications such as signaling their species or as a way to hide from predators. Animals that can change color have specialized cells called chromatophores that can alter pigmentation and light reflecting properties. Seg 3 How do we see the color pink. We are able to see pink because our brains are able to perceive variations in light and color. Although pink as a wavelength does not exist in the light spectrum, it is our brains that processes light in a such a way that we are able to perceive combinations of colors thus giving us a way to see colors like pink. Seg 4 Blue wings, blue feathers. Blue rarely exists in nature. But due to evolution, structural features in the wings and feathers of some animals allow light to bend in ways that make it possible to reflect the color
20240902	15:00:00	15:30:00	JOURNEYS IN INDIA - HYDERABAD: THE LAKE CITY	Join us as we discover the amazing history of this ancient city through its religion, royal lineage, architecture and art. In the markets, Bill shows you how to buy souvenirs like a pro. We visit the Golconda Fort where the ultimate in diamond souvenirs originated. And, of course, no visit to Hyderabad would be complete without taking a look at its high-tech and movie industries, which have revolutionized the city.
20240902	15:30:00	16:00:00	JOURNEYS IN INDIA - RANTHAMBORE & KEOLADEO NATIONAL PARKS	Ranthambore National Park is part of Project Tiger, a unique wildlife conservation program set up to insure the preservation of the magnificent Tiger. In Ranthambore we encounter the tiger along with Sambar and Blue Bull, Wild Boar and Langur Monkey. We also explore the historic side of Ranthambore which is dotted with ruins of the fort that protected the region for hundreds of years. We end the episode with a tour of a very different national park. Board a rickshaw and join your guide as he explores Keoladeo National Park, known for its abundant bird life.
20240902	16:00:00	16:30:00	NATURE'S FORCE - EP. 01	Journey inside Dust Storms to see how they are formed and the hazards and effects they cause. A glimpse into the science of Clouds and how they fit into the weather cycle of the planet. The power of Lightening is more than visual, it is noise, electricity and it even helps plants to grow. Did you know that Rain droplets have different shapes and temperatures, it's maybe more interesting than you think?
20240902	16:30:00	17:00:00	BLUE WORLD	In the series pilot, host Jonathan Bird travels to the Bahamas, where, in the past few years, diver interactions with Tiger sharks have become up close and personal. These large and dangerous animals are not only being hand-fed, but actually handled by divers. Jonathan learns how to flip a Tiger shark from experienced shark handlers. Next, Jonathan joins world-renown cave explorer Brian Kakuk to investigate the Crystal Cave of Abaco, Bahamas...considered the most highly-ornamented underwater cave in the world! The formations in this cave are simply stunning, and incredibly unique.

20240902	17:00:00	17:30:00	JOURNEYS IN AFRICA - ZANZIBAR: THE ORIGINAL SPICE ISLAND	The name alone conjures up mysterious and exotic images. The architecture and backstory to this once powerful independent kingdom, is both amazing and horrifying. Outside the city, Zanzibar earns its "Spice Island" nickname due to the huge plantations that grow everything to make your cooking flavorful. Journeys final stop is to visit the highly endangered Red Colobus monkeys. Learn why these human-like primates eat dirt for survival.
20240902	17:30:00	18:00:00	JOURNEYS IN AFRICA - SAFARI 101: TIPS FOR A SUCCESSFUL ADVENTURE	All the essentials for going on, and having a successful safari are covered before our host gets a very special challenge—to find at least half of the "Big Twelve" on one safari drive. Four hours and six (6) very special animals—can he do it using his own rules for a successful safari?
20240902	18:00:00	19:00:00	CHINA UNCOVERED - A CITY TRANSFORMED	From the skyscrapers of Shanghai to the mountainous peaks of "The Last Shangri-La", explore the breathtaking landscape of this incredible country and connect with the people that infuse China's everyday life with flavor, passion and prosperity. Through the eyes of a cultural academic, a laborer, an architect, an urban planner, and a photographer, the grand evolution of a little fishing village is illustrated and documented to reveal one of the fastest growing megacities in the world. And while the physical landscape gracefully moves towards the future, beliefs, behaviors, and practices are put into test. The changes brought by the Thirty Year Miracle are indeed immense, and it has left no stone, no life, unturned.
20240902	19:00:00	19:30:00	RACE OF LIFE - EP. 01	We live in a world full of the most magnificent of animals. There are approximately eight point seven (8.7) million different species on earth. With this vast array of natural wonders how do we choose a favorite amongst all these spectacular creatures? The ethereal grace of the oceans whales, the might of the imposing hippo, the unequalled speed of the cheetah, the mesmerizing lure of the snake, the power of the elephant, the strength of the ant, the stealth of the scorpion, the extraordinary talents of the octopus, the force of the crocodile, the sheer grace of the wedge tailed eagle, or the regular commanding presence of the lion...
20240902	19:30:00	20:00:00	EUROPEAN ISLANDS EP - 01: FUERTEVENTURA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240902	20:00:00	20:40:00	STOLEN TREASURES EP. 3	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.

20240902	20:40:00	21:25:00	STOLEN TREASURES - EP. 4	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240902	21:25:00	22:05:00	THE BOY FROM THE WILD	Growing up on a Game Reserve meant to help wildlife get out of captivity, it shares how it began & how Peter Meyer survived some incredible moments in the wild.
20240902	22:05:00	23:00:00	DEPLETED URANIUM	More than 50 countries now possess weapons based on depleted uranium (DU). Experimentation has been rife, and the consequences for civilians and the military alike have been dramatic. This investigation compares and contrasts the arguments of those who defend and attack a technology that is highly toxic. For 20 years, scientists, doctors, veterans and activists have denounced the use of DU. Against them are the arms industry lobbyists and nuclear authorities who continue to minimise the risks. Through archive documents, interviews and in situ investigations, accompanied by key witnesses (victims, experts...) we aim to present a clearer picture of the issues and stakes linked to the use of DU. Quick-paced, with a sense of urgency, the film underlines the essential background and conflicting viewpoints, enabling viewers to make up their own minds about a subject that concerns us all.
20240902	23:00:00	23:30:00	DESPERATE HOURS - EP. 01	In this episode we contemplate, from a safe distance, the lethal majesty of volcanoes. One of the planet's most destructive as well as spectacular natural forces. It is estimated there are up to 4,000 volcanoes on the Earth, of which annually about 50 are active volcanoes above sea level, emitting – in their eruptions – millions of tons of dust, ash and gases and endangering the lives and property of millions of people. Our trip around the earth and earthquakes takes us to some interesting places. Such as the famously hard to pronounce, Eyjafjallajökull. This air traffic halting volcano is located in Iceland, which has long been known as the land of ice and fire! So far, a spectacular inconvenience, but for tomorrow who can say? Whether Iceland or that other volcanic hotspot Indonesia, Volcanoes are a potent reminder that at any moment old mother nature has the power to change everybody's plans. Most especially with a so-called supervolcano, like the one at Yellowstone Park. Under Yellowstone lies the largest magma chamber in the world. Studies indicate the likelihood of the supervolcano erupting is five to ten times higher than the likelihood of Earth being hit by an asteroid.
20240902	23:30:00	00:00:00	DESPERATE HOURS - EP. 02	Earthquakes have always been with us, but it is really only in the last 50 years or so, that their devastating impact has been captured so vividly - not only in photographs but in moving images, broadcast around the world at first via television, and in the last 20 years or so over the internet. Some of the images that have been captured on film or tape go beyond human capacity to describe. So the earth really moves in this episode, as we take in scenes and stories from some of the most devastating of all natural cataclysms. The earthquake, in all its destructive power! Of all the natural disasters we look at in this episode, none releases more sheer destructive energy than an earthquake. After all, it takes a great deal of the Earth's energy, for two of its magnetic plates to grind against each long enough, that they go snap - and jolt the planet's outer crust for hundreds of square miles! Most earthquakes take place within the so-called 'Ring of Fire' around the Pacific Ocean. At least once a year Alaska experiences a 7.0 earthquake. California alone gets about 10,000 quakes a year, but most go unnoticed except by seismographs.

20240903	00:00:00	00:55:00	DEPLETED URANIUM	More than 50 countries now possess weapons based on depleted uranium (DU). Experimentation has been rife, and the consequences for civilians and the military alike have been dramatic. This investigation compares and contrasts the arguments of those who defend and attack a technology that is highly toxic. For 20 years, scientists, doctors, veterans and activists have denounced the use of DU. Against them are the arms industry lobbyists and nuclear authorities who continue to minimise the risks. Through archive documents, interviews and in situ investigations, accompanied by key witnesses (victims, experts...) we aim to present a clearer picture of the issues and stakes linked to the use of DU. Quick-paced, with a sense of urgency, the film underlines the essential background and conflicting viewpoints, enabling viewers to make up their own minds about a subject that concerns us all.
20240903	00:55:00	01:50:00	ARE THE SKIES TOO CROWDED?	International commercial aviation produces as much CO2 as Africa. The European Union plans to double the numbers of aircrafts by 2020. Can the earth handle a growing number of carbon dioxide-emitting planes in the upper atmospheric strata forever? The reduction of greenhouse gases is one of the main challenges of the 21st century and the aviation industry knows it will have to develop a "sustainable" aviation. Decline or regression is not an option. So, commercial aviation is looking for the answer in a field that has always served it well: scientific and technological innovation all over the world. Luckily, some interesting solutions are actively researched by those who are inventing the eco-friendly aviation of the next 50 years. The film aims to meet the players in an incredible transformation that will ultimately change everything about air travel.
20240903	01:50:00	02:45:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240903	02:45:00	03:40:00	SECRETS OF THE THRACIAN KING	In August 2004 in Bulgaria, archaeologist Georgi Kitov made a spectacular discovery in the valley of the Thracian Kings, a valley where about twenty temples and royal tombs are located. Kitov accessed a still-intact ancient tomb, which housed incredible wealth, dating back to the 4th century B.C., when Thracian culture was at its height. In front of the gigantic mausoleum, archaeologists found a magnificent, life-sized bronze head, one of the period's finest specimens ever found, and possessing an unsettlingly modern style. Who was this king and what does his tomb tell us about Thracian culture? Was he buried according to the Thracian custom of Orphic rites, and what do we know today about these secret rites that promised eternal life? Research into the deceased's identity revealed the tomb belonged to King Seuthes III. With the help of archaeologists and historians, who decipher the king's vestiges, the film pieces together the puzzle of Seuthes III's life. He was a modern king, who was open to Hellenisation, a warrior king, who was opposed to Macedonian authority, and a priest king, who was committed to preserving Thracian cultural rites.
20240903	03:40:00	04:30:00	MAN EATERS	The first documentary about the Human-leopard conflict in Sri Lanka, "Man Eaters: A Human Leopard Story" approaches the conflict by analyzing past and present cases of man-eating leopards in Sri Lanka and what led to their strange behavior. Unlike India, man-eating leopards in Sri Lanka are very rare.

20240903	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - PERU: IQUITOS, LIVING IN A FLOATING CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240903	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - NETHERLANDS: THE FLOATING HOUSES OF IJBURG	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. 20240903	05:30:00	06:00:00	MINDWORKS - VISUAL PERCEPTION	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240903	06:00:00	06:35:00	CLOSE QUARTER BATTLE - EP. 02	As warfare has evolved, many military techniques and technologies have been adapted for use in urban settings by police units around the world. This episode provides viewers with an intimate perspective on what it feels like to be "inside the heads" of special police personnel, and how their use of military-style strategies and equipment allows them to save lives. From riot control in South Africa and the lessons learned from its excesses, to Los Angeles Police Chief Robert Gates' creation of an elite police S.W.A.T team, CQB will showcase how, over the past 30 years, the fight against urban crime has evolved into a military scenario, with both sides using increasingly complex weaponry and tactics.
20240903	06:35:00	07:30:00	HIDDEN TRACES	On the 11th of November, 1918, the First World War drew to an end with a terrible toll... after a conflict unlike anything Humanity had ever seen before. For 4 years and 3 months, soldiers from at least 20 countries were plunged in the hell of trenches... caught under a deluge of bombs.
20240903	07:30:00	08:00:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240903	08:00:00	08:25:00	TRAVEL THRU HISTORY - LAS VEGAS	In this episode we explore Las Vegas' lesser known past. We visit the National Atomic Testing museum to learn about how the desert outside of Vegas was used for testing America's secret nuclear weapons. We also visit the Mormon Fort, the first permanent non-native settlement in the area, as well as the Neon Museum.

20240903	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 02	A student darter is selected to dart from the helicopter and soon a suitable giraffe is located. The dart location is perfect and the giraffe begins to slow down as the rest of the team jump into action. The giraffe becomes more of a challenge as it wrestles with the rope and breaks free. The drugs eventually take full effect and the giraffe is subdued. The team carry out all the checkups, take samples and reverse the drug in good time to see it run off in good health. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240903	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ETCH A SKETCH, BINGO, BIKINI	Before computer drawing programs, there was a toy that if you mastered its two circular white knobs you could have a picture perfect SKETCH. We'll explain how the ETCH A SKETCH drew onto the scene. And what did Neil Armstrong REALLY say when he stepped on the moon, the "aahh" answer will surprise you! Plus, where did the explosive name BIKINI come from?
20240903	09:15:00	09:45:00	RACE OF LIFE - EP. 03	Sleek, dangerous, fast, and vicious. Revered for their beauty and vitality. No-one runs the Race of Life faster than the Cheetah, and yet it is on the endangered species list. The Leopard is perhaps the best equipped survivor for the long run, with its population spread far beyond Sub-Saharan Africa. This success is probably to do with the fact they are 'opportunistic hunters'. And what of the Lion? Known as the King of the Jungle, (even though they don't live there), lions hunt buffalos, giraffes, warthogs, wildebeests and zebras, and antelopes when the opportunity presents itself. Lions are high up on the food chain, the very centre of their food web, so have almost no predators. Another loner in the race of life, the snow leopard prefers to inhabit steep cliff areas, rocky outcrops and ravines. To survive, the snow leopard must be a clever and resourceful hunter. Next, we leave the Snow Leopard and the great Asian mountains behind, and travel to the Americas, where the Cougar roam. Also known as mountain lions or pumas, cougars are agile and sleek, known for their habit of appearing from seemingly nowhere, and pouncing on their prey. The Tiger -
20240903	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 02: MADEIRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240903	10:20:00	11:10:00	DIAMOND RIVER HUNTERS - THE PAYOFF	The Operation is in its sixth week and the team is struggling to get both sets of machinery running simultaneously. They are isolated in every possible way and can only rely on themselves to solve the technical problems. Kim returns from a cancer treatment and has brought along his niece Kirsten. Mitch, an investor in the venture, has also joined them. The classifiers are becoming clogged with vegetation that is being pumped from the riverbanks. A risky decision is taken, and the vegetation is burnt off with petrol to save time. This backfires when John, the local foreman is almost badly burnt when petrol under the sand is ignited, and the classifier is almost destroyed. The rainy season begins and problems escalate. The team must devise new strategies to safe guard the equipment and prevent it from being washed away by the now daily thunderstorms. The miners struggle on in spite of the elements. Soon after the 1st period of prolonged rain there is a flash flood and mining has to be halted. Don is concerned by the backlog of bags that still need to be sorted. The sorting table is returned to the lodge and the team take turns sorting the stones,
20240903	11:10:00	11:30:00	OUT OF TOWN ADVENTURES - S1 EP 03: SEYCHELLES	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240903	11:30:00	11:55:00	OUT OF TOWN ADVENTURES - S1 EP 04: SWITZERLAND	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240903	11:55:00	12:20:00	THE TECH EFFECT - EP. 02	In this episode, we look at the ways robotic engineers are mimicking the natural world. BionicWheelBot and the BionicFlyingFox have been developed to navigate difficult terrain, like their biological counterparts. Robots like the canine-inspired models produced by Boston Dynamic are already being used in hazardous environments to reduce the need for humans to be exposed to risk. We'll also see how robots are covering new ground in space exploration, with smart autonomous vehicles destined for Mars, given greater capability than ever before. Finally, we visit some of the environments, such as offshore rigs and factories, where robots are being deployed in a range of jobs, including as exoskeletons for human workers, to reduce injuries and enhance endurance.
20240903	12:20:00	12:45:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240903	12:45:00	13:35:00	SPEED KILLS I - EP. 02	Under the ocean, it's survival of the fittest... and fastest. Stonefish vacuum food in; Seals whiplash their victims to death and Mantis Shrimps unleash hammer blows with the acceleration of bullets. With over three billion years to get inventive, ocean creatures have exploded the design envelope wide open in their quest for speed!
20240903	13:35:00	14:00:00	INSIDE OUTER SPACE - MOON, SOLAR FLARES, MARS, QUASAR, HUBBLE, NEIL ARMSTRONG	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240903	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - PERU: IQUITOS, LIVING IN A FLOATING CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240903	14:30:00	15:00:00	WONDER - PROBLEMS	Seg 1 Monty Hall problem. The Monty Hall Problem poses a counter-instinctive dilemma of picking a choice with a higher probability of winning. It has been calculated that switching from a player's initial choice to the last option possible, after eliminating all empty choices, instead of sticking with the initial choice gives a bigger chance of winning. Seg 2 The Birthday Problem. The Birthday Problem presents a situation that addresses brains' unintuitive response to exponents. We try to figure out why it's possible for only 23 people to have a 50% chance of sharing a birthday when there are 365 unique birthdays. The dilemma usually comes in when we gloss over the fact that even small groups can form several pairings, and we actually compute the probability of sharing a birthday by subtracting the chances of not sharing a birthday by multiplying individual probabilities with each other. The answers can be quite surprising when the math to be done is not instinctive for people. Seg 3 Gambler's ruin. Gambler's Ruin closes in on how a gambler with the smaller amount will always be the loser in the long run in a game of 50-50 chance with an indefinite number of
20240903	15:00:00	15:30:00	JOURNEYS IN INDIA - RANTHAMBORE & KEOLADEO NATIONAL PARKS	Ranthambore National Park is part of Project Tiger, a unique wildlife conservation program set up to insure the preservation of the magnificent Tiger. In Ranthambore we encounter the tiger along with Sambar and Blue Bull, Wild Boar and Langur Monkey. We also explore the historic side of Ranthambore which is dotted with ruins of the fort that protected the region for hundreds of years. We end the episode with a tour of a very different national park. Board a rickshaw and join your guide as he explores Keoladeo National Park, known for its abundant bird life.
20240903	15:30:00	16:00:00	JOURNEYS IN INDIA - KERALA	Join us as we cruise the backwaters of Kerala, one of the most beautiful and serene areas of India. We explore the cities of Cochin and Kozhikode. Attend a local theatre performance and learn about traditional drama styles. The drama continues as we witness a local festival and then take in a display of the ancient art of Kalaripayattu. Bill helps raise the Chinese fishing nets at dusk and tour a 1000 year old boat yard, where luxury vessels are still handcrafted.
20240903	16:00:00	16:30:00	NATURE'S FORCE - EP. 02	Heatwaves have caused cities to literally meltdown and systems to fail, how are we working with nature's heat? When two Cyclones collide, we get the Fujiwhara Effect, how is this possible and how does it manifest? Floods occur around the world and the world is learning how to cope, combat and prevent damage and share lessons. How do you classify a Blizzard, and let's look at some of the worst blizzards that have occurred on earth. Do you really know how to measure Rainfall and how to identify violent rain from a shower or appreciate when we have had enough or too much?
20240903	16:30:00	17:00:00	BLUE WORLD	Jonathan travels to Iceland to investigate a giant crack in the ground filled with frigid runoff from melting glaciers. It's rumored to be the clearest water in the world. But to find out, Jonathan has to brave some very cold water. Next, he heads down to sunny Florida, not to dive a coral reef or a spectacular shipwreck, but to dive in shallow, murky water under a busy bridge. This secret spot is home to some of the ocean's most remarkable, and weird, animals.
20240903	17:00:00	17:30:00	JOURNEYS IN AFRICA - SAFARI 101: TIPS FOR A SUCCESSFUL ADVENTURE	All the essentials for going on, and having a successful safari are covered before our host gets a very special challenge—to find at least half of the “Big Twelve” on one safari drive. Four hours and six (6) very special animals—can he do it using his own rules for a successful safari?
20240903	17:30:00	18:00:00	JOURNEYS IN AFRICA - NGORONGORO: BATTLE FOR THE CRATER	Nicknamed the Garden of Eden, this volcanic caldera is home to over 25,000 big game animals. Here survival isn't just a game—it's a matter of life and death. You'll witness one of the great acts of nature—buffalo, lion and hyena in a face-to-face struggle for dominance. Life in the crater can take surprising twists.

20240903	18:00:00	19:00:00	CHINA UNCOVERED - THE NEED FOR SPEED	China runs on two gears as it moves millions of people around every day. A young driver of one of the world's fastest trains and two seasoned pilots of one of the world's biggest airlines are seeing the effects modernization and globalization have on their journeys. Meanwhile, in downtown Shanghai a recreational revolution is taking place as the youth choose bikes and skateboards over four wheels.
20240903	19:00:00	19:30:00	RACE OF LIFE - EP. 09	Crocodiles , like all living reptiles, they are descended from animals that roamed the Earth about 250 million years ago. There's something so viscerally terrifying about these creatures that lay in wait for their prey, just under the waterline. The comparatively friendly seeming turtle is among the most ancient of the reptiles alive today and have a protective shell that encloses their body and provides protection and camouflage, just as it did millions of years back. They inhabit terrestrial, freshwater, and marine habitats and are found both in tropical and temperate regions. Poisonous or harmless, large or small, all snakes - from the desert rattlesnake to the dwarf pipe snake - have certain things in common: a long, thin shape; scaly, legless bodies; and unblinking, lidless eyes. Like all reptiles, snakes rely on the heat of the sun to control their body temperature. The venom of the king cobra, the world's largest poisonous snake, is strong enough to kill an elephant. Lizards have developed their own adaptations – some lose their tail when in danger, as a means of escaping from a predator. In time the tail will grow back again. The tail they leave behind will
20240903	19:30:00	20:05:00	EUROPEAN ISLANDS EP - 02: MADEIRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240903	20:05:00	20:45:00	STOLEN TREASURES EP. 5	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240903	20:45:00	21:20:00	STOLEN TREASURES EP. 6	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. 20240903	21:20:00	22:05:00	COLONIES UNDER THE SEA	The film follows four unique divers as they explore shipwrecks in the heart of the Bahamas archipelago in order to discover the unexpected life they harbor.

20240903	22:05:00	23:00:00	GROSSLOCKNER KING OF THE HIGH ALPS	The report accompanies Austrian farmers in the highest mountain of the country - the Grossglockner - from July until Christmas, throughout the changing seasons. It is mid-June and summer is finding its way into the valleys of East Tyrol, even though the Hohe Tauern Mountains are still covered with snow. In the distance, the Grossglockner gleams bright white above the Tyrol mountain village of Kals. This summer, mountain climbers from all over the world will scale the Grossglockner. Toni Riepler, a mountain guide from Kals and his wife Gitti have a lot of work to do. They run the "Glorerhütte", one of the oldest mountain huts in the area. For 3 months, from mid-June to mid-September, the family lives high up in the Alps. In the winter, they stay down in the valley.
20240903	23:00:00	23:55:00	ON THE CITIES' ROOFTOPS - PARIS	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...
20240903	23:55:00	00:55:00	BHUTAN IN THE PURSUIT OF HAPPINESS	Nestled in the heart of the Himalayas, the small kingdom of Bhutan has decided to do away with the dictatorship of Gross Domestic Product and economic growth at all costs. A new wealth indicator has now become the country's gold standard: Gross National Happiness. Launched by the country's fourth King, the "new paradigm" is based on four pillars: protection of the environment; conservation and promotion of Bhutanese culture; good governance; and responsible and sustainable economic development.
20240904	00:55:00	01:50:00	THE MYSTERY OF DARK MATTER	Dark matter, which is unknown and undetectable in our physical models, would appear to populate the cosmos on a massive scale. For the first time, a film portrays the wild scientific quest that dark matter gives rise to. A real thriller. In our physical models, the weight of all observable matter (stars, galaxies, etc.) accounts for just 4% of the universe, whereas an invisible, unknown matter that no tool has ever been able to detect appears to populate the universe on a massive scale. Today, astrophysicists and cosmologists - researchers in the fields of the infinitely large and the infinitely small - are joining forces to solve a major mystery: what is this famous "dark matter" made up of? A breathtaking thriller that leads us to the dawn of a scientific and metaphysical revolution, akin to Copernic's or Galileo's. It could totally change the way we perceive our world. 2013 : Best film Award at the International Science Film Festival (Athens, Greece).
20240904	01:50:00	02:45:00	SURROUNDED BY WAVES	The international scientific community is called on to take sides and provide solid answers. "Surrounded by Waves" explores the methods and motivations behind the most prominent research in the field and clarifies what we currently know, all with a mind to the social context behind the issue. Through an elegant blend of interviews, archives, experiments and 3D animation, the film clearly assesses the estimated risk linked to cell phones while offering a subtle observation of society's growing distrust of its industries and the unprecedented role of science in the debate.
20240904	02:45:00	03:40:00	WORLD AFTER FUKUSHIMA	The derisory dosimeters, located at crossroads and hanging around children's necks, are a constant reminder of the invisible monster and of the deadly particles people attempt to retain by placing bottles of water on windowsills. 2 years on, in the region of Fukushima, people's lives - or at least their "existences" - carry on, as they integrate radioactive pollution into their daily lives. Beyond the earthquake and the tsunami, the nuclear catastrophe has revealed the shortcomings of a system and its criminal arrogance. And everyone remembers with dread the series of errors and procrastinations that sealed their fate, as politicians preferred to "downplay the situation instead of reducing risks".

20240904	03:40:00	04:30:00	BOTETI: THE RETURNING RIVER	For 20 years the Boteti River in northern Botswana has not flowed. What was once an expansive and prolific body of water gradually dried up, leaving zebras, hippos, elephants and crocodiles dependant on the few pools formed from the occasional rains. But now, for the first time in 30 years, rain has fallen in sufficient quantities hundreds of miles to the north in the Angolan highlands, sending a stream of water through the river bed. After years of extreme drought, the river has finally returned in all its glory, transforming the landscape. Filmed in stunning HD, 'Boteti – The Returning River' documents this extraordinary transformation and the dramatic changes it brings to the resident animals. During the years of drought, we see how desperate battles for survival play out along the dormant river, watched over by the elephants of the area. One of the few species that adapts well to the situation by carefully conserving what little water is available, the elephant is an expert at digging channels in the mud so water collects in sufficient quantities to drink. Vultures lurk ominously on the dusty banks adjacent to the pools, waiting patiently for dehydration to claim
20240904	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - PERU UROS THE FLOATING ISLANDS OF LAKE TITICACA	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. 20240904	05:30:00	06:00:00	MINDWORKS - VISUAL DECEPTIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240904	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 03	After the fall of the soviet union many countries remained in dispute in the early nineties despite eastern Europe's independence. In 1994 a bitter conflict broke out between the forces of the Chechnen independence movement and the Russian regular army. Despite overwhelming manpower, weaponry and air support, the Russian forces were unable to establish effective permanent control over the mountainous area due to many successful Chechen guerrilla raids. Improvised Explosive Devices were one of the most effective methods employed in these disastrous raids and were the back drop to many Close Quarter Battle scenarios exchanged between the two sides.
20240904	06:30:00	07:25:00	HIDDEN TRACES	This was the « other » Second World War – the one in the Pacific, confronting the Japanese Imperial Army to the Americans. Although not as famous as the war that raged in Europe, this conflict was just as ferocious and central to our collective memory.

20240904	07:25:00	08:00:00	EVERYDAY ELEMENTS - CHLORINE, TITANIUM, GALLIUM, POTASSIUM, NICKEL	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240904	08:00:00	08:25:00	TRAVEL THRU HISTORY - KEY WEST	It's island living in the Keys on this episode of TTH. We learn about the islands treasure hunting history at the Mel Fisher Museum. Then we'll explore Fort Jefferson, an isolated fort in the Gulf of Mexico that defended the islands. American literature enthusiasts will enjoy a look at Ernest Hemingway's Key West home, where some of his most famous works were penned.
20240904	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 03	One of the students is selected and soon locate a huge bull elephant from the helicopter. The dart successfully finds it mark and the bull takes 20 minutes to lie down. The rest of the team rush in to do the necessary data entries and reverse the drug within 20 minutes. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240904	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - POPSICLE, BARBER POLES, BRAIN FREEZE	On a hot summer's day, nothing cools you down like a frozen fruity POPSICLE! You'll learn how an 11-year old boy created this sweet icy treat! And, have you ever noticed those colored spinning poles outside the BARBERSHOP? You'll be in STITCHES when you learn how they got their start! Plus, find out how a melting chocolate bar gave way to the invention of the MICROWAVE!
20240904	09:15:00	09:45:00	RACE OF LIFE - EP. 04	Deserts are dry. Deserts are extreme. True deserts get less than 18 cm of rain per year. True deserts have very few plants. Semi-desert habitats have enough rainfall to support more plant and animal life. Either way, deserts are not easy places for animals to live. Desert animals have evolved to handle the desert's heat and lack of water. They have adapted their bodies and behaviors to the desert climate. Most can survive on small amounts of water and many get all of their water from their food. Some drink maybe once a week and travel considerable distances to find isolated waterholes and springs. Large animals seek shade during the hottest part of the day. Some animals dig a hollow depression into the ground and lie in the cooler soil while others are nocturnal. Many reptiles and other animals protect themselves from the extreme temperature by spending their time in burrows. The scorpion is one of the most ancient creatures on earth, in existence since life first crawled out of the sea. One look and you can see why they're born survivors. Not only are their bodies armoured against the desert heat – and other predators – but all scorpions have
20240904	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 03: TENERIFE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.

20240904	10:20:00	11:10:00	DIAMOND RIVER HUNTERS - JOURNEY BACK	Peter and his team return to Lesotho once more to pursue their dreams of finding big diamonds. The rainy season is supposed to be over but they have to make their way down the dangerous mountain roads during a violent hailstorm. They setup the mining operation again after a 3 month break, but the machinery is rusted and they battle to get the TLB running. To combat the technical problems they had last time, a new team member has been recruited: Alan, a pump specialist. They have also brought up a bigger CAT earthmover and a Hopper has been specially constructed to turn over more ground. They have invested heavily in new machinery to try and increase productivity, but still face daily technical problems. The investors all have concerns about Gary, who is looking extremely thin and haggard after the break. They begin to suspect he may have a drug problem. The new CAT is delivered to the mining site, but it breaks down on the first day. Mining resumes once Kim and Alan get the pumps up and running, and the CAT is repaired by Warren. The rivers rise after heavy rains and the team are unable to cross the first river. The CAT becomes stuck trying to get up the riverbank. They try to dig their way out, but it doesn't work and the CAT becomes
20240904	11:10:00	11:30:00	OUT OF TOWN ADVENTURES - S1 EP 04: SWITZERLAND	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240904	11:30:00	11:55:00	OUT OF TOWN ADVENTURES - S1 EP 05: PALM SPRINGS - JOSHUA TREE	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240904	11:55:00	12:20:00	THE TECH EFFECT - EP. 03	In this episode we examine advances in aviation that include flying cars being developed by Slovakian and Japanese companies. Ride share companies are also considering aerial options, with Uber among those working on autonomous urban aircraft that will fly over congested roads to landing points in the centre of cities. As the skies of the future will be teeming with flying vehicles, suitable air traffic management is essential. We look at new systems to connect autonomous aircraft with each other and an overarching traffic control. Finally, we explore a concept airliner of the future. Sustainable and flexible, it incorporates holograms and neural networks to provide a more engaging and relaxing flight.
20240904	12:20:00	12:45:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240904	12:45:00	13:35:00	SPEED KILLS I - EP. 03	The arrival of the great migration is a promise of gluttony... and speed is the ticket to the feast. Cheetahs and gazelle are caught in a 100 thousand-year-old arms race. Lions muscle their way into the action. And crocodiles unleash awesome bursts of prehistoric power. On the vast plains of the Serengeti, it's only the quick and the dead.

20240904	13:35:00	14:00:00	INSIDE OUTER SPACE - ASTEROIDS, COMETS, VENUS, METEORIDS, NEBULA, SPACE RACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240904	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - PERU UROS THE FLOATING ISLANDS OF LAKE TITICACA	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. 20240904	14:30:00	15:00:00	WONDER - NATURE'S GAMES	Seg 1 Carrion flowers. Carrion flowers are the unorthodox perception of flowers for they are rare, big, and very unpleasant. Other terms are stink flowers and corpse flowers. The biggest flower in the world, rafflesia arnoldii, is a carrion flower. These flowers are difficult to find and reproduce and could breed through cross-pollination by attracting flies and dung beetles. Seg 2 Aposematism. Aposematism is a form of signalling that enables protection for both preys and predators by giving signs of poison and danger through showing off the bright colors and patterns on their epidermal layers that become associated with inedibility. Some species have developed mimicry based on aposematism in order to avail the protection aposematic colors give. Seg 3 Cuckoo Misdirection. Cuckoo misdirection demonstrates the mimicking abilities of a female cuckoo in order to find host nests to hatch her eggs. The female mimics a cry of a predator bird in order to frighten the hosts, leaving them vulnerable, thus the cuckoo can seize the chance to drop her egg on a host nest. Seg 4 Pheromones. Animal pheromones are the chemicals secreted and released by different species to communicate with other organisms. There are various types serving different purposes, ranging from reproduction, to trailing, to alarms. Some pheromones are also specific to one species of
20240904	15:00:00	15:30:00	JOURNEYS IN INDIA - KERALA	Join us as we cruise the backwaters of Kerala, one of the most beautiful and serene areas of India. We explore the cities of Cochin and Kozhikode. Attend a local theatre performance and learn about traditional drama styles. The drama continues as we witness a local festival and then take in a display of the ancient art of Kalaripayattu. Bill helps raise the Chinese fishing nets at dusk and tour a 1000 year old boat yard, where luxury vessels are still handcrafted.
20240904	15:30:00	16:00:00	JOURNEYS IN INDIA - AMRITSAR, SHIMLA AND MANALI: THE FAR NORTH	The Golden Temple is the centerpiece of the city of Amritsar, and probably the second most photographed building in India, but few know about the building or the people who built it. The most significant building to people of the Sikh faith, it is open to people of all faiths. We witness the celebration of the changing of the guard before heading into the mountains for a visit to the British influenced town of Shimla. Journeys then heads further north for look at the resort area of Manali.
20240904	16:00:00	16:30:00	NATURE'S FORCE - EP. 03	A snapshot of Seasons, how they work together and keep the globe in balance. Droughts are explored in terms of how we can predict them, proof our lives from them and collect data because of them. Hurricanes are explained, their power revealed and the measures that are used to help us survive their impact. Thunderstorms have a few stages of development that roll out in a particular order.

20240904	16:30:00	17:00:00	BLUE WORLD	Jonathan joins an expedition to recruit a new Blue World camera operator in the form of a 1,000 pound Tiger shark! Working with experienced shark handlers, he puts a camera on the dorsal fin of the shark to see what it can film all by itself. But will Jonathan get his camera back? Next, he joins an experienced cave diver to explore a famous underwater cave in Northern Florida (USA).
20240904	17:00:00	17:30:00	JOURNEYS IN AFRICA - NGORONGORO: BATTLE FOR THE CRATER	Nicknamed the Garden of Eden, this volcanic caldera is home to over 25,000 big game animals. Here survival isn't just a game—it's a matter of life and death. You'll witness one of the great acts of nature—buffalo, lion and hyena in a face-to-face struggle for dominance. Life in the crater can take surprising twists.
20240904	17:30:00	18:00:00	JOURNEYS IN AFRICA - NAIROBI: THE ENCHANTED CITY	Nairobi is the capital of Kenya and one of the most fascinating cities in Africa. On our visit we'll see the colonial architecture of a bygone era and the ultra-modern side of town as well. We'll learn the truth behind the "Out of Africa" story and our host gets eye-to-eye with some endangered giraffes.
20240904	18:00:00	19:00:00	CHINA UNCOVERED - THE COST OF BEAUTY RISING	Fashion designer Ji Cheng has shown her designs at London fashion week and, like beauty stylist A Zhi, is beginning to challenge the monopoly of Western brands in China. New levels of expendable income mean the wallets of the wealthy elite are helping fund this rising beauty scene and creating a market for luxury goods for shrewd businesswoman Felicity Feng. Expats from everywhere are trying to gain a foothold in this blossoming city, but can they handle its lightning speed?
20240904	19:00:00	19:30:00	RACE OF LIFE - EP. 03	Sleek, dangerous, fast, and vicious. Revered for their beauty and vitality. No-one runs the Race of Life faster than the Cheetah, and yet it is on the endangered species list. The Leopard is perhaps the best equipped survivor for the long run, with its population spread far beyond Sub-Saharan Africa. This success is probably to do with the fact they are 'opportunistic hunters'. And what of the Lion? Known as the King of the Jungle, (even though they don't live there), lions hunt buffalos, giraffes, warthogs, wildebeests and zebras, and antelopes when the opportunity presents itself. Lions are high up on the food chain, the very centre of their food web, so have almost no predators. Another loner in the race of life, the snow leopard prefers to inhabit steep cliff areas, rocky outcrops and ravines. To survive, the snow leopard must be a clever and resourceful hunter. Next, we leave the Snow Leopard and the great Asian mountains behind, and travel to the Americas, where the Cougar roam. Also known as mountain lions or pumas, cougars are agile and sleek, known for their habit of appearing from seemingly nowhere, and pouncing on their prey. The Tiger -
20240904	19:30:00	20:05:00	EUROPEAN ISLANDS EP - 03: TENERIFE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240904	20:05:00	20:50:00	STOLEN TREASURES EP. 7	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.

20240904	20:50:00	21:30:00	STOLEN TREASURES EP. 8	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. 20240904	21:30:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - WEST BENGAL	Soumik arrives in the city of joy Kolkata in search of his musical roots and puts together his team. They head into the villages in search of travelling minstrels known as Bauls. Their journey leads them deeper into impoverished rural hinterlands where an old man sings under his broken down house. These musicians are driven by deep faith and extraordinary spiritual resilience. Their daughters sing and children learn deep lessons in simple words.
20240904	22:05:00	23:00:00	REMOTE CONTROL WAR	The current campaigns in Iraq and Afghanistan are the world's first Robotic War, with over 7,000 robots in the air and 12,000 on the ground. Warfare has been revolutionised in a monumental shift. Mankind's five thousand year monopoly on war is breaking down. Robotic war is here.
20240904	23:00:00	23:55:00	HIDDEN TRACES	"D-DAY" - June 6th 1944: Normandy landings Personal and daily items such as helmets, badges, bullets, weapons, cans have been uncovered by recent archeological digs. These traces left behind by soldiers and civilians on the battle ground and findings of underground passages and blockhouses kept secret provide new insights into 2WW History.
20240904	23:55:00	00:50:00	MIND IN MOTION	Our exploration will lead us into the depths of the brain and to the very sources of consciousness, for a fascinating glimpse into the process of thought. How can we decide whether a person in a coma is likely to return to consciousness? How can a person see with the tongue? Why do amputees experience phantom sensations in missing limbs? What do we have in common with the fruit fly? What are the effects of meditation on the brain? Scientific answers to these questions and others are now within our reach, thanks to stunning new research in the neurosciences. It focuses on the brain, our mental mechanisms, the connection between body and mind. Why we need to represent ourselves and others consciously in order to survive? In our quest for answers, we have met some remarkable scientists - high-ranking pioneers who are innovative yet modest. They share their discoveries and questions with us while stressing that it is vitally importance for our society to try and understand why we have conscious brains. The story of their search, across North America and Europe, will be vividly told through evocative visuals and original imagery from new brain exploration technology.

20240905	00:50:00	01:45:00	ROLL ON CINEMA	This film endeavours to show how the invention of cinema was in no way inevitable, and how it may well have been a mere accident. To pinpoint the start, it all began in the heart of Paris, in the depths of darkened room, on 28 March 1798, when Etienne-Gaspard Robertson gave one of his first screenings of his "Fantasmagoria" - making ghosts and spectres dance. But how did we move from perfecting the magic lantern to the cinematography of the Lumière brothers? The invention was born throughout the 19th century, out of the unpredictable crossing of two parallel research paths - that of philosophical toys and the photography of movement. Originally-named optical devices - such as the kinesiograph, the zoetrope, the praxinoscope and the phenakistoscope, without forgetting the photographic revolver or gun - associated the realm of toys with the realm of thought, reflecting both a fascination for the magical effects produced by animation and speed, and a desire to understand human anatomy, and analyse the phenomenon of vision. All these pre-cinema optical devices literally stemmed from a desire for spectacle and the will to acquire knowledge. Robertson, Reynaud, Plateau, Muybridge and Marey spearheaded the adventure. Thanks to these brilliant
20240905	01:45:00	02:40:00	VERSAILLES FURNITURE	Via six masterpieces, the film reveals the beauty of the spirit of Versailles of the 17th and 18th centuries. A unique homage to the people that crafted it, the furniture reveals the personal tastes of its commissioners, and portrays something that has ceased to exist! These unique items of furniture that once belonged to Louis 14th, Louis 15th, Marie-Antoinette and Louis 16th have fascinating stories to tell: the tortoise-shell chest-of-drawers with inlays of brass; an astronomical clock - a veritable miracle of science; the most emblematic example of French furniture art in the world - the King's Desk; and the exquisite items made for Marie-Antoinette - the queen's jewellery case and the wheat-sheaf furniture.
20240905	02:40:00	03:35:00	NEW YORK - THE WORLD'S SMALLEST OPERA HOUSE	"If you can make it there, you can make it anywhere". That's the vision people from all over the world have of New York. This report takes a look behind the scenes of the world's smallest opera house, in the heart of New York. Tony Amato, the son of an Italian butcher, thought when he came to New York in the 40s that he could make it too by realizing his dream of owning an opera house. The house is 3 stories high and three windows wide. The hall feels no bigger than a living room, however its 107 seats are always sold out. Tony Amato continues to be the center and linchpin of this miniature opera. Tony is barely 5 foot tall, with his sneakers and the small, wiry man seems to be held up by his pant-suspenders. His voice is persuasive, his eyes bright. He conducts, sings, jumps, laughs and grumbles all at once. At 88 years of age, Maestro Tony Amato is in the middle of the season's last production.
20240905	03:35:00	04:30:00	ARGAN OIL: THE WHITE GOLD OF MOROCCO	This report follows the process of making Argan oil, beginning with the harvest and ending with the cooperatives working for the international market. Made from the nuts of the Argan tree, which grows almost exclusively in the Essaouira region of Morocco, Argan oil has become one of the latest miracle ingredients of the beauty industry in Europe. Publicity is created around the fact that this oil is made by Berber women. But who are they? How do they live? And how hard is their work? We accompany these women in their daily lives and take part in their traditions.
20240905	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - TOKYO THE MEGALOPOLIS OF MICRO-HOUSES	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240905	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - THE KOROWAI, AT THE HEART OF THE FOREST	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. 20240905	05:30:00	06:00:00	MINDWORKS - ALTERED VIEWS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240905	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 04	The history of the British Empire colonial legacy in Northern Ireland is well known the world over but a there is a largely untold story of the the fi refi ghts between and close quarter battles exchanged between the provisional IRA, the British army and the elite SAS. Although the IRA often employed „terrorist“ techniques within the city of london and on England's mainland not much is said of the often guerilla warfare techniques of the British Special Air Service in Northern Ireland since the beginning of this conflict. In this episode we will examine how the history of the Special Air Service aff ected the training of every elite force after it and how the close quarter battles in Northern Ireland in the late 1970s through to the millennium shaped both special forces and resistance methods.
20240905	06:30:00	07:25:00	HIDDEN TRACES	Napoleon Bonaparte - Military genius and builder, he will then reign, without any intention to share his position, for over a decade and will engage, with his troupes, in many battles. His imperial army, which has reached 700 000 men, is considered in 1815, the greatest one in the world.
20240905	07:25:00	08:00:00	EVERYDAY ELEMENTS - SODIUM, OXYGEN, ARGON, ARSENIC, ZINC	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240905	08:00:00	08:25:00	TRAVEL THRU HISTORY - SAVANNAH	We visit the old south and enjoy some sweet tea in Savannah. On this episode, we'll stroll the city's beautiful squares, as well as visit it's civil war past at Old Fort Jackson. Then, we head up the stairs of the famous Tybee Island lighthouse and visit the Savannah Railroad museum.
20240905	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 04	One of the teams prepare for a black and white rhino capture. The white rhino calf has an infection and needs urgent attention. The lecturers brief the team and preparation is done.
20240905	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - KITTY LITTER, BULLET PROOF VEST, NEON LIGHTS	It was the PURRRFECT idea for making our furry friends more pleasant around the house! You'll learn how KITTY LITTER clawed its way into our homes. And you'll learn how a garment made out of special woven fibers can stop a bullet, plus, why is walking under a ladder bad luck? And finally, we'll CUT TO THE CHASE and explain the history behind this common phrase!

20240905	09:15:00	09:45:00	RACE OF LIFE - EP. 05	These are Nature's own Battletanks, and (with the exception of the Indian Elephant), all endemic to the African continent. The African Savannah is the stage for thousands of battles every day. How do elephants, these large, cumbersome creatures survive and even prosper on a diet that even the strictest vegetarian would pass on! Well for one thing, most other animals get out of their way. But lions and hyenas are not always so easily moved – they prey on young, sick and old elephants in particular. This seemingly gentle giant has been revealed to have a darker side in the last few years too. They may survive on just plant life, but that doesn't mean they don't like a fight – to the death. Elephants have been observed attacking and killing Rhinos in the last 20 years. It's a savage clash. Meanwhile, the Rhino, a tough looking customer if ever there was one, is an endangered species. When the great herds go on the search for food, predators go on the hunt for them. If ever there was an animal that seems destined to survive, it's the Rhino, which has been around for over 6 million years. But it too has an enemy: mankind – the deadliest foe of all.
20240905	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 04: LANZAROTE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240905	10:15:00	11:05:00	DIAMOND RIVER HUNTERS - BIG STONE FEVER	The team are pinning their hopes on the new hopper, as the more ground they can move, the more chance there is of finding big diamonds. The hopper is eventually completed and it is tested for the 1st time. But it's not long before it is clogged and has to be shut down while they find the blockage. Peter and Rob are concerned about leaving Warren behind unsupervised, but they have no choice. Kim goes through the backlog of bags and finds a small two carat diamond. With most of the investors away on business the mine is being run with a skeleton crew. Tensions rise as Alan's hasty approach to sorting the bags is not appreciated by Kim or Warren. There is a massive confrontation between Alan and Warren. Alan is frustrated by delays with the hopper. Friction between him and Warren is growing and frustrations boil over. They have another huge confrontation. Thabo the labour broker arrives on site to mediate a labour dispute, it seems the local team are not being paid. The hopper is moved and the platform rebuilt to get it working again. Warren overloads it and the operation is halted once again. He is frustrated and blames the investors for not researching the equipment properly. There is a big storm overnight and the river cannot be crossed. Warren
20240905	11:05:00	11:30:00	OUT OF TOWN ADVENTURES - S1 EP 05: PALM SPRINGS - JOSHUA TREE	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240905	11:30:00	11:55:00	OUT OF TOWN ADVENTURES - S1 EP 06: RWANDA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240905	11:55:00	12:20:00	THE TECH EFFECT - EP. 04	In this episode we travel on a space tourist test flight that flies high above the Earth. It's just one of the options available for wealthy thrill-seekers looking to defy gravity on a trip above our atmosphere. We also look at the latest spacesuits designed by NASA for extra-vehicular activity, or floating in space. Finally, we get an update on the Artemis project, the plan to send men and women to the moon this decade. Artemis requires cooperation between all the major space agencies to build a huge new space station called Gateway, that will also be the launch pad for a crewed mission to Mars this century.

20240905	12:20:00	12:45:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240905	12:45:00	13:35:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lighting. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240905	13:35:00	14:00:00	INSIDE OUTER SPACE - BLACK HOLES, OLYMPUS MONS, JUPITER, INTERNATIONAL SPACE STATION, LIGHTYEAR, FOOD IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240905	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - TOKYO THE MEGALOPOLIS OF MICRO-HOUSES	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240905	14:30:00	15:00:00	WONDER - PERCEPTION	Seg 1 Saccadic Eye Masking. Saccadic eye movements are characterized as the fast movement of eyes when perceiving motion. These are so fast that they are blurred. To compensate for the blurriness, our brains mask these blurred visions to help us see a completed albeit masked version of sight. Seg 2 Plant Movement. While plants do not exhibit movement for locomotion or moving from place to place, they still exhibit movement in response to different stimuli. These movements are plant adaptations for food production, plant reproduction and survival. Seg 3 The Language of Color. Language plays a major role in how people from different parts of the world perceive color. The fact that some languages completely lack terms for some colors that other languages have come to know offers insight on how much influence it has on the way people see colors. Seg 4 Color Blindness. Color blindness is the condition that makes people not able to properly see and perceive colors. Color blindness is the result of damaged or underdeveloped rods and cones. these are the light sensitive cells that can be found in the part of our eyes known as the retina which are responsible for seeing colors. Color blindness can either be

20240905	15:00:00	15:30:00	JOURNEYS IN INDIA - AMRITSAR, SHIMLA AND MANALI: THE FAR NORTH	The Golden Temple is the centerpiece of the city of Amritsar, and probably the second most photographed building in India, but few know about the building or the people who built it. The most significant building to people of the Sikh faith, it is open to people of all faiths. We witness the celebration of the changing of the guard before heading into the mountains for a visit to the British influenced town of Shimla. Journeys then heads further north for look at the resort area of Manali.
20240905	15:30:00	16:00:00	JOURNEYS IN INDIA - AGRA AND ITS ENVIRONS	Agra is home to India's most recognizable monument—the Taj Mahal. First, we tour the Agra Fort and learn its role in the incredible history behind the Taj Mahal's construction. Bill takes us to a factory where we learn how the craft of stone inlay that adorns the Taj Mahal, is still made today. We continue on to Fatehpur Sikri, a former Mughal capital, which was created of red sandstone and displays the influence of its Hindu and Mughal roots. Finally, we meet with a man that is giving the wildlife of India a voice and sanctuary.
20240905	16:00:00	16:30:00	NATURE'S FORCE - EP. 04	How are Rainbows formed and what's their science? We look at the largest Hail ever recorded and explain why it comes in so many shapes and sizes. Global Warming is a big issue and topic, and we give a nutshell insight to its meaning and impact on many levels. Forecasting is key and crucial to living with nature and its weather, as it involves precision technologies and expertise. Typhoon Halyan is an example of one of the most devastating storms in recent history and its story illustrates the power and destruction that Typhoons can cause.
20240905	16:30:00	17:00:00	BLUE WORLD	Cave diving is the most difficult and dangerous type of diving, so the training to become a certified cave diver is arduous. This episode documents Jonathan's actual cave training in the Bahamas and follows him as he learns how to dive safely in the overhead environment of a cave in an attempt to earn his full cave diver certification.
20240905	17:00:00	17:30:00	JOURNEYS IN AFRICA - NAIROBI: THE ENCHANTED CITY	Nairobi is the capital of Kenya and one of the most fascinating cities in Africa. On our visit we'll see the colonial architecture of a bygone era and the ultra-modern side of town as well. We'll learn the truth behind the "Out of Africa" story and our host gets eye-to-eye with some endangered giraffes.
20240905	17:30:00	18:00:00	JOURNEYS IN AFRICA - TARANGIRE: LAND OF THE ELEPHANT	This is definitely the land of the elephant. Large herds of pachyderms roam this marshy park putting on a show for whoever wants to watch. But that's not the only big boys of this park—buffalo, lion and a host of hooved game make this a wonder to behold.
20240905	18:00:00	19:00:00	CHINA UNCOVERED THE RHYTHM OF MODERN CHINA	Famous Chinese Erhu player Zhao Lei is leaving his stamp on classical Chinese music by experimenting with musical fusion between the East and West. On a sharper note in downtown Shanghai, Yuyintang Livehouse opens its doors to contemporary music lovers. The spiritual home of cutting edge beats in Shanghai, Yuyintang has started the careers of Visual Kei band Lilith and progressive metal rockers Mathlotus, but the modern music scene is still reeling from the Rock 'n' Roll ban of the Cultural Revolution. Join them as they strive to become the rock stars of tomorrow.
20240905	19:00:00	19:30:00	RACE OF LIFE - EP. 04	Deserts are dry. Deserts are extreme. True deserts get less than 18 cm of rain per year. True deserts have very few plants. Semi-desert habitats have enough rainfall to support more plant and animal life. Either way, deserts are not easy places for animals to live. Desert animals have evolved to handle the desert's heat and lack of water. They have adapted their bodies and behaviors to the desert climate. Most can survive on small amounts of water and many get all of their water from their food. Some drink maybe once a week and travel considerable distances to find isolated waterholes and springs. Large animals seek shade during the hottest part of the day. Some animals dig a hollow depression into the ground and lie in the cooler soil while others are nocturnal. Many reptiles and other animals protect themselves from the extreme temperature by spending their time in burrows. The scorpion is one of the most ancient creatures on earth, in existence since life first crawled out of the sea. One look and you can see why they're born survivors. Not only are their bodies armoured against the desert heat – and other predators – but all scorpions have

20240905	19:30:00	20:00:00	EUROPEAN ISLANDS EP - 04: LANZAROTE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240905	20:00:00	20:25:00	BIG COAST - DUNCANBY LODGE SEASON KICKOFF	For 15 years the Big Coast Crew has remained completely committed to expedition boating, showcasing West Coast adventure and telling the tales of this final frontier. From iconic Chinook salmon to Grizzlies, Spirit Bear and Orcas, incredible wildlife roams this land and keeps watch over one of the last great coastal ecosystems on Earth. Each season, Big Coast runs the BC Inside Passage from Alaska and Prince Rupert Southbound through Great Bear Rainforest and Vancouver Island. It's an epic journey of 1,500 kilometres through pristine coastal waterways and wilderness. And each season, with marine weather, wildlife and fish migrations, is a little bit different. In the spirit of coastal conservation, Big Coast practices catch-and-release Tye Chinook Salmon (over 30lbs) angling and only taking what you need. Going strong for 15 years, Big Coast features 13 new half hour episodes every year! A 300-mile boat trip from Vancouver to Duncanby Lodge in Rivers Inlet for Percy Walkus Hatchery Chinook Fundraiser!
20240905	20:25:00	20:50:00	BIG COAST - PRINCE RUPERT CHINOOK AND HALI	Fishing Prince Rupert, Ha-Nee-Nah Lodge on Dundas Island and Hecate Strait for Chinook Salmon and Pacific Halibut!
20240905	20:50:00	21:40:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lightning. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240905	21:40:00	22:05:00	WHAT IN THE WORLD - EP 01	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240905	22:05:00	23:00:00	DIVING WITH CROCODILES	In Africa's waterways, one predator reigns supreme – the Nile crocodile. One of the biggest and most deadly reptiles on Earth, it commands a fearsome reputation and strikes terror those who share its domain. Countless attacks in which victims are ruthlessly taken from riverbanks or attacked in their canoes leave no doubt that the Nile crocodile may views humans as natural prey. In fact, the animal was recently reclassified as the number one killer of humans in Africa, overtaking the previous record holder, the hippo. In 'Diving with Crocodiles' cameraman and crocodile expert Brad Bestelink undertakes the unthinkable and dives into the waters of the Okavango Delta. Without a cage or any other protection, he gets up close and personal with these fearsome creatures in this groundbreaking film. Such a feat has never been recorded before. But Brad is well prepared – his decision to take the plunge is the result of many years spent studying crocodile behavior in his native Botswana. His window of opportunity to dive is small and dependent on the seasonal ebb and flow of the Okavango. There are only a couple of months each year when visibility in the delta allows for perfect filming conditions. This extraordinary film provides all the high drama associated with modern-day

20240905	23:00:00	23:45:00	A YEAR IN THE WILD - EP.1	Rosemary catches up with the conservancy's rarest large carnivore, a coalition of 3 male cheetahs. The Pungwe pack get waist deep into their hunting as they pursue a wildebeest into a water pan. Denning season has begun. The pack are on the hunt for impala. Rosemary deals with a shocking snare removal. The splinters take on another herd of wildebeest.
20240905	23:45:00	00:40:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240906	00:40:00	01:35:00	UNBREATHABLE CITIES ON THE VERGE OF ASPHYXIATION	With an epidemic of cancers among adults, and widespread asthma among children, China and India are on a constant health alert. Nor is the rest of the world free from harm as the pollutants are travelling.
20240906	01:35:00	02:30:00	CATHEDRAL BUILDERS	The epic history, in 3D, of Strasbourg Cathedral and its outstanding builders. A fascinating docudrama, from start to finish. Strasbourg Cathedral, a gothic jewel and the highest monument in the West until the 19th century, was both an excessive dream and an architectural feat. How, in the Middle Ages, was such a wonder made possible? Behind its elegant, pink sandstone façade and its famous rose window, which is set ablaze at sunset, three centuries of visionary and inspired master-builders followed on from one another – Erwin de Steinbach, Ulrich d'Ensingen and Jean Hültz – as did craftsmen with a savoir-faire that was envied all over Europe. They return here in fiction form. An epic blending mystery, doubt, revelations, intrigue and tragedies. Best 3 D Documentary Film Award - Festival Dimension 3 (Saint-Denis - France).
20240906	02:30:00	03:25:00	JOHANA: MAKE UP AND MOTOR OIL	Colombia is the third largest exporter of coffee in the world. The main status symbol of its flourishing regions is the Willys Jeep. We met Johana, the only Willys female driver, who is entering this year's Willys contest. This is the jeep "that won the Second World War", the model that created the later legendary "Jeep". About 600,000 Willys Jeeps were manufactured by the US-Army during World War II. After 1945, many discarded Jeeps were delivered to Colombia, considered as "mula con motor", "donkeys with engines". Mostly men can be found behind the wheel. But Johana is an exception.
20240906	03:25:00	04:30:00	SAVING AUSCHWITZ?	70 years after Auschwitz Museum was founded as the memorial site of the Shoah, this site is subject to diversions, confrontations and plundering. Several attempts to exploit and rewrite its history are at work. The danger of desensitization through mass tourism, or the attempts of the local town and its citizens to simply erase the nightmare to make place for new urban landscape are real threats affecting the future of this memorial site. Today, as the last survivors are passing on, what to do with the Auschwitz site?

20240906	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - JAPAN KYOTO: LIVING IN A TRADITIONAL HOUSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240906	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - INDONESIA THE TORAJA: LIVING IN THE CENTER OF THE UNIVERSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240906	05:30:00	06:00:00	MINDWORKS - AUDITORY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240906	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 05	In 1989, CIA operative Kurt Muse was imprisoned at the notorious Carcel Modelo in Panama for his role in organizing radio transmissions against dictator Manuel Noriega. That December, an elite group of the US Delta Force breached the roof of the prison, and one of the most daring close quarter battle operations in history began. From the dramatic helicopter crash and wounding of several Delta operators to the extraction of the entire team by the 5th Infantry Division, this is prime material for CQB analysis. In this episode, CQB recreates the raid, focusing on the “sub-second” reflexes of the Delta Force team from the moment they entered the prison to their extraction from the roof of the prison by an MH-6 “Little Bird” helicopter.
20240906	06:30:00	07:25:00	HIDDEN TRACES	The First World War: soldiers from at least 20 countries were plunged in the hell of trenches and caught under a deluge of bombs. A century later, archaeologists help bring to light the daily life of the soldiers fighting on the French Eastern Front and reveal unexpected aspects of life on the front.
20240906	07:25:00	08:00:00	EVERYDAY ELEMENTS - PLATINUM, IODINE, ALUMINUM, IRON, TUNGSTEN	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.

20240906	08:00:00	08:25:00	TRAVEL THRU HISTORY - ST. AUGUSTINE	There's a lot to cover in the oldest city in America. Take a sip from the distinctively tasting Fountain of Youth. Then we'll cross the draw bridge of the undefeated Spanish Fort, the Castillo San Marcos. Then we'll learn the true history of pirates at the Pirate Museum.
20240906	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 05	A boma is created with a funnel system and students are placed in strategic areas to man the curtain rails..
20240906	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - HAAGEN DAZS, AMERICA'S FIRST PIZZERIA, CHARCOAL BRIQUETTES	It's the city of love, Paris, France. The world over knows its most famous structure, the Eiffel Tower! But did you know PARISIANS originally wanted to tear it down! We'll explain why and how it was saved! Then, you'll visit America's FIRST PIZZERIA! And how the gourmet ice cream HAAGEN DAZS got its exotic start in Bronx New York!
20240906	09:15:00	09:45:00	RACE OF LIFE - EP. 06	Males and females of most species will fight viciously in self-defense. And females, can be even more aggressive than males when defending their young. In this episode we'll explore the Race of Life from the point of view of food, territory, social status, and mates. Though some fights occur between two different species, most battles are fought between members of the same species. Though the wildlife warriors in these battles usually are not trying to kill each other, the fighting can result in death. Why would members of the same species fight with such ferocity? Food is one reason. Animals that store and hoard food for survival will aggressively protect their pantries. Animals are also willing to fight to protect their food indirectly. For example, predators will defend a territory that provides them with enough prey, or food, to survive. This territorial aggression serves to space out members of a species across their range in a way that maintains sufficient food within each territory. But it also may limit population size. For example, if a pack of wolves cannot find, defend, or take over a suitable territory, the members may starve to death. Though food, territory,
20240906	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 05: LA PALMA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240906	10:20:00	11:10:00	DIAMOND RIVER HUNTERS - CUT AND DRIED	The pressure is on to find the big diamond before the winter snow drives the team from the valley. But labour disputes have brought the operation to a halt. A community meeting is called and compromise is reached. The miners agree to pay the labourers directly and employ more people from the local villages. Work resumes at the mine, but overnight 2 accidents occur. The Rhino, their go anywhere off road vehicle has had a spectacular hand brake failure and ramped off a 20 ft cliff. It is a complete write off and will affect the mobility of the team. Warren has also collapsed and fainted, knocking himself unconscious and seriously grazing his face. The altitude and fatigue are wearing him down. Alan is now working the top site, but he has also been gripped by big stone fever and is determined not to leave without finding a large diamond. Kim finds a few small carat stones on the sorting table. Over night the first snow falls and Alan has to rescue his team and equipment from the top site. They get everyone out, but without road access or pumps they cannot continue to mine there. Down in the valley the river freezes over and they are unable to dive or pump. Mining cannot continue and the team has to pull out for the winter. The investors all return to the valley where
20240906	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 06: RWANDA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. 20240906	14:30:00	15:00:00	WONDER - PHANTOMS	Seg 1 Body Transfer Illusion. The Body Transfer Illusion is the illusion of perceiving another object to be part of your body. This is best exemplified by the rubber hand experiment where in a volunteer is shown a rubber hand while their real hand is obscured. Both the fake and real hand is subject to the same stimulus and soon the volunteer will perceive the fake hand as theirs. Seg 2 Autokinetic Effect. The Autokinetic Effect is the effect caused by subtle movements in our eyes when looking at dark environments. This causes stationary light sources to be perceived as moving even though they aren't. Seg 3 Moon Illusion. The Moon Illusion is the illusion where the moon appears to change sizes during different periods in time when especially when it appears closer to the horizon in fact the moon's size remains constant. This happens because we are able to compare the moon's size with visual references like trees and buildings when it appears nearer the horizon. Seg 4 Geometric Illusions. Geometric Illusions are illusions that can literally be illustrated on paper. This type of illusions make use of geometric properties of renderings and illustration

20240906	15:00:00	15:30:00	JOURNEYS IN INDIA - AGRA AND ITS ENVIRONS	Agra is home to India's most recognizable monument—the Taj Mahal. First, we tour the Agra Fort and learn its role in the incredible history behind the Taj Mahal's construction. Bill takes us to a factory where we learn how the craft of stone inlay that adorns the Taj Mahal, is still made today. We continue on to Fatehpur Sikri, a former Mughal capital, which was created of red sandstone and displays the influence of its Hindu and Mughal roots. Finally, we meet with a man that is giving the wildlife of India a voice and sanctuary.
20240906	15:30:00	16:00:00	JOURNEYS IN INDIA - THE LAND OF RUDYARD KIPLING	With classic tales as The Jungle Book to his credit, Rudyard Kipling brought India to life for many readers around the world. In this episode, Bill steps back into Kipling's wild world while exploring Kanha and Bandhavgarh National Parks, the inspiration for The Jungle Book and many other tales. There, we track tigers and search for jackal, sambar, chital, monkeys and wild boar. We round out the episode with jeep safaris, elephant rides and dinners around the fire.
20240906	16:00:00	16:30:00	NATURE'S FORCE - EP. 05	Snow is a fascinating world of crystals that animals, plants, and humans have had to adapt to, in order to benefit from its best and survive its worst attributes. Some communities live with Tornadoes by building homes with survival features and rather than get out of their paths, they rely on warning systems and classifications. And behind all great weather events is Wind, find out how and why it can change from a gentle breeze into a devastating gale force and where does it go? Nature's force can be mystical and puzzling and the Sunshower has been the subject of myths and legends and superstitions, but it does have a scientific explanation.
20240906	16:30:00	17:00:00	BLUE WORLD	Deep in the heart of Mexico's Yucatan, Jonathan is exploring remote cenotes in the jungle that were once used for Mayan rituals. Just reaching the surface of the water requires rappelling down from the forest above. But then, beneath the surface, he encounters strange alien life forms that live in total darkness, and the remains of humans and animal sacrifices from an ancient culture.
20240906	17:00:00	17:30:00	JOURNEYS IN AFRICA - TARANGIRE: LAND OF THE ELEPHANT	This is definitely the land of the elephant. Large herds of pachyderms roam this marshy park putting on a show for whoever wants to watch. But that's not the only big boys of this park—buffalo, lion and a host of hooved game make this a wonder to behold.
20240906	17:30:00	18:00:00	JOURNEYS IN AFRICA - KILWA KISIWANI: SWAHILI KING OF THE INDIAN OCEAN	This ancient ruined city, lost to history, was one of the most powerful in the world during its prime. The architectural sophistication and sheer size will amaze. Then Journeys heads out to the deep ocean for some big game fishing. Will we land the big one or return empty handed?
20240906	18:00:00	19:00:00	CHINA UNCOVERED - THE QUEST FOR WEALTH	Two brothers from rural China train in the art of Kung Fu in the hopes of elevating their lives however minimally. Meanwhile, rich kids in the city attend private English schools to improve their chances to study abroad. But China's favorite philanthropist Chen Guang Biao shares his rags-to-riches story proving that odds can indeed be beaten. Rural children in China may still dream small, but as for the young elite partying away in rooftop bars, life is sweet.
20240906	19:00:00	19:30:00	RACE OF LIFE - EP. 05	These are Nature's own Battletanks, and (with the exception of the Indian Elephant), all endemic to the African continent. The African Savannah is the stage for thousands of battles every day. How do elephants, these large, cumbersome creatures survive and even prosper on a diet that even the strictest vegetarian would pass on! Well for one thing, most other animals get out of their way. But lions and hyenas are not always so easily moved – they prey on young, sick and old elephants in particular. This seemingly gentle giant has been revealed to have a darker side in the last few years too. They may survive on just plant life, but that doesn't mean they don't like a fight – to the death. Elephants have been observed attacking and killing Rhinos in the last 20 years. It's a savage clash. Meanwhile, the Rhino, a tough looking customer if ever there was one, is an endangered species. When the great herds go on the search for food, predators go on the hunt for them. If ever there was an animal that seems destined to survive, it's the Rhino, which has been around for over 6 million years. But it too has an enemy: mankind – the deadliest foe of all.

20240906	19:30:00	20:05:00	EUROPEAN ISLANDS EP - 05: LA PALMA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.

20240906	20:30:00	20:55:00	BIG COAST - PRINCE RUPERT TO HARTLEY BAY	Trolling for Chinook Salmon in Prince Rupert then making big run Southbound to Hartley Bay through Grenville Channel!
20240906	20:55:00	21:45:00	SPEED KILLS I - EP. 02	Under the ocean, it's survival of the fittest... and fastest. Stonefish vacuum food in; Seals whiplash their victims to death and Mantis Shrimps unleash hammer blows with the acceleration of bullets. With over three billion years to get inventive, ocean creatures have exploded the design envelope wide open in their quest for speed!
20240906	21:45:00	22:05:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20240906	22:05:00	23:00:00	CREATIVE KILLERS - EP. 01	Peppered across Africa are a few iconic locations that are renowned for killing action. Arenas bathed in a history of blood, places where Africa's icons have hunted successfully for generations. Predators here develop unique and clever ways to hunt. But the circumstances aren't the driving factor in this story. Sometimes these predators look for the perfect patch of ground to kill, a small area of long grass, or a single path that leads to the perfect ambush. How do they amplify their age-old skills by using the lie of the land? Savuti is big cat country. But only the most resourceful cats make it to the top. The Marsh Pride, Savuti's resident lions, is faced with their toughest challenge this winter: Buffalo. The complicated mix of boggy marsh, open plains and dense woodland provide extra obstacles in their path to a meal. Over centuries these heavyweights have adapted their hunting strategy to Savuti's every challenge and the buffalos' every move. And their secret: The nighttime hunt. When the sun sets, the tables begin to turn and Savuti is at the pride's mercy. But there's no shortage of challenges: Saba, the pride matriarch and most experienced hunter, has
20240906	23:00:00	23:25:00	NEW FRONTIER - FROM THERE TO HERE	Series introduction and the study of Earth from orbit. The sky above is littered with stars and countless galaxies. It is where we come from and where we are destined to return. The first phase of this journey is complete, now commences the second, with robotics, advanced technologies and sheer daring we are now going where before we only dreamt.
20240906	23:25:00	23:50:00	NEW FRONTIER - RETURN TO THE MOON	The Moon, our closest celestial companion. Our indispensable dance partner through the cosmos. Lighting our night sky and gently tugging at our shores. Few have walked on her surface, though her allure remains strong, once again we are glancing her way with renewed interest and with a view to return very soon.

20240906	23:50:00	00:45:00	SECRETS OF THE THRACIAN KING	In August 2004 in Bulgaria, archaeologist Georgi Kitov made a spectacular discovery in the valley of the Thracian Kings, a valley where about twenty temples and royal tombs are located. Kitov accessed a still-intact ancient tomb, which housed incredible wealth, dating back to the 4th century B.C., when Thracian culture was at its height. In front of the gigantic mausoleum, archaeologists found a magnificent, life-sized bronze head, one of the period's finest specimens ever found, and possessing an unsettlingly modern style. Who was this king and what does his tomb tell us about Thracian culture? Was he buried according to the Thracian custom of Orphic rites, and what do we know today about these secret rites that promised eternal life? Research into the deceased's identity revealed the tomb belonged to King Seuthes III. With the help of archaeologists and historians, who decipher the king's vestiges, the film pieces together the puzzle of Seuthes III's life. He was a modern king, who was open to Hellenisation, a warrior king, who was opposed to Macedonian authority, and a priest king, who was committed to preserving Thracian cultural rites.
20240907	00:45:00	01:40:00	ARCTIC: THE ROUTE OF THE NUCLEAR-POWERED ICEBREAKERS	This report accompanies a polar cargo ship through the Arctic Sea and provides a rare insight into the interior of the Russian nuclear-powered icebreaker float. Along the north coast of Russia, a land of climatic extremes, lies one of the most difficult to navigate straits in the world. The Northern Sea route is a 6,000 kilometer shipping lane through the Polar Sea.
20240907	01:40:00	02:35:00	KYUCHU: WHERE THE GREEN TEA GROWS	This report shows how the famous Japanese green tea is cultivated, explores its healing power and explains how deeply the tea has penetrated Japanese society. For the Japanese people, green tea is more than just an ordinary beverage. It is the key to the national culture - it combines enjoyment, philosophy and the art of living. In springtime, the entire country waits for the first flush, the very first harvest of the precious Sencha tea from the island of Kyushu, the world's biggest organic tea production region.
20240907	02:35:00	03:30:00	CAMBODIA'S LAST BAMBOO TRAIN	This report climbs aboard the bamboo train, learns about its passengers and portrays life as it currently is in Cambodia. Without this bamboo train, people would not be able to go do their daily tasks such as going to work or to the doctor. Deep in the Cambodian Battambang region, a small bamboo train called "Norry" makes its way through rice fields and jungle passages. It is considered to be one of the most important lifelines into the poor region. But it looks like Norry's time is running out, because of the changes in Cambodia over the last years. More and more fields are being cleaned of land mines, new roads are being built, and many Cambodians are now able to afford a motorbike. The people fear that in a few years' time the bamboo train will stop operating.
20240907	03:30:00	04:30:00	THE HAWKDOCTOR OF ABU DHABI	360° GEO - Report visits takes a trip to the vet and accompanies the doctor on her daily mission dedicated to the feathered treasures of the sheiks. Falcons are an inherent part of Arab culture in the United Arab Emirates. For centuries, the country has traditionally hunted with the impressive raptors. Almost every family owns at least one falcon. The German lady veterinary Margit Müller takes care of these precious birds of prey's health. She is the manageress of the "Abu Dhabi Falcon Hospital" - the biggest Falcon Hospital in the world.
20240907	04:30:00	05:00:00	SHOW ME WHERE YOU LIVE - PERU: IQUITOS, LIVING IN A FLOATING CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240907	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - AUSTRIA VORARLBERG THE GREEN VALLEY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? 20240907	05:30:00	06:00:00	MINDWORKS - EVERYDAY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240907	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 06	Joint Task Force Two (JTF 2) is the elite Canadian Forces Special Operations unit responsible for a broad range of missions, including counter-terrorism and armed assistance to other government departments. Highly secretive, JTF 2 and its predecessor, the Canadian Airborne Regiment, have been deployed in hotspots around the world from Haiti to Bosnia. This episode focuses on the legendary JTF sniper teams and their use in Afghanistan alongside the British SAS and the US Delta Force at "the sharp end of the spear." A book written by an ex-JTF member explains how, in 2006, both the Pentagon and the British Foreign Office noted the instrumental role that JTF 2 played in the rescue of the British and Canadian Christian Peacemaker Team held hostage in Iraq. Unique in look, the FN P90 personal defense weapon, used by JTF 2 soldiers and special police around the world, will be highlighted in this program.
20240907	06:30:00	07:25:00	HIDDEN TRACES	The First World War: soldiers from at least 20 countries were plunged in the hell of trenches and caught under a deluge of bombs. A century later, archaeologists help bring to light the daily life of the soldiers fighting on the French Eastern Front and reveal unexpected aspects of life on the front.
20240907	07:25:00	08:00:00	EVERYDAY ELEMENTS - SILICON, FLUORINE, LITHIUM, BORON, CHROMIUM	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240907	08:00:00	08:25:00	SARAH SHARK - EP. 01	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.
20240907	08:25:00	08:50:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.

20240907	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - SWEET 'N LOW, RIDING SHOTGUN, POTATO CHIP	It's been sweetening America for almost 40 years! Now, find out the truth behind how SWEET N LOW actually got its name! And why do we yell SHOTGUN when getting into a car with friends? Then, is it really bad luck to open an umbrella in the house? And, learn the salty truth on how the POTATO CHIP was invented out of ANGER!
20240907	09:15:00	09:45:00	RACE OF LIFE - EP. 07	With predators practically always on the lookout for a meal, prey must constantly avoid being eaten. Any defensive adaptation that prey can utilize adds to the chances of survival for its species. Some adaptations are defense mechanisms which can give the prey an advantage against their enemies. The first is very direct and comes naturally. Animals can use speed as a very effective means of escaping predators. In the evolutionary history of big herbivores and the carnivores that prey upon them, the phrase "arms race" is only technically a metaphor. Antelope are literally born to run, and many of the things that chase them, such as the cheetah, are either masters of endurance or champion sprinters. The evolutionary story almost writes itself: over millions of years of chasing, and being chased, wherever predators evolved to move quickly, their prey were selected to run even faster. Except of course there's more to life than running for your life. An antelope's frame is under more demands than evading cheetahs—it also needs to travel long distances to follow food availability with the shifting rainy season. The ostrich meanwhile stands at one extreme of bird evolution, for although unable to fly, of all the birds the ostrich runs the fastest race of life. More
20240907	09:45:00	10:10:00	THE TECH EFFECT - EP. 02	In this episode, we look at the ways robotic engineers are mimicking the natural world. BionicWheelBot and the BionicFlyingFox have been developed to navigate difficult terrain, like their biological counterparts. Robots like the canine-inspired models produced by Boston Dynamic are already being used in hazardous environments to reduce the need for humans to be exposed to risk. We'll also see how robots are covering new ground in space exploration, with smart autonomous vehicles destined for Mars, given greater capability than ever before. Finally, we visit some of the environments, such as offshore rigs and factories, where robots are being deployed in a range of jobs, including as exoskeletons for human workers, to reduce injuries and enhance endurance.
20240907	10:10:00	10:40:00	EVERYDAY ELEMENTS - CARBON, GOLD, NEON, ZIRCONIUM, ANTIMONY	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240907	10:40:00	11:10:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240907	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 07: UTAH - SALTON SEA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240907	11:35:00	12:00:00	OUT OF TOWN ADVENTURES - S1 EP 08: GEORGIA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240907	12:00:00	12:25:00	TRAVEL QUEST - BRAZIL	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240907	12:25:00	13:10:00	STOLEN TREASURES EP. 1	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240907	13:10:00	14:05:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240907	14:05:00	14:35:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - WEST BENGAL	Soumik arrives in the city of joy Kolkata in search of his musical roots and puts together his team. They head into the villages in search of travelling minstrels known as Bauls. Their journey leads them deeper into impoverished rural hinterlands where an old man sings under his broken down house. These musicians are driven by deep faith and extraordinary spiritual resilience. Their daughters sing and children learn deep lessons in simple words.
20240907	14:35:00	15:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240907	15:05:00	15:35:00	JOURNEYS IN INDIA - THE LAND OF RUDYARD KIPLING	With classic tales as The Jungle Book to his credit, Rudyard Kipling brought India to life for many readers around the world. In this episode, Bill steps back into Kipling's wild world while exploring Kanha and Bandhavgarh National Parks, the inspiration for The Jungle Book and many other tales. There, we track tigers and search for jackal, sambar, chital, monkeys and wild boar. We round out the episode with jeep safaris, elephant rides and dinners around the fire.

20240907	15:35:00	16:05:00	JOURNEYS IN INDIA - BANGALORE AND OOTY	Bangalore is a city with many names: the Garden City, the Pub City, the Fashion Capital the list goes on. Follow Bill as he journeys through this city of contrasts and touches on its many faces. We visit Cubbon Park and Lal Bagh Gardens, shop in the markets and explore the nightlife of the modern city. We also explore architecture, from ancient Bull Temple, the legendary source of the Vishva Bharti River to the largest legislative building in India. Bill's final stop is the "Queen of the Hill Stations" Ooty, where he tours the plantations, rides the historic narrow-gauge railroad and visits the Stone House, which was built by the British in the days of colonial rule.
20240907	16:05:00	17:00:00	BRAZIL'S COASTLINES - THE NORTH--EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240907	17:00:00	17:30:00	JOURNEYS IN AFRICA - KILWA KISIWANI: SWAHILI KING OF THE INDIAN OCEAN	This ancient ruined city, lost to history, was one of the most powerful in the world during its prime. The architectural sophistication and sheer size will amaze. Then Journeys heads out to the deep ocean for some big game fishing. Will we land the big one or return empty handed?
20240907	17:30:00	18:00:00	JOURNEYS IN AFRICA - TSAVO: LEGACY OF THE MAN-EATERS	Featured in films and documentaries, the mane-less lions of Tsavo have a fierce reputation – man-eaters. Journeys embarks on a photo hunt for these legendary beasts of the bush. In the process, we witness the raw power of the ghosts in the dark.
20240907	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 02	A student darter is selected to dart from the helicopter and soon a suitable giraffe is located. The dart location is perfect and the giraffe begins to slow down as the rest of the team jump into action. The giraffe becomes more of a challenge as it wrestles with the rope and breaks free. The drugs eventually take full effect and the giraffe is subdued. The team carry out all the checkups, take samples and reverse the drug in good time to see it run off in good health. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240907	18:25:00	19:20:00	WATER: H2O STORIES - SUSTAINABLE WATER MANAGEMENT	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240907	19:20:00	20:05:00	RV EXPLORERS S1 EP 02 - WHANGANUI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240907	20:05:00	20:30:00	BIG COAST - HARTLEY BAY HUMPBACKS AND CHINOOK	Humpback Whales, perfect water, summer sunshine and one of the finest fishing Chinook Salmon solo fishing days!
20240907	20:30:00	20:55:00	BIG COAST - BC CENTRAL COAST SALMON SAFARI	Running Southbound outside on Central Coast with a big Tyee Chinook Release finish North of Milbanke Sound!
20240907	20:55:00	21:45:00	SPEED KILLS I - EP. 03	The arrival of the great migration is a promise of gluttony... and speed is the ticket to the feast. Cheetahs and gazelle are caught in a 100 thousand-year-old arms race. Lions muscle their way into the action. And crocodiles unleash awesome bursts of prehistoric power. On the vast plains of the Serengeti, it's only the quick and the dead.

20240907	21:45:00	22:05:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20240907	22:05:00	23:00:00	CREATIVE KILLERS - EP. 02	On the plains of East Africa an epic journey is underway. Millions of wildebeest and thousands of zebras march in an annual, circular migration in search of lush grazing. Two major rivers, the Mara and the Grumeti, intersect their route and force the herds to cross. Crocodiles, the biggest living on earth, wait in these rivers to take advantage of this moving feast. In this ever-changing waterscape successful predators adapt their hunting strategies to suit the shifting environment. On the Grumeti River, DC is the Dominant Croc of a loose gang called the RagTags. When the wildebeest arrive to drink, these Pit Stops, Zone 1, are the crocs' first challenge. It doesn't go well for the RagTags. These smaller, inexperienced crocs don't calculate their launch speed correctly, so opportunities are missed. DC finds a pool where he can work alone. He grabs an impressive male zebra, but the pool's not deep enough to drown it. The zebra fights hard and DC is forced to let it go. Deep Water, Zone 2, is a zone exclusive to the Mara River. Steep banks and fast-flowing water make it a river that favours the crocodiles. Wildebeest plunge off the cliffs straight into the deep channel. To hunt here is easy: Swim, launch and drown. There's no free lunch on the Grumeti. DC waits for the next opportunity. He picks up vibrations in the water that tell him the herds have started to cross. Zone 3, The Shallows, is a dangerous zone for crocodiles. Wildebeest gallop across the river and crocodiles can get trampled. DC captures a calf but the RagTags share with him and DC is left with a single mouthful. Frustrated with his small portion, DC drives the gang away. Theft is a viable strategy in the Grumeti. The RagTags follow DC when he tries to hoard his next prize.
20240907	23:00:00	23:25:00	WILD AUSTRALIA WITH RAY MEARS - EP. 01	Ray Mears explores the Great Barrier Reef starting on the Queensland mainland taking a boat out to Hervey Bay with whale expert Wally Franklin. They witness a mother hump back whale teaching her three month old calf the whale moves needed to survive the long migration to Antarctica. He flies out to Lady Elliot Island at the southernmost tip of the Great Barrier Reef where he goes scuba diving on the coral reef and discovers giant turtles and manta rays and shoals of big eyed trevelly fish. Back on the island Ray helps marine biologist Maggie O'Neal plant a Pisonia tree and finds out how the Pisonia trees kill the Black Noddy bird's that nest in them in order to use their corpses as a fertile compost given the unforgiving ground of a coral island.
20240907	23:25:00	23:50:00	WILD AUSTRALIA WITH RAY MEARS - EP. 02	Ray Mears journeys into the remote wilderness region of Arnhem land to the Cooper Creek Billabong. He's there during the dry season and all the wild life is concentrated into a narrow stretch of water. He comes face to face with the dominant saltwater crocodile and watches as the croc manoeuvres a dead pig down river to a secret hiding place. When Ray gets too close warns him off. Ray travels into Stone Country above the Billabong where he finds a gallery of ancient Aboriginal art and joins locals Connie Nayinggul and her grandson Moses on a fishing expedition. They catch a barramundi and cook the fish in a traditional ground oven using paper bark. Finally Ray travels with land manager Greg Towns across the dried up mudflats through giant flocks of Magpie Geese. Ray helps Greg to burn away large meadows of alien and destructive grass that is killing the birds. In a dramatic scene Ray witnesses the spectacle of farming with fire.

20240907	23:50:00	00:45:00	ARE THE SKIES TOO CROWDED?	International commercial aviation produces as much CO2 as Africa. The European Union plans to double the numbers of aircrafts by 2020. Can the earth handle a growing number of carbon dioxide-emitting planes in the upper atmospheric strata forever? The reduction of greenhouse gases is one of the main challenges of the 21st century and the aviation industry knows it will have to develop a "sustainable" aviation. Decline or regression is not an option. So, commercial aviation is looking for the answer in a field that has always served it well: scientific and technological innovation all over the world. Luckily, some interesting solutions are actively researched by those who are inventing the eco-friendly aviation of the next 50 years. The film aims to meet the players in an incredible transformation that will ultimately change everything about air travel.
20240908	00:45:00	01:40:00	ARGAN OIL: THE WHITE GOLD OF MOROCCO	This report follows the process of making Argan oil, beginning with the harvest and ending with the cooperatives working for the international market. Made from the nuts of the Argan tree, which grows almost exclusively in the Essaouira region of Morocco, Argan oil has become one of the latest miracle ingredients of the beauty industry in Europe. Publicity is created around the fact that this oil is made by Berber women. But who are they? How do they live? And how hard is their work? We accompany these women in their daily lives and take part in their traditions.
20240908	01:40:00	02:35:00	IDJWI - AFRICA'S FORGOTTEN ISLAND	The inhabitants of the island of Idjwi on Lake Kivu are poor but have one highly valuable asset in this region of Africa - peace. The island of Idjwi is saddled between Rwanda and the Democratic Republic of Congo, right in the middle of Lake Kivu. Although its inhabitants have been surrounded for years by war and suffering, they have always been spared the violence. So tens of thousands of refugees have flocked to safety and settled there. The only link to the mainland is via the Nyamizi, an old barge. Thanks to this shuttle service, the islanders can sell their harvests at markets on the mainland and establish contacts with the outside world. 360°-GEO boarded the boat that links the forgotten island to the African continent.
20240908	02:35:00	03:30:00	GALICIA'S DEATH COST	360°GEO - Report accompanies goose barnacle fishermen on a trip to the deadly cliffs. But even there, the goose barnacle population is declining rapidly. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds.
20240908	03:30:00	04:25:00	SOKOTRA, ENDANGERED TREASURE ISLAND	Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihlin finds it hard to make ends meet with just his herd of goats. Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihlin finds it hard to make ends meet with just his herd of goats.
20240908	04:25:00	05:20:00	MEET MY WILD FRIEND - HAPPY FEW	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.

20240908	05:20:00	06:00:00	EUROPEAN ISLANDS EP - 03: TENERIFE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240908	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 07	In 1968, a new form of military policing was being developed in a rural area north of Los Angeles. The Los Angeles Police Department sent an observer to this unit, and he, in turn, took this knowledge back to the LAPD. This contributed to the development of the department's first Special Weapons and Tactics (S.W.A.T.) team. This CQB episode takes an historical journey to examine how this incident affected and changed police tactics around the world. Using CQB's trademark "sub-second" analysis, the program also looks at how police S.W.A.T. teams train, plan and equip themselves for the challenges of urban combat. The dramatization of a 1980s S.W.A.T. siege of a gang safe-house demonstrates the complicated challenge of protecting innocent people who might be caught in the line of fire, as well as the specifics of the squad's training regimen, how they communicated, and the special equipment they used.
20240908	06:30:00	07:25:00	HIDDEN TRACES	"D-DAY" - June 6th 1944: Normandy landings Personal and daily items such as helmets, badges, bullets, weapons, cans have been uncovered by recent archeological digs. These traces left behind by soldiers and civilians on the battle ground and findings of underground passages and blockhouses kept secret provide new insights into 2WW History.
20240908	07:25:00	08:00:00	EVERYDAY ELEMENTS - HELIUM, TIN, CALCIUM, PALLADIUM, LEAD	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240908	08:00:00	08:25:00	SARAH SHARK - EP. 02	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.
20240908	08:25:00	09:15:00	TROUBLE IN LEMUR LAND	High up in the mountains of north-eastern Madagascar lives one of the world's most critically endangered primates. There are less than a thousand Silky Sifakas alive today and this area of remote rainforest, known as Marojejy-Anjanaharibe-Sud, is their only home. In the past, the rugged terrain here kept the Silkies relatively safe but things are now changing at an alarming pace. This magical place is under serious threat from illegal logging operations as international demand for highly sought-after rosewood and ebony increases. Unscrupulous logging gangs are encroaching on the Silkies' last remaining habitat. 'Trouble in Lemur Land' follows two men, an American primatologist and a Malagasy conservationist, on their quest to protect this rare species, at the same time providing a rare glimpse into the life of this extraordinarily beautiful and graceful animal. The film centres around the arrival of two babies in the group – a glimmer of hope in an otherwise desperate situation. Lemur reproduction rates are slow and Silkies only mate one day in the year, so it is a very special moment when primatologist Erik Patel sees the newborns for the first

20240908	09:15:00	09:45:00	RACE OF LIFE - EP. 08	Predator versus prey: in this instalment we analyze three attack-escape scenarios involving bird predators and their prey. One is the climbing flight escape, another is horizontal speeding, and thirdly, there is turning and diving to avoid capture. Predator and prey attack-escape behaviour is another outcome of the evolutionary arms race. There is something about birds of prey that make us pay attention – maybe it is the inherent fear we all have that one will attack us – or perhaps it is just because they are seldom seen by most westerners. Regardless, birds of prey are fascinating and in this episode we examine some of the largest, mightiest and most spectacular raptors from around the world. We'll watch with fascination the Eagle, a large bird of prey that is a skilled hunter and highly efficient killer. These elegant predators do their best work in large open spaces, where they can fly high and see for miles and miles. Meanwhile, the fastest living animal on land, sea or sky is also a bird of prey. The peregrine falcon can be found from the arctic to the tropics, and for centuries has been a symbol of prestige. At the other end of the scale is a bird that
20240908	09:45:00	10:10:00	THE TECH EFFECT - EP. 03	In this episode we examine advances in aviation that include flying cars being developed by Slovakian and Japanese companies. Ride share companies are also considering aerial options, with Uber among those working on autonomous urban aircraft that will fly over congested roads to landing points in the centre of cities. As the skies of the future will be teeming with flying vehicles, suitable air traffic management is essential. We look at new systems to connect autonomous aircraft with each other and an overarching traffic control. Finally, we explore a concept airliner of the future. Sustainable and flexible, it incorporates holograms and neural networks to provide a more engaging and relaxing flight.
20240908	10:10:00	10:40:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240908	10:40:00	11:10:00	EVERYDAY ELEMENTS - CHLORINE, TITANIUM, GALLIUM, POTASSIUM, NICKEL	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240908	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 08: GEORGIA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240908	11:35:00	12:00:00	OUT OF TOWN ADVENTURES - S1 EP 09: LA REUNION	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240908	12:00:00	12:25:00	TRAVEL QUEST - ANTARCTICA	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240908	12:25:00	13:05:00	STOLEN TREASURES EP. 2	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240908	13:05:00	14:00:00	WATER: H2O STORIES - THE BLUE PLANET	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240908	14:00:00	14:30:00	QUIRKY SCIENCE - EP. 3	In contrast with popular belief, Edison did not invent the light bulb. Many people contributed to the invention. Mind you, the first lamp was invented around 70,000 BC. Once upon a time we had limelight, which was actually quite unsafe, and then there were arc "arc lamps" – shedding light that blinded movie stars up to the point where they had to wear sunglasses. What Edison did was improve the light bulb to become a practical, affordable and safe product. He tested over 5000 filaments to make the bulb last: from bamboo fiber to a hair out of an assistant's beard. At the same time others were working on light bulbs made with gasses, which we now know as energy efficient lamps. Modern-day lighting innovations are quite startling, a lot of them - we can't even see with the naked eye... Lasers, for example. For the longest time it was merely a pet-theory of the grand Einstein. Nobody knew what to make of this idea that 'atoms could release their excess energy as light' When the laser was invented, people joked that the laser was 'a solution looking for a problem'. Now it is omnipresent. In the near future: laser-light therapy by flashing the human brain.
20240908	14:30:00	15:00:00	QUIRKY SCIENCE - EP. 4	A man with an ear for music, one of the first to try teaching the deaf how to speak, thought he could build a "harmonic telegraph". He had this idea that several notes could travel through a wire simultaneously, instead of the one Morse code that the telegraph could transmit. He thought this to be possible because he misinterpreted the writings of a researcher writing in German – a language he did not know. – And would later describe his misinterpretation as a "very valuable blunder". The man was Alexander Graham Bell and he invented telephony. The big question is: what happens in that wire? How can voices travel? Bell and his assistant eventually proved that different tones would vary the strength of an electric current in a wire. In fact, it's the vibrations of the voice that determine the strength of the current. His invention caused a lot of fuss – yet it took years before people comprehended the scale of it: before the widespread use of the phone – whom were you going to call? Eventually, the telephone, or better said, its wiring, leads to the Internet. Nowadays we mostly make our calls 'wireless' so the wire Graham Bell used to make voices travel over long distances is no longer needed How does that work? Even wireless calling, some say, is actually a very unnatural way of communicating. Looking at the future, are we heading towards a 'phoneless' call?

20240908	15:00:00	15:30:00	JOURNEYS IN INDIA - BANGALORE AND OOTY	Bangalore is a city with many names: the Garden City, the Pub City, the Fashion Capital the list goes on. Follow Bill as he journeys through this city of contrasts and touches on its many faces. We visit Cubbon Park and Lal Bagh Gardens, shop in the markets and explore the nightlife of the modern city. We also explore architecture, from ancient Bull Temple, the legendary source of the Vishva Bharti River to the largest legislative building in India. Bill's final stop is the "Queen of the Hill Stations" Ooty, where he tours the plantations, rides the historic narrow-gauge railroad and visits the Stone House, which was built by the British in the days of colonial rule.
20240908	15:30:00	16:00:00	JOURNEYS IN INDIA - MUMBAI & GOA	Join us as we explore the Gateway to India—Mumbai. From its early history, it's many foreign occupations to the hustle and bustle of today. Bill tells Mumbai's rich history is told through two of its most famous inhabitants, Gandhi and Kipling. We delve into the community of the Parsi faith and learn about their beliefs regarding the circle of life before heading to a little bit of heaven on earth, the coastal paradise of Goa. This hot spot for "in the know" travelers feature white, sandy beaches and is surrounded by tropical plant life. Bill introduces both the armchair and actual traveler to this incredible destination. We explore the Portuguese influence on Goa's architecture and cuisine, tour the ghost city of Old Goa and explore Roman Catholic churches.
20240908	16:00:00	17:00:00	BRAZIL'S COASTLINES - THE EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240908	17:00:00	17:30:00	JOURNEYS IN AFRICA - TSAVO: LEGACY OF THE MAN-EATERS	Featured in films and documentaries, the mane-less lions of Tsavo have a fierce reputation – man-eaters. Journeys embarks on a photo hunt for these legendary beasts of the bush. In the process, we witness the raw power of the ghosts in the dark.
20240908	17:30:00	18:00:00	JOURNEYS IN AFRICA - MOMBASA: THE CENTER OF IT ALL	Gold, ivory and slaves drove the economy of the East coast of Africa 500 years ago. Join us as we explore the Portuguese and Arab roles in these horrific trade schemes. We'll also investigate the pristine waters off the coast of the nearby National Park where our host dons a snorkel mask and comes face-to-face with the creatures of the coral reef.
20240908	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 03	One of the students is selected and soon locate a huge bull elephant from the helicopter. The dart successfully finds it mark and the bull takes 20 minutes to lie down. The rest of the team rush in to do the necessary data entries and reverse the drug within 20 minutes. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240908	18:25:00	19:10:00	RV EXPLORERS S1 EP 03 - WHANGAREI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240908	19:10:00	19:55:00	RV EXPLORERS S1 EP 04 - COROMANDLE	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240908	19:55:00	20:20:00	BIG COAST - WHISKEY COVE CHINOOK	Trolling cut plug herring from home base on Denny Island, BC!
20240908	20:20:00	20:45:00	BIG COAST - MOUTH OF RIVERS INLET	Chasing big Chinook Salmon just outside Rivers Inlet, BC from Duncanby Lodge!

20240908	20:45:00	21:35:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lighting. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240908	21:35:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240908	22:05:00	23:00:00	CREATIVE KILLERS - EP. 03	Peppered across Africa are a few iconic locations that are renowned for killing action. Arenas bathed in a history of blood, places where Africa's icons have hunted successfully for generations. Predators here develop unique and clever ways to hunt. But the circumstances aren't the driving factor in this story. Sometimes these predators look for the perfect patch of ground to kill, a small area of long grass, or a single path that leads to the perfect ambush. How do they amplify their age-old skills by using the lie of the land? The fastest mammal on the planet, Cheetah's don't only use speed to kill. They use look out points to scan for weak prey and a baby fawn as lure to get its mother to come closer. Africa's heavy weight the Lion is twice the weight and half the speed of the Cheetah. They need cover to hunt down their prey, so they stake out ambush points in Gullies, Marshland and Forest, lying in wait for their prey the wildebeest. We follow three characters through the Ndutu rainy season, starting with the arrival of the annual wildebeest migration, through to the wildebeest calves growing up and continuing their journey to the north-west. The film looks at how our characters use the environment and features of the landscape to their advantage. Reflecting on how they have learnt this from previous generations and will pass onto the next.
20240908	23:00:00	23:30:00	FLYING OVER THE EARTH - CAP AU NORD	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240908	23:30:00	00:00:00	FLYING OVER THE EARTH - AMERICA	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240909	00:00:00	00:55:00	WILL WE SOON BE EATING IN VITRO MEAT	Does cultured meat - which numerous scientists in various countries are working on - open up real perspectives for feeding a rising population and for fighting pollution? Or does it represent a false hope? Will the environmental arguments put forward in its favour be enough to convince consumers to eat cultured meat? Is the current commercial success of the first meat-substitute products available on the market heralding a change in what we eat? Would it not be preferable to turn towards insects, given that they are an already established source of protein and, what's more, are natural? This documentary, shot in the US, China, India, France, Holland and Laos, will change the way you see steak - forever!
20240909	00:55:00	01:50:00	THE BEST SHEEPDOGS FROM WALES	The film follows Nigel and his dogs throughout the summer. Nigel Watkins is a farmer and vice-world champion sheepdog handler. Together with his partner, Janet, he runs his little farm Llanddeusant in the Brecon Beacons National Park in the south of Wales. Farming takes up a fair amount of his time, but his hobbies take up much more of it: he trains Border Collies, a breed of sheepdog.

20240909	01:50:00	02:45:00	GALLA WALLAH: THE SEARCH FOR THE BEST	The valleys of Nepal, around the Himalayan Mountains - the highest in the world - are the home of a special group of people called the Gurkhas. Because of the discipline and endurance they exhibit in their daily fight for survival, they are employed in the elite battalion of the British Army. For more than 200 years, the Gurkhas have served the crown. Every year, more than 25,000 people apply for a position as a Gurkhas, with only a few lucky ones chosen. For the chosen ones, it feels as though they have hit the jackpot. For the others, it is considered to be the worst defeat of their life.
20240909	02:45:00	03:40:00	NEW ZEALAND'S RACE OF EXCESSES	A plunge into New Zealand's Ultramarathon preparations, a tradition that comes from a Maori legend. 55 year-old Lilac Fley is an athlete and many times winner of the extreme race. A Maori legend dictates the course of the Ultramarathon. It tells the story of a boy who once lived with his tribe on the New Zealand coast. One day his mother asked him to search for some kumaras, or sweet potatoes, for a meal. Instead of digging for them, he decided to steal some from the neighboring tribe. Till this day, runners follow in his footsteps along the coastline - during New Zealand's most famous marathon.
20240909	03:40:00	04:25:00	LOVE & MARRIAGE: THE LEGEND OF KALINGA	The Legend of Kalinga is a beautifully narrated journey to the village of Buscalan located in Kalinga, North of Luzon in the Philippines to explore the ancient culture of the Kalinga tribe through an ages-old love story. Whang-Od is the last female "Mombobtok" tribal tattoo artist of the Kalinga. Today she is 103 years old and is still performing tribal tattoos for tattoo seekers who arrive every day to seek her sought-after skin art. She recounts her painful love story of a handsome Headhunter from neighboring village with whom she fell in love while rendering a tattoo for his bravery. The Legend of Kalinga emotionally explores how old culture pushes and forces even the most ardent lovers apart.
20240909	04:25:00	04:45:00	TRAVEL THRU HISTORY - SPACE COAST	Travel Thru History is an Emmy-nominated, un-hosted lifestyle/travel series designed to spark interest and enthusiasm in viewers about our world's rich and fascinating history by traveling to diverse locales across the globe. Locations include New Orleans, Las Vegas, Oslo, Belize, Dublin and more. In this episode we visit the Kennedy Space Center located on Florida's famous "Space Coast." We'll speak to NASA engineers about the past, present and future of American space travel, as well as take a look at the attractions KSC has to offer.
20240909	04:45:00	05:40:00	MEET MY WILD FRIEND - AMBASSADORS	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.
20240909	05:40:00	06:00:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20240909	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 08	The Bosnian War was an extraordinarily complex event, with many layers of military involvement including NATO forces, national militaries, irregular paramilitary forces, mujahedeen revolutionaries, private security companies, and international intelligence personnel. One tactic in particular struck fear into the hearts of the military and civilians alike: the use of snipers positioned in high buildings. This edition of CQB investigates this specific combat technique and how it was countered by opposing forces. Taking viewers inside a "sniper's den," the program explains how this tactic was so successfully used by rebel forces—and how traditional military techniques evolved to combat it.
20240909	06:30:00	07:25:00	HIDDEN TRACES	On the 11th of November, 1918, the First World War drew to an end with a terrible toll... after a conflict unlike anything Humanity had ever seen before. For 4 years and 3 months, soldiers from at least 20 countries were plunged in the hell of trenches... caught under a deluge of bombs.

20240909	07:25:00	08:00:00	EVERYDAY ELEMENTS - NITROGEN, MERCURY, COPPER, MAGNESIUM, COBALT	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240909	08:00:00	08:25:00	TRAVEL THRU HISTORY - DENVER	We head underground and visit the Hidee Gold Mine to see how this most precious material is obtained. Then we get a tour of the brand new History Colorado Center where we'll explore Colorado's past through first hand stories and interactive attractions.
20240909	08:25:00	08:50:00	CAPTURE WILD SCHOOL - EP. 06	A student is prepared to carry out the darting of a massive problematic buffalo that has been terrorizing staff members close to a camp. This task must be done on foot and the student needs to practice darting from many different distances before he can proceed.
20240909	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - GRAND CENTRAL TERMINAL, 120 VOLTS, NACHOS	It's one of the world's most famous train stations. GRAND CENTRAL TERMINAL. We'll take you on a trip to reveal its many fascinating secrets! And if they are cleaned without water, how do clothes get spotless when they are DRY CLEANED?
20240909	09:15:00	09:45:00	RACE OF LIFE - EP. 09	Crocodiles , like all living reptiles, they are descended from animals that roamed the Earth about 250 million years ago. There's something so viscerally terrifying about these creatures that lay in wait for their prey, just under the waterline. The comparatively friendly seeming turtle is among the most ancient of the reptiles alive today and have a protective shell that encloses their body and provides protection and camouflage, just as it did millions of years back. They inhabit terrestrial, freshwater, and marine habitats and are found both in tropical and temperate regions. Poisonous or harmless, large or small, all snakes - from the desert rattlesnake to the dwarf pipe snake - have certain things in common: a long, thin shape; scaly, legless bodies; and unblinking, lidless eyes. Like all reptiles, snakes rely on the heat of the sun to control their body temperature. The venom of the king cobra, the world's largest poisonous snake, is strong enough to kill an elephant. Lizards have developed their own adaptations – some lose their tail when in danger, as a means of escaping from a predator. In time the tail will grow back again. The tail they leave behind will
20240909	09:45:00	10:10:00	EUROPEAN ISLANDS EP - 06: RHODOS	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240909	10:10:00	10:40:00	EVERYDAY ELEMENTS - CHLORINE, TITANIUM, GALLIUM, POTASSIUM, NICKEL	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240909	10:40:00	11:10:00	EVERYDAY ELEMENTS - SODIUM, OXYGEN, ARGON, ARSENIC, ZINC	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.

20240909	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 09: LA REUNION	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240909	11:35:00	12:00:00	OUT OF TOWN ADVENTURES - S1 EP 10: PALM SPRINGS HIKING	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240909	12:00:00	12:30:00	THE TECH EFFECT - EP. 06	In this episode we visit the home of the future, a place where automation, robotics and connectivity combine to create an easier and more sustainable life for its human inhabitants. From personal robots, to indoor hydroponic gardens, electronics companies are competing to find the most intuitive solutions to automating household chores. This episode also explores advances in technology in the motoring world, such as drones that give drivers advance warning of upcoming hazards, a "robot whisperer" who visits a car factory to study robotic body language and how Lamborghini is conducting carbon fibre tests in space. Finally, we look at how home gaming and drone racing are using innovation to expand entertainment options.
20240909	12:30:00	13:30:00	MEFLOQUINE	Developed by the US Army after Vietnam to combat malaria in troops, Mefloquine became available to the public in the 90s. However, in the following decades it became most well-known for reports of its serious psychiatric side effects. Questions about why it has been so widely and easily dispensed have been raised for some time. The director's personal investigation seeks to understand why those affected have been left in the dark for so long. In doing so he uncovers some surprising truths about the powerful players involved in this controversial drug's story.
20240909	13:30:00	14:00:00	INSIDE OUTER SPACE - FERMI PARADOX, SOLAR WIND, NEPTUNE, THE GREAT RED SPOT, ROBOTS, DONUT PLANETS	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240909	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - NETHERLANDS: THE FLOATING HOUSES OF IJBURG	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240909	14:30:00	15:00:00	WONDER - ART OF ILLUSION	Seg 1 Animation. Animation is the process and technique that involves creating the illusion of movement from still drawings and inanimate objects. It is achieved by displaying images with slight variations in a rapid and successive manner thus making our eyes perceive the illusion of movement. Seg 2 Aviation Illusions. Aviation illusions are the sensory illusions associated with taking flight. When pilots take flight their vestibular system, the sensory system responsible for balance, is affected by conflicting stimulus from what the pilot sees and feels during flight. Seg 3 Spinning Dancer. The spinning dancer illusion is an illusion that was created by Nobuyuki Kayahara. One can either perceive the dancer as spinning clockwise or counter clockwise. This phenomenon is explained by Bistable perception which states that perception can be altered subjectively just by how an object is observed. Seg 4 Mirage. Mirages are a physical optical phenomenon that can be observed when there is a difference in the temperature in the surrounding air of an area. The different temperatures of the air causes light to refract and cause weird distortions when viewed at the correct angle. This can range from weird reflections to

This hot spot for "in the know" travelers feature white, sandy beaches and is surrounded by tropical plant life. Bill introduces both the armchair and actual traveler to this incredible destination. We explore the Portuguese influence on Goa's architecture and cuisine, tour the ghost city of Old Goa and explore Roman Catholic churches.
20240909	15:30:00	16:00:00	JOURNEYS IN INDIA - GIR: THE LAST REFUGE OF THE LION	The desert of Gujarat is hardly the place one expects to encounter a lion, but in the scrub forest of the region Bill does exactly that. Join him as he tracks the lion and many less dangerous creatures from spotted deer to owls and parrots. Around the campfire at night meet the local dance group who is preserving the traditional dances of the area people. A unique experience in a unique region.
20240909	16:00:00	16:30:00	NATURE'S FORCE - EP. 06	What is La Nina and how is it being monitored? Find out the effects and the reach that this system is influencing. How did Indian Summer get its name and what is the science behind the phenomenon? Winter is the season that has the biggest effect on the planet, animal behaviour and often brings out the worst that nature can bring. Nature's Halo is a magical sight with a scientific explanation. The story of and lessons from Hurricane Katrina give us a great understanding of the ferocity and speed that nature can unleash
20240909	16:30:00	17:00:00	BLUE WORLD	In the Flower Garden Banks National Marine Sanctuary, Jonathan investigates some of the densest coral reefs in the Caribbean as they spawn under cover of darkness. Then he heads over to Silver Springs for the Sea Hunt Forever Festival, celebrating the classic TV show Sea Hunt and the vintage scuba gear that was used on the program.
20240909	17:00:00	17:30:00	JOURNEYS IN AFRICA - MOMBASA: THE CENTER OF IT ALL	Gold, ivory and slaves drove the economy of the East coast of Africa 500 years ago. Join us as we explore the Portuguese and Arab roles in these horrific trade schemes. We'll also investigate the pristine waters off the coast of the nearby National Park where our host dons a snorkel mask and comes face-to-face with the creatures of the coral reef.
20240909	17:30:00	18:00:00	JOURNEYS IN AFRICA - ARUSHA/MANYARA: HIDDEN WONDERS OF THE NORTH	The Great Rift Valley is actually where the continent of Africa is literally tearing itself apart. It's a geologic phenomenon where one side is a rainforest full of colorful birds and strange monkeys and the other, a large lake centered on a vast plain. Two bordering eco-zones...double the wildlife.

20240909	18:00:00	18:45:00	PAST HUNTERS - S1 EP 01: BULKELEY HOTEL	The former home of Queen Victoria is now home to many spirits who have been seen by guests and staff. Witness the first ever formal documentation of the paranormal activities in the Bulkeley Hotel.
20240909	18:45:00	19:15:00	RACE OF LIFE - EP. 06	Males and females of most species will fight viciously in self-defense. And females, can be even more aggressive than males when defending their young. In this episode we'll explore the Race of Life from the point of view of food, territory, social status, and mates. Though some fights occur between two different species, most battles are fought between members of the same species. Though the wildlife warriors in these battles usually are not trying to kill each other, the fighting can result in death. Why would members of the same species fight with such ferocity? Food is one reason. Animals that store and hoard food for survival will aggressively protect their pantries. Animals are also willing to fight to protect their food indirectly. For example, predators will defend a territory that provides them with enough prey, or food, to survive. This territorial aggression serves to space out members of a species across their range in a way that maintains sufficient food within each territory. But it also may limit population size. For example, if a pack of wolves cannot find, defend, or take over a suitable territory, the members may starve to death. Though food, territory,
20240909	19:15:00	19:40:00	EUROPEAN ISLANDS EP - 06: RHODOS	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240909	19:40:00	20:05:00	BIG COAST - RIVERS INLET TO PORT HARDY	Trolling coho at Calvert Island and on a big Chinook Salmon quest Southbound around Cape Caution and Port Hardy!
20240909	20:05:00	20:30:00	BIG COAST - PORT HARDY CHINOOK	Trolling monster Chinook Salmon with Big Jim Henschke outside Port Hardy, BC!
20240909	20:30:00	21:25:00	SCOTSTAR - EP. 1	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240909	21:25:00	22:00:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - NAGALAND	High in the eastern mountains in a remote corner of India, Soumik encounters the Naga tribes. They teach him about their mysterious customs, chicken dances and head-hunting traditions, part of a unique identity at the brink of extinction. The Nagas wish to preserve.
20240909	22:00:00	22:30:00	DESPERATE HOURS - EP. 01	In this episode we contemplate, from a safe distance, the lethal majesty of volcanoes. One of the planet's most destructive as well as spectacular natural forces. It is estimated there are up to 4,000 volcanoes on the Earth, of which annually about 50 are active volcanoes above sea level, emitting – in their eruptions – millions of tons of dust, ash and gases and endangering the lives and property of millions of people. Our trip around the earth and earthquakes takes us to some interesting places. Such as the famously hard to pronounce, Eyjafjallajökull. This air traffic halting volcano is located in Iceland, which has long been known as the land of ice and fire! So far, a spectacular inconvenience, but for tomorrow who can say? Whether Iceland or that other volcanic hotspot Indonesia, Volcanoes are a potent reminder that at any moment old mother nature has the power to change everybody's plans. Most especially with a so-called supervolcano, like the one at Yellowstone Park. Under Yellowstone lies the largest magma chamber in the world. Studies indicate the likelihood of the supervolcano erupting is five to ten times higher than the likelihood of Earth being hit by an asteroid.

20240909	22:30:00	23:00:00	DESPERATE HOURS - EP. 02	Earthquakes have always been with us, but it is really only in the last 50 years or so, that their devastating impact has been captured so vividly - not only in photographs but in moving images, broadcast around the world at first via television, and in the last 20 years or so over the internet. Some of the images that have been captured on film or tape go beyond human capacity to describe. So the earth really moves in this episode, as we take in scenes and stories from some of the most devastating of all natural cataclysms. The earthquake, in all its destructive power! Of all the natural disasters we look at in this episode, none releases more sheer destructive energy than an earthquake. After all, it takes a great deal of the Earth's energy, for two of its magnetic plates to grind against each long enough, that they go snap - and jolt the planet's outer crust for hundreds of square miles! Most earthquakes take place within the so-called 'Ring of Fire' around the Pacific Ocean. At least once a year Alaska experiences a 7.0 earthquake. California alone gets about 10,000 quakes a year, but most go unnoticed except by seismographs.
20240909	23:00:00	23:30:00	DESPERATE HOURS - EP. 03	This gets personal, meaning in this episode we really get under the skin with something that is a threat to us all, wherever we live. The epidemic and its global big brother the pandemic. Earthquakes, tornadoes, floods, volcanoes and all the cataclysms that threaten human life: all of them are terrifying in their own way. But perhaps nothing is more chilling the threat of disease. In recent times, the threat of not merely an epidemic, but a pandemic which could annihilate mankind has somehow never seemed more real. But before we hit the Panic Button, let's brace ourselves by calmly and coolly examining the facts. That means squaring up to the realities of Ebola and Cholera in Africa, SARS and Bird Flu, principally in Asia, but with potential to go global in a flash. There is Smallpox we seem to have defeated, but that's what was thought about Cholera just a few years back - and Cholera has had a resurgence recently. If we as a species are to endure, we have to be ever vigilant as individuals - don't forget to wash your hands before you handle food for example. But we must also be able to act collectively, when the germ warfare is
20240909	23:30:00	00:00:00	DESPERATE HOURS - EP. 04	In this installment, we turn up the heat to examine a natural phenomenon that is both a friend, and a foe to humankind. Some 2 to 400 thousand years ago our ancestors had learned how to create and control fire..... a step vital to human development. We won't quite be going back quite that far on this episode, but we do travel back in time to remind ourselves that dangerous and deadly fires are a fact of life, as immutable as the wind, the rain or the seasons. They can happen anywhere: a smart departmental store in the center of Brussels, a nightclub on Rhode Island where a band called Great White came to play. Their special effects pyrotechnics show caught fire alright. When it did, it killed 100 people, injuring dozens more. Whatever the time and place, firefighters are still expected to go rushing into a burning building as everyone else goes rushing out. Firefighters are required to pull heavy lengths of hose, to scale stairs while carrying giant power tools, and lift 35-foot long wooden ladders.
20240910	00:00:00	00:55:00	VERSAILLES FURNITURE	Via six masterpieces, the film reveals the beauty of the spirit of Versailles of the 17th and 18th centuries. A unique homage to the people that crafted it, the furniture reveals the personal tastes of its commissioners, and portrays something that has ceased to exist! These unique items of furniture that once belonged to Louis 14th, Louis 15th, Marie-Antoinette and Louis 16th have fascinating stories to tell: the tortoise-shell chest-of-drawers with inlays of brass; an astronomical clock - a veritable miracle of science; the most emblematic example of French furniture art in the world - the King's Desk; and the exquisite items made for Marie-Antoinette - the queen's jewellery case and the wheat-sheaf furniture.

20240910	00:55:00	01:50:00	THE FLYING FIREFIGHTERS OF VALENCIA	In recent years, the number of forest fires has consistently increased, especially in Catalonia. The loss of forest land is endangering the cultural and natural habitat of the Northwestern Mediterranean. This report accompanies Chimo and his colleagues through last years' fire season. The "Avialsa" Flying Firefighters squadron operates in the woodland areas around the western part of the Mediterranean Sea. Flying close above the flames ensures the greatest chance of success for the firefighters: the closer they can get their water cargo to the fire source, the quicker they can get the flames under control. Joaquim Miniana, "Chimo" for short, and the pilots of the "Avialsa" firefighting plane squadron in the Spanish province of Valencia are fighting against increasingly long, hot summers.
20240910	01:50:00	02:45:00	GEORGIA, CRADLE OF WINE	360° GEO - Report portrays a changing wine region that is torn between the ancient traditions of its soviet heritage and modern market requirements. In the Soviet era, Georgia was said to be the wine cellar of the USSR. Even after the collapse of the huge empire, wine remained one of the country's most important export goods. But since Russia has imposed an embargo, exports have declined dramatically. Georgia is now in search of new sales markets at a time when winegrowing in its Caucasus region is in full swing. Small winegrowers, cooperatives and winegrowing estates based on the Western model vie with each other for quantity and quality.
20240910	02:45:00	03:40:00	SOKOTRA, ENDANGERED TREASURE ISLAND	Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihini finds it hard to make ends meet with just his herd of goats. Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihini finds it hard to make ends meet with just his herd of goats.
20240910	03:40:00	04:35:00	PICASSO: A MUSEUM REBORN	Behind the scene of the Paris Picasso Museum. Picasso Museum opened its doors in 1985 revealing the most important collection of Picasso's works of art to the world. More than 300 paintings, 1000 drawings, 100 sculptures given to the French State as inheritance rights. Housed in the beautiful Salé Hotel in the heart of the Marais in Paris, Picasso Museum has closed its doors in 2010 to undertake major modernisation and refurbishment works aimed at multiplying the exhibition surfaces by three. For more than a year, this film will follow in the footsteps of Anne Baldassari, Head of the Museum and among worldwide's experts of Picasso' work, when she monitors the works' progress of the new Museum that will reflect the new vision of the artist's work of art, but also during the establishment of temporary exhibitions of the collection that she organises throughout the world during renovation (USA, Australia, Canada, China, Indonesia, Malaysia, Italy, Spain). A companion documentary which recounts the re-opening of the Picasso Museum in Paris, the largest public collection of artist's work in the world. Come behind the scenes and witness all the preparations leading to the reopening of this Museum.
20240910	04:35:00	05:00:00	TRAVEL THRU HISTORY - LAS VEGAS	In this episode we explore Las Vegas' lesser known past. We visit the National Atomic Testing museum to learn about how the desert outside of Vegas was used for testing America's secret nuclear weapons. We also visit the Mormon Fort, the first permanent non-native settlement in the area, as well as the Neon Museum.

20240910	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - PERU: IQUITOS, LIVING IN A FLOATING CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240910	05:30:00	06:00:00	MINDWORKS - OUR AMAZING BRAIN	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240910	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 09	The practice of hiring private armies goes back to ancient times, and the mystique associated with the mercenary warrior has been the subject of many historical studies and fictional characterizations. This episode of CQB takes a more contemporary look at a day in the life of a group of civilian contractors, and how their role has evolved on the modern battlefield. Using its "sub-second" analysis techniques and intimate first-person footage, CQB reveals the backgrounds, training and equipment of today's "soldiers for hire" and how private armies are re-shaping the way conflicts are conducted around the world.
20240910	06:30:00	07:25:00	HIDDEN TRACES	This was the « other » Second World War – the one in the Pacific, confronting the Japanese Imperial Army to the Americans. Although not as famous as the war that raged in Europe, this conflict was just as ferocious and central to our collective memory.
20240910	07:25:00	08:00:00	EVERYDAY ELEMENTS - CARBON, GOLD, NEON, ZIRCONIUM, ANTIMONY	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240910	08:00:00	08:25:00	TRAVEL THRU HISTORY - HOOVER DAM	Marvel at the site of America's most famous water dam. We'll learn about how the Hoover Dam was built, why it's necessary, and take a behind the scenes look at its inner workings.
20240910	08:25:00	08:50:00	JOURNEYS IN INDIA - UDAIPUR AND JAIPUR: INDIA'S NATURAL BEAUTIES	Whether you refer to Udaipur as the City of Lakes or the City of Dawn, you are sure to agree that romance and beauty fill the air. While traveling by boat, we visit the many palaces and temples on the shore. We also tour the majestic City Palace and the Garden of the Maids of Honor. In Jaipur, we tour the Pink City, paying close attention to such architectural treasures as the Palace of Winds (Hawa Mahal) and the Amber Fort. We also visit the magnificent collections housed in the City Palace.
20240910	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - DOMINO'S PIZZA, FORTUNE COOKIES, GADGETS	It's cheesy and eaten all over the world! You'll learn how DOMINICK'S PIZZA became DOMINO'S PIZZA . And we all know how going to a circus wouldn't be complete without fluffy sweet COTTON CANDY! We'll explain how this feathery goodness SPUN to life! And all the spy action heroes use them, but where did the term GADGET really come from?

20240910	09:15:00	09:45:00	RACE OF LIFE - EP. 10	Some have powerful strides and flashing teeth, some employ poisons and trickery, so we know for sure that predators are well equipped for survival. But this episode reveals the unique ways in which animals protect themselves. Obviously, being able to flee a predator is the choice of many prey animals but there are also very interesting methods of defense which involve deception and chemistry. These include using toxic chemicals, camouflage, and mimicry. Insects that look like leaves, snakes that play dead, fish that fly, and toads with poisonous skin, these animals are among the many creatures that defend themselves in fascinating ways. Almost every animal is hunted as food by some other kind of animal and has developed ways to defend itself against predators. The relationship between predator and prey is a bit like an evolutionary arms race. As soon as one develops a weapon or defense mechanism, the other is working on an adaptation that allows them to circumvent that mechanism. Common defense mechanisms include claws, teeth, camouflage, poison, mimicry, and adaptations like echolocation. Some animals will spray toxic or foul smelling liquids at predators. Many animals have developed sophisticated defense mechanisms to help them
20240910	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 07: LA GOMERA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240910	10:15:00	10:40:00	EVERYDAY ELEMENTS - SODIUM, OXYGEN, ARGON, ARSENIC, ZINC	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240910	10:40:00	11:10:00	EVERYDAY ELEMENTS - PLATINUM, IODINE, ALUMINUM, IRON, TUNGSTEN	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240910	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 10: PALM SPRINGS HIKING	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240910	11:35:00	12:00:00	OUT OF TOWN ADVENTURES - S1 EP 11: TEMECULA	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240910	12:00:00	12:30:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.

20240910	12:30:00	13:30:00	MEET MY WILD FRIEND - HAPPY FEW	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.
20240910	13:30:00	14:00:00	INSIDE OUTER SPACE - MILKY WAY, ENECLADUS, SATURN, TIDES, ECLIPSE, LOOKING INTO THE PAST	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240910	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - VIETNAM THE TUNNEL HOUSES OF HANOI	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240910	14:30:00	15:00:00	WONDER - PHENOMENAL	Seg 1 Iridescence. Iridescence is the phenomenon where surfaces reflect a multitude of colors at once and could change color perspectives upon shifting the angle of viewing. Iridescence is caused by interference, where light gets reflected or cancelled out by the structures of the surfaces. Seg 2 Chemiluminescence. Chemiluminescence is the phenomenon of producing light energy through chemical reactions. The byproduct of a chemiluminescent reaction, instead of heat energy, is a photon or a light particle. Only selected compounds are capable of producing chemiluminescence, usually highly oxidized compounds when reacting with another compound. Seg 3 Bioluminescence. Bioluminescence is a form of chemiluminescence, only that this occurs in living things. Special compounds collectively called as luciferin oxidizes upon catalysis by enzymes called luciferase, producing oxyluciferin. Upon decay, oxyluciferin releases photons or light particles. Bioluminescence serve different functions for each organism, but all for survival purposes. Seg 4 Gemstone Coloration. A gemstone acquires its color through elements that are essential to its structure or through impurities, or elements that replace some of the metallic ions in
20240910	15:00:00	15:30:00	JOURNEYS IN INDIA - GIR: THE LAST REFUGE OF THE LION	The desert of Gujarat is hardly the place one expects to encounter a lion, but in the scrub forest of the region Bill does exactly that. Join him as he tracks the lion and many less dangerous creatures from spotted deer to owls and parrots. Around the campfire at night meet the local dance group who is preserving the traditional dances of the area people. A unique experience in a unique region.
20240910	15:30:00	16:00:00	JOURNEYS IN INDIA - NEPAL: KATHMANDU AND CHITWAN NATIONAL PARK	Just north of India is a land steeped in mystery—Nepal. Bill tours the city of Kathmandu, visits the World Heritage temple complexes, and walks along the city streets, where ancient and modern vie for space. We fly around Mount Everest, arguably the world's most famous mountain, before heading into Chitwan National Park. In Chitwan, Bill searches for tigers from the back of an elephant and observes the myriad of wildlife that call the park home.
20240910	16:00:00	16:30:00	NATURE'S FORCE - EP. 07	Weather is universal and it's also Extra Terrestrial. Learn about space weather and how it can impact us on earth. Supercells are unique storms that scientists have learnt to measure into three types. Under the earth's crust, nature is extremely energetic, and we see this through the Volcano which acts as our eye into the forces beneath our feet. Learn about the purple buzzing glow called St Elmo's Fire, how it was named and were to look for it.

20240910	16:30:00	17:00:00	BLUE WORLD	Jonathan heads down to the shipwrecks of North Carolina (USA) to observe how these wrecks have become home to thousands of animals, including Sand Tiger sharks. But instead of chasing all the fish, the sharks are protecting many of them! Then, Jonathan visits the School for Field Studies in the Turks & Caicos Islands to learn how college students conduct fieldwork in their pursuit of degrees in Marine Studies. He helps tag sharks, study conch and investigate marine protected areas!
20240910	17:00:00	17:30:00	JOURNEYS IN AFRICA - ARUSHA/MANYARA: HIDDEN WONDERS OF THE NORTH	The Great Rift Valley is actually where the continent of Africa is literally tearing itself apart. It's a geologic phenomenon where one side is a rainforest full of colorful birds and strange monkeys and the other, a large lake centered on a vast plain. Two bordering eco-zones...double the wildlife.
20240910	17:30:00	18:00:00	JOURNEYS IN AFRICA - GREAT CITIES OF TANZANIA: COUNTDOWN TO HISTORY	To this day sisal, a rope making fiber plant, is a mainstay of the economy. Journeys tours the capital city of Tanzania and its diverse religious institutions before heading into sisal country. We'll learn about the German influences and the seldom heard story of Livingstone's final trip across Africa.
20240910	18:00:00	18:45:00	PAST HUNTERS - S1 EP 02: PLAS TEG	The county of Flintshire in Wales is said to be a land filled with ghosts and haunts. Plas Teg is said to be one of the "most haunted" houses in the area. With over 400 years of history, this place is sure to be the home of many an entity.
20240910	18:45:00	19:15:00	RACE OF LIFE - EP. 07	With predators practically always on the lookout for a meal, prey must constantly avoid being eaten. Any defensive adaptation that prey can utilize adds to the chances of survival for its species. Some adaptations are defense mechanisms which can give the prey an advantage against their enemies. The first is very direct and comes naturally. Animals can use speed as a very effective means of escaping predators. In the evolutionary history of big herbivores and the carnivores that prey upon them, the phrase "arms race" is only technically a metaphor. Antelope are literally born to run, and many of the things that chase them, such as the cheetah, are either masters of endurance or champion sprinters. The evolutionary story almost writes itself: over millions of years of chasing, and being chased, wherever predators evolved to move quickly, their prey were selected to run even faster. Except of course there's more to life than running for your life. An antelope's frame is under more demands than evading cheetahs—it also needs to travel long distances to follow food availability with the shifting rainy season. The ostrich meanwhile stands at one extreme of bird evolution, for although unable to fly, of all the birds the ostrich runs the fastest race of life. More
20240910	19:15:00	19:45:00	EUROPEAN ISLANDS EP - 07: LA GOMERA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240910	19:45:00	20:10:00	BIG COAST - VANCOUVER CHINOOK CLASSIC	Catch-and-release Chinook Salmon derby from Vancouver promoting Pacific Salmon Foundation!
20240910	20:10:00	20:35:00	BIG COAST - BAMFIELD TUNA SHOOTOUT	Chasing down Albacore Tuna 65 miles off West Coast Vancouver Island.
20240910	20:35:00	21:30:00	SCOTSTAR - EP. 2	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.

20240910	21:30:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - GOA	On Christmas eve, Soumik arrives in the ex-Portuguese colony of Goa. A global party hub and Orthodox coastal state in one, Goa is a state in flux. An ambitious, young Fado singer, and a wise, old violinist, bring to life the struggle that many Goans feel between a colonial past and modern future, a laid back lifestyle challenged by tourist and consumer culture.
20240910	22:05:00	23:00:00	ON THE CITIES' ROOFTOPS - PARIS	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...
20240910	23:00:00	23:55:00	ON THE CITIES' ROOFTOPS - NEW YORK	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...
20240910	23:55:00	00:50:00	SURROUNDED BY WAVES	The international scientific community is called on to take sides and provide solid answers. "Surrounded by Waves" explores the methods and motivations behind the most prominent research in the field and clarifies what we currently know, all with a mind to the social context behind the issue. Through an elegant blend of interviews, archives, experiments and 3D animation, the film clearly assesses the estimated risk linked to cell phones while offering a subtle observation of society's growing distrust of its industries and the unprecedented role of science in the debate.
20240911	00:50:00	01:45:00	NEW YORK - THE WORLD'S SMALLEST OPERA HOUSE	"If you can make it there, you can make it anywhere". That's the vision people from all over the world have of New York. This report takes a look behind the scenes of the world's smallest opera house, in the heart of New York. Tony Amato, the son of an Italian butcher, thought when he came to New York in the 40s that he could make it too by realizing his dream of owning an opera house. The house is 3 stories high and three windows wide. The hall feels no bigger than a living room, however its 107 seats are always sold out. Tony Amato continues to be the center and linchpin of this miniature opera. Tony is barely 5 foot tall, with his sneakers and the small, wiry man seems to be held up by his pant-suspenders. His voice is persuasive, his eyes bright. He conducts, sings, jumps, laughs and grumbles all at once. At 88 years of age, Maestro Tony Amato is in the middle of the season's last production.
20240911	01:45:00	02:40:00	JOHANA: MAKE UP AND MOTOR OIL	Colombia is the third largest exporter of coffee in the world. The main status symbol of its flourishing regions is the Willys Jeep. We met Johana, the only Willys female driver, who is entering this year's Willys contest. This is the jeep "that won the Second World War", the model that created the later legendary "Jeep". About 600,000 Willys Jeeps were manufactured by the US-Army during World War II. After 1945, many discarded Jeeps were delivered to Colombia, considered as "mula con motor", "donkeys with engines". Mostly men can be found behind the wheel. But Johana is an exception.
20240911	02:40:00	03:35:00	INCAN SALT	360° GEO - Report observed salt miners in the Peruvian Mountains. This documentary portrays the harsh day-to-day lives of the 'Salineros' as they work in a stunningly beautiful South American mountain landscape. The salt mines of Maras are situated in the highlands of the Peruvian Andes at an altitude of about 3.000 meters. They form a vast manmade labyrinth of salt wells. A thousand terraced wells collect the warm salty waters from the mountain. When the water evaporates under the strong sun, on the edges and bottom of the waterholes a precious white crust is left. This is Maras-Salt. To this very day, the descendants of the Incas harvest their "White Gold of the Andes" using this traditional method.
20240911	03:35:00	04:35:00	THE TIGERS FROM SCOTLAND	Narrated by Iain Glen, this film focuses on the fragile existence of the Scottish Wildcats, their status and what conservation efforts are being undertaken to ensure their survival.

20240911	04:35:00	05:00:00	TRAVEL THRU HISTORY - KEY WEST	It's island living in the Keys on this episode of TTH. We learn about the islands treasure hunting history at the Mel Fisher Museum. Then we'll explore Fort Jefferson, an isolated fort in the Gulf of Mexico that defended the islands. American literature enthusiasts will enjoy a look at Ernest Hemingway's Key West home, where some of his most famous works were penned.
20240911	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - PERU UROS THE FLOATING ISLANDS OF LAKE TITICACA	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240911	05:30:00	06:00:00	MINDWORKS - VISUAL PERCEPTION	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240911	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 10	From the elite ex-special forces personnel in charge of guarding heads of state in conflict zones to the two-person teams that protect CEOs in dangerous regions, modern-day bodyguards must be well versed in close quarter battle techniques. An immense amount of planning and preparation is involved in each operation. From air travel, car convoys and helicopter shuttles to basic foot traffic, a close protection squad must be completely tuned to the Who, What, Where and When of any given situation. This episode of CQB focuses on the complex day-to-day and minute-to-minute operations of these elite teams and the highly developed techniques they employ.
20240911	06:30:00	07:25:00	HIDDEN TRACES	Napoleon Bonaparte - Military genius and builder, he will then reign, without any intention to share his position, for over a decade and will engage, with his troupes, in many battles. His imperial army, which has reached 700 000 men, is considered in 1815, the greatest one in the world.
20240911	07:25:00	08:00:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240911	08:00:00	08:25:00	TRAVEL THRU HISTORY - PHILADELPHIA	The city of brotherly love does not disappoint history lovers. We visit Independence hall, the liberty bell, Elfreth's alley, the Philadelphia Museum of Art, and get creeped out at America's first penitentiary, Eastern State.
20240911	08:25:00	08:50:00	JOURNEYS IN INDIA - HYDERABAD: THE LAKE CITY	Join us as we discover the amazing history of this ancient city through its religion, royal lineage, architecture and art. In the markets, Bill shows you how to buy souvenirs like a pro. We visit the Golconda Fort where the ultimate in diamond souvenirs originated. And, of course, no visit to Hyderabad would be complete without taking a look at its high-tech and movie industries, which have revolutionized the city.

20240911	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - MONOPOLY, AREA CODES, TUXEDO	Take a trip to the Jersey Shore and learn how one of its famous boardwalks helped to inspire the iconic board game of MONOPOLY. And how did a donkey and an elephant become associated with politics? Plus, what's the difference between TOP GRAIN LEATHER and FULL GRAIN LEATHER?
20240911	09:15:00	09:45:00	RACE OF LIFE - EP. 11	Almost all animals living in the sea are predators - from small fish to great white sharks and starfish to giant squid. Their bodies have been designed and built to capture prey and avoid becoming prey themselves. Raiders of the Underwater Universe have evolved to become among the more efficient war machines of our planet. There are "predators lurking" as stone fish, cleverly disguising themselves to wait for unsuspecting prey which wander too close. In an episode that illustrates the Race of Life in an underwater world of dangerous predators with razor-sharp teeth, we will see sharks, barracuda and moray eels go about their grisly business. Underwater predators have adapted some fairly extreme measures to hunt and to survive. The fish of the reef need to be fast to escape the barracuda, with its lightning speed and pincushion teeth. And stay on the alert when they swim near the lairs of the moray eel, a large and lethal creature of perhaps surprising grace and beauty. They may be ambushed by the also elegant - but deadly - lionfish. The knitting needle spines of the lionfish are capable of injecting deadly venom. Or if equally unlucky, prey can be sucked into the huge mouth of a stonefish. With so many hungry mouths to feed, it's a jungle down there.
20240911	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 08: GRAN CANARIA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240911	10:15:00	10:40:00	EVERYDAY ELEMENTS - PLATINUM, IODINE, ALUMINUM, IRON, TUNGSTEN	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240911	10:40:00	11:10:00	EVERYDAY ELEMENTS - SILICON, FLUORINE, LITHIUM, BORON, CHROMIUM	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.

This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240911	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - THE KOROWAI, AT THE HEART OF THE FOREST	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240911	14:30:00	15:00:00	WONDER - SENSORY TRICKS	Seg 1 Visually-Evoked Auditory Response. VEAR or Visually Evoked Auditory response is the type of auditory perception where our brains perceive to hear sounds in response to seeing something. In the case of the jumping pylon illusion, a thud sound is perceived even though there is no sound accompanying the animation. Seg 2 Retinal Fatigue. Retinal fatigue is the term used to describe the condition when the photoreceptors in our eyes become tired or strained due to staring at one color for extend periods of time. The effect causes an afterimage of the complementary color to appear out of nowhere and will be temporarily visible for a few seconds. Seg 3 Müller-Lyer illusion. The Müller-Lyer illusion is an optical illusion where parallel lines of the same length appear longer when perceived with different pointed arrowheads drawn at the ends. Possible explanations suggest that our minds tend to look at overall length rather than just the line's parts or segments when processing the image. Another possible explanation is that our minds tendency to look at angled lines and perceive patterns of depth. Seg 4 Ames Room. The Ames room is a specially constructed room that features a distorted and skewed floor plan. when viewed from one angle, our brain is tricked into

20240911	15:00:00	15:30:00	JOURNEYS IN INDIA - NEPAL: KATHMANDU AND CHITWAN NATIONAL PARK	Just north of India is a land steeped in mystery—Nepal. Bill tours the city of Kathmandu, visits the World Heritage temple complexes, and walks along the city streets, where ancient and modern vie for space. We fly around Mount Everest, arguably the world's most famous mountain, before heading into Chitwan National Park. In Chitwan, Bill searches for tigers from the back of an elephant and observes the myriad of wildlife that call the park home.
20240911	15:30:00	16:00:00	JOURNEYS IN INDIA - TAMIL NADU: CHENNAI, PONDICHERRY AND MORE	Chennai, formerly known as Madras, can trace its roots back to a tiny fishing village. Bill explores the city's growth under the British East India Company, with visits to Fort St. George and the Fort Museum. We then travel to the nearby Sao Tome Basilica, the church and burial site of St. Thomas the Apostle. In Pondicherry, French influences can still be felt in the tree-lined streets, colonial mansions and cafés. Its beautiful setting on the Bay of Bengal makes Pondicherry a delightful place to spend the day. We also visit the ancient port city of Mahabalipuram, where the landscape is dominated by carved-stone architecture. The final highlight of our tour is the Descent of Ganga, which is the world's largest bas-relief carving.
20240911	16:00:00	16:30:00	NATURE'S FORCE - EP. 08	The beauty, magic, and the science behind the Auroras at both ends of the earth, show them to be more than just a protective magnetic layer. The technology used to measure Wind Speed is finely calibrated with an interesting formula. The Tides remind us of our connection to the moon and our place in the solar system and are monitored for any significant change can have implications for industry, communities, and our ocean life. Earthquakes often make news headlines so how are they measured and predicted and what can we learn from them about our planet? Acid Rain is a manufactured weather event, the result of manmade industry mixing with nature to result in international treaties to lessen emissions and pollution.
20240911	16:30:00	17:00:00	BLUE WORLD	In a shark-filled adventure, Jonathan travels to the Bahamas to meet Neal Harvey, a world-renown shark handler who will attempt to teach Jonathan how to put Caribbean Reef sharks into a relaxed state known as tonic immobility! Then, Jonathan heads to NASA's Neutral Buoyancy Lab in Houston, Texas (USA), where astronauts train for space walking underwater, in a giant pool about half the size of a soccer field. Jonathan gets a rare and fascinating look into this high-tech diving as he ventures underwater with the astronauts.
20240911	17:00:00	17:30:00	JOURNEYS IN AFRICA - GREAT CITIES OF TANZANIA: COUNTDOWN TO HISTORY	To this day sisal, a rope making fiber plant, is a mainstay of the economy. Journeys tours the capital city of Tanzania and its diverse religious institutions before heading into sisal country. We'll learn about the German influences and the seldom heard story of Livingstone's final trip across Africa.
20240911	17:30:00	18:00:00	JOURNEYS IN AFRICA - SAADANI NATIONAL PARK	This is one of the few national parks in Africa where the bush meets the ocean. The big game of Africa face off with the creatures of the deep. Our host goes a little rogue for supper and tries his hand at surf netting prawns after spending a day looking for the elusive elephants of Saadani.
20240911	18:00:00	18:45:00	PAST HUNTERS - S1 EP 03: THE BLOCK	The team investigate a disused factory in Burton-Upon-Trent. Reports of paranormal happenings are common and the team are ready for anything.

20240911	18:45:00	19:15:00	RACE OF LIFE - EP. 08	Predator versus prey: in this instalment we analyze three attack-escape scenarios involving bird predators and their prey. One is the climbing flight escape, another is horizontal speeding, and thirdly, there is turning and diving to avoid capture. Predator and prey attack-escape behaviour is another outcome of the evolutionary arms race. There is something about birds of prey that make us pay attention – maybe it is the inherent fear we all have that one will attack us – or perhaps it is just because they are seldom seen by most westerners. Regardless, birds of prey are fascinating and in this episode we examine some of the largest, mightiest and most spectacular raptors from around the world. We'll watch with fascination the Eagle, a large bird of prey that is a skilled hunter and highly efficient killer. These elegant predators do their best work in large open spaces, where they can fly high and see for miles and miles. Meanwhile, the fastest living animal on land, sea or sky is also a bird of prey. The peregrine falcon can be found from the arctic to the tropics, and for centuries has been a symbol of prestige. At the other end of the scale is a bird that
20240911	19:15:00	19:45:00	EUROPEAN ISLANDS EP - 08: GRAN CANARIA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240911	19:45:00	20:10:00	BIG COAST - PERCY WALKUS HATCHERY	Annual brood stock fishery from Percy Walkus Hatchery in Wuikinuxv, Rivers Inlet...conserving the largest Chinook on Earth!
20240911	20:10:00	20:35:00	BIG COAST - DUNCANBY LODGE SEASON KICKOFF	For 15 years the Big Coast Crew has remained completely committed to expedition boating, showcasing West Coast adventure and telling the tales of this final frontier. From iconic Chinook salmon to Grizzlies, Spirit Bear and Orcas, incredible wildlife roams this land and keeps watch over one of the last great coastal ecosystems on Earth. Each season, Big Coast runs the BC Inside Passage from Alaska and Prince Rupert Southbound through Great Bear Rainforest and Vancouver Island. It's an epic journey of 1,500 kilometres through pristine coastal waterways and wilderness. And each season, with marine weather, wildlife and fish migrations, is a little bit different. In the spirit of coastal conservation, Big Coast practices catch-and-release Tyee Chinook Salmon (over 30lbs) angling and only taking what you need. Going strong for 15 years, Big Coast features 13 new half hour episodes every year! A 300-mile boat trip from Vancouver to Duncanby Lodge in Rivers Inlet for Percy Walkus Hatchery Chinook Fundraiser!
20240911	20:35:00	21:30:00	SCOTSTAR - EP. 3	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240911	21:30:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - VARANASI	In the world's oldest city of Varanasi, Soumik explores a neighbourhood that has produced five generations of Indian classical masters. He meets widowed women singers who have committed their lives to the Hindu God, Shiva, and a young drummer with the talent to make it big. Dedication to fading classical arts is formidable in this timeless city of religion, tradition and rising commercial interests.
20240911	22:05:00	23:00:00	HIDDEN TRACES	"D-DAY" - June 6th 1944: Normandy landings Personal and daily items such as helmets, badges, bullets, weapons, cans have been uncovered by recent archeological digs. These traces left behind by soldiers and civilians on the battle ground and findings of underground passages and blockhouses kept secret provide new insights into 2WW History.
20240911	23:00:00	23:55:00	HIDDEN TRACES	On the 11th of November, 1918, the First World War drew to an end with a terrible toll... after a conflict unlike anything Humanity had ever seen before. For 4 years and 3 months, soldiers from at least 20 countries were plunged in the hell of trenches... caught under a deluge of bombs.

20240911	23:55:00	00:50:00	ROLL ON CINEMA	This film endeavours to show how the invention of cinema was in no way inevitable, and how it may well have been a mere accident. To pinpoint the start, it all began in the heart of Paris, in the depths of darkened room, on 28 March 1798, when Etienne-Gaspard Robertson gave one of his first screenings of his "Fantasmagoria" - making ghosts and spectres dance. But how did we move from perfecting the magic lantern to the cinematography of the Lumière brothers? The invention was born throughout the 19th century, out of the unpredictable crossing of two parallel research paths - that of philosophical toys and the photography of movement. Originally-named optical devices - such as the kinesiograph, the zoetrope, the praxinoscope and the phenakistoscope, without forgetting the photographic revolver or gun - associated the realm of toys with the realm of thought, reflecting both a fascination for the magical effects produced by animation and speed, and a desire to understand human anatomy, and analyse the phenomenon of vision. All these pre-cinema optical devices literally stemmed from a desire for spectacle and the will to acquire knowledge. Robertson, Reynaud, Plateau, Muybridge and Marey spearheaded the adventure. Thanks to these brilliant
20240912	00:50:00	01:45:00	CAMBODIA'S LAST BAMBOO TRAIN	This report climbs aboard the bamboo train, learns about its passengers and portrays life as it currently is in Cambodia. Without this bamboo train, people would not be able to go do their daily tasks such as going to work or to the doctor. Deep in the Cambodian Battambang region, a small bamboo train called "Norry" makes its way through rice fields and jungle passages. It is considered to be one of the most important lifelines into the poor region. But it looks like Norry's time is running out, because of the changes in Cambodia over the last years. More and more fields are being cleaned of land mines, new roads are being built, and many Cambodians are now able to afford a motorbike. The people fear that in a few years' time the bamboo train will stop operating.
20240912	01:45:00	02:40:00	GALICIA'S DEATH COST	360°GEO - Report accompanies goose barnacle fishermen on a trip to the deadly cliffs. But even there, the goose barnacle population is declining rapidly. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds.
20240912	02:40:00	03:25:00	MAN EATERS	The first documentary about the Human-leopard conflict in Sri Lanka, "Man Eaters: A Human Leopard Story" approaches the conflict by analyzing past and present cases of man-eating leopards in Sri Lanka and what led to their strange behavior. Unlike India, man-eating leopards in Sri Lanka are very rare.
20240912	03:25:00	04:10:00	007: FOR OUR EYES ONLY	In "For Our Eyes Only," get to know all the actors who have embodied the super spy: Sean Connery, George Lazenby, Roger Moore, Timothy Dalton, Pierce Brosnan, and Daniel Craig, their similarities and characteristics that differentiate each one when exhibiting his well-known charm, class and elegance, combined with physical and mental prowess, that makes 007 a real life super hero.
20240912	04:10:00	04:35:00	THE GLASS EYE	For the first time in medical history a patient with Alzheimer's disease managed to communicate his thoughts and feelings from the inside of the disease. William Utermohlen painted the slow and methodical destruction of his brain. With poetry and tenderness, this documentary shows us the painter and his work near-at-hand the creative process.
20240912	04:35:00	05:00:00	TRAVEL THRU HISTORY - SAVANNAH	We visit the old south and enjoy some sweet tea in Savannah. On this episode, we'll stroll the city's beautiful squares, as well as visit it's civil war past at Old Fort Jackson. Then, we head up the stairs of the famous Tybee Island lighthouse and visit the Savannah Railroad museum.

20240912	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - TOKYO THE MEGALOPOLIS OF MICRO-HOUSES	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240912	05:30:00	05:55:00	MINDWORKS - VISUAL DECEPTIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240912	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 11	Following the September 11 attacks, military presence became commonplace in New York and other American cities, and the counterterrorism forces were effectively given a "blank cheque" when it came to ensuring that another terrorist incident would never take place on American soil. This episode of CQB takes an in-depth look at who was selected to occupy elite anti-terrorist positions, what they were trained for, and how they were equipped: when opposing forces are using commercial airliners and chemical weapons, countermeasures are by necessity complicated and varied. CQB takes an intimate look at what it was like to be an officer on alert for chemical attacks in Washington DC, or an army reservist monitoring suspicious activities on the streets of NYC.
20240912	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - SINGITA PAMUSHANA	Karina has the fortune of visiting one of the top 10 safari lodges in the world and arguably the finest game reserve on earth: SINGITA PAMUSHANA, in the Malilangwe conservation trust. Karina describes the beautiful lodge and wines and dines in style. Karina experiences mating lions. Karina's adventurous guide Craig Van Zyl leads her to a grumpy black rhino that frazzles her nerves. Craig persuades Karina to observe elephants while they enjoy themselves wallowing in the mud, and they spend a night sleeping under the stars.
20240912	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - MANA POOLS NATIONAL PARK	Karina and Craig venture to the untamed Mana pools National park with Classic Africa Safari's in Zimbabwe. They camp in luxury safari tents on the bank of the mighty Zambezi river! This place, and the adventures that come with it, are absolutely amazing as Karina is nudged by a bull elephant and charged by a male lion! They canoe down the awesome Zambezi river, and finally get a chance to relax as they drink a sundowner in the fading light.
20240912	07:15:00	08:00:00	RV EXPLORERS S1 EP 01 - KAIKOURA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240912	08:00:00	08:25:00	TRAVEL THRU HISTORY - NASHVILLE	This country music Mecca has a plethora of American history to explore. We'll stand on the stage of the Grand Ole Opry, visit the home of the 7th US President Andrew Jackson, and visit the largest recreation of the Parthenon outside of Greece.
20240912	08:25:00	08:50:00	JOURNEYS IN INDIA - RANTHAMBORE & KEOLADEO NATIONAL PARKS	Ranthambore National Park is part of Project Tiger, a unique wildlife conservation program set up to insure the preservation of the magnificent Tiger. In Ranthambore we encounter the tiger along with Sambar and Blue Bull, Wild Boar and Langur Monkey. We also explore the historic side of Ranthambore which is dotted with ruins of the fort that protected the region for hundreds of years. We end the episode with a tour of a very different national park. Board a rickshaw and join your guide as he explores Keoladeo National Park, known for its abundant bird life.

20240912	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ZAMBONI ICE RESURFACING MACHINE, PISTACHIO NUTS, STARS	If you have ever gone to a hockey game, or gone ice-skating, there is ONE revolutionary machine that helps keep the fun and action going! And that's all thanks to the ZAMBONI® ICE RESURFACING MACHINE. You'll learn how and why it was invented! And ever notice some pistachio nuts are RED in color? We'll throw up the RED FLAG and explain why the color is simply a COVER UP!
20240912	09:15:00	09:45:00	RACE OF LIFE - EP. 12	The ocean can be an unforgiving place. Animals living in the sea have to deal constantly with finding food, and protecting themselves from predators. There are many ways of hiding, defending, and feeding, and every different technique has advantages for different animals. For example, some animals use camouflage to escape detection or to sneak up on their prey, while other animals have coloration which intentionally makes them stand out. Some creatures hide from predators, while others stay in groups, out in the open, relying on safety in numbers. Some animals have dangerous spines or venom for protection, but even the most venomous creatures must sometimes be wary of predators. Different animals have taken advantage of different food sources, some feeding at the top of the food chain, and others at the bottom. Protecting themselves underwater is also a matter of invention and reinvention, and aquatic animals deploy an array of strategies just to stay alive. They have quite the toolbox to dip into – Evolutionary strategms such as colour and camouflage, toxins and teeth! Nudibranchs, clown fish, squid, octopus and orca whales are just some of the wonderful winners in the underwater race of life. Underwater footage shot in the wild,
20240912	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 09: KERKYRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240912	10:15:00	10:40:00	EVERYDAY ELEMENTS - SILICON, FLUORINE, LITHIUM, BORON, CHROMIUM	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240912	10:40:00	11:10:00	EVERYDAY ELEMENTS - HELIUM, TIN, CALCIUM, PALLADIUM, LEAD	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240912	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 12: LAKE CHARLES	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. 20240912	13:30:00	14:00:00	MINDWORKS - THE BRIAN-EYE PROCESS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240912	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - INDONESIA THE TORAJA: LIVING IN THE CENTER OF THE UNIVERSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240912	14:30:00	15:00:00	WONDER - NATURE'S GAMES	Seg 1 Carrion flowers. Carrion flowers are the unorthodox perception of flowers for they are rare, big, and very unpleasant. Other terms are stink flowers and corpse flowers. The biggest flower in the world, rafflesia arnoldii, is a carrion flower. These flowers are difficult to find and reproduce and could breed through cross-pollination by attracting flies and dung beetles. Seg 2 Aposematism. Aposematism is a form of signalling that enables protection for both preys and predators by giving signs of poison and danger through showing off the bright colors and patterns on their epidermal layers that become associated with inedibility. Some species have developed mimicry based on aposematism in order to avail the protection aposematic colors give. Seg 3 Cuckoo Misdirection. Cuckoo misdirection demonstrates the mimicking abilities of a female cuckoo in order to find host nests to hatch her eggs. The female mimics a cry of a predator bird in order to frighten the hosts, leaving them vulnerable, thus the cuckoo can seize the chance to drop her egg on a host nest. Seg 4 Pheromones. Animal pheromones are the chemicals secreted and released by different species to communicate with other organisms. There are various types serving different purposes, ranging from reproduction, to trailing, to alarms. Some pheromones are also specific to one species of

20240912	15:00:00	15:30:00	JOURNEYS IN INDIA - TAMIL NADU: CHENNAI, PONDICHERRY AND MORE	Chennai, formerly known as Madras, can trace its roots back to a tiny fishing village. Bill explores the city's growth under the British East India Company, with visits to Fort St. George and the Fort Museum. We then travel to the nearby Sao Tome Basilica, the church and burial site of St. Thomas the Apostle. In Pondicherry, French influences can still be felt in the tree-lined streets, colonial mansions and cafés. Its beautiful setting on the Bay of Bengal makes Pondicherry a delightful place to spend the day. We also visit the ancient port city of Mahabalipuram, where the landscape is dominated by carved-stone architecture. The final highlight of our tour is the Descent of Ganga, which is the world's largest bas-relief carving.
20240912	15:30:00	16:00:00	JOURNEYS IN INDIA - OLD AND NEW DELHI: A CITY OF CONTRASTS	We explore the capital of India. The bustling metropolis is filled with modern skyscrapers that stand side-by-side with hundreds of ancient monuments, making Delhi a physical dichotomy of yesterday and tomorrow. In the old city, we travel by rickshaw through the narrow streets and discover a world that is quickly disappearing. Then it's on to the tomb of Humayun, whose architectural design inspired one of the Seven Wonders of the World, the great Taj Mahal. We visit 2 mosques that are in the record books: the very first mosque in Delhi and the largest mosque in India. Next we visit the National Gandhi Museum where we view personal items from Gandhi's life, visit a temple that's open to all faiths and complete the quickest tour of India, without leaving Delhi.
20240912	16:00:00	16:30:00	NATURE'S FORCE - EP. 01	Journey inside Dust Storms to see how they are formed and the hazards and effects they cause. A glimpse into the science of Clouds and how they fit into the weather cycle of the planet. The power of Lightening is more than visual, it is noise, electricity and it even helps plants to grow. Did you know that Rain droplets have different shapes and temperatures, it's maybe more interesting than you think?
20240912	16:30:00	17:00:00	BLUE WORLD	In this epic octopus adventure, Jonathan visits two aquaria to learn about the Giant Pacific octopus, and then travels to Seattle, Washington (USA) to join the Seattle Aquarium dive team on an octopus survey. He meets the Giant Pacific Octopus, the world's largest octopus, and discovers how clever this huge invertebrate really is!
20240912	17:00:00	17:30:00	JOURNEYS IN AFRICA - SAADANI NATIONAL PARK	This is one of the few national parks in Africa where the bush meets the ocean. The big game of Africa face off with the creatures of the deep. Our host goes a little rogue for supper and tries his hand at surf netting prawns after spending a day looking for the elusive elephants of Saadani.
20240912	17:30:00	18:00:00	JOURNEYS IN AFRICA - MIKUMI NATIONAL PARK	If there ever was a lost wildlife gem, it would be Mikumi. Here many of the Big Twelve live their lives against the backdrop of one of the most scenic parks in Africa. Bill takes a break from the wildlife safari to investigate the huge salt works at the edge of the park and how it may impact future conservation.
20240912	18:00:00	18:45:00	PAST HUNTERS - S1 EP 04: MILL STREET BARRACKS	Built in 1861 Mill Street Barracks is steeped in rich history. It has accommodated many branches of the armed forces throughout its life. Like many other barracks it has also been used as a morgue making it a prime location for the supernatural.
20240912	18:45:00	19:15:00	RACE OF LIFE - EP. 09	Crocodiles, like all living reptiles, they are descended from animals that roamed the Earth about 250 million years ago. There's something so viscerally terrifying about these creatures that lay in wait for their prey, just under the waterline. The comparatively friendly seeming turtle is among the most ancient of the reptiles alive today and have a protective shell that encloses their body and provides protection and camouflage, just as it did millions of years back. They inhabit terrestrial, freshwater, and marine habitats and are found both in tropical and temperate regions. Poisonous or harmless, large or small, all snakes - from the desert rattlesnake to the dwarf pipe snake - have certain things in common: a long, thin shape; scaly, legless bodies; and unblinking, lidless eyes. Like all reptiles, snakes rely on the heat of the sun to control their body temperature. The venom of the king cobra, the world's largest poisonous snake, is strong enough to kill an elephant. Lizards have developed their own adaptations - some lose their tail when in danger, as a means of escaping from a predator. In time the tail will grow back again. The tail they leave behind will

20240912	19:15:00	19:45:00	EUROPEAN ISLANDS EP - 09: KERKYRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240912	19:45:00	20:10:00	WHAT IN THE WORLD - EP 01	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240912	20:10:00	20:40:00	WHAT IN THE WORLD - EP 02	For over 24 years, East Timor (now known as Timor Leste) endured a crushing occupation inflicted on them by neighbouring Indonesia on the pretext of the fight against communism. The war was brought to a controversial conclusion in 1999. However, trauma from that period lives on as evidenced by the testimonies of Nelson Belo, Gregorio Saldanha and Pascal Oliveira, survivors of the infamous 1991 Santa Cruz Massacre. This film recalls the trauma of Timor Leste in this the tenth anniversary of its independence.
20240912	20:40:00	21:10:00	WHAT IN THE WORLD - EP 03	Timber is one of this country's biggest natural resources and the source of great potential wealth. Hence the existence of wholesale illegal logging, irrespective of the consequences to the local environment. This has led concerned parties to set up the Olancho Environmental Movement. This organization has mobilized to protect these forests, at some risk to its members, like Rene Gradiz, whose testimony is disturbing in the extreme.
20240912	21:10:00	21:35:00	WHAT IN THE WORLD - EP 04	Indris Seid Yimer and Emyet Assen Woraki's lives have been utterly transformed in the last thirty years. In 1984, they, their families and their community were engulfed in famine and devastation, a famine memorably described by BBC journalist Michael Buerk as "the closest thing to hell on Earth". Set in the Wollo area, the epicentre of the 1984 famine, the film tells their story. Other contributions featured are from people like entrepreneur Samuel Alemu and financier Ermyas Amelga. It also showcases the hauntingly beautiful UNESCO World Heritage site in Lalibela.
20240912	21:35:00	22:15:00	WHAT IN THE WORLD - EP 27	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240912	22:15:00	23:00:00	A YEAR IN THE WILD - EP.1	Rosemary catches up with the conservancy's rarest large carnivore, a coalition of 3 male cheetahs. The Pungwe pack get waist deep into their hunting as they pursue a wildebeest into a water pan. Denning season has begun. The pack are on the hunt for impala. Rosemary deals with a shocking snare removal. The splinters take on another herd of wildebeest.
20240912	23:00:00	23:45:00	A YEAR IN THE WILD - EP.2	A resident baboon on one of the ranches requires some human help to extract a snare. The splinters pack run into a coalition of cheetahs. Jess visits the new-born Splinters pups. Pungwe are on the hunt for big game as they take on formidable buffalo. The Splinters once again demonstrate their extraordinary hunting tactics.

20240912	23:45:00	00:40:00	CREATIVE KILLERS - EP. 01	Peppered across Africa are a few iconic locations that are renowned for killing action. Arenas bathed in a history of blood, places where Africa's icons have hunted successfully for generations. Predators here develop unique and clever ways to hunt. But the circumstances aren't the driving factor in this story. Sometimes these predators look for the perfect patch of ground to kill, a small area of long grass, or a single path that leads to the perfect ambush. How do they amplify their age-old skills by using the lie of the land? Savuti is big cat country. But only the most resourceful cats make it to the top. The Marsh Pride, Savuti's resident lions, is faced with their toughest challenge this winter: Buffalo. The complicated mix of boggy marsh, open plains and dense woodland provide extra obstacles in their path to a meal. Over centuries these heavyweights have adapted their hunting strategy to Savuti's every challenge and the buffalos' every move. And their secret: The nighttime hunt. When the sun sets, the tables begin to turn and Savuti is at the pride's mercy. But there's no shortage of challenges: Saba, the pride matriarch and most experienced hunter, has
20240913	00:40:00	01:35:00	DEPLETED URANIUM	More than 50 countries now possess weapons based on depleted uranium (DU). Experimentation has been rife, and the consequences for civilians and the military alike have been dramatic. This investigation compares and contrasts the arguments of those who defend and attack a technology that is highly toxic. For 20 years, scientists, doctors, veterans and activists have denounced the use of DU. Against them are the arms industry lobbyists and nuclear authorities who continue to minimise the risks. Through archive documents, interviews and in situ investigations, accompanied by key witnesses (victims, experts...) we aim to present a clearer picture of the issues and stakes linked to the use of DU. Quick-paced, with a sense of urgency, the film underlines the essential background and conflicting viewpoints, enabling viewers to make up their own minds about a subject that concerns us all.
20240913	01:35:00	03:05:00	THE MYSTERY OF THE DISAPPEARING BEES	An investigation into a worldwide ecological disaster that could endanger the whole of humanity. The future of our food resources depends on one small insect - the western honey bee, or Apis mellifera. Indeed, it is the most important agricultural pollinator on our planet given that one third of our food supply depends directly on pollination from bees. This documentary tells the story of a worldwide ecological disaster that has been waiting to happen for several generations. It was filmed over an 18-month period in France, Germany, the U.S., Canada and Scotland and retraces the various leads carried out by research scientists in order to try and understand and to stop the declining numbers of domestic and wild bees. Scientists are not the only professionals to figure at the centre of this drama. Beekeepers are in the front line, and striking contrasts exist among beekeepers' experiences in different countries, in various economic situations. The documentary seeks to understand how the long-enjoyed harmonious relationship between man and bee has now undergone such a radical change. It seeks to find a solution that goes beyond science. A solution that cannot
20240913	03:05:00	04:00:00	ALEXANDER THE GREAT, THE MACEDONIAN	A close look at Alexander the Great - from Macedonia to India. Alexander the Great has always enjoyed a unique status in history. To the Greeks and Romans, he was a hero, to the Arabs, he was a prophet, to Westerners, he is a myth. Alexander the Great spread Greek civilisation single-handedly throughout the ancient world, as far as the borders of India, by relentlessly pursuing his sworn enemy Darius the Great, King of Persia. But what remains today of the "real" Alexander? Of his life and environment? Through the many depictions of the hero and the archaeological traces of his triumphant conquest, this film portrays the legendary figure, who has always been, and continues to be, a great source of inspiration, even for artists of today.
20240913	04:00:00	04:35:00	AVIATORS S8 EP 2	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a broad range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!

20240913	04:35:00	05:00:00	TRAVEL THRU HISTORY - ST. AUGUSTINE	There's a lot to cover in the oldest city in America. Take a sip from the distinctively tasting Fountain of Youth. Then we'll cross the draw bridge of the undefeated Spanish Fort, the Castillo San Marcos. Then we'll learn the true history of pirates at the Pirate Museum.
20240913	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - JAPAN KYOTO: LIVING IN A TRADITIONAL HOUSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240913	05:30:00	05:55:00	MINDWORKS - ALTERED VIEWS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240913	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 12	No country other than France operates an elite military force that invites foreign nationals to serve in its ranks. With a reputation for being a safe haven for individuals with questionable pasts, the French Foreign Legion is a true mercenary army that has garnered significant respect within the global special operations community. This episode of CQB examines a raid by the Foreign Legion on a small airport in Iraq during the 1990 Gulf War, exploring the nature of the Legion, how it differs from other special forces, and how it prepares for a wide variety of close quarter battle scenarios in conflict situations around the world.
20240913	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - MANA POOLS NATIONAL PARK	Karina and Craig venture to the untamed Mana pools National park with Classic Africa Safari's in Zimbabwe. They camp in luxury safari tents on the bank of the mighty Zambezi river! This place, and the adventures that come with it, are absolutely amazing as Karina is nudged by a bull elephant and charged by a male lion! They canoe down the awesome Zambezi river, and finally get a chance to relax as they drink a sundowner in the fading light.
20240913	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - CAMP AMALINDA	Karina visits the awesome Matobo Hills national park. She spends a few days at the magnificent Camp Amalinda, nestled within the caves with the most intriguing character and wonderful views. Karina enjoys Amalinda's delectable signature dish. The very knowledgeable guide, Ian Harmer, leads her to one of the many cave painting spectacles. They go in search of the endangered white rhino and have a brush with near heart failure!
20240913	07:15:00	08:00:00	RV EXPLORERS S1 EP 02 - WHANGANUI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.

20240913	08:25:00	08:50:00	JOURNEYS IN INDIA - KERALA	Join us as we cruise the backwaters of Kerala, one of the most beautiful and serene areas of India. We explore the cities of Cochin and Kozhikode. Attend a local theatre performance and learn about traditional drama styles. The drama continues as we witness a local festival and then take in a display of the ancient art of Kalaripayattu. Bill helps raise the Chinese fishing nets at dusk and tour a 1000 year old boat yard, where luxury vessels are still handcrafted.
20240913	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - SWISS ARMY KNIFE, CUP OF JOE, HAMBURGER	If you ever go camping there is one thing you do not want to leave home without, the SWISS ARMY KNIFE! We'll explain how it evolved into the most famous knife in the world and how the company's name got "CUT" together! And where did the term CUP OF JOE come from as well as the word JAVA? And we all love a juicy HAMBURGER, so where did these chopped meat patties come from?
20240913	09:15:00	09:45:00	RACE OF LIFE - EP. 13	In this episode we explore the Race of Life on a small scale but no less competitive or cruel for all that. Insects burrow through the ground, hop and sing in the trees, and dart and dance in the air. They come in many different colors and shapes. There are many reasons why insects are so successful at surviving. Their ability to survive in all kinds of temperatures and environments. A strong, hard but flexible shell called an exoskeleton covers their soft organs and is resistant to chemicals, water and physical impact. Their wings give them the option of flying away from dangerous situations or toward food or mates. In this episode: Dragonflies hover like helicopters over ponds and lakes, then suddenly dart away, pursuing prey or other dragonflies. The monarch butterfly goes through a miraculous metamorphosis, changing from an egg to a hungry caterpillar to a quiet pupa and emerging as a beautiful winged adult. The praying mantis is master of disguise. Its green body, wings and legs merge into the green, leafy background so carefully it seems to be part of the grass. Perched at an angle, with its spiny forelegs raised in a prayerlike pose, the
20240913	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 10: MENORCA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240913	10:20:00	10:45:00	EVERYDAY ELEMENTS - HELIUM, TIN, CALCIUM, PALLADIUM, LEAD	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240913	10:45:00	11:10:00	EVERYDAY ELEMENTS - NITROGEN, MERCURY, COPPER, MAGNESIUM, COBALT	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240913	11:10:00	11:35:00	OUT OF TOWN ADVENTURES - S1 EP 13: ENGLAND - SCOTLAND	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. Season 1 visits attractions from California to Rwanda, Switzerland, Iceland, Utah, Zambia, Mexico, The Grand Canyon, Georgia (the Eastern European one) Louisiana, Hawaii, Mauritius and Seychelles. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240913	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 1	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240913	12:00:00	12:30:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240913	12:30:00	13:30:00	MEET MY WILD FRIEND - ACTIVISTS	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.
20240913	13:30:00	14:00:00	MINDWORKS - OUR AMAZING BRAIN	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240913	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - AUSTRIA VORARLBERG THE GREEN VALLEY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240913	14:30:00	15:00:00	WONDER - PERCEPTION	Seg 1 Saccadic Eye Masking. Saccadic eye movements are characterized as the fast movement of eyes when perceiving motion. These are so fast that they are blurred. To compensate for the blurriness, our brains mask these blurred visions to help us see a completed albeit masked version of sight. Seg 2 Plant Movement. While plants do not exhibit movement for locomotion or moving from place to place, they still exhibit movement in response to different stimuli. These movements are plant adaptations for food production, plant reproduction and survival. Seg 3 The Language of Color. Language plays a major role in how people from different parts of the world perceive color. The fact that some languages completely lack terms for some colors that other languages have come to know offers insight on how much influence it has on the way people see colors. Seg 4 Color Blindness. Color blindness is the condition that makes people not able to properly see and perceive colors. Color blindness is the result of damaged or underdeveloped rods and cones. these are the light sensitive cells that can be found in the part of our eyes known as the retina which are responsible for seeing colors. Color blindness can either be

20240913	15:00:00	15:30:00	JOURNEYS IN INDIA - OLD AND NEW DELHI: A CITY OF CONTRASTS	We explore the capital of India. The bustling metropolis is filled with modern skyscrapers that stand side-by-side with hundreds of ancient monuments, making Delhi a physical dichotomy of yesterday and tomorrow. In the old city, we travel by rickshaw through the narrow streets and discover a world that is quickly disappearing. Then it's on to the tomb of Humayun, whose architectural design inspired one of the Seven Wonders of the World, the great Taj Mahal. We visit 2 mosques that are in the record books: the very first mosque in Delhi and the largest mosque in India. Next we visit the National Gandhi Museum where we view personal items from Gandhi's life, visit a temple that's open to all faiths and complete the quickest tour of India, without leaving Delhi.
20240913	15:30:00	16:00:00	JOURNEYS IN INDIA - GREAT CAVES OF AJANTA AND ELLORA	Caves have held a special place in human development. The Hindu, Buddhist and Jain caves in these two UNESCO sites contain some of the most beautiful carvings and paintings found in Asia. This episode explores the history and relationship between these religions.
20240913	16:00:00	16:30:00	NATURE'S FORCE - EP. 02	Heatwaves have caused cities to literally meltdown and systems to fail, how are we working with nature's heat? When two Cyclones collide, we get the Fujiwhara Effect, how is this possible and how does it manifest? Floods occur around the world and the world is learning how to cope, combat and prevent damage and share lessons. How do you classify a Blizzard, and let's look at some of the worst blizzards that have occurred on earth. Do you really know how to measure Rainfall and how to identify violent rain from a shower or appreciate when we have had enough or too much?
20240913	16:30:00	17:00:00	BLUE WORLD	Jonathan joins shark researcher Dr. Stephen Kajiura to test how well wild sharks can detect electrical fields in their environment. Then, he heads to New Jersey (USA) to learn how to dive in the Mark V commercial diving helmet! Finally, he ends up in the Gulf of Mexico to learn how oil platforms can actually become a healthy artificial reef and attract marine life from miles around.
20240913	17:00:00	17:30:00	JOURNEYS IN AFRICA - MIKUMI NATIONAL PARK	If there ever was a lost wildlife gem, it would be Mikumi. Here many of the Big Twelve live their lives against the backdrop of one of the most scenic parks in Africa. Bill takes a break from the wildlife safari to investigate the huge salt works at the edge of the park and how it may impact future conservation.
20240913	17:30:00	18:00:00	JOURNEYS IN AFRICA - MASAI MARA: WHERE LION IS KING	In this first of a two-parter on the Mara, we follow the migration in anticipation of the famous river crossings. We find all three big cats and hyena waiting for their chance to get their share of the migrants. During migration, the animal numbers are staggering.
20240913	18:00:00	18:45:00	PAST HUNTERS - S1 EP 05: HACK GREEN'S SECRET NUCLEAR BUNKER	The Hack Green Secret Nuclear Bunker is a former government-owned nuclear bunker located at Hack Green, Cheshire, England. It Started as a decoy site for enemy bombers but later developed into a legitimate base. Now it is ripe with hauntings.
20240913	18:45:00	19:15:00	RACE OF LIFE - EP. 10	Some have powerful strides and flashing teeth, some employ poisons and trickery, so we know for sure that predators are well equipped for survival. But this episode reveals the unique ways in which animals protect themselves. Obviously, being able to flee a predator is the choice of many prey animals but there are also very interesting methods of defense which involve deception and chemistry. These include using toxic chemicals, camouflage, and mimicry. Insects that look like leaves, snakes that play dead, fish that fly, and toads with poisonous skin, these animals are among the many creatures that defend themselves in fascinating ways. Almost every animal is hunted as food by some other kind of animal and has developed ways to defend itself against predators. The relationship between predator and prey is a bit like an evolutionary arms race. As soon as one develops a weapon or defense mechanism, the other is working on an adaptation that allows them to circumvent that mechanism. Common defense mechanisms include claws, teeth, camouflage, poison, mimicry, and adaptations like echolocation. Some animals will spray toxic or foul smelling liquids at predators. Many animals have developed sophisticated defense mechanisms to help them

20240913	19:15:00	19:50:00	EUROPEAN ISLANDS EP - 10: MENORCA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240913	19:50:00	20:20:00	WHAT IN THE WORLD - EP 05	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240913	20:20:00	20:50:00	WHAT IN THE WORLD - EP 06	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240913	20:50:00	21:20:00	WHAT IN THE WORLD - EP 15	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240913	21:20:00	21:45:00	WHAT IN THE WORLD - EP 08	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240913	22:10:00	22:35:00	NEW FRONTIER - FROM THERE TO HERE	Series introduction and the study of Earth from orbit. The sky above is littered with stars and countless galaxies. It is where we come from and where we are destined to return. The first phase of this journey is complete, now commences the second, with robotics, advanced technologies and sheer daring we are now going where before we only dreamt.
20240913	22:35:00	23:00:00	NEW FRONTIER - RETURN TO THE MOON	The Moon, our closest celestial companion. Our indispensable dance partner through the cosmos. Lighting our night sky and gently tugging at our shores. Few have walked on her surface, though her allure remains strong, once again we are glancing her way with renewed interest and with a view to return very soon.
20240913	23:00:00	23:25:00	NEW FRONTIER - THE INNER WORLDS	They orbit between us and our Star, the inner worlds; hidden within the sun's glare often only visible at sunrise or sunset. Venus the first and brightest star in the evening sky, and Mercury fleeting across the solar disk. They are half of our solar system's terrestrial planets yet we know so little. As we begin to take a closer look at our companions they are posing more questions than answers.
20240913	23:25:00	23:50:00	NEW FRONTIER - NEXT STOP MARS	It has fired our imaginations for millennia, Mars, the God of War and the source of Man's science fictional demise. We know the dry barren planet was once flowing with vast reservoirs of water, the sky thick and filled with clouds and the tantalizing possibility of life. It is the only other place in our solar system than Man might one day call home.
20240913	23:50:00	00:45:00	UNBREATHABLE CITIES ON THE VERGE OF ASPHYXIATION	With an epidemic of cancers among adults, and widespread asthma among children, China and India are on a constant health alert. Nor is the rest of the world free from harm as the pollutants are travelling.
20240914	00:45:00	01:40:00	WORLD AFTER FUKUSHIMA	The derisory dosimeters, located at crossroads and hanging around children's necks, are a constant reminder of the invisible monster and of the deadly particles people attempt to retain by placing bottles of water on windowsills. 2 years on, in the region of Fukushima, people's lives - or at least their "existences" - carry on, as they integrate radioactive pollution into their daily lives. Beyond the earthquake and the tsunami, the nuclear catastrophe has revealed the shortcomings of a system and its criminal arrogance. And everyone remembers with dread the series of errors and procrastinations that sealed their fate, as politicians preferred to "downplay the situation instead of reducing risks".
20240914	01:40:00	02:35:00	KYUCHU: WHERE THE GREEN TEA GROWS	This report shows how the famous Japanese green tea is cultivated, explores its healing power and explains how deeply the tea has penetrated Japanese society. For the Japanese people, green tea is more than just an ordinary beverage. It is the key to the national culture - it combines enjoyment, philosophy and the art of living. In springtime, the entire country waits for the first flush, the very first harvest of the precious Sencha tea from the island of Kyushu, the world's biggest organic tea production region.
20240914	02:35:00	03:30:00	THE HAWKDOCTOR OF ABU DHABI	360° GEO - Report visits takes a trip to the vet and accompanies the doctor on her daily mission dedicated to the feathered treasures of the sheiks. Falcons are an inherent part of Arab culture in the United Arab Emirates. For centuries, the country has traditionally hunted with the impressive raptors. Almost every family owns at least one falcon. The German lady veterinary Margit Müller takes care of these precious birds of prey's health. She is the manageress of the "Abu Dhabi Falcon Hospital" - the biggest Falcon Hospital in the world.

20240914	03:30:00	04:10:00	LOVE & MARRIAGE: THE LEGEND OF KALINGA	The Legend of Kalinga is a beautifully narrated journey to the village of Buscalan located in Kalinga, North of Luzon in the Philippines to explore the ancient culture of the Kalinga tribe through an ages-old love story. Whang-Od is the last female "Mombobtok" tribal tattoo artist of the Kalinga. Today she is 103 years old and is still performing tribal tattoos for tattoo seekers who arrive every day to seek her sought-after skin art. She recounts her painful love story of a handsome Headhunter from neighboring village with whom she fell in love while rendering a tattoo for his bravery. The Legend of Kalinga emotionally explores how old culture pushes and forces even the most ardent lovers apart.
20240914	04:10:00	05:05:00	APPLE THE TYRANNY OF COOL	Apple, the brand that symbolises counter-culture, has become a giant that dictates cultural norms and trends. At the root of their success story lies the genius marketing ploy of making mainstream power look tacky by declaring themselves counter to it, thereby conquering consumers with their cool. The death of Steve Jobs, on October 5th, provided a dramatic illustration of the paradox of Apple, which is at the heart of this film. It is the first time in history that an entrepreneur has been applauded and mourned as a benefactor of mankind, and their commercial success lauded as a work of genius. This fascinating ability to combine a "rebel-brand" image with huge commercial profits will be the object of this documentary investigation, which examines both the universe of Mac and modern man and his ambiguities. Tracing the history of the brand, from the beginnings of the small computer company to today's multinational, the film shows how Apple has taken a giant bite out of the market, thanks to its aesthetic choices, emotional marketing and indisputable technological ingenuity.
20240914	05:05:00	06:00:00	MEET MY WILD FRIEND - ALLIES	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.
20240914	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 13	Ten years ago, thousands of US and Coalition forces personnel, ranging from elite soldiers to reservists, found themselves in the middle of two conflicts that required an entirely different approach to warfare than they had previously experienced. From special forces units securing vital points of strategic interest and capturing key individuals in Afghanistan. This episode of CQB takes a close look at some of how special operations were integrated into regular units and how they fought through many close quarter combat situations with a combination of intelligence, high-tech weaponry and surveillance technologies to find and capture Saddam Hussein.
20240914	06:30:00	06:55:00	MOST INTRIGUING SAFARI DESTINATIONS - CAMP AMALINDA	Karina visits the awesome Matobo Hills national park. She spends a few days at the magnificent Camp Amalinda, nestled within the caves with the most intriguing character and wonderful views. Karina enjoys Amalinda's delectable signature dish. The very knowledgeable guide, Ian Harmer, leads her to one of the many cave painting spectacles. They go in search of the endangered white rhino and have a brush with near heart failure!
20240914	06:55:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - THE HIDE SAFARI CAMP	Karina teams up with another entertaining guide called Barry Wolhuter as they get close to a variety of animals in a hide. With over 35 thousand elephants in the park, Karina experiences hundreds of elephants during happy hour. The Hide offer a very unusual spa treatment! Life seems pretty fragile for a moment as they are confronted with a huge male lion.
20240914	07:15:00	08:00:00	RV EXPLORERS S1 EP 03 - WHANGAREI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240914	08:00:00	08:25:00	SARAH SHARK - EP. 03	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.

20240914	08:25:00	08:50:00	JOURNEYS IN INDIA - AMRITSAR, SHIMLA AND MANALI: THE FAR NORTH	The Golden Temple is the centerpiece of the city of Amritsar, and probably the second most photographed building in India, but few know about the building or the people who built it. The most significant building to people of the Sikh faith, it is open to people of all faiths. We witness the celebration of the changing of the guard before heading into the mountains for a visit to the British influenced town of Shimla. Journeys then heads further north for look at the resort area of Manali.
20240914	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ALMOND MILK, SCAPEGOAT, BUFFALO WINGS	Learn how ALMOND NUTS get transformed into "MILK." And why are movie TRAILERS shown at the beginning of the film? We'll keep your attention so you'll want to stick around for the answer. And learn how detergents make your clothes SEEM brighter and whiter.
20240914	09:15:00	09:45:00	NEW FRONTIER - FROM THERE TO HERE	Series introduction and the study of Earth from orbit. The sky above is littered with stars and countless galaxies. It is where we come from and where we are destined to return. The first phase of this journey is complete, now commences the second, with robotics, advanced technologies and sheer daring we are now going where before we only dreamt.
20240914	09:45:00	10:10:00	THE TECH EFFECT - EP. 04	In this episode we travel on a space tourist test flight that flies high above the Earth. It's just one of the options available for wealthy thrill-seekers looking to defy gravity on a trip above our atmosphere. We also look at the latest spacesuits designed by NASA for extra-vehicular activity, or floating in space. Finally, we get an update on the Artemis project, the plan to send men and women to the moon this decade. Artemis requires cooperation between all the major space agencies to build a huge new space station called Gateway, that will also be the launch pad for a crewed mission to Mars this century.
20240914	10:10:00	10:40:00	EVERYDAY ELEMENTS - NITROGEN, MERCURY, COPPER, MAGNESIUM, COBALT	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240914	10:40:00	11:10:00	EVERYDAY ELEMENTS - CARBON, GOLD, NEON, ZIRCONIUM, ANTIMONY	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240914	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 1	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240914	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 2	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240914	12:00:00	12:25:00	TRAVEL QUEST - PAPUA NEW GUINEA	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240914	12:25:00	13:20:00	AFRICA'S DEADLIEST EP. 01	Masters of stealth or speed, using enhanced senses and lethal strategies to hunt, Africa's killers include the incredibly fast cheetah and lions, which while slower, have raw power and ingenious teamwork on their side. The rivers, meanwhile, hold fearsome crocodiles.
20240914	13:20:00	14:00:00	STOLEN TREASURES EP. 8	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240914	14:00:00	14:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - NAGALAND	High in the eastern mountains in a remote corner of India, Soumik encounters the Naga tribes. They teach him about their mysterious customs, chicken dances and head-hunting traditions, part of a unique identity at the brink of extinction. The Nagas wish to preserve.
20240914	14:30:00	15:00:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - GOA	On Christmas eve, Soumik arrives in the ex-Portuguese colony of Goa. A global party hub and Orthodox coastal state in one, Goa is a state in flux. An ambitious, young Fado singer, and a wise, old violinist, bring to life the struggle that many Goans feel between a colonial past and modern future, a laid back lifestyle challenged by tourist and consumer culture.
20240914	15:00:00	15:30:00	JOURNEYS IN INDIA - GREAT CAVES OF AJANTA AND ELLORA	Caves have held a special place in human development. The Hindu, Buddhist and Jain caves in these two UNESCO sites contain some of the most beautiful carvings and paintings found in Asia. This episode explores the history and relationship between these religions.
20240914	15:30:00	16:00:00	JOURNEYS IN INDIA - JODHPUR: INDIA'S QUEEN OF THE DESERT	No city in the Great Thar Desert of West India has had the sway that Jodhpur has. Giant forts, impressive palaces and a legendary royal hero that frees his people from tyrannical outsiders all make this a fascinating historic romp.
20240914	16:00:00	17:00:00	BRAZIL'S COASTLINES- THE SOUTH-EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240914	17:00:00	17:30:00	JOURNEYS IN AFRICA - MASAI MARA: WHERE LION IS KING	In this first of a two-parter on the Mara, we follow the migration in anticipation of the famous river crossings. We find all three big cats and hyena waiting for their chance to get their share of the migrants. During migration, the animal numbers are staggering.

20240914	17:30:00	18:00:00	JOURNEYS IN AFRICA - MASAI MARA: LAND OF THE LEOPARD	We elect to stay on a few extra days to try and obtain some good leopard footage. These are the most elusive of the "Big Twelve" and filming them is a major challenge. In the process of tracking leopards, we run across a newborn gazelle trying to walk for the first time. Will it succeed before the predators find it? Can we find and film a leopard up close?
20240914	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 04	One of the teams prepare for a black and white rhino capture. The white rhino calf has an infection and needs urgent attention. The lecturers brief the team and preparation is done.
20240914	18:25:00	19:20:00	WATER: H2O STORIES - THE BLUE PLANET	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240914	19:20:00	19:45:00	BIG COAST - DUNCANBY LODGE SEASON KICKOFF	For 15 years the Big Coast Crew has remained completely committed to expedition boating, showcasing West Coast adventure and telling the tales of this final frontier. From iconic Chinook salmon to Grizzlies, Spirit Bear and Orcas, incredible wildlife roams this land and keeps watch over one of the last great coastal ecosystems on Earth. Each season, Big Coast runs the BC Inside Passage from Alaska and Prince Rupert Southbound through Great Bear Rainforest and Vancouver Island. It's an epic journey of 1,500 kilometres through pristine coastal waterways and wilderness. And each season, with marine weather, wildlife and fish migrations, is a little bit different. In the spirit of coastal conservation, Big Coast practices catch-and-release Tye Chinook Salmon (over 30lbs) angling and only taking what you need. Going strong for 15 years, Big Coast features 13 new half hour episodes every year! A 300-mile boat trip from Vancouver to Duncanby Lodge in Rivers Inlet for Percy Walkus Hatchery Chinook Fundraiser!
20240914	19:45:00	20:10:00	BIG COAST - PRINCE RUPERT CHINOOK AND HALI	Fishing Prince Rupert, Ha-Nee-Nah Lodge on Dundas Island and Hecate Strait for Chinook Salmon and Pacific Halibut!
20240914	20:10:00	20:40:00	WHAT IN THE WORLD - EP 10	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240914	20:40:00	21:10:00	WHAT IN THE WORLD - EP 11	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240914	21:10:00	21:40:00	WHAT IN THE WORLD - EP 12	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240914	21:40:00	22:10:00	WHAT IN THE WORLD - EP 13	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. 20240914	22:10:00	22:35:00	WILD AUSTRALIA WITH RAY MEARS - EP. 01	Ray Mears explores the Great Barrier Reef starting on the Queensland mainland taking a boat out to Hervey Bay with whale expert Wally Franklin. They witness a mother hump back whale teaching her three month old calf the whale moves needed to survive the long migration to Antarctica. He flies out to Lady Elliot Island at the southernmost tip of the Great Barrier Reef where he goes scuba diving on the coral reef and discovers giant turtles and manta rays and shoals of big eyed trevelly fish. Back on the island Ray helps marine biologist Maggie O'Neal plant a Pisonia tree and finds out how the Pisonia trees kill the Black Noddy bird's that nest in them in order to use their corpses as a fertile compost given the unforgiving ground of a coral island.
20240914	22:35:00	23:00:00	WILD AUSTRALIA WITH RAY MEARS - EP. 02	Ray Mears journeys into the remote wilderness region of Arnhem land to the Cooper Creek Billabong. He's there during the dry season and all the wild life is concentrated into a narrow stretch of water. He comes face to face with the dominant saltwater crocodile and watches as the croc manoeuvres a dead pig down river to a secret hiding place. When Ray gets too close warns him off. Ray travels into Stone Country above the Billabong where he finds a gallery of ancient Aboriginal art and joins locals Connie Nayinggul and her grandson Moses on a fishing expedition. They catch a barramundi and cook the fish in a traditional ground oven using paper bark. Finally Ray travels with land manager Greg Towns across the dried up mudflats through giant flocks of Magpie Geese. Ray helps Greg to burn away large meadows of alien and destructive grass that is killing the birds. In a dramatic scene Ray witnesses the spectacle of farming with fire.
20240914	23:00:00	23:25:00	WILD AUSTRALIA WITH RAY MEARS - EP. 03	In Victoria just south west of Melbourne in the You Yangs National Park Ray Mears meets up with researcher Janine Duffy in a dry eucalyptus forest. They go in search of koalas and find a young male who nervously tries to establish his own territory. Ray moves down to the open grasslands and tracks a mob of Eastern Grey kangaroos. He visits the Mount Rothwell Conservation Reserve and meets an unusual marsupial – a predator – that is almost extinct on the mainland of Australia – a Tiger Quoll – smaller relative of the Tasmanian Devil. Finally Ray journeys through a Wet Eucalyptus forest to Lake Elizabeth and canoeing across the quiet waters finds himself surrounded by rare and unique duck billed platypuses

20240914	23:25:00	23:50:00	WILD AUSTRALIA WITH RAY MEARS - EP. 04	Ray starts by hitching a lift on a research crane to get a bird's eye view over the Rainforest; from there, he can see the geographical position responsible for this lush vegetation: mountain range in the west and the sea in the east. He then goes down to the ground, delving into the heart of the jungle, he comes across millennial trees, camouflage spiders and a miniature dinosaur, the Boyd's Forest Dragon. He pursues his journey by travelling on a zipwire with wildlife expert, Justin McMahon. Together they observe life in the canopy. Meanwhile, Ray's cameraman Martin Hayward Smith has been filming an animal that can only be found in this part of the world: the Bennett's tree kangaroo, a cute marsupial that lives like a monkey.
20240914	23:50:00	00:45:00	SECRETS OF THE THRACIAN KING	In August 2004 in Bulgaria, archaeologist Georgi Kitov made a spectacular discovery in the valley of the Thracian Kings, a valley where about twenty temples and royal tombs are located. Kitov accessed a still-intact ancient tomb, which housed incredible wealth, dating back to the 4th century B.C., when Thracian culture was at its height. In front of the gigantic mausoleum, archaeologists found a magnificent, life-sized bronze head, one of the period's finest specimens ever found, and possessing an unsettlingly modern style. Who was this king and what does his tomb tell us about Thracian culture? Was he buried according to the Thracian custom of Orphic rites, and what do we know today about these secret rites that promised eternal life? Research into the deceased's identity revealed the tomb belonged to King Seuthes III. With the help of archaeologists and historians, who decipher the king's vestiges, the film pieces together the puzzle of Seuthes III's life. He was a modern king, who was open to Hellenisation, a warrior king, who was opposed to Macedonian authority, and a priest king, who was committed to preserving Thracian cultural rites.
20240915	00:45:00	01:40:00	CATHEDRAL BUILDERS	The epic history, in 3D, of Strasbourg Cathedral and its outstanding builders. A fascinating docudrama, from start to finish. Strasbourg Cathedral, a gothic jewel and the highest monument in the West until the 19th century, was both an excessive dream and an architectural feat. How, in the Middle Ages, was such a wonder made possible? Behind its elegant, pink sandstone façade and its famous rose window, which is set ablaze at sunset, three centuries of visionary and inspired master-builders followed on from one another – Erwin de Steinbach, Ulrich d'Ensingen and Jean Hültz – as did craftsmen with a savoir-faire that was envied all over Europe. They return here in fiction form. An epic blending mystery, doubt, revelations, intrigue and tragedies. Best 3 D Documentary Film Award - Festival Dimension 3 (Saint-Denis - France).
20240915	01:40:00	02:35:00	GALLA WALLAH: THE SEARCH FOR THE BEST	The valleys of Nepal, around the Himalayan Mountains - the highest in the world - are the home of a special group of people called the Gurkhas. Because of the discipline and endurance they exhibit in their daily fight for survival, they are employed in the elite battalion of the British Army. For more than 200 years, the Gurkhas have served the crown. Every year, more than 25,000 people apply for a position as a Gurkhas, with only a few lucky ones chosen. For the chosen ones, it feels as though they have hit the jackpot. For the others, it is considered to be the worst defeat of their life.
20240915	02:35:00	03:20:00	LOVE & MARRIAGE: THE LEGEND OF KALINGA	The Legend of Kalinga is a beautifully narrated journey to the village of Buscalan located in Kalinga, North of Luzon in the Philippines to explore the ancient culture of the Kalinga tribe through an ages-old love story. Whang-Od is the last female "Mombobtok" tribal tattoo artist of the Kalinga. Today she is 103 years old and is still performing tribal tattoos for tattoo seekers who arrive every day to seek her sought-after skin art. She recounts her painful love story of a handsome Headhunter from neighboring village with whom she fell in love while rendering a tattoo for his bravery. The Legend of Kalinga emotionally explores how old culture pushes and forces even the most ardent lovers apart.

20240915	03:20:00	04:15:00	ST. HELENA, FORGOTTEN ISLAND OF THE ATLANTIC	360°GEO - Report sets foot on the isolated island of St Helena and documents what life is like in the midst of the South Atlantic. Standing solitarily far out in the middle of the Atlantic Ocean is the British Overseas Territory of St. Helena. Island do not get much more remote than this. It is situated 2,000 kilometers from the African coast and 3,000 kilometers from the South American Coast. You can see why it was chosen as a place of exile for the French emperor Napoleon. It is all but impossible to escape from St. Helena. Even today, the only connection to the outside world is by ship, given that the island has no airport. About 4,000 people or "Saints" as they refer to themselves, brave the solitude and live on the island.
20240915	04:15:00	05:00:00	CRAZY FOR MADONNA	A biography of a universal icon of music and Hollywood, Madonna, better known as the Queen of Pop. Sabbatical Entertainment celebrates Madonna's illustrious career spanning more than four decades, always pushing the boundaries of entertainment. Not afraid of controversy, the Material girl, through her talents, redefined and reshaped pop culture history.
20240915	05:00:00	05:55:00	MEET MY WILD FRIEND - ACTIVISTS	Gasp at animal power, gawp at childhood innocence, this is the true story of children who live as friends with wild animals.
20240915	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 01	"Special Operations" are special divisions of military, police or intelligence services that are highly qualified in specific areas of urban warfare and in a variety of special weapons and technology. Over the past forty years, all of the world's superpowers have built up these groups in order to better fight wars, to counter terrorism and to conduct high-stakes police actions. This episode examines the history of such organizations, from the Green Berets, WWII paratroopers and naval special warfare units through to the Seal Team 6, the British SAS, and private contractors, including Black Water and Brown and Root. Showing how these operators are trained, how they plan, and what weaponry and tactical gear they use, the introductory episode of CQB provides viewers with a fast-paced overview of the techniques, strategies and equipment that have been successfully used by Military Special Operations.
20240915	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - THE HIDE SAFARI CAMP	Karina teams up with another entertaining guide called Barry Wolhuter as they get close to a variety of animals in a hide. With over 35 thousand elephants in the park, Karina experiences hundreds of elephants during happy hour. The Hide offer a very unusual spa treatment! Life seems pretty fragile for a moment as they are confronted with a huge male lion.
20240915	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - ROYAL ZAMBEZI LODGE	The Royal Zambezi lodge is beautifully situated on the Zambian bank of the Zambezi River. Karina manages to catch her first challenging tiger fish, which pound for pound is the most powerful fresh water fish on this planet. She gets to relax in Royal luxury, with unusual company! Karina takes a leisurely canoe trip down one of the mighty Zambezi's channels. She wines and dines on an island under the stars. Her safari with Lawrence leads me to the most extraordinary sighting.
20240915	07:15:00	08:00:00	RV EXPLORERS S1 EP 04 - COROMANDLE	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240915	08:00:00	08:25:00	SARAH SHARK - EP. 04	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.

20240915	08:25:00	08:50:00	JOURNEYS IN INDIA - AGRA AND ITS ENVIRONS	Agra is home to India's most recognizable monument—the Taj Mahal. First, we tour the Agra Fort and learn its role in the incredible history behind the Taj Mahal's construction. Bill takes us to a factory where we learn how the craft of stone inlay that adorns the Taj Mahal, is still made today. We continue on to Fatehpur Sikri, a former Mughal capital, which was created of red sandstone and displays the influence of its Hindu and Mughal roots. Finally, we meet with a man that is giving the wildlife of India a voice and sanctuary.
20240915	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - COCA COLA, SLINKY, FRISBEE	Wow, I Never Knew That! is a whimsical, half-hour television series that is jam-packed with exciting tidbits and fascinating facts that uncover the truths and origins behind the stuff you're already familiar with. From the items you use every day to the phrases you use in conversation to the habits you're so accustomed to, you'll be fascinated to learn how they've all really come about! Learn how a pharmacist and an accountant created the most famous drink in the world, COCA COLA! And, learn the "BEAR" truth behind how a U.S. president helped create everyone's favorite stuffed toy, THE TEDDY BEAR! Then, how did a piece of wire accidentally "SLINK" its way to become a fantastic fun toy for children? Plus, how a the WIFFLE BALL was invented.
20240915	09:15:00	09:45:00	NEW FRONTIER - RETURN TO THE MOON	The Moon, our closest celestial companion. Our indispensable dance partner through the cosmos. Lighting our night sky and gently tugging at our shores. Few have walked on her surface, though her allure remains strong, once again we are glancing her way with renewed interest and with a view to return very soon.
20240915	09:45:00	10:10:00	THE TECH EFFECT - EP. 05	In this episode we look at some of the ways technology is helping us solve the big environmental problems of our age. From satellites that map sea surface height, to the development of sustainable fuels such as hydrogen, scientists are using their ingenuity to find answers that will enhance our lives in the future. An aircraft that runs just on solar power, a tech company that's using its mapping expertise to fight floods and a farmer using futuristic technology to protect his tomato plants are among the innovations profiled in this episode.
20240915	10:10:00	10:40:00	INSIDE OUTER SPACE - SOLAR SYSTEMS, SATELLITES, TELESCOPES, STARS, EARTH, ANIMALS IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240915	10:40:00	11:10:00	INSIDE OUTER SPACE - MOON, SOLAR FLARES, MARS, QUASAR, HUBBLE, NEIL ARMSTRONG	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240915	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 2	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240915	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 3	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240915	12:00:00	12:25:00	TRAVEL QUEST - SOUTH KOREA	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240915	12:25:00	13:20:00	AFRICA'S DEADLIEST EP. 02	Killer armies collaborate to take down larger prey. On land, a zebra's kick can kill, but in the water it's easy meat for a congregation of crocodiles. Wild dogs may not seem like fearsome predators, but a pack kills fast, brutally and often.
20240915	13:20:00	14:05:00	STOLEN TREASURES EP. 7	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240915	14:05:00	14:30:00	QUIRKY SCIENCE - EP. 5	Plastic has become ubiquitous. Impressive, since we'd been living without them for centuries! We have grown dependent on plastics in many ways. The production industry uses it to connect the parts that make machinery: our trillions of toilet bowls need it, let alone wash machines, computers, toothbrushes, pens and traffic lights. Can you imagine that plastic was accidentally invented for the purpose of making billiard balls? Though, its inventor had used something now called guncotton, which led to a rather explosive game of pool. In the end, the first plastic was discovered when someone witnessed how Southeast Asian farmers used the poop of a little beetle, called shellac, to preserve wood. When looking for a substitute, Leo Beakeland created 'Bakelite' and that substance turned out to be the first plastic. Nylon followed, the first man-made synthetic plastic, developed by Dupont to replace silk. Nylon isn't that difficult to make yourself, amazingly. During WW2 all nylon production went into the manufacturing of parachutes, leading Dupont and others to stop producing pantyhose. It led to true nylon riots. Plastics were plain out popular. Indeed, the age of plastic had only just begun. But plastic is made with oil and is hard to break down, which calls for a
20240915	14:30:00	15:00:00	QUIRKY SCIENCE - EP. 6	Rubber comes from trees. South American tribes used it long before the world got to know about it. When Columbus witnessed Haitian natives playing ball he found himself mesmerized by the bouncing goo. The South American tribes also made 'waterproof' shoes. When Western ships and their sailors brought these back home, the rubber melted on people's feet. And so did their profits. A stationer accidentally discovered the stuff made a pencil stripe disappear, by rubbing it, and suggested to call it 'India Rubber'. It took decades for someone to discover how to prevent rubber from melting in heat or stiffening in cold. Charles Goodyear found out how, by dropping a lump of natural rubber on his wife's stove. By now, chemists know that the vulcanization process links the rubber molecules like pearls on a string, making each piece of rubber one large molecule! Goodyear's invention spurs the Industrial Revolution. Rubber becomes such a wanted good it instigated a rubber boom – turning Manaus, a remote Brazilian jungle town, into one of the richest cities on earth. This Brazilian monopoly of rubber ended with the theft of 70,000 seeds, by a British traveler named Henry Wickham. It takes decades for someone to discover synthetic rubber. While one researcher was looking for something to replace the rubber in tires – she ended up discovering a material that is so tough it can stop

20240915	15:00:00	15:30:00	JOURNEYS IN INDIA - JODHPUR: INDIA'S QUEEN OF THE DESERT	No city in the Great Thar Desert of West India has had the sway that Jodhpur has. Giant forts, impressive palaces and a legendary royal hero that frees his people from tyrannical outsiders all make this a fascinating historic romp.
20240915	15:30:00	16:00:00	JOURNEYS IN INDIA - KAZARINGA: LAND OF GIANTS	India can match Africa mega-animal for mega-animal. The three biggest—elephant, buffalo and rhino are found in large numbers in only one national park in India—Kazaringa. Join Bill as he attempts to check each of these highly endangered and dangerous herbivores off his bucket list.
20240915	16:00:00	17:00:00	BRAZIL'S COASTLINES - THE AMAZON	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240915	17:00:00	17:30:00	JOURNEYS IN AFRICA - MASAI MARA: LAND OF THE LEOPARD	We elect to stay on a few extra days to try and obtain some good leopard footage. These are the most elusive of the "Big Twelve" and filming them is a major challenge. In the process of tracking leopards, we run across a newborn gazelle trying to walk for the first time. Will it succeed before the predators find it? Can we find and film a leopard up close?
20240915	17:30:00	18:00:00	JOURNEYS IN AFRICA - CAPE TOWN: LITTLE PARADISE BY THE SEA SHORE	One of the most modern cities in Africa, Cape Town has something for everyone. We explore the city's architecture, taste a little wine at nearby Vineyards and track down the only penguin species in Africa before reaching the fabled Cape of Good Hope...just a scenic drive outside the city proper.
20240915	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 05	A boma is created with a funnel system and students are placed in strategic areas to man the curtain rails..
20240915	18:25:00	19:20:00	PARIS BERLIN: SHAPES AND SHADES OF HISTORY - ENEMY BROTHERS	Paris and Berlin have developed and grown facing each other over four centuries of tumultuous historical relationships and mutual admiration. The architecture and urbanism bear witness of this complex and rich confrontation.
20240915	19:20:00	19:45:00	BIG COAST - PRINCE RUPERT CHINOOK AND HALI	Fishing Prince Rupert, Ha-Nee-Nah Lodge on Dundas Island and Hecate Strait for Chinook Salmon and Pacific Halibut!
20240915	19:45:00	20:10:00	BIG COAST - PRINCE RUPERT TO HARTLEY BAY	Trolling for Chinook Salmon in Prince Rupert then making big run Southbound to Hartley Bay through Grenville Channel!
20240915	20:10:00	20:40:00	WHAT IN THE WORLD - EP 14	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240915	20:40:00	21:10:00	WHAT IN THE WORLD - EP 15	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240915	22:00:00	22:30:00	FLYING OVER THE EARTH - CAP AU NORD	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240915	22:30:00	23:00:00	FLYING OVER THE EARTH - AMERICA	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240915	23:00:00	23:30:00	FLYING OVER THE EARTH - DOWNUNDER	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240915	23:30:00	00:00:00	FLYING OVER THE EARTH - DE L'ASIE À L'EUROPE	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.

20240916	00:00:00	00:55:00	WILL WE SOON BE EATING IN VITRO MEAT	Does cultured meat - which numerous scientists in various countries are working on - open up real perspectives for feeding a rising population and for fighting pollution? Or does it represent a false hope? Will the environmental arguments put forward in its favour be enough to convince consumers to eat cultured meat? Is the current commercial success of the first meat-substitute products available on the market heralding a change in what we eat? Would it not be preferable to turn towards insects, given that they are an already established source of protein and, what's more, are natural? This documentary, shot in the US, China, India, France, Holland and Laos, will change the way you see steak - forever!
20240916	00:55:00	01:50:00	ARCTIC: THE ROUTE OF THE NUCLEAR-POWERED ICEBREAKERS	This report accompanies a polar cargo ship through the Arctic Sea and provides a rare insight into the interior of the Russian nuclear-powered icebreaker float. Along the north coast of Russia, a land of climatic extremes, lies one of the most difficult to navigate straits in the world. The Northern Sea route is a 6,000 kilometer shipping lane through the Polar Sea.
20240916	01:50:00	02:45:00	ARGAN OIL: THE WHITE GOLD OF MOROCCO	This report follows the process of making Argan oil, beginning with the harvest and ending with the cooperatives working for the international market. Made from the nuts of the Argan tree, which grows almost exclusively in the Essaouira region of Morocco, Argan oil has become one of the latest miracle ingredients of the beauty industry in Europe. Publicity is created around the fact that this oil is made by Berber women. But who are they? How do they live? And how hard is their work? We accompany these women in their daily lives and take part in their traditions.
20240916	02:45:00	03:40:00	THE BEST SHEEPDOGS FROM WALES	The film follows Nigel and his dogs throughout the summer. Nigel Watkins is a farmer and vice-world champion sheepdog handler. Together with his partner, Janet, he runs his little farm Llanddeusant in the Brecon Beacons National Park in the south of Wales. Farming takes up a fair amount of his time, but his hobbies take up much more of it: he trains Border Collies, a breed of sheepdog.
20240916	03:40:00	04:35:00	THE FLYING FIREFIGHTERS OF VALENCIA	In recent years, the number of forest fires has consistently increased, especially in Catalonia. The loss of forest land is endangering the cultural and natural habitat of the Northwestern Mediterranean. This report accompanies Chimo and his colleagues through last years' fire season. The "Avialsa" Flying Firefighters squadron operates in the woodland areas around the western part of the Mediterranean Sea. Flying close above the flames ensures the greatest chance of success for the firefighters: the closer they can get their water cargo to the fire source, the quicker they can get the flames under control. Joaquim Miniana, "Chimo" for short, and the pilots of the "Avialsa" firefighting plane squadron in the Spanish province of Valencia are fighting against increasingly long, hot summers.
20240916	04:35:00	05:00:00	TRAVEL THRU HISTORY - DENVER	We head underground and visit the Hidee Gold Mine to see how this most precious material is obtained. Then we get a tour of the brand new History Colorado Center where we'll explore Colorado's past through first hand stories and interactive attractions.
20240916	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - NETHERLANDS: THE FLOATING HOUSES OF IJBURG	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240916	05:30:00	05:55:00	MINDWORKS - EVERYDAY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240916	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 02	As warfare has evolved, many military techniques and technologies have been adapted for use in urban settings by police units around the world. This episode provides viewers with an intimate perspective on what it feels like to be "inside the heads" of special police personnel, and how their use of military-style strategies and equipment allows them to save lives. From riot control in South Africa and the lessons learned from its excesses, to Los Angeles Police Chief Robert Gates' creation of an elite police S.W.A.T team, CQB will showcase how, over the past 30 years, the fight against urban crime has evolved into a military scenario, with both sides using increasingly complex weaponry and tactics.
20240916	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - ROYAL ZAMBEZI LODGE	The Royal Zambezi lodge is beautifully situated on the Zambian bank of the Zambezi River. Karina manages to catch her first challenging tiger fish, which pound for pound is the most powerful fresh water fish on this planet. She gets to relax in Royal luxury, with unusual company! Karina takes a leisurely canoe trip down one of the mighty Zambezi's channels. She wines and dines on an island under the stars. Her safari with Lawrence leads me to the most extraordinary sighting.
20240916	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - VICTORIA FALLS SAFARI LODGE	Karina teams up with guide Craig van Zyl again, at Victoria falls, where she gets to see the earth's largest curtain of falling water from a different perspective. White water rafting challenges her nerves on some of the most radical rapids on earth. Karina enjoys a sunset cruise above the falls. Karina tries out a few adrenaline options and tries her hand at golf. The Victoria Falls safari lodge Karina's choice of comfort on this trip.
20240916	07:15:00	08:00:00	RV EXPLORERS S1 EP 05 - TARARUA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240916	08:00:00	08:25:00	TRAVEL THRU HISTORY - AUSTIN	The live music capital of the US has an interesting past. Take an in depth look at one of Austin's oldest hotels, The Driskill. Then we'll learn about Texan independence in the Bob Bullock History museum. Finally, we'll end up at one of Austin's most historic buildings, the Texas state capitol.
20240916	08:25:00	08:50:00	JOURNEYS IN INDIA - THE LAND OF RUDYARD KIPLING	With classic tales as The Jungle Book to his credit, Rudyard Kipling brought India to life for many readers around the world. In this episode, Bill steps back into Kipling's wild world while exploring Kanha and Bandhavgarh National Parks, the inspiration for The Jungle Book and many other tales. There, we track tigers and search for jackal, sambar, chital, monkeys and wild boar. We round out the episode with jeep safaris, elephant rides and dinners around the fire.
20240916	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ETCH A SKETCH, BINGO, BIKINI	Before computer drawing programs, there was a toy that if you mastered its two circular white knobs you could have a picture perfect SKETCH. We'll explain how the ETCH A SKETCH drew onto the scene. And what did Neil Armstrong REALLY say when he stepped on the moon, the "aahh" answer will surprise you! Plus, where did the explosive name BIKINI come from?
20240916	09:15:00	09:45:00	NEW FRONTIER - THE INNER WORLDS	They orbit between us and our Star, the inner worlds; hidden within the sun's glare often only visible at sunrise or sunset. Venus the first and brightest star in the evening sky, and Mercury fleeting across the solar disk. They are half of our solar system's terrestrial planets yet we know so little. As we begin to take a closer look at our companions they are posing more questions than answers.

20240916	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 01: FUERTEVENTURA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240916	10:15:00	10:40:00	INSIDE OUTER SPACE - MOON, SOLAR FLARES, MARS, QUASAR, HUBBLE, NEIL ARMSTRONG	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240916	10:40:00	11:10:00	INSIDE OUTER SPACE - ASTEROIDS, COMETS, VENUS, METEORIDS, NEBULA, SPACE RACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240916	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 3	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240916	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 4	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240916	12:00:00	12:25:00	STREET FOOTBALL IN MY COUNTRY	Street Football is a worldwide phenomenon that can be played by anyone, no matter their age, their gender or where they come from. It can be played anywhere, no need for a stadium, white lines, green grasses or even shoes ! In each episode of these series we take you to an emerging country where Football has become a way of helping children and bringing hope by life changing their habits. Discover the attaching portraits of these children that might one day become some of the greatest players in the world just like before them C. Ronaldo, Messi, Neymar and so many others.
20240916	12:25:00	13:05:00	STOLEN TREASURES EP. 6	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.

20240916	13:05:00	13:30:00	WILD AUSTRALIA WITH RAY MEARS - EP. 01	Ray Mears explores the Great Barrier Reef starting on the Queensland mainland taking a boat out to Hervey Bay with whale expert Wally Franklin. They witness a mother hump back whale teaching her three month old calf the whale moves needed to survive the long migration to Antarctica. He flies out to Lady Elliot Island at the southernmost tip of the Great Barrier Reef where he goes scuba diving on the coral reef and discovers giant turtles and manta rays and shoals of big eyed trevelly fish. Back on the island Ray helps marine biologist Maggie O'Neal plant a Pisonia tree and finds out how the Pisonia trees kill the Black Noddy bird's that nest in them in order to use their corpses as a fertile compost given the unforgiving ground of a coral island.
20240916	13:30:00	14:00:00	MINDWORKS - VISUAL PERCEPTION	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240916	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - GREECE LIVING IN A MONASTERY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240916	14:30:00	15:00:00	WONDER - COLOR	Seg 1 Chromatic Adaptation. Chromatic adaptation is the ability of humans to adjust to changes in brightness to keep up with the appearance of colors. this is the reason why we are able to perceive colors properly even though lighting in real environments change constantly. Seg 2 Color-changing animals. Color changing in animals are developed adaptations which the animals use for various applications such as signaling their species or as a way to hide from predators. Animals that can change color have specialized cells called chromatophores that can alter pigmentation and light reflecting properties. Seg 3 How do we see the color pink. We are able to see pink because our brains are able to perceive variations in light and color. Although pink as a wavelength does not exist in the light spectrum, it is our brains that processes light in a such a way that we are able to perceive combinations of colors thus giving us a way to see colors like pink. Seg 4 Blue wings, blue feathers. Blue rarely exists in nature. But due to evolution, structural features in the wings and feathers of some animals allow light to bend in ways that make it possible to reflect the color
20240916	15:00:00	15:30:00	JOURNEYS IN INDIA - KAZARINGA: LAND OF GIANTS	India can match Africa mega-animal for mega-animal. The three biggest—elephant, buffalo and rhino are found in large numbers in only one national park in India—Kazaringa. Join Bill as he attempts to check each of these highly endangered and dangerous herbivores off his bucket list.
20240916	15:30:00	16:00:00	JOURNEYS IN INDIA - JAISALMER: INDIA'S HIDDEN GEM	Every major country has a destination that is incredible but not well known to outsiders—Jaisalmer is such a place. Once a major stop along the silk road, this living museum and surrounding countryside has something for everyone: tragic history, unbelievable architecture, unique cultural groups and resilient wildlife.

20240916	16:00:00	16:30:00	NATURE'S FORCE - EP. 03	A snapshot of Seasons, how they work together and keep the globe in balance. Droughts are explored in terms of how we can predict them, proof our lives from them and collect data because of them. Hurricanes are explained, their power revealed and the measures that are used to help us survive their impact. Thunderstorms have a few stages of development that roll out in a particular order.
20240916	16:30:00	17:00:00	BLUE WORLD	In the series pilot, host Jonathan Bird travels to the Bahamas, where, in the past few years, diver interactions with Tiger sharks have become up close and personal. These large and dangerous animals are not only being hand-fed, but actually handled by divers. Jonathan learns how to flip a Tiger shark from experienced shark handlers. Next, Jonathan joins world-renown cave explorer Brian Kakuk to investigate the Crystal Cave of Abaco, Bahamas...considered the most highly-ornamented underwater cave in the world! The formations in this cave are simply stunning, and incredibly unique.
20240916	17:00:00	17:30:00	JOURNEYS IN AFRICA - CAPE TOWN: LITTLE PARADISE BY THE SEA SHORE	One of the most modern cities in Africa, Cape Town has something for everyone. We explore the city's architecture, taste a little wine at nearby Vineyards and track down the only penguin species in Africa before reaching the fabled Cape of Good Hope...just a scenic drive outside the city proper.
20240916	17:30:00	18:00:00	JOURNEYS IN AFRICA - AMBOSELI NATL PARK: LAND OF EXTREMES	Amboseli National Park has had several years of drought so we're anxious to see if the famous elephant herds are healthy. Journeys takes to the air and ground to get a count of these incredible animals. Along the way, we visit the local Masai to see how they're adjusting to encroaching civilization and we encounter buffalo, hippos and numerous bird species that make Amboseli so special.
20240916	18:00:00	18:50:00	PAST HUNTERS - S1 EP 06: DRAKELOW TUNNELS	The Drakelow Tunnels are a former underground military complex used mainly for storage. However, during the construction and running of this facility, 6 people are thought to have died. It is believed most of the hauntings that occur here are from the very people that died here.
20240916	18:50:00	19:20:00	RACE OF LIFE - EP. 11	Almost all animals living in the sea are predators - from small fish to great white sharks and starfish to giant squid. Their bodies have been designed and built to capture prey and avoid becoming prey themselves. Raiders of the Underwater Universe have evolved to become among the more efficient war machines of our planet. There are "predators lurking" as stone fish, cleverly disguising themselves to wait for unsuspecting prey which wander too close. In an episode that illustrates the Race of Life in an underwater world of dangerous predators with razor-sharp teeth, we will see sharks, barracuda and moray eels go about their grisly business. Underwater predators have adapted some fairly extreme measures to hunt and to survive. The fish of the reef need to be fast to escape the barracuda, with its lightning speed and pincushion teeth. And stay on the alert when they swim near the lairs of the moray eel, a large and lethal creature of perhaps surprising grace and beauty. They may be ambushed by the also elegant - but deadly - lionfish. The knitting needle spines of the lionfish are capable of injecting deadly venom. Or if equally unlucky, prey can be sucked into the huge mouth of a stonefish. With so many hungry mouths to feed, it's a jungle down there.
20240916	19:20:00	19:50:00	EUROPEAN ISLANDS EP - 01: FUERTEVENTURA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.

20240916	19:50:00	20:20:00	WHAT IN THE WORLD - EP 21	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240916	20:20:00	20:45:00	WHAT IN THE WORLD - EP 22	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240916	20:45:00	21:10:00	WHAT IN THE WORLD - EP 23	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240916	21:10:00	21:35:00	WHAT IN THE WORLD - EP 24	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240916	21:35:00	22:00:00	WHAT IN THE WORLD - EP 25	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240916	22:00:00	22:30:00	DESPERATE HOURS - EP. 03	This gets personal, meaning in this episode we really get under the skin with something that is a threat to us all, wherever we live. The epidemic and its global big brother the pandemic. Earthquakes, tornadoes, floods, volcanoes and all the cataclysms that threaten human life: all of them are terrifying in their own way. But perhaps nothing is more chilling the threat of disease. In recent times, the threat of not merely an epidemic, but a pandemic which could annihilate mankind has somehow never seemed more real. But before we hit the Panic Button, let's brace ourselves by calmly and coolly examining the facts. That means squaring up to the realities of Ebola and Cholera in Africa, SARS and Bird Flu, principally in Asia, but with potential to go global in a flash. There is Smallpox we seem to have defeated, but that's what was thought about Cholera just a few years back - and Cholera has had a resurgence recently. If we as a species are to endure, we have to be ever vigilant as individuals – don't forget to wash your hands before you handle food for example. But we must also be able to act collectively, when the germ warfare is
20240916	22:30:00	23:00:00	DESPERATE HOURS - EP. 04	In this installment, we turn up the heat to examine a natural phenomenon that is both a friend, and a foe to humankind. Some 2 to 400 thousand years ago our ancestors had learned how to create and control fire..... a step vital to human development. We won't quite be going back quite that far on this episode, but we do travel back in time to remind ourselves that dangerous and deadly fires are a fact of life, as immutable as the wind, the rain or the seasons. They can happen anywhere: a smart departmental store in the center of Brussels, a nightclub on Rhode Island where a band called Great White came to play. Their special effects pyrotechnics show caught fire alright. When it did, it killed 100 people, injuring dozens more. Whatever the time and place, firefighters are still expected to go rushing into a burning building as everyone else goes rushing out. Firefighters are required to pull heavy lengths of hose, to scale stairs while carrying giant power tools, and lift 35-foot long wooden ladders.
20240916	23:00:00	23:30:00	DESPERATE HOURS - EP. 05	In this episode, you can run for cover but you can't hide from the wild winds. That means hurricanes, cyclones, tornadoes, twisters and typhoons. They're all pretty much different names for the same thing, no? Powerful wind storms. Well no, not necessarily. Hurricanes mostly form over warm ocean water and once they have gathered momentum, can be up to 600 miles across. A tornado on the other hand, is a rapidly spinning tube of air which touches both the ground and the clouds above. In the US, they are often referred to as twisters. Did you know that hurricanes twist and turn in anticlockwise fashion in the Northern Hemisphere but in a clockwise direction in the Southern Hemisphere? Or that tornadoes can travel at speeds of up to 200 miles per hour? They can demolish large buildings, uproot trees and pick up and hurl vehicles hundreds of feet away, as if they were mere playthings. A tornado's path of destruction can be anywhere in excess of a one mile wide, and some 50 miles long. 1000 tornadoes are reported in the United States in a typical year. Fortunately, only two percent of these are labeled "violent", but that's enough to create plenty of havoc annually.
20240916	23:30:00	00:05:00	DESPERATE HOURS - EP. 06	In this instalment, we batten down the hatches, and run for dry land, as we look at the damage a little water can do, or rather, a great deal of it. The European Union's 'Floods Directive' defines a flood as "a covering by water of land not normally covered by water". But that rather tepid description simply doesn't do justice to the terror unleashed by raging currents and flash flooding. Natural disasters will be with us for a long time to come. But the death and destruction caused by Brazilian floods and landslides, the flooding after Hurricane Katrina and the Northern Indian Floods, could all have been reduced by environmental awareness in building codes, better coordinated relief efforts and so on. Then there was the massive flooding after the Tsunami of December 26th, 2004. Hundreds of thousands were killed in minutes, and millions lost their homes, as wave after destructive wave crashed into the coastlines of some 11 Indian Ocean countries. Environmentalists argue another factor causing floods is urbanisation. By replacing grass and dirt with buildings, roads and parking lots, insufficient soil is left, to soak up rainwater. When it does overflow, the results

20240917	00:05:00	01:05:00	BHUTAN IN THE PURSUIT OF HAPPINESS	Nestled in the heart of the Himalayas, the small kingdom of Bhutan has decided to do away with the dictatorship of Gross Domestic Product and economic growth at all costs. A new wealth indicator has now become the country's gold standard: Gross National Happiness. Launched by the country's fourth King, the "new paradigm" is based on four pillars: protection of the environment; conservation and promotion of Bhutanese culture; good governance; and responsible and sustainable economic development.
20240917	01:05:00	02:00:00	GEORGIA, CRADLE OF WINE	360° GEO - Report portrays a changing wine region that is torn between the ancient traditions of its soviet heritage and modern market requirements. In the Soviet era, Georgia was said to be the wine cellar of the USSR. Even after the collapse of the huge empire, wine remained one of the country's most important export goods. But since Russia has imposed an embargo, exports have declined dramatically. Georgia is now in search of new sales markets at a time when winegrowing in its Caucasus region is in full swing. Small winegrowers, cooperatives and winegrowing estates based on the Western model vie with each other for quantity and quality.
20240917	02:00:00	02:55:00	PICASSO: A MUSEUM REBORN	Behind the scene of the Paris Picasso Museum. Picasso Museum opened its doors in 1985 revealing the most important collection of Picasso's works of art to the world. More than 300 paintings, 1000 drawings, 100 sculptures given to the French State as inheritance rights. Housed in the beautiful Salé Hotel in the heart of the Marais in Paris, Picasso Museum has closed its doors in 2010 to undertake major modernisation and refurbishment works aimed at multiplying the exhibition surfaces by three. For more than a year, this film will follow in the footsteps of Anne Baldassari, Head of the Museum and among worldwide's experts of Picasso' work, when she monitors the works' progress of the new Museum that will reflect the new vision of the artist's work of art, but also during the establishment of temporary exhibitions of the collection that she organises throughout the world during renovation (USA, Australia, Canada, China, Indonesia, Malaysia, Italy, Spain). A companion documentary which recounts the re-opening of the Picasso Museum in Paris, the largest public collection of artist's work in the world. Come behind the scenes and witness all the preparations leading to the reopening of this Museum.
20240917	02:55:00	03:50:00	ST. HELENA, FORGOTTEN ISLAND OF THE ATLANTIC	360° GEO - Report sets foot on the isolated island of St Helena and documents what life is like in the midst of the South Atlantic. Standing solitarily far out in the middle of the Atlantic Ocean is the British Overseas Territory of St. Helena. Island do not get much more remote than this. It is situated 2,000 kilometers from the African coast and 3,000 kilometers from the South American Coast. You can see why it was chosen as a place of exile for the French emperor Napoleon. It is all but impossible to escape from St. Helena. Even today, the only connection to the outside world is by ship, given that the island has no airport. About 4,000 people or "Saints" as they refer to themselves, brave the solitude and live on the island.
20240917	03:50:00	04:35:00	LOVE & MARRIAGE: THE LEGEND OF KALINGA	The Legend of Kalinga is a beautifully narrated journey to the village of Buscalan located in Kalinga, North of Luzon in the Philippines to explore the ancient culture of the Kalinga tribe through an ages-old love story. Whang-Od is the last female "Mombobtok" tribal tattoo artist of the Kalinga. Today she is 103 years old and is still performing tribal tattoos for tattoo seekers who arrive every day to seek her sought-after skin art. She recounts her painful love story of a handsome Headhunter from neighboring village with whom she fell in love while rendering a tattoo for his bravery. The Legend of Kalinga emotionally explores how old culture pushes and forces even the most ardent lovers apart.
20240917	04:35:00	05:00:00	TRAVEL THRU HISTORY - HOOVER DAM	Marvel at the site of America's most famous water dam. We'll learn about how the Hoover Dam was built, why it's necessary, and take a behind the scenes look at its inner workings.

20240917	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - VIETNAM THE TUNNEL HOUSES OF HANOI	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240917	05:30:00	06:00:00	MINDWORKS - FOOLING THE TONGUE AND NOSE	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240917	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 03	After the fall of the soviet union many countries remained in dispute in the early nineties despite eastern Europe's independence. In 1994 a bitter conflict broke out between the forces of the Chechnen independence movement and the Russian regular army. Despite overwhelming manpower, weaponry and air support, the Russian forces were unable to establish effective permanent control over the mountainous area due to many successful Chechen guerrilla raids. Improvised Explosive Devices were one of the most effective methods employed in these disastrous raids and were the back drop to many Close Quarter Battle scenarios exchanged between the two sides.
20240917	06:30:00	06:55:00	MOST INTRIGUING SAFARI DESTINATIONS - VICTORIA FALLS SAFARI LODGE	Karina teams up with guide Craig van Zyl again, at Victoria falls, where she gets to see the earth's largest curtain of falling water from a different perspective. White water rafting challenges her nerves on some of the most radicle rapids on earth. Karina enjoys a sunset cruise above the falls. Karina tries out a few adrenaline options and tries her hand at golf. The Victoria Falls safari lodge Karina's choice of comfort on this trip.
20240917	06:55:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - ANTELOPE PARK	Karina's adventure continues at Antelope Park. She actually walks with lions and enjoys a wild swim with animated elephants. Karina watches lions feed, perhaps a little too close and witnesses a successful lion hunt before her very eyes.
20240917	07:15:00	08:00:00	RV EXPLORERS S1 EP 06 - FAR NORTH	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240917	08:00:00	08:25:00	TRAVEL THRU HISTORY - MINNEAPOLIS	We'll find out why they called Minneapolis the "Mill City" when we visit the Mill City Museum. Then we march over to the Union's Fort Snelling, the first permanent structure in Minnesota, and then head underground and learn about St. Paul's organized crime hide outs.
20240917	08:25:00	08:50:00	JOURNEYS IN INDIA - BANGALORE AND OOTY	Bangalore is a city with many names: the Garden City, the Pub City, the Fashion Capital the list goes on. Follow Bill as he journeys through this city of contrasts and touches on its many faces. We visit Cubbon Park and Lal Bagh Gardens, shop in the markets and explore the nightlife of the modern city. We also explore architecture, from ancient Bull Temple, the legendary source of the Vishva Bharti River to the largest legislative building in India. Bill's final stop is the "Queen of the Hill Stations" Ooty, where he tours the plantations, rides the historic narrow-gauge railroad and visits the Stone House, which was built by the British in the days of colonial rule.

20240917	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - POPSICLE, BARBER POLES, BRAIN FREEZE	On a hot summer's day, nothing cools you down like a frozen fruity POPSICLE! You'll learn how an 11-year old boy created this sweet icy treat! And, have you ever noticed those colored spinning poles outside the BARBERSHOP? You'll be in STITCHES when you learn how they got their start! Plus, find out how a melting chocolate bar gave way to the invention of the MICROWAVE!
20240917	09:15:00	09:45:00	NEW FRONTIER - THE PLANET MAKERS	From the beginnings of our Solar System four and half billion years ago there remains tantalizing clues to its evolution; remnent debris: asteroids and comets. They vary in size from grains of dust to mountain sides, footballs to planetoids. They were the building blocks of the planets and perhaps carry the origins of life itself. Now within our grasp these rocks of ice and dust are ready to give up their secrets.
20240917	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 02: MADEIRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240917	10:20:00	10:45:00	INSIDE OUTER SPACE - ASTEROIDS, COMETS, VENUS, METEORIDS, NEBULA, SPACE RACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240917	10:45:00	11:10:00	INSIDE OUTER SPACE - BLACK HOLES, OLYMPUS MONS, JUPITER, INTERNATIONAL SPACE STATION, LIGHTYEAR, FOOD IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240917	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 4	Outta Town Adventures travels both near and far to discover the best advenures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and pisitive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240917	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 5	Outta Town Adventures travels both near and far to discover the best advenures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and pisitive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240917	12:00:00	12:25:00	TRAVEL QUEST - BRAZIL	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!

20240917	12:25:00	13:05:00	STOLEN TREASURES - EP. 7	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240917	13:05:00	13:30:00	WILD AUSTRALIA WITH RAY MEARS - EP. 02	Ray Mears journeys into the remote wilderness region of Arnhem land to the Cooper Creek Billabong. He's there during the dry season and all the wild life is concentrated into a narrow stretch of water. He comes face to face with the dominant saltwater crocodile and watches as the croc manoeuvres a dead pig down river to a secret hiding place. When Ray gets too close warns him off. Ray travels into Stone Country above the Billabong where he finds a gallery of ancient Aboriginal art and joins locals Connie Nayinggul and her grandson Moses on a fishing expedition. They catch a barramundi and cook the fish in a traditional ground oven using paper bark. Finally Ray travels with land manager Greg Towns across the dried up mudflats through giant flocks of Magpie Geese. Ray helps Greg to burn away large meadows of alien and destructive grass that is killing the birds. In a dramatic scene Ray witnesses the spectacle of farming with fire.
20240917	13:30:00	14:00:00	MINDWORKS - VISUAL DECEPTIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240917	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - INDIA VARANASI LIVING IN A HOLY CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240917	14:30:00	15:00:00	WONDER - PROBLEMS	Seg 1 Monty Hall problem. The Monty Hall Problem poses a counter-instinctive dilemma of picking a choice with a higher probability of winning. It has been calculated that switching from a player's initial choice to the last option possible, after eliminating all empty choices, instead of sticking with the initial choice gives a bigger chance of winning. Seg 2 The Birthday Problem. The Birthday Problem presents a situation that addresses brains' unintuitive response to exponents. We try to figure out why it's possible for only 23 people to have a 50% chance of sharing a birthday when there are 365 unique birthdays. The dilemma usually comes in when we gloss over the fact that even small groups can form several pairings, and we actually compute the probability of sharing a birthday by subtracting the chances of not sharing a birthday by multiplying individual probabilities with each other. The answers can be quite surprising when the math to be done is not instinctive for people. Seg 3 Gambler's ruin. Gambler's Ruin closes in on how a gambler with the smaller amount will always be the loser in the long run in a game of 50-50 chance with an indefinite number of
20240917	15:00:00	15:30:00	JOURNEYS IN INDIA - JAISALMER: INDIA'S HIDDEN GEM	Every major country has a destination that is incredible but not well known to outsiders—Jaisalmer is such a place. Once a major stop along the silk road, this living museum and surrounding countryside has something for everyone: tragic history, unbelievable architecture, unique cultural groups and resilient wildlife.
20240917	15:30:00	16:00:00	JOURNEYS IN INDIA - GUJARAT: LAND OF EXTREMES	The people and wildlife of the western state of Gujarat have found ways to survive in an inhospitable environment. Unique big game exists side-by-side with some of the most talented and unique craftsman in the world. Bill gets the inside scoop on this strange land and is doubly surprised by his local guide.
20240917	16:00:00	16:30:00	NATURE'S FORCE - EP. 04	How are Rainbows formed and what's their science? We look at the largest Hail ever recorded and explain why it comes in so many shapes and sizes. Global Warming is a big issue and topic, and we give a nutshell insight to its meaning and impact on many levels. Forecasting is key and crucial to living with nature and its weather, as it involves precision technologies and expertise. Typhoon Halyan is an example of one of the most devastating storms in recent history and its story illustrates the power and destruction that Typhoons can cause.
20240917	16:30:00	17:00:00	BLUE WORLD	Jonathan travels to Iceland to investigate a giant crack in the ground filled with frigid runoff from melting glaciers. It's rumored to be the clearest water in the world. But to find out, Jonathan has to brave some very cold water. Next, he heads down to sunny Florida, not to dive a coral reef or a spectacular shipwreck, but to dive in shallow, murky water under a busy bridge. This secret spot is home to some of the ocean's most remarkable, and weird, animals.
20240917	17:00:00	17:30:00	JOURNEYS IN AFRICA - AMBOSELI NATL PARK: LAND OF EXTREMES	Amboseli National Park has had several years of drought so we're anxious to see if the famous elephant herds are healthy. Journeys takes to the air and ground to get a count of these incredible animals. Along the way, we visit the local Masai to see how they're adjusting to encroaching civilization and we encounter buffalo, hippos and numerous bird species that make Amboseli so special.
20240917	17:30:00	18:00:00	JOURNEYS IN AFRICA - NAKURU NATL PARK: WONDERLAND OF AFRICA	This under-visited, and far western Kenyan park area, is renowned for its giant flamingo gatherings that literally turn lakes pink. We explore these many parks on foot, in a safari vehicle and on horseback searching out the local legends that have marked this region the death zone. Our host faces imminent doom in three unique parks in this fast-paced episode.
20240917	18:00:00	18:50:00	PAST HUNTERS - S1 EP 07: RAZOR RUOCK'S HOME	We visit the home of Soccer legend Neil "Razor" Ruddock which seems to be haunted. Is it his home specifically? Or are these ghosts attached to him?

20240917	18:50:00	19:20:00	RACE OF LIFE - EP. 12	The ocean can be an unforgiving place. Animals living in the sea have to deal constantly with finding food, and protecting themselves from predators. There are many ways of hiding, defending, and feeding, and every different technique has advantages for different animals. For example, some animals use camouflage to escape detection or to sneak up on their prey, while other animals have coloration which intentionally makes them stand out. Some creatures hide from predators, while others stay in groups, out in the open, relying on safety in numbers. Some animals have dangerous spines or venom for protection, but even the most venomous creatures must sometimes be wary of predators. Different animals have taken advantage of different food sources, some feeding at the top of the food chain, and others at the bottom. Protecting themselves underwater is also a matter of invention and reinvention, and aquatic animals deploy an array of strategies just to stay alive. They have quite the toolbox to dip into – Evolutionary strategms such as colour and camouflage, toxins and teeth! Nudibranchs, clown fish, squid, octopus and orca whales are just some of the wonderful winners in the underwater race of life. Underwater footage shot in the wild,
20240917	19:20:00	19:55:00	EUROPEAN ISLANDS EP - 02: MADEIRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240917	19:55:00	20:45:00	SCOTSTAR - EP. 1	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240917	20:45:00	21:35:00	SCOTSTAR - EP. 2	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240917	21:35:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - GOA	On Christmas eve, Soumik arrives in the ex-Portuguese colony of Goa. A global party hub and Orthodox coastal state in one, Goa is a state in flux. An ambitious, young Fado singer, and a wise, old violinist, bring to life the struggle that many Goans feel between a colonial past and modern future, a laid back lifestyle challenged by tourist and consumer culture.
20240917	22:05:00	23:00:00	ON THE CITIES' ROOFTOPS - NEW YORK	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...
20240917	23:00:00	23:55:00	ON THE CITIES' ROOFTOPS - BARCELONA	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...

20240917	23:55:00	00:50:00	MIND IN MOTION	Our exploration will lead us into the depths of the brain and to the very sources of consciousness, for a fascinating glimpse into the process of thought. How can we decide whether a person in a coma is likely to return to consciousness? How can a person see with the tongue? Why do amputees experience phantom sensations in missing limbs? What do we have in common with the fruit fly? What are the effects of meditation on the brain? Scientific answers to these questions and others are now within our reach, thanks to stunning new research in the neurosciences. It focuses on the brain, our mental mechanisms, the connection between body and mind. Why we need to represent ourselves and others consciously in order to survive? In our quest for answers, we have met some remarkable scientists - high-ranking pioneers who are innovative yet modest. They share their discoveries and questions with us while stressing that it is vitally importance for our society to try and understand why we have conscious brains. The story of their search, across North America and Europe, will be vividly told through evocative visuals and original imagery from new brain exploration technology.
20240918	00:50:00	01:45:00	IDJWI - AFRICA'S FORGOTTEN ISLAND	The inhabitants of the island of Idjwi on Lake Kivu are poor but have one highly valuable asset in this region of Africa - peace. The island of Idjwi is saddled between Rwanda and the Democratic Republic of Congo, right in the middle of Lake Kivu. Although its inhabitants have been surrounded for years by war and suffering, they have always been spared the violence. So tens of thousands of refugees have flocked to safety and settled there. The only link to the mainland is via the Nyamizi, an old barge. Thanks to this shuttle service, the islanders can sell their harvests at markets on the mainland and establish contacts with the outside world. 360°-GEO boarded the boat that links the forgotten island to the African continent.
20240918	01:45:00	02:30:00	MAN EATERS	The first documentary about the Human-leopard conflict in Sri Lanka, "Man Eaters: A Human Leopard Story" approaches the conflict by analyzing past and present cases of man-eating leopards in Sri Lanka and what led to their strange behavior. Unlike India, man-eating leopards in Sri Lanka are very rare.
20240918	02:30:00	03:20:00	007: FOR OUR EYES ONLY	In "For Our Eyes Only," get to know all the actors who have embodied the super spy: Sean Connery, George Lazenby, Roger Moore, Timothy Dalton, Pierce Brosnan, and Daniel Craig, their similarities and characteristics that differentiate each one when exhibiting his well-known charm, class and elegance, combined with physical and mental prowess, that makes 007 a real life super hero.
20240918	03:20:00	04:15:00	THE NEW MAN OF AZERBAIJAN	Still today, there are no phones, no Internet and no newspapers in the remote areas of Azerbaijan. The newsman or "Ashig" has always played an important role in this Eastern culture over the centuries. Without them, the inhabitants would be radically cut off from the rest of the world and all its news. Certain distinguished representatives of their guild still travel the country's mountains to the remotest areas, to spread news, stories and the latest gossip. One of these representatives is Nemet, the old and honorable Aschug from Baku, who has been practicing this skill for a very long time. Like all Aschugs, he transmits his information through song!
20240918	04:15:00	04:35:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20240918	04:35:00	05:00:00	TRAVEL THRU HISTORY - PHILADELPHIA	The city of brotherly love does not disappoint history lovers. We visit Independence hall, the liberty bell, Elfreth's alley, the Philadelphia Museum of Art, and get creeped out at America's first penitentiary, Eastern State.

20240918	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - THE KOROWAI, AT THE HEART OF THE FOREST	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240918	05:30:00	05:55:00	MINDWORKS - AUDITORY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240918	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 04	The history of the British Empire colonial legacy in Northern Ireland is well known the world over but there is a largely untold story of the fights between and close quarter battles exchanged between the provisional IRA, the British army and the elite SAS. Although the IRA often employed „terrorist“ techniques within the city of London and on England's mainland not much is said of the often guerilla warfare techniques of the British Special Air Service in Northern Ireland since the beginning of this conflict. In this episode we will examine how the history of the Special Air Service affected the training of every elite force after it and how the close quarter battles in Northern Ireland in the late 1970s through to the millennium shaped both special forces and resistance methods.
20240918	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - ANTELOPE PARK	Karina's adventure continues at Antelope Park. She actually walks with lions and enjoys a wild swim with animated elephants. Karina watches lions feed, perhaps a little too close and witnesses a successful lion hunt before her very eyes.
20240918	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - BUMI HILLS SAFARI LODGE	Overlooking the enormous expanse of Lake Kariba, the vistas from Bumi Hills are breath taking! With crystal clear waters, rich red sand and plenty of wildlife, this place epitomizes paradise! In this episode Karina flies with Craig to the North West of Zimbabwe to visit Bumi Hills on the edge of Lake Kariba. Karina and Craig catch and cook their own fish in mud, watch the intriguing habits of Kariba elephants and track intrepid black rhino.
20240918	07:15:00	08:00:00	RV EXPLORERS S1 EP 01 - KAIKOURA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240918	08:00:00	08:25:00	TRAVEL THRU HISTORY - SAN ANTONIO	San Antonio is rich with Texas, Mexican, and Spanish history. We make our last stand at the Alamo, and visit Missions National Historical Park. Lastly, we spelunk the Natural Bridge Caverns underground.

20240918	08:25:00	08:50:00	JOURNEYS IN INDIA - MUMBAI & GOA	Join us as we explore the Gateway to India—Mumbai. From its early history, it's many foreign occupations to the hustle and bustle of today. Bill tells Mumbai's rich history is told through two of its most famous inhabitants, Gandhi and Kipling. We delve into the community of the Parsi faith and learn about their beliefs regarding the circle of life before heading to a little bit of heaven on earth, the coastal paradise of Goa. This hot spot for "in the know" travelers feature white, sandy beaches and is surrounded by tropical plant life. Bill introduces both the armchair and actual traveler to this incredible destination. We explore the Portuguese influence on Goa's architecture and cuisine, tour the ghost city of Old Goa and explore Roman Catholic churches.
20240918	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - KITTY LITTER, BULLET PROOF VEST, NEON LIGHTS	It was the PURRRFECT idea for making our furry friends more pleasant around the house! You'll learn how KITTY LITTER clawed its way into our homes. And you'll learn how a garment made out of special woven fibers can stop a bullet, plus, why is walking under a ladder bad luck? And finally, we'll CUT TO THE CHASE and explain the history behind this common phrase!
20240918	09:15:00	09:45:00	NEW FRONTIER - THE ICE GIANTS	Beyond the asteroid belt lay the ice giants, some can be seen with the naked eye, others only glimpsed once by a passing probe. We are again sending cameras to the edge of the solar system giving us new insights into the evolution of our worlds.
20240918	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 03: TENERIFE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240918	10:20:00	10:45:00	INSIDE OUTER SPACE - BLACK HOLES, OLYMPUS MONS, JUPITER, INTERNATIONAL SPACE STATION, LIGHTYEAR, FOOD IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240918	10:45:00	11:10:00	INSIDE OUTER SPACE - APOLLO 11, KUIPER BELT, URANUS, SETI, NASA, LAW IN SPACE	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240918	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 5	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240918	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 6	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240918	12:00:00	12:25:00	TRAVEL QUEST - ANTARCTICA	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240918	12:25:00	13:05:00	STOLEN TREASURES EP. 8	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240918	13:05:00	13:30:00	WILD AUSTRALIA WITH RAY MEARS - EP. 03	In Victoria just south west of Melbourne in the You Yangs National Park Ray Mears meets up with researcher Janine Duffy in a dry eucalyptus forest. They go in search of koalas and find a young male who nervously tries to establish his own territory.Ray moves down to the open grasslands and tracks a mob of Eastern Grey kangaroos. He visits the Mount Rothwell Conservation Reserve and meets an unusual marsupial – a predator – that is almost extinct on the mainland of Australia – a Tiger Quoll – smaller relative of the Tasmanian Devil. Finally Ray journeys through a Wet Eucalyptus forest to Lake Elizabeth and canoeing across the quiet waters finds himself surrounded by rare and unique duck billed platypuses
20240918	13:30:00	14:00:00	MINDWORKS - ALTERED VIEWS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240918	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - INDIA ARUNACHAL PRADESH: LIVING IN A BAMBOO HOUSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240918	14:30:00	15:00:00	WONDER - NATURE'S GAMES	Seg 1 Carrion flowers. Carrion flowers are the unorthodox perception of flowers for they are rare, big, and very unpleasant. Other terms are stink flowers and corpse flowers. The biggest flower in the world, rafflesia arnoldii, is a carrion flower. These flowers are difficult to find and reproduce and could breed through cross-pollination by attracting flies and dung beetles. Seg 2 Aposematism. Aposematism is a form of signalling that enables protection for both preys and predators by giving signs of poison and danger through showing off the bright colors and patterns on their epidermal layers that become associated with inedibility. Some species have developed mimicry based on aposematism in order to avail the protection aposematic colors give. Seg 3 Cuckoo Misdirection. Cuckoo misdirection demonstrates the mimicking abilities of a female cuckoo in order to find host nests to hatch her eggs. The female mimics a cry of a predator bird in order to frighten the hosts, leaving them vulnerable, thus the cuckoo can seize the chance to drop her egg on a host nest. Seg 4 Pheromones. Animal pheromones are the chemicals secreted and released by different species to communicate with other organisms. There are various types serving different purposes, ranging from reproduction, to trailing, to alarms. Some pheromones are also specific to one species of
20240918	15:00:00	15:30:00	JOURNEYS IN INDIA - GUJARAT: LAND OF EXTREMES	The people and wildlife of the western state of Gujarat have found ways to survive in an inhospitable environment. Unique big game exists side-by-side with some of the most talented and unique craftsman in the world. Bill gets the inside scoop on this strange land and is doubly surprised by his local guide.
20240918	15:30:00	16:00:00	JOURNEYS IN INDIA - CENTRAL INDIA: LAND OF PILGRIMAGES	Two of the most sacred places in India are featured in this fascinating episode. Bill first burst the myths surrounding the legendary Khajuraho and its intricately carved temples before heading to the Holy City of Varanasi. Varanasi, the Jerusalem or Mecca for Hindus with its deep connection to the Ganges River, is explored with an insider's perspective.
20240918	16:00:00	16:30:00	NATURE'S FORCE - EP. 05	Snow is a fascinating world of crystals that animals, plants, and humans have had to adapt to, in order to benefit from its best and survive its worst attributes. Some communities live with Tornadoes by building homes with survival features and rather than get out of their paths, they rely on warning systems and classifications. And behind all great weather events is Wind, find out how and why it can change from a gentle breeze into a devastating gale force and where does it go? Nature's force can be mystical and puzzling and the Sunshower has been the subject of myths and legends and superstitions, but it does have a scientific explanation.
20240918	16:30:00	17:00:00	BLUE WORLD	Jonathan joins an expedition to recruit a new Blue World camera operator in the form of a 1,000 pound Tiger shark! Working with experienced shark handlers, he puts a camera on the dorsal fin of the shark to see what it can film all by itself. But will Jonathan get his camera back? Next, he joins an experienced cave diver to explore a famous underwater cave in Northern Florida (USA).
20240918	17:00:00	17:30:00	JOURNEYS IN AFRICA - NAKURU NATL PARK: WONDERLAND OF AFRICA	This under-visited, and far western Kenyan park area, is renowned for its giant flamingo gatherings that literally turn lakes pink. We explore these many parks on foot, in a safari vehicle and on horseback searching out the local legends that have marked this region the death zone. Our host faces imminent doom in three unique parks in this fast-paced episode.
20240918	17:30:00	18:00:00	JOURNEYS IN AFRICA - VICTORIA FALLS: THE SMOKE THAT THUNDERS	One of the 7 Natural Wonders of the World, Victoria Falls is an amazing spectacle that straddles the Zambia/Zimbabwe border. The force of the water is so intense that the water bouncing back creates a rainforest. Remarkably, the wildlife in the area is as abundant as the water going over the falls.
20240918	18:00:00	18:50:00	PAST HUNTERS - S1 EP 08: BLACKPOOL PLEASURE BEACH	Blackpool Pleasure Beach is one of the most visited attractions in the United Kingdom. People visit it not only for the fun, but to also hopefully catch a glimpse of the many ghosts that haunt there.

20240918	18:50:00	19:20:00	RACE OF LIFE - EP. 13	In this episode we explore the Race of Life on a small scale but no less competitive or cruel for all that. Insects burrow through the ground, hop and sing in the trees, and dart and dance in the air. They come in many different colors and shapes. There are many reasons why insects are so successful at surviving. Their ability to survive in all kinds of temperatures and environments. A strong, hard but flexible shell called an exoskeleton covers their soft organs and is resistant to chemicals, water and physical impact. Their wings give them the option of flying away from dangerous situations or toward food or mates. In this episode: Dragonflies hover like helicopters over ponds and lakes, then suddenly dart away, pursuing prey or other dragonflies. The monarch butterfly goes through a miraculous metamorphosis, changing from an egg to a hungry caterpillar to a quiet pupa and emerging as a beautiful winged adult. The praying mantis is master of disguise. Its green body, wings and legs merge into the green, leafy background so carefully it seems to be part of the grass. Perched at an angle, with its spiny forelegs raised in a prayerlike pose, the
20240918	19:20:00	19:55:00	EUROPEAN ISLANDS EP - 03: TENERIFE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240918	19:55:00	20:45:00	SCOTSTAR - EP. 3	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240918	20:45:00	21:35:00	SCOTSTAR - EP. 1	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240918	21:35:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - NAGALAND	High in the eastern mountains in a remote corner of India, Soumik encounters the Naga tribes. They teach him about their mysterious customs, chicken dances and head-hunting traditions, part of a unique identity at the brink of extinction. The Nagas wish to preserve.
20240918	22:05:00	23:00:00	HIDDEN TRACES	On the 11th of November, 1918, the First World War drew to an end with a terrible toll... after a conflict unlike anything Humanity had ever seen before. For 4 years and 3 months, soldiers from at least 20 countries were plunged in the hell of trenches... caught under a deluge of bombs.
20240918	23:00:00	23:55:00	HIDDEN TRACES	This was the « other » Second World War – the one in the Pacific, confronting the Japanese Imperial Army to the Americans. Although not as famous as the war that raged in Europe, this conflict was just as ferocious and central to our collective memory.
20240918	23:55:00	00:50:00	THE MYSTERY OF DARK MATTER	Dark matter, which is unknown and undetectable in our physical models, would appear to populate the cosmos on a massive scale. For the first time, a film portrays the wild scientific quest that dark matter gives rise to. A real thriller. In our physical models, the weight of all observable matter (stars, galaxies, etc.) accounts for just 4% of the universe, whereas an invisible, unknown matter that no tool has ever been able to detect appears to populate the universe on a massive scale. Today, astrophysicists and cosmologists - researchers in the fields of the infinitely large and the infinitely small - are joining forces to solve a major mystery: what is this famous “dark matter” made up of? A breath-taking thriller that leads us to the dawn of a scientific and metaphysical revolution, akin to Copernic's or Galileo's. It could totally change the way we perceive our world. 2013 : Best film Award at the International Science Film Festival (Athens, Greece).

20240919	00:50:00	01:45:00	ARGAN OIL: THE WHITE GOLD OF MOROCCO	This report follows the process of making Argan oil, beginning with the harvest and ending with the cooperatives working for the international market. Made from the nuts of the Argan tree, which grows almost exclusively in the Essaouira region of Morocco, Argan oil has become one of the latest miracle ingredients of the beauty industry in Europe. Publicity is created around the fact that this oil is made by Berber women. But who are they? How do they live? And how hard is their work? We accompany these women in their daily lives and take part in their traditions.
20240919	01:45:00	02:40:00	NEW ZEALAND'S RACE OF EXCESSES	A plunge into New Zealand's Ultramarathon preparations, a tradition that comes from a Maori legend. 55 year-old Lilac Fley is an athlete and many times winner of the extreme race. A Maori legend dictates the course of the Ultramarathon. It tells the story of a boy who once lived with his tribe on the New Zealand coast. One day his mother asked him to search for some kumaras, or sweet potatoes, for a meal. Instead of digging for them, he decided to steal some from the neighboring tribe. Till this day, runners follow in his footsteps along the coastline - during New Zealand's most famous marathon.
20240919	02:40:00	03:35:00	PARAGUAY'S NEW HOUSES	In Paraguay, the loofah plant is used to make vegetable sponges but nowadays, it can also used to build houses. 360°GEO - Report follows Elsa Zaldivar on her quest to free Paraguay from its housing shortage.Until recently, the loofah plant in Paraguay had fallen into oblivion. But over the past few years, it has experienced a successful comeback - as bath sponge. Today, loofah sponges are sold throughout the world.According to Elsa Zaldivar, loofah is now also being used in the construction of houses. The once densely wooded countryside has today been largely chopped down. Many people do not have access to affordable building materials. The idea of the loofah-cooperative is to compound loofah remains with plastic waste in order to create a a solid building material for house walls.
20240919	03:35:00	04:35:00	SAVING AUSCHWITZ?	70 years after Auschwitz Museum was founded as the memorial site of the Shoah, this site is subject to diversions, confrontations and plundering. Several attempts to exploit and rewrite its history are at work. The danger of desensitization through mass tourism, or the attempts of the local town and its citizens to simply erase the nightmare to make place for new urban landscape are real threats affecting the future of this memorial site. Today, as the last survivors are passing on, what to do with the Auschwitz site?
20240919	04:35:00	05:00:00	TRAVEL THRU HISTORY - NASHVILLE	This country music Mecca has a plethora of American history to explore. We'll stand on the stage of the Grand Ole Opry, visit the home of the 7th US President Andrew Jackson, and visit the largest recreation of the Parthenon outside of Greece.
20240919	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - INDONESIA THE TORAJA: LIVING IN THE CENTER OF THE UNIVERSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240919	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 05	In 1989, CIA operative Kurt Muse was imprisoned at the notorious Carcel Modelo in Panama for his role in organizing radio transmissions against dictator Manuel Noriega. That December, an elite group of the US Delta Force breached the roof of the prison, and one of the most daring close quarter battle operations in history began. From the dramatic helicopter crash and wounding of several Delta operators to the extraction of the entire team by the 5th Infantry Division, this is prime material for CQB analysis. In this episode, CQB recreates the raid, focusing on the "sub-second" reflexes of the Delta Force team from the moment they entered the prison to their extraction from the roof of the prison by an MH-6 "Little Bird" helicopter.
20240919	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - BUMI HILLS SAFARI LODGE	Overlooking the enormous expanse of Lake Kariba, the vistas from Bumi Hills are breath taking! With crystal clear waters, rich red sand and plenty of wildlife, this place epitomizes paradise! In this episode Karina flies with Craig to the North West of Zimbabwe to visit Bumi Hills on the edge of Lake Kariba. Karina and Craig catch and cook their own fish in mud, watch the intriguing habits of Kariba elephants and track intrepid black rhino.

Located out of sight at the border of the Banco forest, this prison host 5,000 inmates but has capacity for 1,500. With the inmates' help, life inside is organized, and a degree of stability exists.
20240919	13:30:00	14:00:00	MINDWORKS - AUDITORY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.

20240919	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - BURKINA FASO THE LABYRINTH CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240919	14:30:00	15:00:00	WONDER - PERCEPTION	Seg 1 Saccadic Eye Masking. Saccadic eye movements are characterized as the fast movement of eyes when perceiving motion. These are so fast that they are blurred. To compensate for the blurriness, our brains mask these blurred visions to help us see a completed albeit masked version of sight. Seg 2 Plant Movement. While plants do not exhibit movement for locomotion or moving from place to place, they still exhibit movement in response to different stimuli. These movements are plant adaptations for food production, plant reproduction and survival. Seg 3 The Language of Color. Language plays a major role in how people from different parts of the world perceive color. The fact that some languages completely lack terms for some colors that other languages have come to know offers insight on how much influence it has on the way people see colors. Seg 4 Color Blindness. Color blindness is the condition that makes people not able to properly see and perceive colors. Color blindness is the result of damaged or underdeveloped rods and cones. these are the light sensitive cells that can be found in the part of our eyes known as the retina which are responsible for seeing colors. Color blindness can either be
20240919	15:00:00	15:30:00	JOURNEYS IN INDIA - CENTRAL INDIA: LAND OF PILGRIMAGES	Two of the most sacred places in India are featured in this fascinating episode. Bill first burst the myths surrounding the legendary Khajuraho and its intricately carved temples before heading to the Holy City of Varanasi. Varanasi, the Jerusalem or Mecca for Hindus with its deep connection to the Ganges River, is explored with an insider's perspective.
20240919	15:30:00	16:00:00	JOURNEYS IN INDIA - MYSORE: THE REBEL KINGDOM	Journeys explores the history and fables that surround the controversial rebel leader Tipu Sultan. Mysore was the center of an Empire strong enough to challenge the British. Tipu's over-the-top personality is reflected in the architecture, gardens and stories that still permeate this metropolis.
20240919	16:00:00	16:30:00	NATURE'S FORCE - EP. 06	What is La Nina and how is it being monitored? Find out the effects and the reach that this system is influencing. How did Indian Summer get its name and what is the science behind the phenomenon? Winter is the season that has the biggest effect on the planet, animal behaviour and often brings out the worst that nature can bring. Nature's Halo is a magical sight with a scientific explanation. The story of and lessons from Hurricane Katrina give us a great understanding of the ferocity and speed that nature can unleash
20240919	16:30:00	17:00:00	BLUE WORLD	Cave diving is the most difficult and dangerous type of diving, so the training to become a certified cave diver is arduous. This episode documents Jonathan's actual cave training in the Bahamas and follows him as he learns how to dive safely in the overhead environment of a cave in an attempt to earn his full cave diver certification.

20240919	17:00:00	17:30:00	JOURNEYS IN AFRICA - VICTORIA FALLS: THE SMOKE THAT THUNDERS	One of the 7 Natural Wonders of the World, Victoria Falls is an amazing spectacle that straddles the Zambia/Zimbabwe border. The force of the water is so intense that the water bouncing back creates a rainforest. Remarkably, the wildlife in the area is as abundant as the water going over the falls.
20240919	17:30:00	18:00:00	JOURNEYS IN AFRICA - NORTHERN CAPE - SOUTH AFRICA'S DESERT	Once a year in good rain years, the deserts of South Africa explode in color. This is the greatest flower bloom in the world. We venture into the desert to experience this first-hand and film the rare animals that call this arid land home.
20240919	18:00:00	18:50:00	PAST HUNTERS - S1 EP 09: WHITBY HALL	Built in the early 1800s, Whitby Hall used to be an administrative center and now stands as a public park and arts center. It has never before been investigated, but staff have reported many noises and presences among them.
20240919	18:50:00	19:20:00	RACE OF LIFE - EP. 03	Sleek, dangerous, fast, and vicious. Revered for their beauty and vitality. No-one runs the Race of Life faster than the Cheetah, and yet it is on the endangered species list. The Leopard is perhaps the best equipped survivor for the long run, with its population spread far beyond Sub-Saharan Africa. This success is probably to do with the fact they are 'opportunistic hunters'. And what of the Lion? Known as the King of the Jungle, (even though they don't live there), lions hunt buffalos, giraffes, warthogs, wildebeests and zebras, and antelopes when the opportunity presents itself. Lions are high up on the food chain, the very centre of their food web, so have almost no predators. Another loner in the race of life, the snow leopard prefers to inhabit steep cliff areas, rocky outcrops and ravines. To survive, the snow leopard must be a clever and resourceful hunter. Next, we leave the Snow Leopard and the great Asian mountains behind, and travel to the Americas, where the Cougar roam. Also known as mountain lions or pumas, cougars are agile and sleek, known for their habit of appearing from seemingly nowhere, and pouncing on their prey. The Tiger -
20240919	19:20:00	19:45:00	EUROPEAN ISLANDS EP - 04: LANZAROTE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240919	19:45:00	20:10:00	WHAT IN THE WORLD - EP 01	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240919	20:10:00	20:40:00	WHAT IN THE WORLD - EP 02	For over 24 years, East Timor (now known as Timor Leste) endured a crushing occupation inflicted on them by neighbouring Indonesia on the pretext of the fight against communism. The war was brought to a controversial conclusion in 1999. However, trauma from that period lives on as evidenced by the testimonies of Nelson Belo, Gregorio Saldanha and Pascal Oliveira, survivors of the infamous 1991 Santa Cruz Massacre. This film recalls the trauma of Timor Leste in this the tenth anniversary of its independence.
20240919	20:40:00	21:10:00	WHAT IN THE WORLD - EP 03	Timber is one of this country's biggest natural resources and the source of great potential wealth. Hence the existence of wholesale illegal logging, irrespective of the consequences to the local environment. This has led concerned parties to set up the Olancho Environmental Movement. This organization has mobilized to protect these forests, at some risk to its members, like Rene Gradiz, whose testimony is disturbing in the extreme.

20240919	21:10:00	21:35:00	WHAT IN THE WORLD - EP 04	Indris Seid Yimer and Emyet Assen Woraki's lives have been utterly transformed in the last thirty years. In 1984, they, their families and their community were engulfed in famine and devastation, a famine memorably described by BBC journalist Michael Buerk as "the closest thing to hell on Earth". Set in the Wollo area, the epicentre of the 1984 famine, the film tells their story. Other contributions featured are from people like entrepreneur Samuel Alemu and financier Ermyas Amelga. It also showcases the hauntingly beautiful UNESCO World Heritage site in Lalibela.
20240919	21:35:00	22:15:00	WHAT IN THE WORLD - EP 27	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240919	22:15:00	23:00:00	A YEAR IN THE WILD - EP.2	A resident baboon on one of the ranches requires some human help to extract a snare. The splinters pack run into a coalition of cheetahs. Jess visits the new-born Splinters pups. Pungwe are on the hunt for big game as they take on formidable buffalo. The Splinters once again demonstrate their extraordinary hunting tactics.
20240919	23:00:00	23:45:00	A YEAR IN THE WILD - EP.3	As a new year starts in the heart of Africa, the rainy season has come to the Okavango Delta in Botswana, and with it begins a season of plenty and the luxury of permanent and abundant water sources. In South Africa's Hluhluwe-Imfolozi Game Reserve, a group of rare samango monkeys take advantage of the abundant fruit born by a large Natal fig tree. In Thailand, a group of rhesus macaques have discovered a mango tree, and are busy feeding and stuffing their throat pouches with the fruit. Back in the Okavango Delta, the rains have also brought large buffalo herds back to the Xakanaxa area, the territory of a powerful pride of lions. Life and death are also a close-run thing for young gannet fledglings on their massive breeding colony of 50.000 birds on Malgas Island off the South African coast. As the young birds attempt to spread their wings and take to the air, some end up in the water. Many young animals have to run a gauntlet early on in life, and as a young loggerhead turtle hatches out of its egg and emerges from the sand on a beach in Mozambique, it faces a gruelling journey from its nest on the beach down to the sea. African penguins, too,
20240919	23:45:00	00:40:00	CREATIVE KILLERS - EP. 02	On the plains of East Africa an epic journey is underway. Millions of wildebeest and thousands of zebras march in an annual, circular migration in search of lush grazing. Two major rivers, the Mara and the Grumeti, intersect their route and force the herds to cross. Crocodiles, the biggest living on earth, wait in these rivers to take advantage of this moving feast. In this ever-changing waterscape successful predators adapt their hunting strategies to suit the shifting environment. On the Grumeti River, DC is the Dominant Croc of a loose gang called the RagTags. When the wildebeest arrive to drink, these Pit Stops, Zone 1, are the crocs' first challenge. It doesn't go well for the RagTags. These smaller, inexperienced crocs don't calculate their launch speed correctly, so opportunities are missed. DC finds a pool where he can work alone. He grabs an impressive male zebra, but the pool's not deep enough to drown it. The zebra fights hard and DC is forced to let it go. Deep Water, Zone 2, is a zone exclusive to the Mara River. Steep banks and fast-flowing water make it a river that favours the crocodiles. Wildebeest plunge off the cliffs straight into the deep channel. To hunt here is easy: Swim, launch and drown. There's no free lunch on the Grumeti. DC waits for the next opportunity. He picks up vibrations in the water that tell him the herds have started to cross. Zone 3, The Shallows, is a dangerous zone for crocodiles. Wildebeest gallop across the river and crocodiles can get trampled. DC captures a calf but the RagTags share with him and DC is left with a single mouthful. Frustrated with his small portion, DC drives the gang away. Theft is a viable strategy in the Grumeti. The RagTags follow DC when he tries to hoard his next prize.

20240920	00:40:00	01:35:00	SURROUNDED BY WAVES	The international scientific community is called on to take sides and provide solid answers. "Surrounded by Waves" explores the methods and motivations behind the most prominent research in the field and clarifies what we currently know, all with a mind to the social context behind the issue. Through an elegant blend of interviews, archives, experiments and 3D animation, the film clearly assesses the estimated risk linked to cell phones while offering a subtle observation of society's growing distrust of its industries and the unprecedented role of science in the debate.
20240920	01:35:00	02:30:00	THE BEST SHEEPDOGS FROM WALES	The film follows Nigel and his dogs throughout the summer. Nigel Watkins is a farmer and vice-world champion sheepdog handler. Together with his partner, Janet, he runs his little farm Llanddeusant in the Brecon Beacons National Park in the south of Wales. Farming takes up a fair amount of his time, but his hobbies take up much more of it: he trains Border Collies, a breed of sheepdog.
20240920	02:30:00	03:30:00	THE TIGERS FROM SCOTLAND	Narrated by Iain Glen, this film focuses on the fragile existence of the Scottish Wildcats, their status and what conservation efforts are being undertaken to ensure their survival.
20240920	03:30:00	04:05:00	AVIATORS S8 EP 1	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a broad range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240920	04:05:00	04:35:00	AVIATORS S8 EP 5	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a broad range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240920	04:35:00	05:00:00	TRAVEL THRU HISTORY - WILMINGTON	America's military history is on display on the decks of the USS North Carolina. Then we visit the historic Confederate Fort Fisher civil war museum and learn about the Carolina's role in the civil war.
20240920	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - AUSTRIA VORARLBERG THE GREEN VALLEY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240920	05:30:00	05:55:00	MINDWORKS - OUR AMAZING BRAIN	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.

20240920	05:55:00	06:25:00	CLOSE QUARTER BATTLE - EP. 06	Joint Task Force Two (JTF 2) is the elite Canadian Forces Special Operations unit responsible for a broad range of missions, including counter-terrorism and armed assistance to other government departments. Highly secretive, JTF 2 and its predecessor, the Canadian Airborne Regiment, have been deployed in hotspots around the world from Haiti to Bosnia. This episode focuses on the legendary JTF sniper teams and their use in Afghanistan alongside the British SAS and the US Delta Force at “the sharp end of the spear.” A book written by an ex-JTF member explains how, in 2006, both the Pentagon and the British Foreign Office noted the instrumental role that JTF 2 played in the rescue of the British and Canadian Christian Peacemaker Team held hostage in Iraq. Unique in look, the FN P90 personal defense weapon, used by JTF 2 soldiers and special police around the world, will be highlighted in this program.
20240920	06:25:00	06:50:00	MOST INTRIGUING SAFARI DESTINATIONS - INN ON RUPURARA	For a complete change of scenery, Karina continues on her safari in the Eastern Highlands of Zimbabwe at the Inn on the Rupurara, where she is literally on top of the world, with incredible granite outcrops. She views the 2nd Highest water falls in Africa, the Mtarazi. Spencer treats Karina to a walking and horseback safari and she terrorizes the crew with her trout fly fishing technique! Karina walks through a Forest Wonderland armed with a map and takes an invigorating Swim in the pool above the Pungwe Falls.
20240920	06:50:00	07:15:00	MOST INTRIGUING SAFARI DESTINATIONS - SINGITA PAMUSHANA	Karina has the fortune of visiting one of the top 10 safari lodges in the world and arguably the finest game reserve on earth: SINGITA PAMUSHANA, in the Malilangwe conservation trust. Karina describes the beautiful lodge and wines and dines in style. Karina experiences mating lions. Karina's adventurous guide Craig Van Zyl leads her to a grumpy black rhino that frazzles her nerves. Craig persuades Karina to observe elephants while they enjoy themselves wallowing in the mud, and they spend a night sleeping under the stars.
20240920	07:15:00	08:00:00	RV EXPLORERS S1 EP 03 - WHANGAREI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240920	08:00:00	08:25:00	TRAVEL THRU HISTORY - BELIZE	Un-Belizable! We're off on a Central American Mayan excursion. We head up the steps of the ancient high temple at Lamanai. Then we take a city tour of the main tourist destination, Belize City. We learn about Belize's colonial roots at the Belize City History Museum and dive the amazing Blue Hole.
20240920	08:25:00	08:50:00	JOURNEYS IN INDIA - NEPAL: KATHMANDU AND CHITWAN NATIONAL PARK	Just north of India is a land steeped in mystery—Nepal. Bill tours the city of Kathmandu, visits the World Heritage temple complexes, and walks along the city streets, where ancient and modern vie for space. We fly around Mount Everest, arguably the world's most famous mountain, before heading into Chitwan National Park. In Chitwan, Bill searches for tigers from the back of an elephant and observes the myriad of wildlife that call the park home.
20240920	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - SWEET 'N LOW, RIDING SHOTGUN, POTATO CHIP	It's been sweetening America for almost 40 years! Now, find out the truth behind how SWEET N LOW actually got its name! And why do we yell SHOTGUN when getting into a car with friends? Then, is it really bad luck to open an umbrella in the house? And, learn the salty truth on how the POTATO CHIP was invented out of ANGER!
20240920	09:15:00	09:45:00	NEW FRONTIER - THE SUN	It powers the machinery of nature; our weather, encourages and sustains life on land and at sea. When it sets in the West it reveals to us its many billions of sibling stars populating the night sky. We study our Sun closely, and like a Rosetta stone it can reveal the secrets of all the other stars above.
20240920	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 05: LA PALMA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.

20240920	10:20:00	10:45:00	INSIDE OUTER SPACE - FERMI PARADOX, SOLAR WIND, NEPTUNE, THE GREAT RED SPOT, ROBOTS, DONUT PLANETS	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240920	10:45:00	11:10:00	INSIDE OUTER SPACE - MILKY WAY, ENECLADUS, SATURN, TIDES, ECLIPSE, LOOKING INTO THE PAST	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240920	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 7	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240920	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 8	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240920	12:00:00	12:25:00	TRAVEL QUEST - SOUTH KOREA	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've led groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240920	12:25:00	13:05:00	STOLEN TREASURES EP. 3	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240920	13:05:00	13:30:00	WILD AUSTRALIA WITH RAY MEARS - EP. 04	Ray starts by hitching a lift on a research crane to get a bird's eye view over the Rainforest; from there, he can see the geographical position responsible for this lush vegetation: mountain range in the west and the sea in the east. He then goes down to the ground, delving into the heart of the jungle, he comes across millennial trees, camouflage spiders and a miniature dinosaur, the Boyd's Forest Dragon. He pursues his journey by travelling on a zipwire with wildlife expert, Justin McMahon. Together they observe life in the canopy. Meanwhile, Ray's cameraman Martin Hayward Smith has been filming an animal that can only be found in this part of the world: the Bennett's tree kangaroo, a cute marsupial that lives like a monkey.

20240920	13:30:00	14:00:00	MINDWORKS - EVERYDAY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240920	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - ICELAND THE WESTMAN ISLANDS AN UNPREDICTABLE LAND	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240920	14:30:00	15:00:00	WONDER - PHANTOMS	Seg 1 Body Transfer Illusion. The Body Transfer Illusion is the illusion of perceiving another object to be part of your body. This is best exemplified by the rubber hand experiment where in a volunteer is a shown a rubber hand while their real hand is obscured. Both the fake and real hand is subject to the same stimulus and soon the volunteer will perceive the fake hand as theirs. Seg 2 Autokinetic Effect. The Autokinetic Effect is the effect caused by subtle movements in our eyes when looking at dark environments. This causes stationary light sources to be perceived as moving even though they aren't. Seg 3 Moon Illusion. The Moon Illusion is the illusion where the moon appears to change sizes during different periods in time when especially when it appears closer to the horizon in fact the moon's size remains constant. This happens because we are able to compare the moon's size with visual references like trees and buildings when it appears nearer the horizon. Seg 4 Geometric Illusions. Geometric Illusions are illusions that can literally be illustrated on paper. This type of illusions make use of geometric properties of renderings and illustration
20240920	15:00:00	15:30:00	JOURNEYS IN INDIA - MYSORE: THE REBEL KINGDOM	Journeys explores the history and fables that surround the controversial rebel leader Tipu Sultan. Mysore was the center of an Empire strong enough to challenge the British. Tipu's over-the-top personality is reflected in the architecture, gardens and stories that still permeate this metropolis.
20240920	15:30:00	16:00:00	JOURNEYS IN INDIA - NAGARHOLE AND BANDIPUR: THE SOUTHERN PARADISE OF INDIA	These two national parks have some of the most diverse wildlife found on the Indian subcontinent. From the ancestors of our domesticated livestock to leopards, bear and elephants—this is a photographer's paradise. Join Bill as he attempts to track down two of the hardest predators to photograph—the leopard and the sloth bear.
20240920	16:00:00	16:30:00	NATURE'S FORCE - EP. 07	Weather is universal and it's also Extra Terrestrial. Learn about space weather and how it can impact us on earth. Supercells are unique storms that scientists have learnt to measure into three types. Under the earth's crust, nature is extremely energetic, and we see this through the Volcano which acts as our eye into the forces beneath our feet. Learn about the purple buzzing glow called St Elmo's Fire, how it was named and were to look for it.

20240920	16:30:00	17:00:00	BLUE WORLD	Deep in the heart of Mexico's Yucatan, Jonathan is exploring remote cenotes in the jungle that were once used for Mayan rituals. Just reaching the surface of the water requires rappelling down from the forest above. But then, beneath the surface, he encounters strange alien life forms that live in total darkness, and the remains of humans and animal sacrifices from an ancient culture.
20240920	17:00:00	17:30:00	JOURNEYS IN AFRICA - NORTHERN CAPE - SOUTH AFRICA'S DESERT	Once a year in good rain years, the deserts of South Africa explode in color. This is the greatest flower bloom in the world. We venture into the desert to experience this first-hand and film the rare animals that call this arid land home.
20240920	17:30:00	18:00:00	JOURNEYS IN AFRICA - DURBAN: CITY OF DIVERSITY	Few people know that Gandhi got his political activist start in South Africa. This is a city where Asia meets Africa and is one of the most diverse cities in the world. Here Journeys encounters people of European, Far Eastern and Indian descent as well as the local Zulus.
20240920	18:00:00	18:50:00	PAST HUNTERS - S1 EP 10: CARNFIELD HALL	Carnfield Hall is a country house dating from the 15th and 16th Centuries. This private residence turn event hall is using its paranormal activity to draw in business. Are these spirits the old residents?
20240920	18:50:00	19:20:00	RACE OF LIFE - EP. 04	Deserts are dry. Deserts are extreme. True deserts get less than 18 cm of rain per year. True deserts have very few plants. Semi-desert habitats have enough rainfall to support more plant and animal life. Either way, deserts are not easy places for animals to live. Desert animals have evolved to handle the desert's heat and lack of water. They have adapted their bodies and behaviors to the desert climate. Most can survive on small amounts of water and many get all of their water from their food. Some drink maybe once a week and travel considerable distances to find isolated waterholes and springs. Large animals seek shade during the hottest part of the day. Some animals dig a hollow depression into the ground and lie in the cooler soil while others are nocturnal. Many reptiles and other animals protect themselves from the extreme temperature by spending their time in burrows. The scorpion is one of the most ancient creatures on earth, in existence since life first crawled out of the sea. One look and you can see why they're born survivors. <u>Not only are their bodies armoured against the desert heat – and other predators – but all scorpions have</u>
20240920	19:20:00	19:55:00	EUROPEAN ISLANDS EP - 05: LA PALMA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240920	19:55:00	20:25:00	WHAT IN THE WORLD - EP 05	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240920	20:25:00	20:50:00	WHAT IN THE WORLD - EP 06	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240920	20:50:00	21:20:00	WHAT IN THE WORLD - EP 15	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240920	22:10:00	22:35:00	NEW FRONTIER - THE INNER WORLDS	They orbit between us and our Star, the inner worlds; hidden within the sun's glare often only visible at sunrise or sunset. Venus the first and brightest star in the evening sky, and Mercury fleeting across the solar disk. They are half of our solar system's terrestrial planets yet we know so little. As we begin to take a closer look at our companions they are posing more questions than answers.
20240920	22:35:00	23:00:00	NEW FRONTIER - NEXT STOP MARS	It has fired our imaginations for millennia, Mars, the God of War and the source of Man's science fictional demise. We know the dry barren planet was once flowing with vast reservoirs of water, the sky thick and filled with clouds and the tantalizing possibility of life. It is the only other place in our solar system than Man might one day call home.
20240920	23:00:00	23:25:00	NEW FRONTIER - THE PLANET MAKERS	From the beginnings of our Solar System four and half billion years ago there remains tantalizing clues to its evolution; remnant debris: asteroids and comets. They vary in size from grains of dust to mountain sides, footballs to planetoids. They were the building blocks of the planets and perhaps carry the origins of life itself. Now within our grasp these rocks of ice and dust are ready to give up their secrets.

20240920	23:25:00	23:50:00	NEW FRONTIER - THE ICE GIANTS	Beyond the asteroid belt lay the ice giants, some can be seen with the naked eye, others only glimpsed once by a passing probe. We are again sending cameras to the edge of the solar system giving us new insights into the evolution of our worlds.
20240920	23:50:00	01:20:00	THE MYSTERY OF THE DISAPPEARING BEES	An investigation into a worldwide ecological disaster that could endanger the whole of humanity. The future of our food resources depends on one small insect - the western honey bee, or <i>Apis mellifera</i> . Indeed, it is the most important agricultural pollinator on our planet given that one third of our food supply depends directly on pollination from bees. This documentary tells the story of a worldwide ecological disaster that has been waiting to happen for several generations. It was filmed over an 18-month period in France, Germany, the U.S., Canada and Scotland and retraces the various leads carried out by research scientists in order to try and understand and to stop the declining numbers of domestic and wild bees. Scientists are not the only professionals to figure at the centre of this drama. Beekeepers are in the front line, and striking contrasts exist among beekeepers' experiences in different countries, in various economic situations. The documentary seeks to understand how the long-enjoyed harmonious relationship between man and bee has now undergone such a radical change. It seeks to find a solution that goes beyond science. A solution that cannot
20240921	01:20:00	02:15:00	ARE THE SKIES TOO CROWDED?	International commercial aviation produces as much CO2 as Africa. The European Union plans to double the numbers of aircrafts by 2020. Can the earth handle a growing number of carbon dioxide-emitting planes in the upper atmospheric strata forever? The reduction of greenhouse gases is one of the main challenges of the 21st century and the aviation industry knows it will have to develop a "sustainable" aviation. Decline or regression is not an option. So, commercial aviation is looking for the answer in a field that has always served it well: scientific and technological innovation all over the world. Luckily, some interesting solutions are actively researched by those who are inventing the eco-friendly aviation of the next 50 years. The film aims to meet the players in an incredible transformation that will ultimately change everything about air travel.
20240921	02:15:00	03:10:00	NEW YORK - THE WORLD'S SMALLEST OPERA HOUSE	"If you can make it there, you can make it anywhere". That's the vision people from all over the world have of New York. This report takes a look behind the scenes of the world's smallest opera house, in the heart of New York. Tony Amato, the son of an Italian butcher, thought when he came to New York in the 40s that he could make it too by realizing his dream of owning an opera house. The house is 3 stories high and three windows wide. The hall feels no bigger than a living room, however its 107 seats are always sold out. Tony Amato continues to be the center and linchpin of this miniature opera. Tony is barely 5 foot tall, with his sneakers and the small, wiry man seems to be held up by his pant-suspenders. His voice is persuasive, his eyes bright. He conducts, sings, jumps, laughs and grumbles all at once. At 88 years of age, Maestro Tony Amato is in the middle of the season's last production.
20240921	03:10:00	04:00:00	007: FOR OUR EYES ONLY	In "For Our Eyes Only," get to know all the actors who have embodied the super spy: Sean Connery, George Lazenby, Roger Moore, Timothy Dalton, Pierce Brosnan, and Daniel Craig, their similarities and characteristics that differentiate each one when exhibiting his well-known charm, class and elegance, combined with physical and mental prowess, that makes 007 a real life super hero.
20240921	04:00:00	05:05:00	CHINA UNCOVERED - THE QUEST FOR WEALTH	Two brothers from rural China train in the art of Kung Fu in the hopes of elevating their lives however minimally. Meanwhile, rich kids in the city attend private English schools to improve their chances to study abroad. But China's favorite philanthropist Chen Guang Biao shares his rags-to-riches story proving that odds can indeed be beaten. Rural children in China may still dream small, but as for the young elite partying away in rooftop bars, life is sweet.

20240921	05:05:00	06:00:00	DEEP BLUE DIVE	The ethos of freediving is simple. The challenge: to dive as deep as possible on just one breath. The drive: to explore the ocean in the purest way. The goal: to make it back to the surface in a coherent state. In 'Deep Blue Dive' we voyage into this deep and dangerous world with Trevor Hutton, a freediver from South Africa, and reveal the extraordinary physiological challenges which have to be overcome to succeed in this sport. Trevor is a self-taught freediver operating on the periphery of the sport; southern Africa is not a chosen freediving location for good reason. The coastline is hostile, the swell runs high and the deeper water is frequented by every dangerous species of shark imaginable, the Great White in particular. Trevor is six feet tall and he weighs 220 pounds. This is a heavy frame to supply with oxygen, but he's well equipped. His lung capacity is nine litres and his average heart rate is 43 beats per minute. As soon as he hits the water, a set of strange physiological phenomena take over. We see how nerve receptors in his face trigger a response in the heart – slowing it down by an incredible 50%. Simultaneously, blood
20240921	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 07	In 1968, a new form of military policing was being developed in a rural area north of Los Angeles. The Los Angeles Police Department sent an observer to this unit, and he, in turn, took this knowledge back to the LAPD. This contributed to the development of the department's first Special Weapons and Tactics (S.W.A.T.) team. This CQB episode takes an historical journey to examine how this incident affected and changed police tactics around the world. Using CQB's trademark "sub-second" analysis, the program also looks at how police S.W.A.T. teams train, plan and equip themselves for the challenges of urban combat. The dramatization of a 1980s S.W.A.T. siege of a gang safe-house demonstrates the complicated challenge of protecting innocent people who might be caught in the line of fire, as well as the specifics of the squad's training regimen, how they communicated, and the special equipment they used.
20240921	06:30:00	07:15:00	PAST HUNTERS - S1 EP 01: BULKELEY HOTEL	The former home of Queen Victoria is now home to many spirits who have been seen by guests and staff. Witness the first ever formal documentation of the paranormal activities in the Bulkeley Hotel.
20240921	07:15:00	08:00:00	RV EXPLORERS S1 EP 01 - KAIKOURA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240921	08:00:00	08:25:00	SARAH SHARK - EP. 05	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.
20240921	08:25:00	08:50:00	JOURNEYS IN INDIA - TAMIL NADU: CHENNAI, PONDICHERRY AND MORE	Chennai, formerly known as Madras, can trace its roots back to a tiny fishing village. Bill explores the city's growth under the British East India Company, with visits to Fort St. George and the Fort Museum. We then travel to the nearby Sao Tome Basilica, the church and burial site of St. Thomas the Apostle. In Pondicherry, French influences can still be felt in the tree-lined streets, colonial mansions and cafés. Its beautiful setting on the Bay of Bengal makes Pondicherry a delightful place to spend the day. We also visit the ancient port city of Mahabalipuram, where the landscape is dominated by carved-stone architecture. The final highlight of our tour is the Descent of Ganga, which is the world's largest bas-relief carving.
20240921	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - THERMOS, PEZ CANDY, MARK TWAIN	Learn the secrets behind THERMOS' amazing technology! And they were the sweet candy pellets we loved as a kid, but did you know that PEZ was created to help people stop smoking? And find out how a steamboat inspired SAMUEL LANGHORNE CLEMENS to change his name to MARK TWAIN!

20240921	09:15:00	09:45:00	NEW FRONTIER - EXO PLANETS	As scientists and astronomers peer closer at nearby stars with ever more fidelity they are discovering planets; exo planets, worlds outside our own solar system. With technological advances and improved techniques scientists are discovering more and more worlds every day. With confidence scientists now calculated there could be as many as 40 billion Earth like planets in our Milky Way galaxy alone.
20240921	09:45:00	10:10:00	THE TECH EFFECT - EP. 06	In this episode we visit the home of the future, a place where automation, robotics and connectivity combine to create an easier and more sustainable life for its human inhabitants. From personal robots, to indoor hydroponic gardens, electronics companies are competing to find the most intuitive solutions to automating household chores. This episode also explores advances in technology in the motoring world, such as drones that give drivers advance warning of upcoming hazards, a “robot whisperer” who visits a car factory to study robotic body language and how Lamborghini is conducting carbon fibre tests in space. Finally, we look at how home gaming and drone racing are using innovation to expand entertainment options.
20240921	10:10:00	10:40:00	INSIDE OUTER SPACE - MILKY WAY, ENECLADUS, SATURN, TIDES, ECLIPSE, LOOKING INTO THE PAST	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240921	10:40:00	11:10:00	INSIDE OUTER SPACE - SPACE WALK, OORT CLOUD, MERCURY, SPACE SUIT, STAR CHART, PLUTO	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240921	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 8	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240921	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 9	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240921	12:00:00	12:25:00	TRAVEL QUEST - YAP	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!

20240921	12:25:00	13:05:00	STOLEN TREASURES - EP. 5	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240921	13:05:00	14:00:00	BLACK MAMBA: KISS OF DEATH	It's 'Silly Season' in Mamba Valley and like zombies from their graves, the heat draws Black Mambas from the shadows. They're on the hunt for summer lodgings but as the deadliest snake on the planet, they're not popular neighbors. Many will fall foul to a gunshot or the sharp end of a shovel. But some will be lucky enough to be 'rescued' by a snake wrangling team with a passion for Mambas and a unique facility where these snakes can be housed and observed. One snake has a special mission—she's recently mated and ready to deliver a new generation of silver killers into Mamba Valley. She's the deadliest snake on the planet, but can she outwit her greatest enemy and unleash her fearsome spawn on the valley?
20240921	14:00:00	14:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - KARNATAKA	In the tropical climes of verdant Karnataka, Soumik meets powerful dancers. They explain how India's archaic caste system has hurt their lives as performers. Yet here, atop mountains and forests, music and dance are one in the same—an enduring and ancient way of life.
20240921	14:30:00	15:00:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - VARANASI	In the world's oldest city of Varanasi, Soumik explores a neighbourhood that has produced five generations of Indian classical masters. He meets widowed women singers who have committed their lives to the Hindu God, Shiva, and a young drummer with the talent to make it big. Dedication to fading classical arts is formidable in this timeless city of religion, tradition and rising commercial interests.
20240921	15:00:00	15:30:00	JOURNEYS IN INDIA - NAGARHOLE AND BANDIPUR: THE SOUTHERN PARADISE OF INDIA	These two national parks have some of the most diverse wildlife found on the Indian subcontinent. From the ancestors of our domesticated livestock to leopards, bear and elephants—this is a photographer's paradise. Join Bill as he attempts to track down two of the hardest predators to photograph—the leopard and the sloth bear.
20240921	15:30:00	16:00:00	JOURNEYS IN INDIA - BHAVNAGAR: LAND OF SURPRISES	Where can you find literally hundreds of Jain Temples, a lost civilization and one of the top birding destinations in the world—the Bhavnagar region of course. Follow Bill as he attempts to climb 4000 steps to the great Jain temples of Palitana, floats through a lagoon full of flamingoes, egrets and cranes and learns about a kingdom lost to history.
20240921	16:00:00	17:00:00	BRAZIL'S COASTLINES - THE AMAZON	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240921	17:00:00	17:30:00	JOURNEYS IN AFRICA - DURBAN: CITY OF DIVERSITY	Few people know that Gandhi got his political activist start in South Africa. This is a city where Asia meets Africa and is one of the most diverse cities in the world. Here Journeys encounters people of European, Far Eastern and Indian descent as well as the local Zulus.

20240921	17:30:00	18:00:00	JOURNEYS IN AFRICA - HLUHLUWE: TALE OF TWO PARKS	If it's rhinos you want to see, you must visit Hluhluwe-Imfolozi Wildlife Park. This huge wilderness area has the highest density of rhino in the world. In addition to the rhino, we locate a pride of lions that is truly amazing. Mkuze National Park is a treasure trove of rare antelope and various other big game. Best of all, there is often no other guests, so this is one of Africa's best hidden gems.
20240921	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 06	A student is prepared to carry out the darting of a massive problematic buffalo that has been terrorizing staff members close to a camp. This task must be done on foot and the student needs to practice darting from many different distances before he can proceed.
20240921	18:25:00	19:20:00	WATER: H2O STORIES - THE SORCERER'S APPRENTICE	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240921	19:20:00	19:45:00	BIG COAST - HARTLEY BAY HUMPBACKS AND CHINOOK	Humpback Whales, perfect water, summer sunshine and one of the finest fishing Chinook Salmon solo fishing days!
20240921	19:45:00	20:10:00	BIG COAST - BC CENTRAL COAST SALMON SAFARI	Running Southbound outside on Central Coast with a big Tyee Chinook Release finish North of Milbanke Sound!
20240921	20:10:00	20:40:00	WHAT IN THE WORLD - EP 10	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240921	20:40:00	21:10:00	WHAT IN THE WORLD - EP 11	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240921	21:10:00	21:40:00	WHAT IN THE WORLD - EP 12	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240921	21:40:00	22:10:00	WHAT IN THE WORLD - EP 13	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240921	22:10:00	22:35:00	WILD AUSTRALIA WITH RAY MEARS - EP. 03	In Victoria just south west of Melbourne in the You Yangs National Park Ray Mears meets up with researcher Janine Duffy in a dry eucalyptus forest. They go in search of koalas and find a young male who nervously tries to establish his own territory. Ray moves down to the open grasslands and tracks a mob of Eastern Grey kangaroos. He visits the Mount Rothwell Conservation Reserve and meets an unusual marsupial – a predator – that is almost extinct on the mainland of Australia – a Tiger Quoll – smaller relative of the Tasmanian Devil. Finally Ray journeys through a Wet Eucalyptus forest to Lake Elizabeth and canoeing across the quiet waters finds himself surrounded by rare and unique duck billed platypuses
20240921	22:35:00	23:00:00	WILD AUSTRALIA WITH RAY MEARS - EP. 04	Ray starts by hitching a lift on a research crane to get a bird's eye view over the Rainforest; from there, he can see the geographical position responsible for this lush vegetation: mountain range in the west and the sea in the east. He then goes down to the ground, delving into the heart of the jungle, he comes across millennial trees, camouflage spiders and a miniature dinosaur, the Boyd's Forest Dragon. He pursues his journey by travelling on a zipwire with wildlife expert, Justin McMahon. Together they observe life in the canopy. Meanwhile, Ray's cameraman Martin Hayward Smith has been filming an animal that can only be found in this part of the world: the Bennett's tree kangaroo, a cute marsupial that lives like a monkey.
20240921	23:00:00	23:25:00	WILD AUSTRALIA WITH RAY MEARS - EP. 05	Ray takes the Great Ocean Road along the Antarctic facing coast of Australia – the longest South facing coastline in the world. He starts in Port Philip Bay the entrance to Melbourne Harbour where for the first time he sees a strange marine creature – the weedy sea dragon – a relative of the sea horse. He also swims with a unique species of dolphin – the Burrnunan Dolphins. Crossing the Bay he heads off down the longest War Memorial in the world – the Great Ocean Road and meets 93 year old Doug Stirling who remembers the world war 1 veterans building the road. Ray visits the Penguin Colony on Middle Island where guard dogs protect the penguins from foxes and he watches the night time return of the penguins after a day spent at sea fishing. He takes to the seas and discovers the creatures of the deep waters – albatross, balls of krill and a pod of fast moving common dolphins.
20240921	23:25:00	23:50:00	WILD AUSTRALIA WITH RAY MEARS - EP. 06	In this episode, Ray explores the Red Centre of the country and shows that the Australian desert is filled with life for those who know where to find water. He arrives in the Red Centre by chopper as he flies over the Uluru monolith or Ayres Rock. For his first stop, he goes to a red kangaroo sanctuary where he cuddles a joey, meets their carer Brolga and gets close to the usually wary adult red kangaroos. He pursues his journey deeper in the desert to meet a local aboriginal Sammy Wilson. They go to a traditional waterhole and chat over a camp fire about Sammy's ancestral knowledge of the land. Ray spends the night out under the stars before driving more inland to rocky areas where water collects. There Ray comes face to face with a wild kangaroo and rock wallabies. He then follows tracks along a dry river bed that lead him to Australia's wild dog: a dingo.

20240921	23:50:00	00:45:00	ALEXANDER THE GREAT, THE MACEDONIAN	A close look at Alexander the Great - from Macedonia to India. Alexander the Great has always enjoyed a unique status in history. To the Greeks and Romans, he was a hero, to the Arabs, he was a prophet, to Westerners, he is a myth. Alexander the Great spread Greek civilisation single-handedly throughout the ancient world, as far as the borders of India, by relentlessly pursuing his sworn enemy Darius the Great, King of Persia. But what remains today of the "real" Alexander? Of his life and environment? Through the many depictions of the hero and the archaeological traces of his triumphant conquest, this film portrays the legendary figure, who has always been, and continues to be, a great source of inspiration, even for artists of today.
20240922	00:45:00	01:40:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240922	01:40:00	02:35:00	CATHEDRAL BUILDERS	The epic history, in 3D, of Strasbourg Cathedral and its outstanding builders. A fascinating docudrama, from start to finish. Strasbourg Cathedral, a gothic jewel and the highest monument in the West until the 19th century, was both an excessive dream and an architectural feat. How, in the Middle Ages, was such a wonder made possible? Behind its elegant, pink sandstone façade and its famous rose window, which is set ablaze at sunset, three centuries of visionary and inspired master-builders followed on from one another – Erwin de Steinbach, Ulrich d'Ensingen and Jean Hültz – as did craftsmen with a savoir-faire that was envied all over Europe. They return here in fiction form. An epic blending mystery, doubt, revelations, intrigue and tragedies. Best 3 D Documentary Film Award - Festival Dimension 3 (Saint-Denis - France).
20240922	02:35:00	03:30:00	INCAN SALT	360° GEO - Report observed salt miners in the Peruvian Mountains. This documentary portrays the harsh day-to-day lives of the 'Salineros' as they work in a stunningly beautiful South American mountain landscape. The salt mines of Maras are situated in the highlands of the Peruvian Andes at an altitude of about 3.000 meters. They form a vast manmade labyrinth of salt wells. A thousand terraced wells collect the warm salty waters from the mountain. When the water evaporates under the strong sun, on the edges and bottom of the waterholes a precious white crust is left. This is Maras-Salt. To this very day, the descendants of the Incas harvest their "White Gold of the Andes" using this traditional method.
20240922	03:30:00	04:05:00	AVIATORS S8 EP 4	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a broad range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240922	04:05:00	05:00:00	CHINA UNCOVERED - THE OLD-WORD WONDERS	Despite the constant looming threat of globalization, some beloved old traditions, like the Szechuan chili and hotpots are still mainstays in Chinese culture. But while some traditions thrive, some face big challenges. A rare look at the enigma of Tibet shows a culture approaching a crossroads. Even the iconic pandas are dwindling if not for the aggressive breeding programs. Will old traditions stand a chance against the steam-rolling speeds and force of the new world?

20240922	05:00:00	05:30:00	WILD ONES - EP. 10	The most venomous snake on land. The deserted heart of the Australian outback, where people seldom venture, is the hot, baked home of the most venomous land snake in the world – the inland taipan, a two meter long snake with enough venom in one bite to kill a quarter of a million mice. The rare envenomating lizard. Venom is not the exclusive domain of snakes and spiders. In the deserts of the south-west United States and the north west of Mexico lives the striking and venomous Gila Monster – the largest land lizard in North America. Blue ringed octopus. In the shallow waters of the Pacific Ocean is an animal the size of a golf ball that carries with it not one, but two types of venom. One is used on its main prey of crabs and is relatively harmless to humans, the other is used in defense and can kill an adult human in minutes. The tiny toxin wielding Red-backed spider. In secluded outhouses, under fences and letterboxes, under barbeques and amongst garden litter are the messy webs that hold the killing fields and the hundreds of offspring of a very deadly female. Tucked in the corner of her web the scarlet stripe of the red-back spider
20240922	05:30:00	06:00:00	WILD ONES - EP. 11	Wildebeest and Zebra - Africa's most famous drifters. Hundreds of thousands of zebra live together in the Serengeti. Their distinctive eye-catching stripes are as unique as fingerprints and even within the largest of gatherings no two zebra will be found with exactly the same stripes. Turtles that make epic journeys to reproduce. The most abundant sea turtle in the world, Olive Ridleys' have extraordinary nesting habits. These small turtles migrate massive distances between their oceanic feeding grounds and the shores that draw them back to mate, and then to nest. Sooty Tern - Sea birds that don't come to land for years. Like the turtle, once it has left land for the first time, a young Sooty Tern may not go back for years, spending all its time in the ocean skies until it is time for it to breed. Soaring on outstretched wings, these elegant seabirds feed almost entirely on the fish driven to the surface by the hunters below. Australian Pelicans - Water birds that follow ephemeral rivers. Pelicans – these quirky, comical, big billed birds are usually thought of as spending all their time around coasts and harbors. They are widespread in Australia's lakes, rivers, billabongs and estuaries – or other waterway with enough food for their fish-loving lifestyle. The whales and
20240922	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 08	The Bosnian War was an extraordinarily complex event, with many layers of military involvement including NATO forces, national militaries, irregular paramilitary forces, mujahedeen revolutionaries, private security companies, and international intelligence personnel. One tactic in particular struck fear into the hearts of the military and civilians alike: the use of snipers positioned in high buildings. This edition of CQB investigates this specific combat technique and how it was countered by opposing forces. Taking viewers inside a "sniper's den," the program explains how this tactic was so successfully used by rebel forces—and how traditional military techniques evolved to combat it.
20240922	06:30:00	07:15:00	PAST HUNTERS - S1 EP 02: PLAS TEG	The county of Flintshire in Wales is said to be a land filled with ghosts and haunts. Plas Teg is said to be one of the "most haunted" houses in the area. With over 400 years of history, this place is sure to be the home of many an entity.
20240922	07:15:00	08:00:00	RV EXPLORERS S1 EP 02 - WHANGANUI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240922	08:00:00	08:25:00	SARAH SHARK - EP. 06	Sarah travels to one of the top 10 dive destinations in Australia (Julian Rocks, Byron Bay, NSW) to dive with three species of Wobbegong Sharks within the Cape Byron Marine Park. She also conducts a street poll with members of the public to find out what they think about sharks.

20240922	08:25:00	08:50:00	JOURNEYS IN INDIA - OLD AND NEW DELHI: A CITY OF CONTRASTS	We explore the capital of India. The bustling metropolis is filled with modern skyscrapers that stand side-by-side with hundreds of ancient monuments, making Delhi a physical dichotomy of yesterday and tomorrow. In the old city, we travel by rickshaw through the narrow streets and discover a world that is quickly disappearing. Then it's on to the tomb of Humayun, whose architectural design inspired one of the Seven Wonders of the World, the great Taj Mahal. We visit 2 mosques that are in the record books: the very first mosque in Delhi and the largest mosque in India. Next we visit the National Gandhi Museum where we view personal items from Gandhi's life, visit a temple that's open to all faiths and complete the quickest tour of India, without leaving Delhi.
20240922	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - GRAND CENTRAL TERMINAL, 120 VOLTS, NACHOS	It's one of the world's most famous train stations. GRAND CENTRAL TERMINAL. We'll take you on a trip to reveal its many fascinating secrets! And if they are cleaned without water, how do clothes get spotless when they are DRY CLEANED?
20240922	09:15:00	09:45:00	NEW FRONTIER - EDGE OF THE UNIVERSE	The night sky is a time machine. The further we look out into the universe the further back in time we reach. What we see in the night sky is only a small percentage of the contents of the Universe, most is dark matter and dark energy we know it exists; however its nature eludes us for the moment.
20240922	09:45:00	10:10:00	THE TECH EFFECT - EP. 01	The Tech Effect is a portal to the future, a look at the forces and inventions that could shape us in the coming century. From e-sports to robotics, home automation to autonomous cars, this series examines the potential for cutting edge technology to improve our lives, while not ignoring the risks. The Tech Effect will appeal to anyone curious about exploring the technological advances that are changing our world. Sophisticated and edgy, each theme-based episode profiles the innovations transforming contemporary life. By identifying the world's most ingenious discoveries, we can unlock tomorrow, today. This episode investigates the jobs of the future, and why it might not be long before your co-worker is a robot. As industry changes, companies are identifying ways to re-train their workforce so they can be deployed in new roles. With space research becoming an important tool for innovation, we hear from a worker on the International Space Station about the types of experiments he conducts. Finally, we visit the factories of the future, discovering that, as a car has more lines of code than an F35 fighter jet, one of the most important jobs of the future in the automotive industry is software developer.
20240922	10:10:00	10:40:00	INSIDE OUTER SPACE - SPACE WALK, OORT CLOUD, MERCURY, SPACE SUIT, STAR CHART, PLUTO	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240922	10:40:00	11:10:00	INSIDE OUTER SPACE - MOON, SOLAR FLARES, MARS, QUASAR, HUBBLE, NEIL ARMSTRONG	Come with us as we explore and unravel the mysteries of what lies beyond our planet Earth. This is a series packed with space stories and information about our universe covering what we can see, how we can live in space and what science tells us about the past and the future as we journey inside out of space.
20240922	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 9	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240922	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 10	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240922	12:00:00	12:25:00	TRAVEL QUEST EP. 06: MADAGASCAR	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240922	12:25:00	13:05:00	STOLEN TREASURES EP. 6	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240922	13:05:00	14:00:00	WATER: H2O STORIES - THE SORCERER'S APPRENTICE	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240922	14:00:00	14:30:00	QUIRKY SCIENCE - EP. 7	Who came up with the idea of canned food? It began with a battle between French and British armies, two centuries ago. Napoleon Bonaparte faced many problems with his goal to dominate Europe, one of which was feeding a large and sprawling army. In 1809 Napoleon held a contest, with a prize of 12,000 francs for the person who could come up with the most innovative method of preserving food. The winner was Nicolas François Appert who submitted a method of boiling and sealing food in glass bottles. Well if the French were going to travel farther and farther, the British needed to invent something as well: canning. However, opening the cans was quite a challenge – soldiers worked with stones and bayonets and it was only 30 years later that someone designed the first can opener! Although cans travel much easier across a battlefield, for decades they would not only mysteriously explode, but would also cause the harshest diseases. But how could the scientists of those days know? It wasn't until 50 years after Appert that Louis Pasteur discovered why canning (generally) worked so well. By testing the influence of air on broths, he did away with the idea that things spoiled 'spontaneously' and launched his 'germ theory'. Even though canned foods became safer,

20240922	14:30:00	15:00:00	QUIRKY SCIENCE - EP. 8	Throughout the history of mankind - the business of curing, of understanding and treating disease, has taken a rather peculiar path. Some procedures have proven to be very efficient while other methods could only have made things worse for the patient. Up to the 16th Century 'treating' someone could mean diminishing one of four bodily fluids, paving the way for bloodletting. As it turns out, modern science proves that bloodletting does help in rare cases. In fact, bloodsucking leeches are excellent helpers to cure wounds. We now know that one little creature is the cause for many diseases: bacteria. But until the mid-19th century, many felt that such tiny organisms such as germs could not possibly kill larger ones such as humans. After all, we can't even see them with the naked eye! How then, did we discover them? Thanks to one doctor who decided to take a good look ...between his teeth. Since then, we have found a cure for most bacterial infections in the form of Antibiotics. This was accidentally discovered by Alexander Fleming - whilst leaving the office for a holiday, he left a culture plate smeared with his personal nasal mucus on his lab bench only to find that mould surrounding this mucus actually inhibited its growth. In the new millennium, this discovery of
20240922	15:00:00	15:30:00	JOURNEYS IN INDIA - BHAVNAGAR: LAND OF SURPRISES	Where can you find literally hundreds of Jain Temples, a lost civilization and one of the top birding destinations in the world—the Bhavnagar region of course. Follow Bill as he attempts to climb 4000 steps to the great Jain temples of Palitana, floats through a lagoon full of flamingoes, egrets and cranes and learns about a kingdom lost to history.
20240922	15:30:00	16:00:00	JOURNEYS IN INDIA - PANNA: LAND OF THE DHOLE	Over the years, Bill has been able to find and film all of the great predators of India, but one—the wild Asiatic Dog or Dhole. These illusive and endangered canines have rarely been captured on camera. This is the last great wildlife challenge Bill has yet to conquer...Will he succeed?
20240922	16:00:00	17:00:00	BRAZIL'S COASTLINES - THE NORTH--EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240922	17:00:00	17:30:00	JOURNEYS IN AFRICA - HLUHLUWE: TALE OF TWO PARKS	If it's rhinos you want to see, you must visit Hluhluwe-Imfolozi Wildlife Park. This huge wilderness area has the highest density of rhino in the world. In addition to the rhino, we locate a pride of lions that is truly amazing. Mkuze National Park is a treasure trove of rare antelope and various other big game. Best of all, there is often no other guests, so this is one of Africa's best hidden gems.
20240922	17:30:00	18:00:00	JOURNEYS IN AFRICA - JOHANNESBURG: CITY OF MANY FACES	From the streets of Soweto to the colonial Union Building, the metro area of Joburg is a mix of architecture, people and traditions. Johannesburg is more than just a big city—it's also home to one of the world's best safari parks.
20240922	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 01	Very quick intro to the history of the course and the make up of the influx of new students as well as a look at some of the lecturers and their characters. Darting practice and drug theory: Students practice with dart guns from certain distances and learn the theory of dangerous drugs. The next step is learning to dart from a helicopter. A moving target is towed by a vehicle, and students have 1 dart to prove their accuracy. Darting practice on donkeys: 3 teams are formed and they have 3 donkeys to dart and check all vital signs. Darting 2 young antelope: 2 students are chosen to dart a young Rhone antelope and young Sable needing medical attention.
20240922	18:25:00	19:20:00	PARIS BERLIN: SHAPES AND SHADES OF HISTORY - RACE TOWARDS MODERNITY	Paris and Berlin have developed and grown facing each other over four centuries of tumultuous historical relationships and mutual admiration. The architecture and urbanism bear witness of this complex and rich confrontation.

20240922	19:20:00	19:45:00	BIG COAST - WHISKEY COVE CHINOOK	Trolling cut plug herring from home base on Denny Island, BC!
20240922	19:45:00	20:10:00	BIG COAST - MOUTH OF RIVERS INLET	Chasing big Chinook Salmon just outside Rivers Inlet, BC from Duncanby Lodge!
20240922	20:10:00	20:40:00	WHAT IN THE WORLD - EP 14	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240922	20:40:00	21:10:00	WHAT IN THE WORLD - EP 15	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. 20240922	22:05:00	23:00:00	DIVING OFF CAPE HORN	Mid-July, during the Antarctic winter when night-time temperatures sink to -20°C, marks the beginning of the Centolla season on Tierra del Fuego. Spider crabs can grow up to a half meter long and may only be caught during a few months. It's peak season for crab fishermen on Cape Horn. Taking their boats out to sea, they will hoist the popular delicacy out of the icy water.
20240922	23:00:00	23:55:00	OF BOATS AND MEN - EP. 01	Travelling by boat bears a priceless sense of Freedom and offers endless new vistas to all passengers. Across waterways around the world Boats are an essential tool of daily life whether they carry goods, serve as utilities or services in remote areas.

20240922	23:55:00	00:50:00	WORLD AFTER FUKUSHIMA	The derisory dosimeters, located at crossroads and hanging around children's necks, are a constant reminder of the invisible monster and of the deadly particles people attempt to retain by placing bottles of water on windowsills. 2 years on, in the region of Fukushima, people's lives - or at least their "existences" - carry on, as they integrate radioactive pollution into their daily lives. Beyond the earthquake and the tsunami, the nuclear catastrophe has revealed the shortcomings of a system and its criminal arrogance. And everyone remembers with dread the series of errors and procrastinations that sealed their fate, as politicians preferred to "downplay the situation instead of reducing risks".
20240923	00:50:00	01:45:00	THE FLYING FIREFIGHTERS OF VALENCIA	In recent years, the number of forest fires has consistently increased, especially in Catalonia. The loss of forest land is endangering the cultural and natural habitat of the Northwestern Mediterranean. This report accompanies Chimo and his colleagues through last years' fire season. The "Avialsa" Flying Firefighters squadron operates in the woodland areas around the western part of the Mediterranean Sea. Flying close above the flames ensures the greatest chance of success for the firefighters: the closer they can get their water cargo to the fire source, the quicker they can get the flames under control. Joaquim Miniana, "Chimo" for short, and the pilots of the "Avialsa" firefighting plane squadron in the Spanish province of Valencia are fighting against increasingly long, hot summers.
20240923	01:45:00	02:40:00	GALICIA'S DEATH COST	360°GEO - Report accompanies goose barnacle fishermen on a trip to the deadly cliffs. But even there, the goose barnacle population is declining rapidly. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds. Their working district is the "Costa del Morte" - the "Coast of Death", where the oil tanker "Prestige" split apart in 2002. Here, the waves of the Atlantic are often lashed against the rocks by northwest gale force 8 winds.
20240923	02:40:00	03:35:00	ST. HELENA, FORGOTTEN ISLAND OF THE ATLANTIC	360°GEO - Report sets foot on the isolated island of St Helena and documents what life is like in the midst of the South Atlantic. Standing solitarily far out in the middle of the Atlantic Ocean is the British Overseas Territory of St. Helena. Island do not get much more remote than this. It is situated 2,000 kilometers from the African coast and 3,000 kilometers from the South American Coast. You can see why it was chosen as a place of exile for the French emperor Napoleon. It is all but impossible to escape from St. Helena. Even today, the only connection to the outside world is by ship, given that the island has no airport. About 4,000 people or "Saints" as they refer to themselves, brave the solitude and live on the island.
20240923	03:35:00	04:35:00	SAVING AUSCHWITZ?	70 years after Auschwitz Museum was founded as the memorial site of the Shoah, this site is subject to diversions, confrontations and plundering. Several attempts to exploit and rewrite its history are at work. The danger of desensitization through mass tourism, or the attempts of the local town and its citizens to simply erase the nightmare to make place for new urban landscape are real threats affecting the future of this memorial site. Today, as the last survivors are passing on, what to do with the Auschwitz site?
20240923	04:35:00	05:00:00	TRAVEL THRU HISTORY - AUSTIN	The live music capital of the US has an interesting past. Take an in depth look at one of Austin's oldest hotels, The Driskill. Then we'll learn about Texan independence in the Bob Bullock History museum. Finally, we'll end up at one of Austin's most historic buildings, the Texas state capitol.

20240923	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - GREECE LIVING IN A MONASTERY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240923	05:30:00	06:00:00	MINDWORKS - VISUAL PERCEPTION	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240923	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 09	The practice of hiring private armies goes back to ancient times, and the mystique associated with the mercenary warrior has been the subject of many historical studies and fictional characterizations. This episode of CQB takes a more contemporary look at a day in the life of a group of civilian contractors, and how their role has evolved on the modern battlefield. Using its "sub-second" analysis techniques and intimate first-person footage, CQB reveals the backgrounds, training and equipment of today's "soldiers for hire" and how private armies are re-shaping the way conflicts are conducted around the world.
20240923	06:30:00	07:15:00	PAST HUNTERS - S1 EP 03: THE BLOCK	The team investigate a disused factory in Burton-Upon-Trent. Reports of paranormal happenings are common and the team are ready for anything.
20240923	07:15:00	08:00:00	RV EXPLORERS S1 EP 03 - WHANGAREI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240923	08:00:00	08:25:00	TRAVEL THRU HISTORY - LOUISVILLE	And we're off! We learn the history of the world famous Kentucky Derby. Then, call your shot as we learn about one of America's most famous brands, Louisville Slugger. Also, we zip line in the world's only underground zip line attraction and visit the Ali Center.
20240923	08:25:00	08:50:00	JOURNEYS IN INDIA - GREAT CAVES OF AJANTA AND ELLORA	Caves have held a special place in human development. The Hindu, Buddhist and Jain caves in these two UNESCO sites contain some of the most beautiful carvings and paintings found in Asia. This episode explores the history and relationship between these religions.
20240923	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - DOMINO'S PIZZA, FORTUNE COOKIES, GADGETS	It's cheesy and eaten all over the world! You'll learn how DOMINICK'S PIZZA became DOMINO'S PIZZA. And we all know how going to a circus wouldn't be complete without fluffy sweet COTTON CANDY! We'll explain how this feathery goodness SPUN to life! And all the spy action heroes use them, but where did the term GADGET really come from?
20240923	09:15:00	09:45:00	NEW FRONTIER - THE ASTRONAUTS	One hundred kilometres above the Earth's surface lies an invisible frontier: the edge of space. This is the Karman Line, the boundary between our planet's atmosphere and what lies beyond. What does it take to cross that line?

20240923	09:45:00	10:10:00	EUROPEAN ISLANDS EP - 06: RHODOS	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240923	10:10:00	10:40:00	EVERYDAY ELEMENTS - CARBON, GOLD, NEON, ZIRCONIUM, ANTIMONY	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240923	10:40:00	11:10:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240923	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 10	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240923	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 11	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240923	12:00:00	12:25:00	TRAVEL QUEST - YAP	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240923	12:25:00	12:55:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - WEST BENGAL	Soumik arrives in the city of joy Kolkata in search of his musical roots and puts together his team. They head into the villages in search of travelling minstrels known as Bauls. Their journey leads them deeper into impoverished rural hinterlands where an old man sings under his broken down house. These musicians are driven by deep faith and extraordinary spiritual resilience. Their daughters sing and children learn deep lessons in simple words.
20240923	12:55:00	13:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240923	13:30:00	14:00:00	MINDWORKS - MEMORY	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.

20240923	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - VIETNAM THE TUNNEL HOUSES OF HANOI	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240923	14:30:00	15:00:00	WONDER - ART OF ILLUSION	Seg 1 Animation. Animation is the process and technique that involves creating the illusion of movement from still drawings and inanimate objects. It is achieved by displaying images with slight variations in a rapid and successive manner thus making our eyes perceive the illusion of movement. Seg 2 Aviation Illusions. Aviation illusions are the sensory illusions associated with taking flight. When pilots take flight their vestibular system, the sensory system responsible for balance, is affected by conflicting stimulus from what the pilot sees and feels during flight. Seg 3 Spinning Dancer. The spinning dancer illusion is an illusion that was created by Nobuyuki Kayahara. One can either perceive the dancer as spinning clockwise or counter clockwise. This phenomenon is explained by Bistable perception which states that perception can be altered subjectively just by how an object is observed. Seg 4 Mirage. Mirages are a physical optical phenomenon that can be observed when there is a difference in the temperature in the surrounding air of an area. The different temperatures of the air causes light to refract and cause weird distortions when viewed at the correct angle. This can range from weird reflections to
20240923	15:00:00	15:30:00	JOURNEYS IN INDIA - PANNA: LAND OF THE DHOLE	Over the years, Bill has been able to find and film all of the great predators of India, but one—the wild Asiatic Dog or Dhole. These illusive and endangered canines have rarely been captured on camera. This is the last great wildlife challenge Bill has yet to conquer...Will he succeed?
20240923	15:30:00	16:00:00	JOURNEYS IN INDIA - AHMEDABAD: LAND OF GANDHI	There is no figure in Indian history that rivals Gandhi. Bill explores the land Gandhi called home and in the process, learns about the man himself. But Ahmedabad is more than Gandhi...its rich history and unusual architecture is revealed.
20240923	16:00:00	16:30:00	NATURE'S FORCE - EP. 08	The beauty, magic, and the science behind the Auroras at both ends of the earth, show them to be more than just a protective magnetic layer. The technology used to measure Wind Speed is finely calibrated with an interesting formula. The Tides remind us of our connection to the moon and our place in the solar system and are monitored for any significant change can have implications for industry, communities, and our ocean life. Earthquakes often make news headlines so how are they measured and predicted and what can we learn from them about our planet? Acid Rain is a manufactured weather event, the result of manmade industry mixing with nature to result in international treaties to lessen emissions and pollution.
20240923	16:30:00	17:00:00	BLUE WORLD	In the Flower Garden Banks National Marine Sanctuary, Jonathan investigates some of the densest coral reefs in the Caribbean as they spawn under cover of darkness. Then he heads over to Silver Springs for the Sea Hunt Forever Festival, celebrating the classic TV show Sea Hunt and the vintage scuba gear that was used on the program.

20240923	17:00:00	17:30:00	JOURNEYS IN AFRICA - JOHANNESBURG: CITY OF MANY FACES	From the streets of Soweto to the colonial Union Building, the metro area of Joburg is a mix of architecture, people and traditions. Johannesburg is more than just a big city—it's also home to one of the world's best safari parks.
20240923	17:30:00	18:00:00	JOURNEYS IN AFRICA - KRUGER NATL PARK: HUNT FOR THE CHEETAH	In all previous Journeys' shows, only glimpses of the cheetah were seen. Here at Kruger, we get up close to this shy cat before heading out of the park and visiting a special research and breeding center dedicated to cheetahs.
20240923	18:00:00	18:50:00	PAST HUNTERS - S1 EP 11: TUTBURY CASTLE	The team head to Tutbury Castle in Derbyshire to investigate the paranormal reports at the location. Past Hunters appear to have caught the Tutbury Ghost on camera.
20240923	18:50:00	19:20:00	RACE OF LIFE - EP. 06	Males and females of most species will fight viciously in self-defense. And females, can be even more aggressive than males when defending their young. In this episode we'll explore the Race of Life from the point of view of food, territory, social status, and mates. Though some fights occur between two different species, most battles are fought between members of the same species. Though the wildlife warriors in these battles usually are not trying to kill each other, the fighting can result in death. Why would members of the same species fight with such ferocity? Food is one reason. Animals that store and hoard food for survival will aggressively protect their pantries. Animals are also willing to fight to protect their food indirectly. For example, predators will defend a territory that provides them with enough prey, or food, to survive. This territorial aggression serves to space out members of a species across their range in a way that maintains sufficient food within each territory. But it also may limit population size. For example, if a pack of wolves cannot find, defend, or take over a suitable territory, the members may starve to death. Though food, territory,
20240923	19:20:00	19:50:00	EUROPEAN ISLANDS EP - 07: LA GOMERA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240923	19:50:00	20:20:00	WHAT IN THE WORLD - EP 21	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240923	20:20:00	20:45:00	WHAT IN THE WORLD - EP 22	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. 20240923	22:00:00	22:30:00	DESPERATE HOURS - EP. 05	In this episode, you can run for cover but you can't hide from the wild winds. That means hurricanes, cyclones, tornadoes, twisters and typhoons. They're all pretty much different names for the same thing, no? Powerful wind storms. Well no, not necessarily. Hurricanes mostly form over warm ocean water and once they have gathered momentum, can be up to 600 miles across. A tornado on the other hand, is a rapidly spinning tube of air which touches both the ground and the clouds above. In the US, they are often referred to as twisters. Did you know that hurricanes twist and turn in anticlockwise fashion in the Northern Hemisphere but in a clockwise direction in the Southern Hemisphere? Or that tornadoes can travel at speeds of up to 200 miles per hour? They can demolish large buildings, uproot trees and pick up and hurl vehicles hundreds of feet away, as if they were mere playthings. A tornado's path of destruction can be anywhere in excess of a one mile wide, and some 50 miles long. 1000 tornadoes are reported in the United States in a typical year. Fortunately, only two percent of these are labeled "violent", but that's enough to create plenty of havoc annually.

20240923	22:30:00	23:00:00	DESPERATE HOURS - EP. 06	In this instalment, we batten down the hatches, and run for dry land, as we look at the damage a little water can do, or rather, a great deal of it. The European Union's 'Floods Directive' defines a flood as "a covering by water of land not normally covered by water". But that rather tepid description simply doesn't do justice to the terror unleashed by raging currents and flash flooding. Natural disasters will be with us for a long time to come. But the death and destruction caused by Brazilian floods and landslides, the flooding after Hurricane Katrina and the Northern Indian Floods, could all have been reduced by environmental awareness in building codes, better coordinated relief efforts and so on. Then there was the massive flooding after the Tsunami of December 26th, 2004. Hundreds of thousands were killed in minutes, and millions lost their homes, as wave after destructive wave crashed into the coastlines of some 11 Indian Ocean countries. Environmentalists argue another factor causing floods is urbanisation. By replacing grass and dirt with buildings, roads and parking lots, insufficient soil is left, to soak up rainwater. When it does overflow, the results
20240923	23:00:00	23:30:00	DESPERATE HOURS - EP. 07	In this sobering yet thrilling instalment of Desperate Hours our special focus on Geological Disasters. Now most natural disasters, including volcanoes and earthquakes are of course geological disasters. But, avalanches, landslides, blizzards and heatwaves. They don't – usually – causes fatalities in the tens of thousands. Do they? Don't be lulled into a false sense of security. While casualty counts might be lower, geological disturbances like landslides and heat waves can cause their fair share of misery. A heat wave for instance, can be one of nature's silent killers. India is justifiably renowned for its hot climate, but the heat wave that scorched India in the middle of this decade was something else. For two miserable weeks. In New Delhi, the 45 degree heat actually started melting roads. Ours is a dangerous world, where geological mishaps – avalanches, landslides, heat waves, sinkholes and blizzards, can spell disaster, almost as much as the big cataclysms such as earthquakes, volcanoes and tidal waves. It's enough to make you want to purchase that one way ticket to Mars.
20240923	23:30:00	00:05:00	DESPERATE HOURS - EP. 08	Our focus for this chilling but fascinating episode of Desperate Hours is on Nuclear and Industrial Disasters. Nuclear power depends on harnessing the energy released during one of two processes - nuclear fission, or nuclear fusion. In both Nuclear fusion and nuclear fission, energy is released from the high-powered atomic bonds between the particles within a nucleus. The two processes differ, in that Nuclear Fission means splitting an atom into two, or more, smaller atoms. While Nuclear Fusion, is the fusing of two, or more, smaller atoms into a larger one. Ironically nuclear power is a relatively clean source of energy, which is great. But of course, unless the utmost precautions are taken in generating nuclear power, then the consequences can go beyond merely disastrous, to the unthinkable, the horrific. Safety in the workplace and care for the environment are a human responsibility but when it comes to nuclear power it's not just industrial accidents that threaten tragic consequences. on an epic scale. A natural disaster such as a volcano or earthquake is something we have little-or-no control over and when such an event strikes a nuclear power
20240924	00:05:00	01:00:00	VERSAILLES FURNITURE	Via six masterpieces, the film reveals the beauty of the spirit of Versailles of the 17th and 18th centuries. A unique homage to the people that crafted it, the furniture reveals the personal tastes of its commissioners, and portrays something that has ceased to exist! These unique items of furniture that once belonged to Louis 14th, Louis 15th, Marie-Antoinette and Louis 16th have fascinating stories to tell: the tortoise-shell chest-of-drawers with inlays of brass; an astronomical clock - a veritable miracle of science; the most emblematic example of French furniture art in the world - the King's Desk; and the exquisite items made for Marie-Antoinette - the queen's jewellery case and the wheat-sheaf furniture.

20240924	01:00:00	01:55:00	CAMBODIA'S LAST BAMBOO TRAIN	This report climbs aboard the bamboo train, learns about its passengers and portrays life as it currently is in Cambodia. Without this bamboo train, people would not be able to go do their daily tasks such as going to work or to the doctor. Deep in the Cambodian Battambang region, a small bamboo train called "Norry" makes its way through rice fields and jungle passages. It is considered to be one of the most important lifelines into the poor region. But it looks like Norry's time is running out, because of the changes in Cambodia over the last years. More and more fields are being cleaned of land mines, new roads are being built, and many Cambodians are now able to afford a motorbike. The people fear that in a few years' time the bamboo train will stop operating.
20240924	01:55:00	02:50:00	THE HAWKDOCTOR OF ABU DHABI	360° GEO - Report visits takes a trip to the vet and accompanies the doctor on her daily mission dedicated to the feathered treasures of the sheiks. Falcons are an inherent part of Arab culture in the United Arab Emirates. For centuries, the country has traditionally hunted with the impressive raptors. Almost every family owns at least one falcon. The German lady veterinary Margit Müller takes care of these precious birds of prey's health. She is the manageress of the "Abu Dhabi Falcon Hospital" - the biggest Falcon Hospital in the world.
20240924	02:50:00	03:45:00	PICASSO: A MUSEUM REBORN	Behind the scene of the Paris Picasso Museum. Picasso Museum opened its doors in 1985 revealing the most important collection of Picasso's works of art to the world. More than 300 paintings, 1000 drawings, 100 sculptures given to the French State as inheritance rights. Housed in the beautiful Salé Hotel in the heart of the Marais in Paris, Picasso Museum has closed its doors in 2010 to undertake major modernisation and refurbishment works aimed at multiplying the exhibition surfaces by three. For more than a year, this film will follow in the footsteps of Anne Baldassari, Head of the Museum and among worldwide's experts of Picasso' work, when she monitors the works' progress of the new Museum that will reflect the new vision of the artist's work of art, but also during the establishment of temporary exhibitions of the collection that she organises throughout the world during renovation (USA, Australia, Canada, China, Indonesia, Malaysia, Italy, Spain). A companion documentary which recounts the re-opening of the Picasso Museum in Paris, the largest public collection of artist's work in the world. Come behind the scenes and witness all the preparations leading to the reopening of this Museum.
20240924	03:45:00	04:35:00	GREAT WHITE CODE RED	The Great White shark is a highly complex predator with advanced sensory weaponry. Two shark specialists, Dr Craig O'Connell and Dr Jeremy Cliff look beneath the skin of the Great White to reveal the true source of its extraordinary predatory abilities and discover the secrets of one the world's most feared predators.
20240924	04:35:00	05:00:00	TRAVEL THRU HISTORY - MINNEAPOLIS	We'll find out why they called Minneapolis the "Mill City" when we visit the Mill City Museum. Then we march over to the Union's Fort Snelling, the first permanent structure in Minnesota, and then head underground and learn about St. Paul's organized crime hide outs.
20240924	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - INDIA VARANASI LIVING IN A HOLY CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240924	05:30:00	06:00:00	MINDWORKS - VISUAL DECEPTIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240924	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 10	From the elite ex-special forces personnel in charge of guarding heads of state in conflict zones to the two-person teams that protect CEOs in dangerous regions, modern-day bodyguards must be well versed in close quarter battle techniques. An immense amount of planning and preparation is involved in each operation. From air travel, car convoys and helicopter shuttles to basic foot traffic, a close protection squad must be completely tuned to the Who, What, Where and When of any given situation. This episode of CQB focuses on the complex day-to-day and minute-to-minute operations of these elite teams and the highly developed techniques they employ.
20240924	06:30:00	07:15:00	PAST HUNTERS - S1 EP 04: MILL STREET BARRACKS	Built in 1861 Mill Street Barracks is steeped in rich history. It has accommodated many branches of the armed forces throughout its life. Like many other barracks it has also been used as a morgue making it a prime location for the supernatural.
20240924	07:15:00	08:00:00	RV EXPLORERS S1 EP 04 - COROMANDLE	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240924	08:00:00	08:25:00	TRAVEL THRU HISTORY - NEW ORLEANS	The Saints come marching in as we tour the iconic St. Louis Cathedral and the mysterious Ursuline Convent in New Orleans. We delve into Mardi Gras history at Mardi Gras World and visit the National WWII Museum's world class collection.
20240924	08:25:00	08:50:00	JOURNEYS IN INDIA - JODHPUR: INDIA'S QUEEN OF THE DESERT	No city in the Great Thar Desert of West India has had the sway that Jodhpur has. Giant forts, impressive palaces and a legendary royal hero that frees his people from tyrannical outsiders all make this a fascinating historic romp.
20240924	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - MONOPOLY, AREA CODES, TUXEDO	Take a trip to the Jersey Shore and learn how one of its famous boardwalks helped to inspire the iconic board game of MONOPOLY. And how did a donkey and an elephant become associated with politics? Plus, what's the difference between TOP GRAIN LEATHER and FULL GRAIN LEATHER?
20240924	09:15:00	09:45:00	NEW FRONTIER - GETTING THERE	Launching payloads into space is a very difficult task, historically rocket launches are the proverbial 'swords into ploughshares' Missiles designed to carry atomic warheads now send satellites and probes into the solar system. Ironically it's one of the few exploits Mankind undertakes that doesn't occur in nature.
20240924	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 07: LA GOMERA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240924	10:15:00	10:40:00	EVERYDAY ELEMENTS - SILVER, HYDROGEN, PHOSPHORUS, GERMANIUM, SULPHUR	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.

20240924	10:40:00	11:10:00	EVERYDAY ELEMENTS - CHLORINE, TITANIUM, GALLIUM, POTASSIUM, NICKEL	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240924	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 11	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240924	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 12	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240924	12:00:00	12:25:00	TRAVEL QUEST EP. 06: MADAGASCAR	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240924	12:25:00	12:55:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240924	12:55:00	13:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - NAGALAND	High in the eastern mountains in a remote corner of India, Soumik encounters the Naga tribes. They teach him about their mysterious customs, chicken dances and head-hunting traditions, part of a unique identity at the brink of extinction. The Nagas wish to preserve.
20240924	13:30:00	14:00:00	MINDWORKS - MIND OVER MATTER	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240924	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - IRAN KANDOVAN THE TROGLODYTE VILLAGE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.

20240924	14:30:00	15:00:00	WONDER - PHENOMENAL	Seg 1 Iridescence. Iridescence is the phenomenon where surfaces reflect a multitude of colors at once and could change color perspectives upon shifting the angle of viewing. Iridescence is caused by interference, where light gets reflected or cancelled out by the structures of the surfaces. Seg 2 Chemiluminescence. Chemiluminescence is the phenomenon of producing light energy through chemical reactions. The byproduct of a chemiluminescent reaction, instead of heat energy, is a photon or a light particle. Only selected compounds are capable of producing chemiluminescence, usually highly oxidized compounds when reacting with another compound. Seg 3 Bioluminescence. Bioluminescence is a form of chemiluminescence, only that this occurs in living things. Special compounds collectively called as luciferin oxidizes upon catalysis by enzymes called luciferase, producing oxyluciferin. Upon decay, oxyluciferin releases photons or light particles. Bioluminescence serve different functions for each organism, but all for survival purposes. Seg 4 Gemstone Coloration. A gemstone acquires its color through elements that are essential to its structure or through impurities, or elements that replace some of the metallic ions in
20240924	15:00:00	15:30:00	JOURNEYS IN INDIA - AHMEDABAD: LAND OF GANDHI	There is no figure in Indian history that rivals Gandhi. Bill explores the land Gandhi called home and in the process, learns about the man himself. But Ahmedabad is more than Gandhi...its rich history and unusual architecture is revealed.
20240924	15:30:00	16:00:00	JOURNEYS IN INDIA - CALCUTTA: CITY OF LIVING HISTORY	There is no city in India that is more British than Calcutta. The former capital of British India, Calcutta has gardens, buildings and museums to prove it. Throw away any ideas you have of this giant city and discover the treasures it holds.
20240924	16:00:00	16:30:00	FLYING OVER THE EARTH - CAP AU NORD	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240924	16:30:00	17:00:00	BLUE WORLD	Jonathan heads down to the shipwrecks of North Carolina (USA) to observe how these wrecks have become home to thousands of animals, including Sand Tiger sharks. But instead of chasing all the fish, the sharks are protecting many of them! Then, Jonathan visits the School for Field Studies in the Turks & Caicos Islands to learn how college students conduct fieldwork in their pursuit of degrees in Marine Studies. He helps tag sharks, study conch and investigate marine protected areas!
20240924	17:00:00	17:30:00	JOURNEYS IN AFRICA - KRUGER NATL PARK: HUNT FOR THE CHEETAH	In all previous Journeys' shows, only glimpses of the cheetah were seen. Here at Kruger, we get up close to this shy cat before heading out of the park and visiting a special research and breeding center dedicated to cheetahs.
20240924	17:30:00	18:00:00	JOURNEYS IN AFRICA - THE LAND OF THE ZULU	South Africa has many different tribal groups and ethnic people, but none have a more fascinating story than the Zulu. These were once the most feared warriors in all of Africa and they have fiercely held onto that culture. They're also dedicated conservationists and we see first-hand the wildlife sanctuaries they've created. This is a proud people with a unique history, and we get to share that with them.
20240924	18:00:00	18:50:00	PAST HUNTERS - S1 EP 12: ORDSALL HALL	Ordsall Hall is over 820 years old. It has been put to many uses including a family home, working men's club and church hall. With over 15 hauntings and many sightings, Ordsall Hall will certainly keep the team busy.

20240924	18:50:00	19:20:00	RACE OF LIFE - EP. 07	With predators practically always on the lookout for a meal, prey must constantly avoid being eaten. Any defensive adaptation that prey can utilize adds to the chances of survival for its species. Some adaptations are defense mechanisms which can give the prey an advantage against their enemies. The first is very direct and comes naturally. Animals can use speed as a very effective means of escaping predators. In the evolutionary history of big herbivores and the carnivores that prey upon them, the phrase "arms race" is only technically a metaphor. Antelope are literally born to run, and many of the things that chase them, such as the cheetah, are either masters of endurance or champion sprinters. The evolutionary story almost writes itself: over millions of years of chasing, and being chased, wherever predators evolved to move quickly, their prey were selected to run even faster. Except of course there's more to life than running for your life. An antelope's frame is under more demands than evading cheetahs—it also needs to travel long distances to follow food availability with the shifting rainy season. The ostrich meanwhile stands at one extreme of bird evolution, for although unable to fly, of all the birds the ostrich runs the fastest race of life. More
20240924	19:20:00	19:50:00	EUROPEAN ISLANDS EP - 08: GRAN CANARIA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240924	19:50:00	20:45:00	SCOTSTAR - EP. 1	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240924	20:45:00	21:35:00	SCOTSTAR - EP. 2	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240924	21:35:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - VARANASI	In the world's oldest city of Varanasi, Soumik explores a neighbourhood that has produced five generations of Indian classical masters. He meets widowed women singers who have committed their lives to the Hindu God, Shiva, and a young drummer with the talent to make it big. Dedication to fading classical arts is formidable in this timeless city of religion, tradition and rising commercial interests.
20240924	22:05:00	23:00:00	ON THE CITIES' ROOFTOPS - BARCELONA	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...
20240924	23:00:00	23:55:00	ON THE CITIES' ROOFTOPS - TOKYO	How is life on the city's roofs? This series scales new heights, exploring apartment buildings, towers and monuments to discover a world full of unsuspected treasures : our rooftops. By day and night, the population changes on these heights. There are people who work here, people who live here, and others who come here to relax. The world's rooftops are a continual hive of activity...

20240924	23:55:00	00:50:00	ROLL ON CINEMA	This film endeavours to show how the invention of cinema was in no way inevitable, and how it may well have been a mere accident. To pinpoint the start, it all began in the heart of Paris, in the depths of darkened room, on 28 March 1798, when Etienne-Gaspard Robertson gave one of his first screenings of his "Fantasmagoria" - making ghosts and spectres dance. But how did we move from perfecting the magic lantern to the cinematography of the Lumière brothers? The invention was born throughout the 19th century, out of the unpredictable crossing of two parallel research paths - that of philosophical toys and the photography of movement. Originally-named optical devices - such as the kinesiograph, the zoetrope, the praxinoscope and the phenakistoscope, without forgetting the photographic revolver or gun - associated the realm of toys with the realm of thought, reflecting both a fascination for the magical effects produced by animation and speed, and a desire to understand human anatomy, and analyse the phenomenon of vision. All these pre-cinema optical devices literally stemmed from a desire for spectacle and the will to acquire knowledge. Robertson, Reynaud, Plateau, Muybridge and Marey spearheaded the adventure. Thanks to these brilliant
20240925	00:50:00	01:45:00	THE BEST SHEEPDOGS FROM WALES	The film follows Nigel and his dogs throughout the summer. Nigel Watkins is a farmer and vice-world champion sheepdog handler. Together with his partner, Janet, he runs his little farm Llanddeusant in the Brecon Beacons National Park in the south of Wales. Farming takes up a fair amount of his time, but his hobbies take up much more of it: he trains Border Collies, a breed of sheepdog.
20240925	01:45:00	02:40:00	GEORGIA, CRADLE OF WINE	360° GEO - Report portrays a changing wine region that is torn between the ancient traditions of its soviet heritage and modern market requirements. In the Soviet era, Georgia was said to be the wine cellar of the USSR. Even after the collapse of the huge empire, wine remained one of the country's most important export goods. But since Russia has imposed an embargo, exports have declined dramatically. Georgia is now in search of new sales markets at a time when winegrowing in its Caucasus region is in full swing. Small winegrowers, cooperatives and winegrowing estates based on the Western model vie with each other for quantity and quality.
20240925	02:40:00	03:35:00	INCAN SALT	360° GEO - Report observed salt miners in the Peruvian Mountains. This documentary portrays the harsh day-to-day lives of the 'Salineros' as they work in a stunningly beautiful South American mountain landscape. The salt mines of Maras are situated in the highlands of the Peruvian Andes at an altitude of about 3.000 meters. They form a vast manmade labyrinth of salt wells. A thousand terraced wells collect the warm salty waters from the mountain. When the water evaporates under the strong sun, on the edges and bottom of the waterholes a precious white crust is left. This is Maras-Salt. To this very day, the descendants of the Incas harvest their "White Gold of the Andes" using this traditional method.
20240925	03:35:00	04:35:00	THE TIGERS FROM SCOTLAND	Narrated by Iain Glen, this film focuses on the fragile existence of the Scottish Wildcats, their status and what conservation efforts are being undertaken to ensure their survival.
20240925	04:35:00	05:00:00	TRAVEL THRU HISTORY - SAN ANTONIO	San Antonio is rich with Texas, Mexican, and Spanish history. We make our last stand at the Alamo, and visit Missions National Historical Park. Lastly, we spelunk the Natural Bridge Caverns underground.

20240925	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - INDIA ARUNACHAL PRADESH: LIVING IN A BAMBOO HOUSE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240925	05:30:00	06:00:00	MINDWORKS - ALTERED VIEWS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240925	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 11	Following the September 11 attacks, military presence became commonplace in New York and other American cities, and the counterterrorism forces were effectively given a "blank cheque" when it came to ensuring that another terrorist incident would never take place on American soil. This episode of CQB takes an in-depth look at who was selected to occupy elite anti-terrorist positions, what they were trained for, and how they were equipped: when opposing forces are using commercial airliners and chemical weapons, countermeasures are by necessity complicated and varied. CQB takes an intimate look at what it was like to be an officer on alert for chemical attacks in Washington DC, or an army reservist monitoring suspicious activities on the streets of NYC.
20240925	06:30:00	07:15:00	PAST HUNTERS - S1 EP 05: HACK GREEN'S SECRET NUCLEAR BUNKER	The Hack Green Secret Nuclear Bunker is a former government-owned nuclear bunker located at Hack Green, Cheshire, England. It Started as a decoy site for enemy bombers but later developed into a legitimate base. Now it is ripe with hauntings.
20240925	07:15:00	08:00:00	RV EXPLORERS S1 EP 05 - TARARUA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240925	08:00:00	08:25:00	TRAVEL THRU HISTORY - SALT LAKE CITY	Westward ho! We settle in Salt Lake City, where we learn about Brigham Young's settlement of the Utah territory and his monument at This is the Place Park. Then we dig in the dirt to find hundreds of perfectly preserved dinosaurs at the Utah Natural History museum. We'll take a look at some US aviation history at the Hill Air force Base museum, and see how life was like for the Utah pioneers at Frontier Homestead State Park.
20240925	08:25:00	08:50:00	JOURNEYS IN INDIA - KAZARINGA: LAND OF GIANTS	India can match Africa mega-animal for mega-animal. The three biggest—elephant, buffalo and rhino are found in large numbers in only one national park in India—Kazaringa. Join Bill as he attempts to check each of these highly endangered and dangerous herbivores off his bucket list.

20240925	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ZAMBONI ICE RESURFACING MACHINE, PISTACHIO NUTS, STARS	If you have ever gone to a hockey game, or gone ice-skating, there is ONE revolutionary machine that helps keep the fun and action going! And that's all thanks to the ZAMBONI® ICE RESURFACING MACHINE. You'll learn how and why it was invented! And ever notice some pistachio nuts are RED in color? We'll throw up the RED FLAG and explain why the color is simply a COVER UP!
20240925	09:15:00	09:45:00	NEW FRONTIER - ORBIT	The International Space Station is undoubtedly the jewel in the crown of low Earth orbit; observation post, research lab and class room. Equally however there are many other assets orbiting Earth that are even more important to our everyday lives; delivering communications, weather observation, global positioning and resource management the list is growing with every year.
20240925	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 08: GRAN CANARIA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240925	10:15:00	10:40:00	EVERYDAY ELEMENTS - CHLORINE, TITANIUM, GALLIUM, POTASSIUM, NICKEL	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240925	10:40:00	11:10:00	EVERYDAY ELEMENTS - SODIUM, OXYGEN, ARGON, ARSENIC, ZINC	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240925	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 12	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240925	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S2 EP 13	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240925	12:00:00	12:25:00	TRAVEL QUEST - EP 7	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240925	12:25:00	12:55:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - NAGALAND	High in the eastern mountains in a remote corner of India, Soumik encounters the Naga tribes. They teach him about their mysterious customs, chicken dances and head-hunting traditions, part of a unique identity at the brink of extinction. The Nagas wish to preserve.

20240925	12:55:00	13:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - GOA	On Christmas eve, Soumik arrives in the ex-Portuguese colony of Goa. A global party hub and Orthodox coastal state in one, Goa is a state in flux. An ambitious, young Fado singer, and a wise, old violinist, bring to life the struggle that many Goans feel between a colonial past and modern future, a laid back lifestyle challenged by tourist and consumer culture.
20240925	13:30:00	14:00:00	MINDWORKS - ILLUSIONS OF TOUCH	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240925	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - IRAN MASULEH LIFE ON THE ROOFTOPS	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240925	14:30:00	15:00:00	WONDER - SENSORY TRICKS	Seg 1 Visually-Evoked Auditory Response. VEAR or Visually Evoked Auditory response is the type of auditory perception where our brains perceive to hear sounds in response to seeing something. In the case of the jumping pylon illusion, a thud sound is perceived even though there is no sound accompanying the animation. Seg 2 Retinal Fatigue. Retinal fatigue is the term used to describe the condition when the photoreceptors in our eyes become tired or strained due to staring at one color for extend periods of time. The effect causes an afterimage of the complementary color to appear out of nowhere and will be temporarily visible for a few seconds. Seg 3 Müller-Lyer illusion. The Müller-Lyer illusion is an optical illusion where parallel lines of the same length appear longer when perceived with different pointed arrowheads drawn at the ends. Possible explanations suggest that our minds tend to look at overall length rather than just the line's parts or segments when processing the image. Another possible explanation is that our minds tendency to look at angled lines and perceive patterns of depth. Seg 4 Ames Room. The Ames room is a specially constructed room that features a distorted and skewed floor plan. when viewed from one angle, our brain is tricked into
20240925	15:00:00	15:30:00	JOURNEYS IN INDIA - CALCUTTA: CITY OF LIVING HISTORY	There is no city in India that is more British than Calcutta. The former capital of British India, Calcutta has gardens, buildings and museums to prove it. Throw away any ideas you have of this giant city and discover the treasures it holds.
20240925	15:30:00	16:00:00	JOURNEYS IN INDIA - SOUTH INDIA: LAND OF SUPERLATIVES	Two of the greatest ancient monuments in the world are in South India—Hampi and Konark. These two wonders of the world were lost to the west, but now are at the top of many bucket lists. Join Bill as he takes the veil off these two incredible achievements of man.

20240925	16:00:00	16:30:00	FLYING OVER THE EARTH - AMERICA	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240925	16:30:00	17:00:00	BLUE WORLD	In a shark-filled adventure, Jonathan travels to the Bahamas to meet Neal Harvey, a world-renown shark handler who will attempt to teach Jonathan how to put Caribbean Reef sharks into a relaxed state known as tonic immobility! Then, Jonathan heads to NASA's Neutral Buoyancy Lab in Houston, Texas (USA), where astronauts train for space walking underwater, in a giant pool about half the size of a soccer field. Jonathan gets a rare and fascinating look into this high-tech diving as he ventures underwater with the astronauts.
20240925	17:00:00	17:30:00	JOURNEYS IN AFRICA - THE LAND OF THE ZULU	South Africa has many different tribal groups and ethnic people, but none have a more fascinating story than the Zulu. These were once the most feared warriors in all of Africa and they have fiercely held onto that culture. They're also dedicated conservationists and we see first-hand the wildlife sanctuaries they've created. This is a proud people with a unique history, and we get to share that with them.
20240925	17:30:00	18:00:00	JOURNEYS IN AFRICA - KILIMANJARO: THE ROOF OF AFRICA	Host Bill Ball begins the ascent of the highest mountain in Africa. Trouble almost immediately affects the team as the cameraman suffers from fatigue and altitude sickness. Just over halfway, the trip is in serious doubt as altitude, cold and wind force the team to evaluate their fitness to continue.
20240925	18:00:00	18:50:00	THE PAST HUNTERS - THACKRAY MEDICAL MUSEUM	Derek Acorah's The Past Hunters investigate Thackray Medical Museum, believed to one of Leeds most haunted buildings. Workers claim to have witnessed constant paranormal activity in the museum and one claim is that two Victorian ghosts are trapped inside of the location.
20240925	18:50:00	19:20:00	RACE OF LIFE - EP. 08	Predator versus prey: in this instalment we analyze three attack-escape scenarios involving bird predators and their prey. One is the climbing flight escape, another is horizontal speeding, and thirdly, there is turning and diving to avoid capture. Predator and prey attack-escape behaviour is another outcome of the evolutionary arms race. There is something about birds of prey that make us pay attention – maybe it is the inherent fear we all have that one will attack us – or perhaps it is just because they are seldom seen by most westerners. Regardless, birds of prey are fascinating and in this episode we examine some of the largest, mightiest and most spectacular raptors from around the world. We'll watch with fascination the Eagle, a large bird of prey that is a skilled hunter and highly efficient killer. These elegant predators do their best work in large open spaces, where they can fly high and see for miles and miles. Meanwhile, the fastest living animal on land, sea or sky is also a bird of prey. The peregrine falcon can be found from the arctic to the tropics, and for centuries has been a symbol of prestige. At the other end of the scale is a bird that
20240925	19:20:00	19:50:00	EUROPEAN ISLANDS EP - 09: KERKYRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240925	19:50:00	20:45:00	SCOTSTAR - EP. 3	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240925	20:45:00	21:35:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lightning. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.

20240925	21:35:00	22:05:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240925	22:05:00	23:00:00	HIDDEN TRACES	This was the « other » Second World War – the one in the Pacific, confronting the Japanese Imperial Army to the Americans. Although not as famous as the war that raged in Europe, this conflict was just as ferocious and central to our collective memory.
20240925	23:00:00	23:55:00	HIDDEN TRACES	Napoleon Bonaparte - Military genius and builder, he will then reign, without any intention to share his position, for over a decade and will engage, with his troupes, in many battles. His imperial army, which has reached 700 000 men, is considered in 1815, the greatest one in the world.
20240925	23:55:00	00:50:00	UNBREATHABLE CITIES ON THE VERGE OF ASPHYXIATION	With an epidemic of cancers among adults, and widespread asthma among children, China and India are on a constant health alert. Nor is the rest of the world free from harm as the pollutants are travelling.
20240926	00:50:00	01:45:00	KYUCHU: WHERE THE GREEN TEA GROWS	This report shows how the famous Japanese green tea is cultivated, explores its healing power and explains how deeply the tea has penetrated Japanese society. For the Japanese people, green tea is more than just an ordinary beverage. It is the key to the national culture - it combines enjoyment, philosophy and the art of living. In springtime, the entire country waits for the first flush, the very first harvest of the precious Sencha tea from the island of Kyushu, the world's biggest organic tea production region.
20240926	01:45:00	02:40:00	IDJWI - AFRICA'S FORGOTTEN ISLAND	The inhabitants of the island of Idjwi on Lake Kivu are poor but have one highly valuable asset in this region of Africa - peace. The island of Idjwi is saddled between Rwanda and the Democratic Republic of Congo, right in the middle of Lake Kivu. Although its inhabitants have been surrounded for years by war and suffering, they have always been spared the violence. So tens of thousands of refugees have flocked to safety and settled there. The only link to the mainland is via the Nyamizi, an old barge. Thanks to this shuttle service, the islanders can sell their harvests at markets on the mainland and establish contacts with the outside world. 360°-GEO boarded the boat that links the forgotten island to the African continent.
20240926	02:40:00	03:35:00	SOKOTRA, ENDANGERED TREASURE ISLAND	Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihini finds it hard to make ends meet with just his herd of goats. Sokotra, an island off the Horn of Africa, has been a Unesco world heritage site since 2008, but the strict rules that once enabled the Beduins to protect their biodiversity are now being relaxed. 360° GEO follows in the footsteps of a Yemeni goatherd on the island. Many rare species are being threatened by the increase in extensive grazing, which is even affecting the goatherds' very existence. 55-year old Abdullah Ablihini finds it hard to make ends meet with just his herd of goats.
20240926	03:35:00	04:35:00	SAVING AUSCHWITZ?	70 years after Auschwitz Museum was founded as the memorial site of the Shoah, this site is subject to diversions, confrontations and plundering. Several attempts to exploit and rewrite its history are at work. The danger of desensitization through mass tourism, or the attempts of the local town and its citizens to simply erase the nightmare to make place for new urban landscape are real threats affecting the future of this memorial site. Today, as the last survivors are passing on, what to do with the Auschwitz site?

20240926	04:35:00	05:00:00	TRAVEL THRU HISTORY - MIAMI	Bienvenido a Miami! We take a look at the history behind Florida's modern metropolis. We visit the Ancient Spanish Monastery, see the opulence of the Vizcaya Museum and Gardens, and head into the swamp to learn about the Miccosukee indians.
20240926	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - BURKINA FASO THE LABYRINTH CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240926	05:30:00	06:00:00	MINDWORKS - AUDITORY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240926	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 12	No country other than France operates an elite military force that invites foreign nationals to serve in its ranks. With a reputation for being a safe haven for individuals with questionable pasts, the French Foreign Legion is a true mercenary army that has garnered significant respect within the global special operations community. This episode of CQB examines a raid by the Foreign Legion on a small airport in Iraq during the 1990 Gulf War, exploring the nature of the Legion, how it differs from other special forces, and how it prepares for a wide variety of close quarter battle scenarios in conflict situations around the world.
20240926	06:30:00	07:15:00	PAST HUNTERS - S1 EP 06: DRAKELOW TUNNELS	The Drakelow Tunnels are a former underground military complex used mainly for storage. However, during the construction and running of this facility, 6 people are thought to have died. It is believed most of the hauntings that occur here are from the very people that died here.
20240926	07:15:00	08:00:00	RV EXPLORERS S1 EP 06 - FAR NORTH	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240926	08:00:00	08:25:00	TRAVEL THRU HISTORY - TORONTO	TTH heads to the great white North...kind of. We visit the world class city of Toronto. There we'll head straight up the Western Hemisphere's tallest structure, the CN Tower. Next we score a look at the Hockey Hall of Fame and see a North American castle at Casa Loma. Finally we see how the British defended their city against the newly formed United States at Fort York.
20240926	08:25:00	08:50:00	JOURNEYS IN INDIA - JAISALMER: INDIA'S HIDDEN GEM	Every major country has a destination that is incredible but not well known to outsiders—Jaisalmer is such a place. Once a major stop along the silk road, this living museum and surrounding countryside has something for everyone: tragic history, unbelievable architecture, unique cultural groups and resilient wildlife.

20240926	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - SWISS ARMY KNIFE, CUP OF JOE, HAMBURGER	If you ever go camping there is one thing you do not want to leave home without, the SWISS ARMY KNIFE! We'll explain how it evolved into the most famous knife in the world and how the company's name got "CUT" together! And where did the term CUP OF JOE come from as well as the word JAVA? And we all love a juicy HAMBURGER, so where did these chopped meat patties come from?
20240926	09:15:00	09:45:00	NEW FRONTIER - SHORE TO SHORE	Our seafaring nature has translated well to the space age, seeking to sail out into the unknown in search of riches of one kind or another. While Europe and Asia continue their interest in the resource rich Moon, The United States and NASA have set their sights on nothing less than manned missions to Mars. Can they manage to go shore to shore on the most dangerous of unknown seas, deep space.
20240926	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 09: KERKYRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240926	10:15:00	10:40:00	EVERYDAY ELEMENTS - SODIUM, OXYGEN, ARGON, ARSENIC, ZINC	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240926	10:40:00	11:10:00	EVERYDAY ELEMENTS - PLATINUM, IODINE, ALUMINUM, IRON, TUNGSTEN	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240926	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S2 EP 13	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240926	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S3 EP 1	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240926	12:00:00	12:25:00	TRAVEL QUEST EP. 08: NORTH POLE	Bill Ball breaks the rules and stereo types of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240926	12:25:00	12:55:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - GOA	On Christmas eve, Soumik arrives in the ex-Portuguese colony of Goa. A global party hub and Orthodox coastal state in one, Goa is a state in flux. An ambitious, young Fado singer, and a wise, old violinist, bring to life the struggle that many Goans feel between a colonial past and modern future, a laid back lifestyle challenged by tourist and consumer culture.

20240926	12:55:00	13:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - VARANASI	In the world's oldest city of Varanasi, Soumik explores a neighbourhood that has produced five generations of Indian classical masters. He meets widowed women singers who have committed their lives to the Hindu God, Shiva, and a young drummer with the talent to make it big. Dedication to fading classical arts is formidable in this timeless city of religion, tradition and rising commercial interests.

This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240926	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - LOUISIANA BAYOUS A LOST PARADISE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240926	14:30:00	15:00:00	WONDER - NATURE'S GAMES	Seg 1 Carrion flowers. Carrion flowers are the unorthodox perception of flowers for they are rare, big, and very unpleasant. Other terms are stink flowers and corpse flowers. The biggest flower in the world, rafflesia arnoldii, is a carrion flower. These flowers are difficult to find and reproduce and could breed through cross-pollination by attracting flies and dung beetles. Seg 2 Aposematism. Aposematism is a form of signalling that enables protection for both preys and predators by giving signs of poison and danger through showing off the bright colors and patterns on their epidermal layers that become associated with inedibility. Some species have developed mimicry based on aposematism in order to avail the protection aposematic colors give. Seg 3 Cuckoo Misdirection. Cuckoo misdirection demonstrates the mimicking abilities of a female cuckoo in order to find host nests to hatch her eggs. The female mimics a cry of a predator bird in order to frighten the hosts, leaving them vulnerable, thus the cuckoo can seize the chance to drop her egg on a host nest. Seg 4 Pheromones. Animal pheromones are the chemicals secreted and released by different species to communicate with other organisms. There are various types serving different purposes, ranging from reproduction, to trailing, to alarms. Some pheromones are also specific to one species of
20240926	15:00:00	15:30:00	JOURNEYS IN INDIA - SOUTH INDIA: LAND OF SUPERLATIVES	Two of the greatest ancient monuments in the world are in South India—Hampi and Konark. These two wonders of the world were lost to the west, but now are at the top of many bucket lists. Join Bill as he takes the veil off these two incredible achievements of man.
20240926	15:30:00	16:00:00	JOURNEYS IN INDIA - UDAIPUR AND JAIPUR: INDIA'S NATURAL BEAUTIES	Whether you refer to Udaipur as the City of Lakes or the City of Dawn, you are sure to agree that romance and beauty fill the air. While traveling by boat, we visit the many palaces and temples on the shore. We also tour the majestic City Palace and the Garden of the Maids of Honor. In Jaipur, we tour the Pink City, paying close attention to such architectural treasures as the Palace of Winds (Hawa Mahal) and the Amber Fort. We also visit the magnificent collections housed in the City Palace.

20240926	16:00:00	16:30:00	FLYING OVER THE EARTH - DOWNUNDER	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240926	16:30:00	17:00:00	BLUE WORLD	In this epic octopus adventure, Jonathan visits two aquaria to learn about the Giant Pacific octopus, and then travels to Seattle, Washington (USA) to join the Seattle Aquarium dive team on an octopus survey. He meets the Giant Pacific Octopus, the world's largest octopus, and discovers how clever this huge invertebrate really is!
20240926	17:00:00	17:30:00	JOURNEYS IN AFRICA - KILIMANJARO: THE ROOF OF AFRICA	Host Bill Ball begins the ascent of the highest mountain in Africa. Trouble almost immediately affects the team as the cameraman suffers from fatigue and altitude sickness. Just over halfway, the trip is in serious doubt as altitude, cold and wind force the team to evaluate their fitness to continue.
20240926	17:30:00	18:00:00	JOURNEYS IN AFRICA - SERENGETI: THE GREAT MIGRATION	One of the Seven Natural Wonders of the World—all other great wilderness areas are compared to this vast savannah. Wildlife numbers are awesome, but nothing like the numbers of the great migration. Journeys places you in the midst of this natural phenomenon where predator and prey are on a march for survival.
20240926	18:00:00	18:50:00	THE PAST HUNTERS - THE CHOCOLATE FACTORY	Derek Acorah's The Past Hunters travel to Hull to investigate ghostly goings on inside of a former chocolate factory. The investigation turns out to be no picnic, as the ghosts haunting make direct contact with the team.
20240926	18:50:00	19:20:00	RACE OF LIFE - EP. 09	Crocodiles , like all living reptiles, they are descended from animals that roamed the Earth about 250 million years ago. There's something so viscerally terrifying about these creatures that lay in wait for their prey, just under the waterline. The comparatively friendly seeming turtle is among the most ancient of the reptiles alive today and have a protective shell that encloses their body and provides protection and camouflage, just as it did millions of years back. They inhabit terrestrial, freshwater, and marine habitats and are found both in tropical and temperate regions. Poisonous or harmless, large or small, all snakes - from the desert rattlesnake to the dwarf pipe snake - have certain things in common: a long, thin shape; scaly, legless bodies; and unblinking, lidless eyes. Like all reptiles, snakes rely on the heat of the sun to control their body temperature. The venom of the king cobra, the world's largest poisonous snake, is strong enough to kill an elephant. Lizards have developed their own adaptations – some lose their tail when in danger, as a means of escaping from a predator. In time the tail will grow back again. The tail they leave behind will
20240926	19:20:00	19:55:00	EUROPEAN ISLANDS EP - 10: MENORCA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240926	19:55:00	20:45:00	SPEED KILLS I - EP. 02	Under the ocean, it's survival of the fittest... and fastest. Stonefish vacuum food in; Seals whiplash their victims to death and Mantis Shrimps unleash hammer blows with the acceleration of bullets. With over three billion years to get inventive, ocean creatures have exploded the design envelope wide open in their quest for speed!
20240926	20:45:00	21:35:00	SPEED KILLS I - EP. 03	The arrival of the great migration is a promise of gluttony... and speed is the ticket to the feast. Cheetahs and gazelle are caught in a 100 thousand-year-old arms race. Lions muscle their way into the action. And crocodiles unleash awesome bursts of prehistoric power. On the vast plains of the Serengeti, it's only the quick and the dead.
20240926	21:35:00	22:15:00	THE BOY FROM THE WILD	Growing up on a Game Reserve meant to help wildlife get out of captivity, it shares how it began & how Peter Meyer survived some incredible moments in the wild.

20240926	22:15:00	23:00:00	A YEAR IN THE WILD - EP.3	As a new year starts in the heart of Africa, the rainy season has come to the Okavango Delta in Botswana, and with it begins a season of plenty and the luxury of permanent and abundant water sources. In South Africa's Hluhluwe-Imfolozi Game Reserve, a group of rare samango monkeys take advantage of the abundant fruit born by a large Natal fig tree. In Thailand, a group of rhesus macaques have discovered a mango tree, and are busy feeding and stuffing their throat pouches with the fruit. Back in the Okavango Delta, the rains have also brought large buffalo herds back to the Xakanaxa area, the territory of a powerful pride of lions. Life and death are also a close-run thing for young gannet fledglings on their massive breeding colony of 50.000 birds on Malgas Island off the South African coast. As the young birds attempt to spread their wings and take to the air, some end up in the water. Many young animals have to run a gauntlet early on in life, and as a young loggerhead turtle hatches out of its egg and emerges from the sand on a beach in Mozambique, it faces a gruelling journey from its nest on the beach down to the sea. African penguins, too,
20240926	23:00:00	23:45:00	A YEAR IN THE WILD - EP.4	It is April, and large groups of blacktip and tiger sharks are gathering off the South African Coast. They are waiting for the onset of one of nature's most spectacular mass migrations: the annual sardine run. Like the cold ocean current that gives rise to the extraordinary numbers of African pilchards and their predators during the Sardine Run, the frigid Benguela current that runs northwards along the arid coastline of Namibia also supports a remarkable diversity of life. Monk parakeets are highly sociable, quirky South American parrots, but unlike all other parrots, they build complex nesting structures that can reach the size of a car, with individual compartments for each nesting pair. South American parakeets aren't the only birds turned architects: the social weaver birds of southern Africa also construct permanent nests on trees, large enough to house dozens of bird families, often stretching across several generations at a time. Like the weaverbirds, bats, too, tend to roost in large numbers. At this time of year, mothers and their young form part of the colony, with the young clinging closely to the front of their mothers until there are weaned at 6 months of age. In
20240926	23:45:00	00:40:00	CREATIVE KILLERS - EP. 03	Peppered across Africa are a few iconic locations that are renowned for killing action. Arenas bathed in a history of blood, places where Africa's icons have hunted successfully for generations. Predators here develop unique and clever ways to hunt. But the circumstances aren't the driving factor in this story. Sometimes these predators look for the perfect patch of ground to kill, a small area of long grass, or a single path that leads to the perfect ambush. How do they amplify their age-old skills by using the lie of the land? The fastest mammal on the planet, Cheetah's don't only use speed to kill. They use look out points to scan for weak prey and a baby fawn as lure to get its mother to come closer. Africa's heavy weight the Lion is twice the weight and half the speed of the Cheetah. They need cover to hunt down their prey, so they stake out ambush points in Gullies, Marshland and Forest, lying in wait for their prey the wildebeest. We follow three characters through the Ndutu rainy season, starting with the arrival of the annual wildebeest migration, through to the wildebeest calves growing up and continuing their journey to the north-west. The film looks at how our characters use the environment and features of the landscape to their advantage. Reflecting on how they have learnt this from previous generations and will pass onto the next.

20240927	00:40:00	01:35:00	MIND IN MOTION	Our exploration will lead us into the depths of the brain and to the very sources of consciousness, for a fascinating glimpse into the process of thought. How can we decide whether a person in a coma is likely to return to consciousness? How can a person see with the tongue? Why do amputees experience phantom sensations in missing limbs? What do we have in common with the fruit fly? What are the effects of meditation on the brain? Scientific answers to these questions and others are now within our reach, thanks to stunning new research in the neurosciences. It focuses on the brain, our mental mechanisms, the connection between body and mind. Why we need to represent ourselves and others consciously in order to survive? In our quest for answers, we have met some remarkable scientists - high-ranking pioneers who are innovative yet modest. They share their discoveries and questions with us while stressing that it is vitally importance for our society to try and understand why we have conscious brains. The story of their search, across North America and Europe, will be vividly told through evocative visuals and original imagery from new brain exploration technology.
20240927	01:35:00	02:30:00	JOHANA: MAKE UP AND MOTOR OIL	Colombia is the third largest exporter of coffee in the world. The main status symbol of its flourishing regions is the Willys Jeep. We met Johana, the only Willys female driver, who is entering this year's Willys contest. This is the jeep "that won the Second World War", the model that created the later legendary "Jeep". About 600,000 Willys Jeeps were manufactured by the US-Army during World War II. After 1945, many discarded Jeeps were delivered to Colombia, considered as "mula con motor", "donkeys with engines". Mostly men can be found behind the wheel. But Johana is an exception.
20240927	02:30:00	03:25:00	NEW ZEALAND'S RACE OF EXCESSES	A plunge into New Zealand's Ultramarathon preparations, a tradition that comes from a Maori legend. 55 year-old Lilac Fley is an athlete and many times winner of the extreme race. A Maori legend dictates the course of the Ultramarathon. It tells the story of a boy who once lived with his tribe on the New Zealand coast. One day his mother asked him to search for some kumaras, or sweet potatoes, for a meal. Instead of digging for them, he decided to steal some from the neighboring tribe. Till this day, runners follow in his footsteps along the coastline - during New Zealand's most famous marathon.
20240927	03:25:00	04:00:00	AVIATORS S8 EP 3	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a bread range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240927	04:00:00	04:35:00	AVIATORS S8 EP 2	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a bread range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240927	04:35:00	05:00:00	TRAVEL THRU HISTORY - BELIZE	Un-Belizable! We're off on a Central American Mayan excursion. We head up the steps of the ancient high temple at Lamanai. Then we take a city tour of the main tourist destination, Belize City. We learn about Belize's colonial roots at the Belize City History Museum and dive the amazing Blue Hole.

20240927	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - ICELAND THE WESTMAN ISLANDS AN UNPREDICTABLE LAND	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240927	05:30:00	06:00:00	MINDWORKS - EVERYDAY ILLUSIONS	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240927	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 13	Ten years ago, thousands of US and Coalition forces personnel, ranging from elite soldiers to reservists, found themselves in the middle of two conflicts that required an entirely different approach to warfare than they had previously experienced. From special forces units securing vital points of strategic interest and capturing key individuals in Afghanistan. This episode of CQB takes a close look at some of how special operations were integrated into regular units and how they fought through many close quarter combat situations with a combination of intelligence, high-tech weaponry and surveillance technologies to find and capture Saddam Hussein.
20240927	06:30:00	07:15:00	PAST HUNTERS - S1 EP 07: RAZOR RUOCK'S HOME	We visit the home of Soccer legend Neil "Razor" Ruddock which seems to be haunted. Is it his home specifically? Or are these ghosts attached to him?
20240927	07:15:00	08:00:00	RV EXPLORERS S1 EP 01 - KAIKOURA	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240927	08:00:00	08:25:00	TRAVEL THRU HISTORY - LOS ANGELES	Go for launch! We visit Space Shuttle Endeavor at the California Science Center. Then, we check out the glitch and glamour at the Hollywood Museum. We'll learn about the Holocaust at the Holocaust Museum and Japanese Internment during WWII at the Japanese/American National Museum. After that, we dig for bones at the famous La Brea Tar Pits.
20240927	08:25:00	08:50:00	JOURNEYS IN INDIA - GUJARAT: LAND OF EXTREMES	The people and wildlife of the western state of Gujarat have found ways to survive in an inhospitable environment. Unique big game exists side-by-side with some of the most talented and unique craftsman in the world. Bill gets the inside scoop on this strange land and is doubly surprised by his local guide.
20240927	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - ALMOND MILK, SCAPEGOAT, BUFFALO WINGS	Learn how ALMOND NUTS get transformed into "MILK." And why are movie TRAILERS shown at the beginning of the film? We'll keep your attention so you'll want to stick around for the answer. And learn how detergents make your clothes SEEM brighter and whiter.

20240927	09:15:00	09:45:00	NEW FRONTIER - MARS: ADAPT OR LEAVE	As the latest successes and failures come and go Mars continues to give up her secrets. Invisible clouds are revealed with ultraviolet light and the search for the source of methane continues with ExoMars. As we prepare to land humans on the red planet, getting there is one thing; staying long term is another, can we really conquer this planet?
20240927	09:45:00	10:20:00	EUROPEAN ISLANDS EP - 02: MADEIRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240927	10:20:00	10:45:00	EVERYDAY ELEMENTS - PLATINUM, IODINE, ALUMINUM, IRON, TUNGSTEN	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240927	10:45:00	11:10:00	EVERYDAY ELEMENTS - SILICON, FLUORINE, LITHIUM, BORON, CHROMIUM	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240927	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S3 EP 1	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240927	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S3 EP 2	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240927	12:00:00	12:25:00	THE TECH EFFECT - EP. 01	The Tech Effect is a portal to the future, a look at the forces and inventions that could shape us in the coming century. From e-sports to robotics, home automation to autonomous cars, this series examines the potential for cutting edge technology to improve our lives, while not ignoring the risks. The Tech Effect will appeal to anyone curious about exploring the technological advances that are changing our world. Sophisticated and edgy, each theme-based episode profiles the innovations transforming contemporary life. By identifying the world's most ingenious discoveries, we can unlock tomorrow, today. This episode investigates the jobs of the future, and why it might not be long before your co-worker is a robot. As industry changes, companies are identifying ways to re-train their workforce so they can be deployed in new roles. With space research becoming an important tool for innovation, we hear from a worker on the International Space Station about the types of experiments he conducts. Finally, we visit the factories of the future, discovering that, as a car has more lines of code than an F35 fighter jet, one of the most important jobs of the future in the automotive industry is software developer.
20240927	12:25:00	12:55:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - VARANASI	In the world's oldest city of Varanasi, Soumik explores a neighbourhood that has produced five generations of Indian classical masters. He meets widowed women singers who have committed their lives to the Hindu God, Shiva, and a young drummer with the talent to make it big. Dedication to fading classical arts is formidable in this timeless city of religion, tradition and rising commercial interests.

20240927	12:55:00	13:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - WEST BENGAL	Soumik arrives in the city of joy Kolkata in search of his musical roots and puts together his team. They head into the villages in search of travelling minstrels known as Bauls. Their journey leads them deeper into impoverished rural hinterlands where an old man sings under his broken down house. These musicians are driven by deep faith and extraordinary spiritual resilience. Their daughters sing and children learn deep lessons in simple words.
20240927	13:30:00	14:00:00	MINDWORKS - MUSCLE MEMORY	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240927	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - SPAIN GRANADA'S HIDDEN GARDENS	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240927	14:30:00	15:00:00	WONDER - PERCEPTION	Seg 1 Saccadic Eye Masking. Saccadic eye movements are characterized as the fast movement of eyes when perceiving motion. These are so fast that they are blurred. To compensate for the blurriness, our brains mask these blurred visions to help us see a completed albeit masked version of sight. Seg 2 Plant Movement. While plants do not exhibit movement for locomotion or moving from place to place, they still exhibit movement in response to different stimuli. These movements are plant adaptations for food production, plant reproduction and survival. Seg 3 The Language of Color. Language plays a major role in how people from different parts of the world perceive color. The fact that some languages completely lack terms for some colors that other languages have come to know offers insight on how much influence it has on the way people see colors. Seg 4 Color Blindness. Color blindness is the condition that makes people not able to properly see and perceive colors. Color blindness is the result of damaged or underdeveloped rods and cones. these are the light sensitive cells that can be found in the part of our eyes known as the retina which are responsible for seeing colors. Color blindness can either be
20240927	15:00:00	15:30:00	JOURNEYS IN INDIA - UDAIPUR AND JAIPUR: INDIA'S NATURAL BEAUTIES	Whether you refer to Udaipur as the City of Lakes or the City of Dawn, you are sure to agree that romance and beauty fill the air. While traveling by boat, we visit the many palaces and temples on the shore. We also tour the majestic City Palace and the Garden of the Maids of Honor. In Jaipur, we tour the Pink City, paying close attention to such architectural treasures as the Palace of Winds (Hawa Mahal) and the Amber Fort. We also visit the magnificent collections housed in the City Palace.
20240927	15:30:00	16:00:00	JOURNEYS IN INDIA - HYDERABAD: THE LAKE CITY	Join us as we discover the amazing history of this ancient city through its religion, royal lineage, architecture and art. In the markets, Bill shows you how to buy souvenirs like a pro. We visit the Golconda Fort where the ultimate in diamond souvenirs originated. And, of course, no visit to Hyderabad would be complete without taking a look at its high-tech and movie industries, which have revolutionized the city.

20240927	16:00:00	16:30:00	FLYING OVER THE EARTH - DE L'ASIE À L'EUROPE	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240927	16:30:00	17:00:00	BLUE WORLD	Jonathan joins shark researcher Dr. Stephen Kajiura to test how well wild sharks can detect electrical fields in their environment. Then, he heads to New Jersey (USA) to learn how to dive in the Mark V commercial diving helmet! Finally, he ends up in the Gulf of Mexico to learn how oil platforms can actually become a healthy artificial reef and attract marine life from miles around.
20240927	17:00:00	17:30:00	JOURNEYS IN AFRICA - SERENGETI: THE GREAT MIGRATION	One of the Seven Natural Wonders of the World—all other great wilderness areas are compared to this vast savannah. Wildlife numbers are awesome, but nothing like the numbers of the great migration. Journeys places you in the midst of this natural phenomenon where predator and prey are on a march for survival.
20240927	17:30:00	18:00:00	JOURNEYS IN AFRICA - ZANZIBAR: THE ORIGINAL SPICE ISLAND	The name alone conjures up mysterious and exotic images. The architecture and backstory to this once powerful independent kingdom, is both amazing and horrifying. Outside the city, Zanzibar earns its “Spice Island” nickname due to the huge plantations that grow everything to make your cooking flavorful. Journeys final stop is to visit the highly endangered Red Colobus monkeys. Learn why these human-like primates eat dirt for survival.
20240927	18:00:00	18:50:00	THE PAST HUNTERS - THE HAUNTED PARADE	Derek Acorah's The Past Hunters travel to Hoylake and investigate a building known as The Parade. Dating back to 1909, this once former school, still seems to have ghostly pupils and teachers taking class.
20240927	18:50:00	19:20:00	RACE OF LIFE - EP. 10	Some have powerful strides and flashing teeth, some employ poisons and trickery, so we know for sure that predators are well equipped for survival. But this episode reveals the unique ways in which animals protect themselves. Obviously, being able to flee a predator is the choice of many prey animals but there are also very interesting methods of defense which involve deception and chemistry. These include using toxic chemicals, camouflage, and mimicry. Insects that look like leaves, snakes that play dead, fish that fly, and toads with poisonous skin, these animals are among the many creatures that defend themselves in fascinating ways. Almost every animal is hunted as food by some other kind of animal and has developed ways to defend itself against predators. The relationship between predator and prey is a bit like an evolutionary arms race. As soon as one develops a weapon or defense mechanism, the other is working on an adaptation that allows them to circumvent that mechanism. Common defense mechanisms include claws, teeth, camouflage, poison, mimicry, and adaptations like echolocation. Some animals will spray toxic or foul smelling liquids at predators. Many animals have developed sophisticated defense mechanisms to help them
20240927	19:20:00	19:50:00	EUROPEAN ISLANDS EP - 04: LANZAROTE	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240927	19:50:00	20:40:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lightning. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240927	20:40:00	21:30:00	SPEED KILLS I - EP. 02	Under the ocean, it's survival of the fittest... and fastest. Stonefish vacuum food in; Seals whiplash their victims to death and Mantis Shrimps unleash hammer blows with the acceleration of bullets. With over three billion years to get inventive, ocean creatures have exploded the design envelope wide open in their quest for speed!

20240927	21:30:00	22:10:00	WHAT IN THE WORLD - EP 27	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.
20240927	22:10:00	22:35:00	NEW FRONTIER - THE PLANET MAKERS	From the beginnings of our Solar System four and half billion years ago there remains tantalizing clues to its evolution; remnant debris: asteroids and comets. They vary in size from grains of dust to mountain sides, footballs to planetoids. They were the building blocks of the planets and perhaps carry the origins of life itself. Now within our grasp these rocks of ice and dust are ready to give up their secrets.
20240927	22:35:00	23:00:00	NEW FRONTIER - THE ICE GIANTS	Beyond the asteroid belt lay the ice giants, some can be seen with the naked eye, others only glimpsed once by a passing probe. We are again sending cameras to the edge of the solar system giving us new insights into the evolution of our worlds.
20240927	23:00:00	23:25:00	NEW FRONTIER - THE MOONS OF OLYMPUS	These are the the Moon's of the gas giants. Each a unique and mysterious world of its own. Some have oceans of water, geysers of Sulphur or atmospheres of plastic. Some are just now being seen at the outer rim of our solar system, all are worthy of much more scrutiny.
20240927	23:25:00	23:50:00	NEW FRONTIER - THE SUN	It powers the machinery of nature; our weather, encourages and sustains life on land and at sea. When it sets in the West it reveals to us its many billions of sibling stars populating the night sky. We study our Sun closely, and like a Rosetta stone it can reveal the secrets of all the other stars above.
20240927	23:50:00	00:45:00	DEPLETED URANIUM	More than 50 countries now possess weapons based on depleted uranium (DU). Experimentation has been rife, and the consequences for civilians and the military alike have been dramatic. This investigation compares and contrasts the arguments of those who defend and attack a technology that is highly toxic. For 20 years, scientists, doctors, veterans and activists have denounced the use of DU. Against them are the arms industry lobbyists and nuclear authorities who continue to minimise the risks. Through archive documents, interviews and in situ investigations, accompanied by key witnesses (victims, experts...) we aim to present a clearer picture of the issues and stakes linked to the use of DU. Quick-paced, with a sense of urgency, the film underlines the essential background and conflicting viewpoints, enabling viewers to make up their own minds about a subject that concerns us all.
20240928	00:45:00	01:40:00	ARE THE SKIES TOO CROWDED?	International commercial aviation produces as much CO2 as Africa. The European Union plans to double the numbers of aircrafts by 2020. Can the earth handle a growing number of carbon dioxide-emitting planes in the upper atmospheric strata forever? The reduction of greenhouse gases is one of the main challenges of the 21st century and the aviation industry knows it will have to develop a "sustainable" aviation. Decline or regression is not an option. So, commercial aviation is looking for the answer in a field that has always served it well: scientific and technological innovation all over the world. Luckily, some interesting solutions are actively researched by those who are inventing the eco-friendly aviation of the next 50 years. The film aims to meet the players in an incredible transformation that will ultimately change everything about air travel.

20240928	01:40:00	02:35:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240928	02:35:00	03:30:00	GALLA WALLAH: THE SEARCH FOR THE BEST	The valleys of Nepal, around the Himalayan Mountains - the highest in the world - are the home of a special group of people called the Gurkhas. Because of the discipline and endurance they exhibit in their daily fight for survival, they are employed in the elite battalion of the British Army. For more than 200 years, the Gurkhas have served the crown. Every year, more than 25,000 people apply for a position as a Gurkhas, with only a few lucky ones chosen. For the chosen ones, it feels as though they have hit the jackpot. For the others, it is considered to be the worst defeat of their life.
20240928	03:30:00	04:05:00	AVIATORS S8 EP 6	The Aviators is a fast-paced, exciting TV series hosted and written by world re-nowned pilots. This unique series joins our aviation expert correspondents as they cover a broad range of topics designed to keep both pilots and aviation enthusiasts informed and entertained. The series covers everything from new aircraft designs to the latest GPS technologies, accident and safety awareness, airline profiles and remote fly-in getaways all over the world - The Aviators has it all!
20240928	04:05:00	05:00:00	CHINA UNCOVERED - THE COST OF BEAUTY RISING	Fashion designer Ji Cheng has shown her designs at London fashion week and, like beauty stylist A Zhi, is beginning to challenge the monopoly of Western brands in China. New levels of expendable income mean the wallets of the wealthy elite are helping fund this rising beauty scene and creating a market for luxury goods for shrewd businesswoman Felicity Feng. Expats from everywhere are trying to gain a foothold in this blossoming city, but can they handle its lightning speed?
20240928	05:00:00	06:00:00	CHINA UNCOVERED - A CITY TRANSFORMED	From the skyscrapers of Shanghai to the mountainous peaks of "The Last Shangri-La", explore the breathtaking landscape of this incredible country and connect with the people that infuse China's everyday life with flavor, passion and prosperity. Through the eyes of a cultural academic, a laborer, an architect, an urban planner, and a photographer, the grand evolution of a little fishing village is illustrated and documented to reveal one of the fastest growing megacities in the world. And while the physical landscape gracefully moves towards the future, beliefs, behaviors, and practices are put into test. The changes brought by the Thirty Year Miracle are indeed immense, and it has left no stone, no life, unturned.
20240928	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 01	"Special Operations" are special divisions of military, police or intelligence services that are highly qualified in specific areas of urban warfare and in a variety of special weapons and technology. Over the past forty years, all of the world's superpowers have built up these groups in order to better fight wars, to counter terrorism and to conduct high-stakes police actions. This episode examines the history of such organizations, from the Green Berets, WWII paratroopers and naval special warfare units through to the Seal Team 6, the British SAS, and private contractors, including Black Water and Brown and Root. Showing how these operators are trained, how they plan, and what weaponry and tactical gear they use, the introductory episode of CQB provides viewers with a fast-paced overview of the techniques, strategies and equipment that have been successfully used by Military Special Operations.
20240928	06:30:00	07:15:00	PAST HUNTERS - S1 EP 08: BLACKPOOL PLEASURE BEACH	Blackpool Pleasure Beach is one of the most visited attractions in the United Kingdom. People visit it not only for the fun, but to also hopefully catch a glimpse of the many ghosts that haunt there.

20240928	07:15:00	08:00:00	RV EXPLORERS S1 EP 02 - WHANGANUI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240928	08:00:00	08:25:00	TRAVEL THRU HISTORY - SAVANNAH	We visit the old south and enjoy some sweet tea in Savannah. On this episode, we'll stroll the city's beautiful squares, as well as visit it's civil war past at Old Fort Jackson. Then, we head up the stairs of the famous Tybee Island lighthouse and visit the Savannah Railroad museum.
20240928	08:25:00	08:50:00	JOURNEYS IN INDIA - CENTRAL INDIA: LAND OF PILGRIMAGES	Two of the most sacred places in India are featured in this fascinating episode. Bill first burst the myths surrounding the legendary Khajuraho and its intricately carved temples before heading to the Holy City of Varanasi. Varanasi, the Jerusalem or Mecca for Hindus with its deep connection to the Ganges River, is explored with an insider's perspective.
20240928	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - SWEET 'N LOW, RIDING SHOTGUN, POTATO CHIP	It's been sweetening America for almost 40 years! Now, find out the truth behind how SWEET N LOW actually got its name! And why do we yell SHOTGUN when getting into a car with friends? Then, is it really bad luck to open an umbrella in the house? And, learn the salty truth on how the POTATO CHIP was invented out of ANGER!
20240928	09:15:00	09:45:00	NEW FRONTIER - EMISSARIES	Our solar system is vast, from our own star the Sun to Earth is nearly 150 million kilometers or 1 Astronomical Unit. Jupiter is 5.2 AU distant and Pluto up to 48AU, the solar system extends far beyond this into interstellar space. We humans cannot yet travel that sort of distance, however we can and do send our robots and probes in our place; and the results are astounding.
20240928	09:45:00	10:10:00	THE TECH EFFECT - EP. 02	In this episode, we look at the ways robotic engineers are mimicking the natural world. BionicWheelBot and the BionicFlyingFox have been developed to navigate difficult terrain, like their biological counterparts. Robots like the canine-inspired models produced by Boston Dynamic are already being used in hazardous environments to reduce the need for humans to be exposed to risk. We'll also see how robots are covering new ground in space exploration, with smart autonomous vehicles destined for Mars, given greater capability than ever before. Finally, we visit some of the environments, such as offshore rigs and factories, where robots are being deployed in a range of jobs, including as exoskeletons for human workers, to reduce injuries and enhance endurance.
20240928	10:10:00	10:40:00	EVERYDAY ELEMENTS - SILICON, FLUORINE, LITHIUM, BORON, CHROMIUM	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240928	10:40:00	11:10:00	EVERYDAY ELEMENTS - HELIUM, TIN, CALCIUM, PALLADIUM, LEAD	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240928	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S3 EP 2	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!

20240928	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S3 EP 3	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240928	12:00:00	12:25:00	TRAVEL QUEST - EP 7	Bill Ball breaks the rules and stereotypes of travel shows as he ventures beyond the highlights. What do you do after you've lead groups to over 140 countries and all 7 continents? Welcome to Bill's bucket list on steroids... Travel Quest. This new, fast-paced series chases Bill around the globe as he seeks out anything but the mundane and ordinary—coming face-to-face with the largest crocodiles in the world, snorkeling with thousands of jellyfish, walking on the rim of an exploding volcano, feeding a group of sharks without a cage, bicycling across the Serengeti... this is not your typical travel show!
20240928	12:25:00	13:05:00	STOLEN TREASURES EP. 3	It's the biggest museum in the world...the museum of artworks stolen over the centuries and never rediscovered. These works haunt the nightmares of their owners, and occupy the days of hundreds of police officers across the world, as well as those of a handful of private agencies; no country or museum of importance can claim to have been spared. According to Interpol, art theft is the fourth largest criminal trade, after the drug trade, the weapons trade and money laundering. How could it be otherwise, when the soaring price of art propels the value of some paintings into the tens of millions of Euros? This world appears to be full of mysteries. Crime syndicates rub shoulders with petty criminals and the police care more about recovering the items than they do about arresting the perpetrators.
20240928	13:05:00	14:00:00	AUTISTS, A PLACE AMONG THE OTHERS?	Autism remains a mystery. People with autism will live with this disorder all their life and our societies are all facing the same question: how to take care of them? France lags behind on this subject. Comparing the experiences of other countries, Italy, Sweden, Germany, and Quebec, we will clarify the French situation and demonstrate that practices exist and allow to improve significantly the autistic's life. Every time it comes to real societal choices that reveal our various ways to approach difference. But there are in any case, no simple answers to this complex problem.
20240928	14:00:00	14:30:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - RAJASTHAN	In Ajmer, Soumik meets Qawwali group who invite him to play inside the spectacular Ajmer Sharif Darga. He crashes a wedding, jams with tribal drummers, escapes from the police and discovers a group of women singers who have never left their village but who would like to travel and sing in the cities.
20240928	14:30:00	15:00:00	TUNING 2 YOU: INDIA'S LOST MUSICIANS - KARNATAKA	In the tropical climes of verdant Karnataka, Soumik meets powerful dancers. They explain how India's archaic caste system has hurt their lives as performers. Yet here, atop mountains and forests, music and dance are one in the same - an enduring and ancient way of life.
20240928	15:00:00	15:30:00	JOURNEYS IN INDIA - HYDERABAD: THE LAKE CITY	Join us as we discover the amazing history of this ancient city through its religion, royal lineage, architecture and art. In the markets, Bill shows you how to buy souvenirs like a pro. We visit the Golconda Fort where the ultimate in diamond souvenirs originated. And, of course, no visit to Hyderabad would be complete without taking a look at its high-tech and movie industries, which have revolutionized the city.
20240928	15:30:00	16:00:00	JOURNEYS IN INDIA - RANTHAMBORE & KEOLADEO NATIONAL PARKS	Ranthambore National Park is part of Project Tiger, a unique wildlife conservation program set up to insure the preservation of the magnificent Tiger. In Ranthambore we encounter the tiger along with Sambar and Blue Bull, Wild Boar and Langur Monkey. We also explore the historic side of Ranthambore which is dotted with ruins of the fort that protected the region for hundreds of years. We end the episode with a tour of a very different national park. Board a rickshaw and join your guide as he explores Keoladeo National Park, known for its abundant bird life.

20240928	16:00:00	17:00:00	BRAZIL'S COASTLINES - THE EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240928	17:00:00	17:30:00	JOURNEYS IN AFRICA - SAFARI 101: TIPS FOR A SUCCESSFUL ADVENTURE	All the essentials for going on, and having a successful safari are covered before our host gets a very special challenge—to find at least half of the “Big Twelve” on one safari drive. Four hours and six (6) very special animals—can he do it using his own rules for a successful safari?
20240928	17:30:00	18:00:00	JOURNEYS IN AFRICA - NGORONGORO: BATTLE FOR THE CRATER	Nicknamed the Garden of Eden, this volcanic caldera is home to over 25,000 big game animals. Here survival isn't just a game—it's a matter of life and death. You'll witness one of the great acts of nature—buffalo, lion and hyena in a face-to-face struggle for dominance. Life in the crater can take surprising twists.
20240928	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 02	A student darter is selected to dart from the helicopter and soon a suitable giraffe is located. The dart location is perfect and the giraffe begins to slow down as the rest of the team jump into action. The giraffe becomes more of a challenge as it wrestles with the rope and breaks free. The drugs eventually take full effect and the giraffe is subdued. The team carry out all the checkups, take samples and reverse the drug in good time to see it run off in good health. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240928	18:25:00	19:20:00	PARIS BERLIN: SHAPES AND SHADES OF HISTORY - FACE TO FACE	Paris and Berlin have developed and grown facing each other over four centuries of tumultuous historical relationships and mutual admiration. The architecture and urbanism bear witness of this complex and rich confrontation.
20240928	19:20:00	19:45:00	BIG COAST - RIVERS INLET TO PORT HARDY	Trolling coho at Calvert Island and on a big Chinook Salmon quest Southbound around Cape Caution and Port Hardy!
20240928	19:45:00	20:10:00	BIG COAST - PORT HARDY CHINOOK	Trolling monster Chinook Salmon with Big Jim Henschke outside Port Hardy, BC!
20240928	20:10:00	21:00:00	SPEED KILLS I - EP. 03	The arrival of the great migration is a promise of gluttony... and speed is the ticket to the feast. Cheetahs and gazelle are caught in a 100 thousand-year-old arms race. Lions muscle their way into the action. And crocodiles unleash awesome bursts of prehistoric power. On the vast plains of the Serengeti, it's only the quick and the dead.
20240928	21:00:00	21:50:00	SPEED KILLS I - EP. 01	Jungle hunters are masters of disguise. But speed is their secret weapon. A chameleon shoots its ballistic tongue out with five times more g-force than a fighter jet. A Gaboon Viper strikes as fast as lightning. And Leopards take to the trees in a murderous ballet. The jungles explode in an orgy of speed, designed purely to kill.
20240928	21:50:00	22:10:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.

20240928	22:10:00	22:35:00	WILD AUSTRALIA WITH RAY MEARS - EP. 05	Ray takes the Great Ocean Road along the Antarctic facing coast of Australia – the longest South facing coastline in the world. He starts in Port Philp Bay the entrance to Melbourne Harbour where for the first time he sees a strange marine creature – the weedy sea dragon – a relative of the sea horse. He also swims with a unique species of dolphin – the Burrunan Dolphins. Crossing the Bay he heads off down the longest War Memorial in the world – the Great Ocean Road and meets 93 year old Doug Stirling who remembers the world war 1 veterans building the road. Ray visits the Penguin Colony on Middle Island where guard dogs protect the penguins from foxes and he watches the night time return of the penguins after a day spent at sea fishing. He takes to the seas and discovers the creatures of the deep waters – albatross, balls of krill and a pod of fast moving common dolphins.
20240928	22:35:00	23:00:00	WILD AUSTRALIA WITH RAY MEARS - EP. 06	In this episode, Ray explores the Red Centre of the country and shows that the Australian desert is filled with life for those who know where to find water. He arrives in the Red Centre by chopper as he flies over the Uluru monolith or Ayres Rock. For his first stop, he goes to a red kangaroo sanctuary where he cuddles a joey, meets their carer Brolga and gets close to the usually wary adult red kangaroos. He pursues his journey deeper in the desert to meet a local aboriginal Sammy Wilson. They go to a traditional waterhole and chat over a camp fire about Sammy's ancestral knowledge of the land. Ray spends the night out under the stars before driving more inland to rocky areas where water collects. There Ray comes face to face with a wild kangaroo and rock wallabies. He then follows tracks along a dry river bed that lead him to Australia's wild dog: a dingo.
20240928	23:00:00	23:55:00	AFRICA'S DEADLIEST EP. 01	Masters of stealth or speed, using enhanced senses and lethal strategies to hunt, Africa's killers include the incredibly fast cheetah and lions, which while slower, have raw power and ingenious teamwork on their side. The rivers, meanwhile, hold fearsome crocodiles.
20240928	23:55:00	00:50:00	SECRETS OF THE THRACIAN KING	In August 2004 in Bulgaria, archaeologist Georgi Kitov made a spectacular discovery in the valley of the Thracian Kings, a valley where about twenty temples and royal tombs are located. Kitov accessed a still-intact ancient tomb, which housed incredible wealth, dating back to the 4th century B.C., when Thracian culture was at its height. In front of the gigantic mausoleum, archaeologists found a magnificent, life-sized bronze head, one of the period's finest specimens ever found, and possessing an unsettlingly modern style. Who was this king and what does his tomb tell us about Thracian culture? Was he buried according to the Thracian custom of Orphic rites, and what do we know today about these secret rites that promised eternal life? Research into the deceased's identity revealed the tomb belonged to King Seuthes III. With the help of archaeologists and historians, who decipher the king's vestiges, the film pieces together the puzzle of Seuthes III's life. He was a modern king, who was open to Hellenisation, a warrior king, who was opposed to Macedonian authority, and a priest king, who was committed to preserving Thracian cultural rites.
20240929	00:50:00	01:45:00	WILL WE SOON BE EATING IN VITRO MEAT	Does cultured meat - which numerous scientists in various countries are working on - open up real perspectives for feeding a rising population and for fighting pollution? Or does it represent a false hope? Will the environmental arguments put forward in its favour be enough to convince consumers to eat cultured meat? Is the current commercial success of the first meat-substitute products available on the market heralding a change in what we eat? Would it not be preferable to turn towards insects, given that they are an already established source of protein and, what's more, are natural? This documentary, shot in the US, China, India, France, Holland and Laos, will change the way you see steak - forever!
20240929	01:45:00	02:40:00	ARCTIC: THE ROUTE OF THE NUCLEAR- POWERED ICEBREAKERS	This report accompanies a polar cargo ship through the Arctic Sea and provides a rare insight into the interior of the Russian nuclear-powered icebreaker float. Along the north coast of Russia, a land of climatic extremes, lies one of the most difficult to navigate straits in the world. The Northern Sea route is a 6,000 kilometer shipping lane through the Polar Sea.

20240929	02:40:00	03:35:00	CAMBODIA'S LAST BAMBOO TRAIN	This report climbs aboard the bamboo train, learns about its passengers and portrays life as it currently is in Cambodia. Without this bamboo train, people would not be able to go do their daily tasks such as going to work or to the doctor. Deep in the Cambodian Battambang region, a small bamboo train called "Norry" makes its way through rice fields and jungle passages. It is considered to be one of the most important lifelines into the poor region. But it looks like Norry's time is running out, because of the changes in Cambodia over the last years. More and more fields are being cleaned of land mines, new roads are being built, and many Cambodians are now able to afford a motorbike. The people fear that in a few years' time the bamboo train will stop operating.
20240929	03:35:00	04:05:00	LAGERFIELD - THE KAISER OF FASHION	A biography of the controversial fashion savant, creator of extraordinary fashion show sets, renowned photographer, and author of breathtaking books. Lagerfeld is the quintessential renaissance man.
20240929	04:05:00	05:05:00	CHINA UNCOVERED THE RHYTHM OF MODERN CHINA	Famous Chinese Erhu player Zhao Lei is leaving his stamp on classical Chinese music by experimenting with musical fusion between the East and West. On a sharper note in downtown Shanghai, Yuyintang Livehouse opens its doors to contemporary music lovers. The spiritual home of cutting edge beats in Shanghai, Yuyintang has started the careers of Visual Kei band Lilith and progressive metal rockers Mathlotus, but the modern music scene is still reeling from the Rock 'n' Roll ban of the Cultural Revolution. Join them as they strive to become the rock stars of tomorrow.
20240929	05:05:00	06:00:00	CHINA UNCOVERED - THE NEED FOR SPEED	China runs on two gears as it moves millions of people around every day. A young driver of one of the world's fastest trains and two seasoned pilots of one of the world's biggest airlines are seeing the effects modernization and globalization have on their journeys. Meanwhile, in downtown Shanghai a recreational revolution is taking place as the youth choose bikes and skateboards over four wheels.
20240929	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 02	As warfare has evolved, many military techniques and technologies have been adapted for use in urban settings by police units around the world. This episode provides viewers with an intimate perspective on what it feels like to be "inside the heads" of special police personnel, and how their use of military-style strategies and equipment allows them to save lives. From riot control in South Africa and the lessons learned from its excesses, to Los Angeles Police Chief Robert Gates' creation of an elite police S.W.A.T team, CQB will showcase how, over the past 30 years, the fight against urban crime has evolved into a military scenario, with both sides using increasingly complex weaponry and tactics.
20240929	06:30:00	07:15:00	PAST HUNTERS - S1 EP 09: WHITBY HALL	Built in the early 1800s, Whitby Hall used to be an administrative center and now stands as a public park and arts center. It has never before been investigated, but staff have reported many noises and presences among them.
20240929	07:15:00	08:00:00	RV EXPLORERS S1 EP 03 - WHANGAREI	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240929	08:00:00	08:25:00	TRAVEL THRU HISTORY - ST. AUGUSTINE	There's a lot to cover in the oldest city in America. Take a sip from the distinctively tasting Fountain of Youth. Then we'll cross the draw bridge of the undefeated Spanish Fort, the Castillo San Marcos. Then we'll learn the true history of pirates at the Pirate Museum.
20240929	08:25:00	08:50:00	JOURNEYS IN INDIA - MYSORE: THE REBEL KINGDOM	Journeys explores the history and fables that surround the controversial rebel leader Tipu Sultan. Mysore was the center of an Empire strong enough to challenge the British. Tipu's over-the-top personality is reflected in the architecture, gardens and stories that still permeate this metropolis.
20240929	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - GRAND CENTRAL TERMINAL, 120 VOLTS, NACHOS	It's one of the world's most famous train stations. GRAND CENTRAL TERMINAL. We'll take you on a trip to reveal its many fascinating secrets! And if they are cleaned without water, how do clothes get spotless when they are DRY CLEANED?

20240929	09:15:00	09:45:00	NEW FRONTIER - FIRST LIGHT	For an instrument first developed as recently as the 17th century, the telescope has travelled a long way. The latest version of the once-humble telescope will be going a lot farther – carrying us ever closer to the first light that ever bathed the Universe in which we live.
20240929	09:45:00	10:10:00	THE TECH EFFECT - EP. 03	In this episode we examine advances in aviation that include flying cars being developed by Slovakian and Japanese companies. Ride share companies are also considering aerial options, with Uber among those working on autonomous urban aircraft that will fly over congested roads to landing points in the centre of cities. As the skies of the future will be teeming with flying vehicles, suitable air traffic management is essential. We look at new systems to connect autonomous aircraft with each other and an overarching traffic control. Finally, we explore a concept airliner of the future. Sustainable and flexible, it incorporates holograms and neural networks to provide a more engaging and relaxing flight.
20240929	10:10:00	10:40:00	EVERYDAY ELEMENTS - HELIUM, TIN, CALCIUM, PALLADIUM, LEAD	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240929	10:40:00	11:10:00	EVERYDAY ELEMENTS - NITROGEN, MERCURY, COPPER, MAGNESIUM, COBALT	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.

20240929	13:05:00	14:00:00	WATER: H2O STORIES - SUSTAINABLE WATER MANAGEMENT	Water: H2O Stories is a 3x52 series revisiting the story of water on planet Earth and its disrupted course over time which has led to the 21st century biggest challenge.
20240929	14:00:00	14:30:00	QUIRKY SCIENCE - EP. 9	The Internet was invented during the cold war and launched in 1969. Yet it wasn't made for the public. In fact, it was developed for the army to communicate quickly and secretly so that no spies could intercept and no bombs could disrupt the sharing of information! It was nothing like we know today. The Internet involved computers exchanging text, on a black field with green letters, and e-mail was only invented 2 years later because the developers needed a reliable tool to communicate. So only in 1972 was this application; electronic mail, introduced. The Internet we know now was actually a second, separate invention, launched over a decade and a half after the Internet was first launched, and was called the 'World Wide Web'. Nobody was paying attention to Tim Berners-Lee and his pet idea, even though he had a radical new way for scientists to share data by linking documents to one another over the Internet! His proposal came back with the words "vague but exciting" written across the cover, so Berners-Lee took his invention to the people: with a website, bringing us the Internet we know today. Yet the Internet is only just out of its
20240929	14:30:00	15:00:00	QUIRKY SCIENCE - EP. 5	Plastic has become ubiquitous. Impressive, since we'd been living without them for centuries! We have grown dependent on plastics in many ways. The production industry uses it to connect the parts that make machinery: our trillions of toilet bowls need it, let alone wash machines, computers, toothbrushes, pens and traffic lights. Can you imagine that plastic was accidentally invented for the purpose of making billiard balls? Though, its inventor had used something now called guncotton, which led to a rather explosive game of pool. In the end, the first plastic was discovered when someone witnessed how Southeast Asian farmers used the poop of a little beetle, called shellac, to preserve wood. When looking for a substitute, Leo Beakeland created 'Bakelite' and that substance turned out to be the first plastic. Nylon followed, the first man-made synthetic plastic, developed by Dupont to replace silk. Nylon isn't that difficult to make yourself, amazingly. During WW2 all nylon production went into the manufacturing of parachutes, leading Dupont and others to stop producing pantyhose. It led to true nylon riots. Plastics were plain out popular. Indeed, the age of plastic had only just begun. But plastic is made with oil and is hard to break down, which calls for a
20240929	15:00:00	15:30:00	JOURNEYS IN INDIA - RANTHAMBORE & KEOLADEO NATIONAL PARKS	Ranthambore National Park is part of Project Tiger, a unique wildlife conservation program set up to insure the preservation of the magnificent Tiger. In Ranthambore we encounter the tiger along with Sambar and Blue Bull, Wild Boar and Langur Monkey. We also explore the historic side of Ranthambore which is dotted with ruins of the fort that protected the region for hundreds of years. We end the episode with a tour of a very different national park. Board a rickshaw and join your guide as he explores Keoladeo National Park, known for its abundant bird life.

20240929	15:30:00	16:00:00	JOURNEYS IN INDIA - KERALA	Join us as we cruise the backwaters of Kerala, one of the most beautiful and serene areas of India. We explore the cities of Cochin and Kozhikode. Attend a local theatre performance and learn about traditional drama styles. The drama continues as we witness a local festival and then take in a display of the ancient art of Kalaripayattu. Bill helps raise the Chinese fishing nets at dusk and tour a 1000 year old boat yard, where luxury vessels are still handcrafted.
20240929	16:00:00	17:00:00	BRAZIL'S COASTLINES- THE SOUTH-EAST	A series to celebrate Brazil and its diversity. We will explore the beauty and richness of the 8000 kilometer-long coasts, focusing on their natural and geographical aspects but also on its economic and cultural facets. An exciting journey blending the best aerial shots with stunning photography across the country to reveal both a cultural and human portrait.
20240929	17:00:00	17:30:00	JOURNEYS IN AFRICA - NGORONGORO: BATTLE FOR THE CRATER	Nicknamed the Garden of Eden, this volcanic caldera is home to over 25,000 big game animals. Here survival isn't just a game—it's a matter of life and death. You'll witness one of the great acts of nature—buffalo, lion and hyena in a face-to-face struggle for dominance. Life in the crater can take surprising twists.
20240929	17:30:00	18:00:00	JOURNEYS IN AFRICA - NAIROBI: THE ENCHANTED CITY	Nairobi is the capital of Kenya and one of the most fascinating cities in Africa. On our visit we'll see the colonial architecture of a bygone era and the ultra-modern side of town as well. We'll learn the truth behind the "Out of Africa" story and our host gets eye-to-eye with some endangered giraffes.
20240929	18:00:00	18:25:00	CAPTURE WILD SCHOOL - EP. 03	One of the students is selected and soon locate a huge bull elephant from the helicopter. The dart successfully finds it mark and the bull takes 20 minutes to lie down. The rest of the team rush in to do the necessary data entries and reverse the drug within 20 minutes. The vet lecturers give the debrief and conclude with all the positives and negatives.
20240929	18:25:00	19:20:00	PARIS BERLIN: SHAPES AND SHADES OF HISTORY - THE CLASH	Paris and Berlin have developed and grown facing each other over four centuries of tumultuous historical relationships and mutual admiration. The architecture and urbanism bear witness of this complex and rich confrontation.
20240929	19:20:00	19:45:00	BIG COAST - VANCOUVER CHINOOK CLASSIC	Catch-and-release Chinook Salmon derby from Vancouver promoting Pacific Salmon Foundation!
20240929	19:45:00	20:10:00	BIG COAST - BAMFIELD TUNA SHOOTOUT	Chasing down Albacore Tuna 65 miles off West Coast Vancouver Island.
20240929	20:10:00	21:05:00	SCOTSTAR - EP. 1	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240929	21:05:00	21:35:00	WHAT IN THE WORLD - EP 01	Presented by Peadar King, this series illustrates the human consequences of global economic inequalities and human rights violations, by focusing on how people encounter these issues on a daily basis. At the heart of Africa, the Congo for many people will always be associated with Joseph Conrad's early twentieth-century novel the Heart of Darkness, a title that has become a by-word for the country. And for Benjamin and David, two former child soldiers, and Funaha held as a sex slave by one of the many militias that continue to terrorise the country, that metaphor remains a daily reality. The film explores how this seemingly never-ending conflict impacts on the people of North Kivu.

20240929	21:35:00	22:05:00	WHAT IN THE WORLD - EP 02	For over 24 years, East Timor (now known as Timor Leste) endured a crushing occupation inflicted on them by neighbouring Indonesia on the pretext of the fight against communism. The war was brought to a controversial conclusion in 1999. However, trauma from that period lives on as evidenced by the testimonies of Nelson Belo, Gregorio Saldanha and Pascal Oliveira, survivors of the infamous 1991 Santa Cruz Massacre. This film recalls the trauma of Timor Leste in this the tenth anniversary of its independence.
20240929	22:05:00	23:00:00	OF BOATS AND MEN - EP. 01	Travelling by boat bears a priceless sense of Freedom and offers endless new vistas to all passengers. Across waterways around the world Boats are an essential tool of daily life whether they carry goods, serve as utilities or services in remote areas.
20240929	23:00:00	23:55:00	OF BOATS AND MEN - EP. 02	Travelling by boat bears a priceless sense of Freedom and offers endless new vistas to all passengers. Across waterways around the world Boats are an essential tool of daily life whether they carry goods, serve as utilities or services in remote areas.
20240929	23:55:00	00:50:00	THE MYSTERY OF DARK MATTER	Dark matter, which is unknown and undetectable in our physical models, would appear to populate the cosmos on a massive scale. For the first time, a film portrays the wild scientific quest that dark matter gives rise to. A real thriller. In our physical models, the weight of all observable matter (stars, galaxies, etc.) accounts for just 4% of the universe, whereas an invisible, unknown matter that no tool has ever been able to detect appears to populate the universe on a massive scale. Today, astrophysicists and cosmologists - researchers in the fields of the infinitely large and the infinitely small - are joining forces to solve a major mystery: what is this famous "dark matter" made up of? A breath-taking thriller that leads us to the dawn of a scientific and metaphysical revolution, akin to Copernic's or Galileo's. It could totally change the way we perceive our world. 2013 : Best film Award at the International Science Film Festival (Athens, Greece).
20240930	00:50:00	01:45:00	SURROUNDED BY WAVES	The international scientific community is called on to take sides and provide solid answers. "Surrounded by Waves" explores the methods and motivations behind the most prominent research in the field and clarifies what we currently know, all with a mind to the social context behind the issue. Through an elegant blend of interviews, archives, experiments and 3D animation, the film clearly assesses the estimated risk linked to cell phones while offering a subtle observation of society's growing distrust of its industries and the unprecedented role of science in the debate.
20240930	01:45:00	02:40:00	CATHEDRAL BUILDERS	The epic history, in 3D, of Strasbourg Cathedral and its outstanding builders. A fascinating docudrama, from start to finish. Strasbourg Cathedral, a gothic jewel and the highest monument in the West until the 19th century, was both an excessive dream and an architectural feat. How, in the Middle Ages, was such a wonder made possible? Behind its elegant, pink sandstone façade and its famous rose window, which is set ablaze at sunset, three centuries of visionary and inspired master-builders followed on from one another – Erwin de Steinbach, Ulrich d'Ensing and Jean Hültz – as did craftsmen with a savoir-faire that was envied all over Europe. They return here in fiction form. An epic blending mystery, doubt, revelations, intrigue and tragedies. Best 3 D Documentary Film Award - Festival Dimension 3 (Saint-Denis - France).
20240930	02:40:00	03:35:00	NEW YORK - THE WORLD'S SMALLEST OPERA HOUSE	"If you can make it there, you can make it anywhere". That's the vision people from all over the world have of New York. This report takes a look behind the scenes of the world's smallest opera house, in the heart of New York. Tony Amato, the son of an Italian butcher, thought when he came to New York in the 40s that he could make it too by realizing his dream of owning an opera house. The house is 3 stories high and three windows wide. The hall feels no bigger than a living room, however its 107 seats are always sold out. Tony Amato continues to be the center and linchpin of this miniature opera. Tony is barely 5 foot tall, with his sneakers and the small, wiry man seems to be held up by his pant-suspenders. His voice is persuasive, his eyes bright. He conducts, sings, jumps, laughs and grumbles all at once. At 88 years of age, Maestro Tony Amato is in the middle of the season's last production.

20240930	03:35:00	04:35:00	SAVING AUSCHWITZ?	70 years after Auschwitz Museum was founded as the memorial site of the Shoah, this site is subject to diversions, confrontations and plundering. Several attempts to exploit and rewrite its history are at work. The danger of desensitization through mass tourism, or the attempts of the local town and its citizens to simply erase the nightmare to make place for new urban landscape are real threats affecting the future of this memorial site. Today, as the last survivors are passing on, what to do with the Auschwitz site?
20240930	04:35:00	05:00:00	TRAVEL THRU HISTORY - LOUISVILLE	And we're off! We learn the history of the world famous Kentucky Derby. Then, call your shot as we learn about one of America's most famous brands, Louisville Slugger. Also, we zip line in the world's only underground zip line attraction and visit the Ali Center.
20240930	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - VIETNAM THE TUNNEL HOUSES OF HANOI	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240930	05:30:00	06:00:00	MINDWORKS - MEMORY	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240930	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 03	After the fall of the soviet union many countries remained in dispute in the early nineties despite eastern Europe's independence. In 1994 a bitter conflict broke out between the forces of the Chechnen independence movement and the Russian regular army. Despite overwhelming manpower, weaponry and air support, the Russian forces were unable to establish effective permanent control over the mountainous area due to many successful Chechen guerrilla raids. Improvised Explosive Devices were one of the most effective methods employed in these disastrous raids and were the back drop to many Close Quarter Battle scenarios exchanged between the two sides.
20240930	06:30:00	07:15:00	PAST HUNTERS - S1 EP 10: CARNFIELD HALL	Carnfield Hall is a country house dating from the 15th and 16th Centuries. This private residence turn event hall is using its paranormal activity to draw in business. Are these spirits the old residents?
20240930	07:15:00	08:00:00	RV EXPLORERS S1 EP 04 - COROMANDLE	RV Explorers, chasing 100 Sunsets. A TV show following a new motorhoming couple as they explore the towns and regions of NZ – experiencing various tourist attractions, events and joining in with other motorhomers to experience their favourite activities.
20240930	08:00:00	08:25:00	TRAVEL THRU HISTORY - ST. PETERSBURG	Up, up and away! We discover St. Petersburg Florida's aviation roots at the St.Pete History Museum. Then, comb your mustache, we visit the Dali Museum to look at Salvador Dali's amazing masterworks. We'll dredge the deep looking for sponges, and defend the bay at Fort Desoto.

20240930	08:25:00	08:50:00	JOURNEYS IN INDIA - NAGARHOLE AND BANDIPUR: THE SOUTHERN PARADISE OF INDIA	These two national parks have some of the most diverse wildlife found on the Indian subcontinent. From the ancestors of our domesticated livestock to leopards, bear and elephants—this is a photographer's paradise. Join Bill as he attempts to track down two of the hardest predators to photograph—the leopard and the sloth bear.
20240930	08:50:00	09:15:00	WOW, I NEVER KNEW THAT! - MONOPOLY, AREA CODES, TUXEDO	Take a trip to the Jersey Shore and learn how one of its famous boardwalks helped to inspire the iconic board game of MONOPOLY. And how did a donkey and an elephant become associated with politics? Plus, what's the difference between TOP GRAIN LEATHER and FULL GRAIN LEATHER?
20240930	09:15:00	09:45:00	NEW FRONTIER - STARS ABOVE	Stars are a bit like human beings. They can be warm or cold, they come in all kinds of shapes and sizes... and, let's face it, they can be dim or bright. And recent discoveries suggest that the number of stars in our galaxy alone, the Milky Way, may exceed 200 billion. Just what are these citizens of the night sky?
20240930	09:45:00	10:15:00	EUROPEAN ISLANDS EP - 01: FUERTEVENTURA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240930	10:15:00	10:40:00	EVERYDAY ELEMENTS - NITROGEN, MERCURY, COPPER, MAGNESIUM, COBALT	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240930	10:40:00	11:10:00	EVERYDAY ELEMENTS - CARBON, GOLD, NEON, ZIRCONIUM, ANTIMONY	A series that puts chemistry in our everyday experience by showing the living connection we have with the chemicals and elements that make up our world. The matter that built skies and seas, the atoms that make up you and me, the chemistry around us that forms the things we touch, smell and see. This series shows us what the objects in our universe and in our homes are made from and why the particles around us behave as they do. Everything around us is built from Everyday Elements.
20240930	11:10:00	11:35:00	OUTTA TOWN ADVENTURES - S3 EP 4	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240930	11:35:00	12:00:00	OUTTA TOWN ADVENTURES - S3 EP 5	Outta Town Adventures travels both near and far to discover the best adventures the destinations have to offer. This TV series is dedicated to presenting history, culture and geography in a fun and positive way. It encourages people to explore this beautiful world - something that starts with simply getting out of town!
20240930	12:00:00	12:25:00	THE TECH EFFECT - EP. 02	In this episode, we look at the ways robotic engineers are mimicking the natural world. BionicWheelBot and the BionicFlyingFox have been developed to navigate difficult terrain, like their biological counterparts. Robots like the canine-inspired models produced by Boston Dynamic are already being used in hazardous environments to reduce the need for humans to be exposed to risk. We'll also see how robots are covering new ground in space exploration, with smart autonomous vehicles destined for Mars, given greater capability than ever before. Finally, we visit some of the environments, such as offshore rigs and factories, where robots are being deployed in a range of jobs, including as exoskeletons for human workers, to reduce injuries and enhance endurance.

20240930	12:25:00	13:30:00	IN THE DARKNESS	An immersion in the heart of the biggest West-African prison: Abidjan. Located out of sight at the border of the Banco forest, this prison host 5,000 inmates but has capacity for 1,500. With the inmates' help, life inside is organized, and a degree of stability exists.
20240930	13:30:00	14:00:00	MINDWORKS - MOODS, INSPIRATION AND THE MIND	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20240930	14:00:00	14:30:00	SHOW ME WHERE YOU LIVE - CUBA, HAVANA, VETETABLE GARDEN CITY	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20240930	14:30:00	15:00:00	WONDER - NATURE'S GAMES	Seg 1 Carrion flowers. Carrion flowers are the unorthodox perception of flowers for they are rare, big, and very unpleasant. Other terms are stink flowers and corpse flowers. The biggest flower in the world, rafflesia arnoldii, is a carrion flower. These flowers are difficult to find and reproduce and could breed through cross-pollination by attracting flies and dung beetles. Seg 2 Aposematism. Aposematism is a form of signalling that enables protection for both preys and predators by giving signs of poison and danger through showing off the bright colors and patterns on their epidermal layers that become associated with inedibility. Some species have developed mimicry based on aposematism in order to avail the protection aposematic colors give. Seg 3 Cuckoo Misdirection. Cuckoo misdirection demonstrates the mimicking abilities of a female cuckoo in order to find host nests to hatch her eggs. The female mimics a cry of a predator bird in order to frighten the hosts, leaving them vulnerable, thus the cuckoo can seize the chance to drop her egg on a host nest. Seg 4 Pheromones. Animal pheromones are the chemicals secreted and released by different species to communicate with other organisms. There are various types serving different purposes, ranging from reproduction, to trailing, to alarms. Some pheromones are also specific to one species of
20240930	15:00:00	15:30:00	JOURNEYS IN INDIA - KERALA	Join us as we cruise the backwaters of Kerala, one of the most beautiful and serene areas of India. We explore the cities of Cochin and Kozhikode. Attend a local theatre performance and learn about traditional drama styles. The drama continues as we witness a local festival and then take in a display of the ancient art of Kalaripayattu. Bill helps raise the Chinese fishing nets at dusk and tour a 1000 year old boat yard, where luxury vessels are still handcrafted.
20240930	15:30:00	16:00:00	JOURNEYS IN INDIA - AMRITSAR, SHIMLA AND MANALI: THE FAR NORTH	The Golden Temple is the centerpiece of the city of Amritsar, and probably the second most photographed building in India, but few know about the building or the people who built it. The most significant building to people of the Sikh faith, it is open to people of all faiths. We witness the celebration of the changing of the guard before heading into the mountains for a visit to the British influenced town of Shimla. Journeys then heads further north for look at the resort area of Manali.

20240930	16:00:00	16:30:00	FLYING OVER THE EARTH - CAP AU NORD	A young French couple, Clémentine Bacri and Adrien Normier set off on a one year long journey around the planet on board a light aircraft dedicated to science and education. Their goal: offer aerial support to public research laboratories, an unique opportunity to discover scientific activities and use them to teach science at school. In research areas, the crew has implemented observation and modeling techniques that are key elements for research.
20240930	16:30:00	17:00:00	BLUE WORLD	In the series pilot, host Jonathan Bird travels to the Bahamas, where, in the past few years, diver interactions with Tiger sharks have become up close and personal. These large and dangerous animals are not only being hand-fed, but actually handled by divers. Jonathan learns how to flip a Tiger shark from experienced shark handlers. Next, Jonathan joins world-renown cave explorer Brian Kakuk to investigate the Crystal Cave of Abaco, Bahamas...considered the most highly-ornamented underwater cave in the world! The formations in this cave are simply stunning, and incredibly unique.
20240930	17:00:00	17:30:00	JOURNEYS IN AFRICA - NAIROBI: THE ENCHANTED CITY	Nairobi is the capital of Kenya and one of the most fascinating cities in Africa. On our visit we'll see the colonial architecture of a bygone era and the ultra-modern side of town as well. We'll learn the truth behind the "Out of Africa" story and our host gets eye-to-eye with some endangered giraffes.
20240930	17:30:00	18:00:00	JOURNEYS IN AFRICA - TARANGIRE: LAND OF THE ELEPHANT	This is definitely the land of the elephant. Large herds of pachyderms roam this marshy park putting on a show for whoever wants to watch. But that's not the only big boys of this park—buffalo, lion and a host of hooved game make this a wonder to behold.
20240930	18:00:00	18:45:00	THE PAST HUNTERS - KNUTSFORD CROWN COURT – PART 1	Derek Acorah's The Past Hunters travel to Knutsford and investigate a former Crown Court. Multiple people have been sentenced to death and life in prison, but will the team encounter any of its former inmates tonight?
20240930	18:45:00	19:15:00	RACE OF LIFE - EP. 12	The ocean can be an unforgiving place. Animals living in the sea have to deal constantly with finding food, and protecting themselves from predators. There are many ways of hiding, defending, and feeding, and every different technique has advantages for different animals. For example, some animals use camouflage to escape detection or to sneak up on their prey, while other animals have coloration which intentionally makes them stand out. Some creatures hide from predators, while others stay in groups, out in the open, relying on safety in numbers. Some animals have dangerous spines or venom for protection, but even the most venomous creatures must sometimes be wary of predators. Different animals have taken advantage of different food sources, some feeding at the top of the food chain, and others at the bottom. Protecting themselves underwater is also a matter of invention and reinvention, and aquatic animals deploy an array of strategies just to stay alive. They have quite the toolbox to dip into – Evolutionary strategies such as colour and camouflage, toxins and teeth! Nudibranchs, clown fish, squid, octopus and orca whales are just some of the wonderful winners in the underwater race of life. Underwater footage shot in the wild,
20240930	19:15:00	19:45:00	EUROPEAN ISLANDS EP - 09: KERKYRA	The European islands are renowned primarily for their hotel resorts. However, we will show you a completely different face of theirs: forests, beaches, coves, mountains, valleys and rivers. Perhaps you will find places that will take your breath away. Why just lie on the beach when there is so much to see? Put on some good hiking shoes, pull your shoelaces tight, and get to know the entire island like the back of your hand.
20240930	19:45:00	20:10:00	BIG COAST - PERCY WALKUS HATCHERY	Annual brood stock fishery from Percy Walkus Hatchery in Wuikinuxv, Rivers Inlet...conserving the largest Chinook on Earth!
20240930	20:10:00	21:05:00	SCOTSTAR - EP. 2	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.

20240930	21:05:00	22:00:00	SCOTSTAR - EP. 3	This series reveals the work of Scotstar - a brand new NHS Emergency Response Unit, dedicated to providing life-saving care to the sickest patients from across Scotland. Each episode provides a blow-by-blow account of remarkable teamwork when time is of the essence.
20240930	22:00:00	22:30:00	DESPERATE HOURS - EP. 07	In this sobering yet thrilling instalment of Desperate Hours our special focus on Geological Disasters. Now most natural disasters, including volcanoes and earthquakes are of course geological disasters. But, avalanches, landslides, blizzards and heatwaves. They don't – usually – causes fatalities in the tens of thousands. Do they? Don't be lulled into a false sense of security. While casualty counts might be lower, geological disturbances like landslides and heat waves can cause their fair share of misery. A heat wave for instance, can be one of nature's silent killers. India is justifiably renowned for its hot climate, but the heat wave that scorched India in the middle of this decade was something else. For two miserable weeks. In New Delhi, the 45 degree heat actually started melting roads. Ours is a dangerous world, where geological mishaps – avalanches, landslides, heat waves, sinkholes and blizzards, can spell disaster, almost as much as the big cataclysms such as earthquakes, volcanoes and tidal waves. It's enough to make you want to purchase that one way ticket to Mars.
20240930	22:30:00	23:00:00	DESPERATE HOURS - EP. 08	Our focus for this chilling but fascinating episode of Desperate Hours is on Nuclear and Industrial Disasters. Nuclear power depends on harnessing the energy released during one of two processes - nuclear fission, or nuclear fusion. In both Nuclear fusion and nuclear fission, energy is released from the high-powered atomic bonds between the particles within a nucleus. The two processes differ, in that Nuclear Fission means splitting an atom into two, or more, smaller atoms. While Nuclear Fusion, is the fusing of two, or more, smaller atoms into a larger one. Ironically nuclear power is a relatively clean source of energy, which is great. But of course, unless the utmost precautions are taken in generating nuclear power, then the consequences can go beyond merely disastrous, to the unthinkable, the horrific. Safety in the workplace and care for the environment are a human responsibility but when it comes to nuclear power it's not just industrial accidents that threaten tragic consequences. on an epic scale. A natural disaster such as a volcano or earthquake is something we have little-or-no control over and when such an event strikes a nuclear power
20240930	23:00:00	23:30:00	DESPERATE HOURS - EP. 09	This episode of Desperate Hours is all about disasters at sea. The long saga of death and misadventure at sea is as much a record of human folly as it is of nature's fury. When you start charting a course through the choppy seas of maritime disasters, the effect can be quite sobering. From the loss of the Titanic, a supposedly unsinkable luxury liner; to a routine ferry trip in South Korea that ended with the heart-breaking loss of so many young lives. Or how about the Exxon Valdez oil spill, which pumped millions of gallons of crude oil into Prince William Sound, Alaska, one of the last pristine environments on earth? Then there is the return of piracy to the high seas – not as a masquerade, but as a clear and present danger. That old saying "worse things happen at sea"? Well, it turns out, they really do.
20240930	23:30:00	00:05:00	DESPERATE HOURS - EP. 10	In this episode of Desperate Hours, we slip the surly bonds of earth to encounter disasters in the air. There have been accidents in the air ever since the time of the Wright brothers and all the improvements in aviation technology since then have lessened but by no means eliminated the dangers of flying. We hope, however, that you are not frantically cancelling your next flight after watching this episode. The chance of getting into or anywhere near a plane crash is actually very low and the air travel is considered one of the safest forms of transport. Many more people die in automobile accidents every year, admittedly with the difference that they don't usually die hundreds at a time. With that sobering thought, we say farewell, and fly safely

20241001	00:05:00	01:40:00	THE MYSTERY OF THE DISAPPEARING BEES	An investigation into a worldwide ecological disaster that could endanger the whole of humanity. The future of our food resources depends on one small insect - the western honey bee, or <i>Apis mellifera</i> . Indeed, it is the most important agricultural pollinator on our planet given that one third of our food supply depends directly on pollination from bees. This documentary tells the story of a worldwide ecological disaster that has been waiting to happen for several generations. It was filmed over an 18-month period in France, Germany, the U.S., Canada and Scotland and retraces the various leads carried out by research scientists in order to try and understand and to stop the declining numbers of domestic and wild bees. Scientists are not the only professionals to figure at the centre of this drama. Beekeepers are in the front line, and striking contrasts exist among beekeepers' experiences in different countries, in various economic situations. The documentary seeks to understand how the long-enjoyed harmonious relationship between man and bee has now undergone such a radical change. It seeks to find a solution that goes beyond science. A solution that cannot
20241001	01:40:00	02:35:00	ALEXANDER THE GREAT, THE MACEDONIAN	A close look at Alexander the Great - from Macedonia to India. Alexander the Great has always enjoyed a unique status in history. To the Greeks and Romans, he was a hero, to the Arabs, he was a prophet, to Westerners, he is a myth. Alexander the Great spread Greek civilisation single-handedly throughout the ancient world, as far as the borders of India, by relentlessly pursuing his sworn enemy Darius the Great, King of Persia. But what remains today of the "real" Alexander? Of his life and environment? Through the many depictions of the hero and the archaeological traces of his triumphant conquest, this film portrays the legendary figure, who has always been, and continues to be, a great source of inspiration, even for artists of today.
20241001	02:35:00	03:30:00	APPLE THE TYRANNY OF COOL	Apple, the brand that symbolises counter-culture, has become a giant that dictates cultural norms and trends. At the root of their success story lies the genius marketing ploy of making mainstream power look tacky by declaring themselves counter to it, thereby conquering consumers with their cool. The death of Steve Jobs, on October 5th, provided a dramatic illustration of the paradox of Apple, which is at the heart of this film. It is the first time in history that an entrepreneur has been applauded and mourned as a benefactor of mankind, and their commercial success lauded as a work of genius. This fascinating ability to combine a "rebel-brand" image with huge commercial profits will be the object of this documentary investigation, which examines both the universe of Mac and modern man and his ambiguities. Tracing the history of the brand, from the beginnings of the small computer company to today's multinational, the film shows how Apple has taken a giant bite out of the market, thanks to its aesthetic choices, emotional marketing and indisputable technological ingenuity.
20241001	03:30:00	04:15:00	THE BOY FROM THE WILD	Growing up on a Game Reserve meant to help wildlife get out of captivity, it shares how it began & how Peter Meyer survived some incredible moments in the wild.
20241001	04:15:00	04:35:00	MONGOLIA, STEPPES EMIRATE	Battered by strong winds, and seen as a grazing land, Mongolia is the kingdom of steppes. With important mineral resources such as copper or uranium, coal and rare soil, Mongolia future is secure: the economy shows a significant growth rate and it is a business paradise for some expatriates. But for most of the population, needs remain unfulfilled.
20241001	04:35:00	05:00:00	TRAVEL THRU HISTORY - NEW ORLEANS	The Saints come marching in as we tour the iconic St. Louis Cathedral and the mysterious Ursuline Convent in New Orleans. We delve into Mardi Gras history at Mardi Gras World and visit the National WWII Museum's world class collection.

20241001	05:00:00	05:30:00	SHOW ME WHERE YOU LIVE - IRAN KANDOVAN THE TROGLODYTE VILLAGE	Show me where you live is a documentary series that aims to answer the following question: How can human beings claim ownership to a space so that they can live safely within it, function as a society, and above all be in harmony with the environment around them? As we discover cultures and emblematic populations, we follow Philippe Simay who is at the heart of Inhabiting the World and represents its identity and originality. Philippe takes us on an epic adventure around the Human Habitat and sets the tone for the journey. As a humanist and philosopher, Philippe is a tireless surveyor of the city, and an explorer of living spaces. Determined to travel around the world, Philippe unveils how the populations that he encounters claim the space they occupy, shapes it and adjust to it. In this series of 20 films, of 26 minutes each, the habitat will be a major showcase revealing our capacity to adapt ourselves at a time where we need to find solutions in order to address immense changes.
20241001	05:30:00	06:00:00	MINDWORKS - MIND OVER MATTER	Understanding how we think and see by playing games with our brains. This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations. In each episode we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.
20241001	06:00:00	06:30:00	CLOSE QUARTER BATTLE - EP. 04	The history of the British Empire colonial legacy in Northern Ireland is well known the world over but a there is a largely untold story of the the fi refi ghts between and close quarter battles exchanged between the provisional IRA, the British army and the elite SAS. Although the IRA often employed „terrorist“ techniques within the city of london and on England's mainland not much is said of the often guerilla warfare techniques of the British Special Air Service in Northern Ireland since the beginning of this conflict. In this episode we will examine how the history of the Special Air Service aff ected the training of every elite force after it and how the close quarter battles in Northern Ireland in the late 1970s through to the millennium shaped both special forces and resistance methods.
